We think our 2025 catalogue is the best yet since 1888.

Some of our many NEW vegetables

Cabbage Spinel F1 | Carrot Oxheart | Pepper Sweet Hybrid Mixed F1 | Pumpkin Wicked F1 | Tomato Romello F1

Welcome to our 2025 catalogue. This year once again we have introduced many new varieties to our already extensive range of both vegetables, flowers and soft fruits. All chosen for their outstanding garden performance.

Our company policies are still the same and after 136 years we still offer the finest quality seeds at 'real value for money' backed up by a friendly service. Seed quality is the most important factor, we have a well equipped laboratory where our qualified technician tests all our seed for germination, vigour and purity.

Finally may I take this opportunity to thank you for your custom and look forward to the new growing season with you.

Tracy Palmer, Managing Director

Some of our many NEW flowers

Cosmos Fandango | Lobelia Regatta Mixed | Nasturtium Baby Yellow | Pansy Atlas Black F1 | Zinnia Saliando

Thank you for your comments

"I have found Kings Seeds of excellent value for money on wide range of interesting seed My order was received quickl and well packaged.."

"Good service and great seed can't fault anything."

"100% germination with nearly all of their seed packets this Spring. Very happy. Kings Seeds wi be my to go to this autumn.

EXPLANATION TO SYMBOLS IN THE KINGS SEEDS SECTION

A Annual A plant that completes its entire life cycle (growth, reproduction, death) in one season.

HA Hardy Annual Plants in this group do not need to be raised indoors, but can be sown directly into their flowering positions in the garden in spring.

HHA Half Hardy Annual Sown in early spring under glass or on a windowsill (see individual packet instructions). Most HHAs are frost-tender and must not be planted outdoors until all danger of frost has passed.

HP Hardy Perennial Living more than two years and usually flowering each year from the second season, unless indicated as first year flowering. Can tolerate frost.

HHP Half Hardy Perennial Living more than two years and usually flowering each year from the second season, unless indicated as first year flowering. Cannot tolerate frost, but maybe overwintered if given frost protection.

HB Biennial A plant that completes its entire life cycle in two years, growing in the first, reproducing (flowering) and then dying in the second.

G Greenhouse Plants generally grown as indoor plants or for summer outdoor container plants. Cannot tolerate frost, but may be overwintered if given frost protection.

F1 Hybrid The result of hand pollination between two parent plants resulting in a superior hybrid plant. Note If gardeners save seeds from hybrids they do not come true.

F2 Hybrid The immediate descendants from selfed or inter-pollinated F1 plants. Plants have improved vigour and uniformity compared to open pollinated varieties, but will not be as strong as F1 Hybrids.

Price if purchased separately £23.00
Special Price **92034 £16.10**

Order line: 01376 570000/572456

Artichoke

An attractive, thistle like plant, which can grace a flower border as well as a vegetable plot, growing to 1.5-2m tall. The flower buds are harvested before they flower. Sow into pots or trays in the greenhouse in February to March at 18°C, or outside from March to April in free draining soil once it has warmed up. Plant out 1m (39") apart the following spring, adding plenty of well-rotted manure to the planting site.

GREEN GLOBE

Good size dark green heads. Crowns benefit from protection over the winter.

S/C 40 10101 £2.15

PURPLE GLOBE - ROMANESCO

The flower buds have a purple/dark red tinge to them, slightly smaller buds and shorter than Green Globe but a fine flavour and hardier in winter.

S/C 40 10102 £2.15

Artichoke Tubers

JERUSALEM ORIGINALS

This very hardy vegetable is ready when there is very little around in the vegetable garden. Unusual with a sweet earthy taste - it makes one of the best vegetable gratins. Grown from tubers and not seed. Plant March to May. Delivery Date Mid March. Last orders please, 28th February 2025.

10 tubers 91023 £13.00

Asparagus Seed

One of those special vegetables that taste at their best when picked from your own plot and served within hours. Raising plants from seed to harvest takes 3 years but it is well worth the wait. Well drained soil is essential. Sow in a nursery bed in April, transplant to permanent site the following April in trenches 20cm deep, 30cm wide with 60cm between trenches. Cover the plants with 5cm of soil and gradually fill the trench as the plants grow. Cut back the foliage when yellow in autumn. Harvest spears in the third season. Stop harvesting spears in mid-June.

ARIANE F1

High quality spears with excellent flavour. Attractive tall slender green spears with tight buds. Limit first year harvest to ensure higher yield in second year *(Ideal replacement for Jersey Knight).*

S/C 10 10205 £3.50

CONNOVERS COLOSSAL

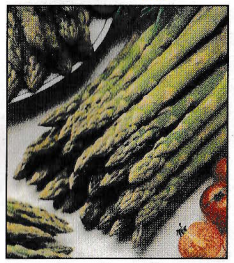

A variety that has stood the test of time, thick stalks of mid-green with a superb flavour. Beds will produce good crops for 15-20 years once established.

S/C 100 10201 £1.90

Asparagus Crowns

Once crowns are fully mature they should produce approx. 15-20 spears each. Delivery MID-APRIL. Last orders please, 28 February 2025. Beds should be prepared well in advance so the roots can be planted as soon as possible after receipt. Your first crop should be the following season.

GIJNLIM F1

These one year old plants are quick to establish. Produces medium thick mid-green spears with closed purple tips. Excellent flavour. Certified.

12 crowns 91010 £18.40
24 crowns 91020 £31.50

JACMAR PURPLE

Second to none for sweetness and tenderness. Try them cold in a healthy salad. Very low fibre content which means that almost the entire spear is free of the tough fibre normally found on the bottom of the green varieties. Certified.

12 crowns 91012 £18.40

Asparagus Pea see Peas pg 47

Aubergine (Eggplant)

Although usually grown in warmer climates, aubergines can be easily produced in Britain, either raised in a glasshouse or plastic tunnel, in grow bags, in a sheltered sunny spot in a garden or even on a patio in a tub if sheltered from cool winds. Sow seeds under glass at 20°C from January to April. Grow on and plant into growbags or large pots under glass or on the patio. Feed plants as soon as first fruits set, once a week with a high potash tomato food. Harvest from July onwards. Stake plants for extra support.

NEW TO KINGS

ANCONA F1

Compact well branched variety with small creamy white fruits, purple flowers and silvery grey foliage. Crops over a long period, ideal for growing in containers.

S/C10 10407 £2.25

CLARA F1

A pure white variety with white flesh. Oval shaped and slightly ribbed on an erect plant. Medium early maturity. Good taste.

S/C 10 10408 £2.95

GENIE F1

One of the finest aubergine we've seen in years! Ripens earlier than 'Black Beauty', with creamy-white, nearly seedless flesh. Big yields of huge rounded fruits 13cm long by 6cm wide, making them just the right size for your favourite ratatouille or simply slicing and tossing on the barbeque.

S/C 10 10411 £2.55

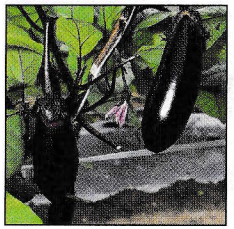

JACKPOT F1

Dark purple fruits. Exceptionally early. Ideal for growing on patios or in a cold greenhouse. Fruits can be harvested small as a true baby vegetable.

S/C 10 10409 £3.15

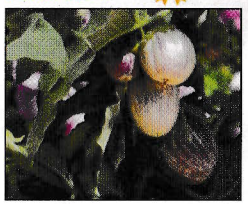

MONEYMAKER F1

Very productive and extra early. Glossy black, semi-long fruits with deep purple calyx.

S/C 50 10403 £3.40

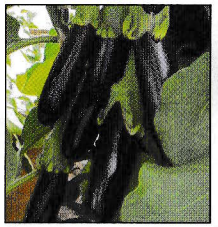

PINSTRIPE F1

Striking striped purple and white fruits with silver foliage. Spineless in most conditions. A very pretty plant.

S/C 10 10410 £2.65

LONG PURPLE

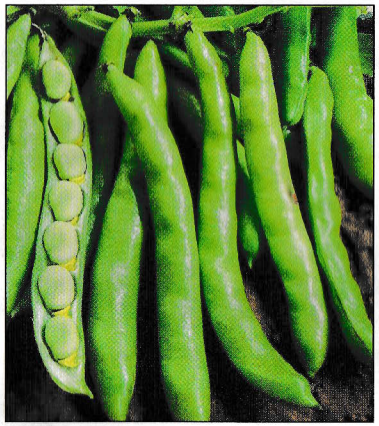

One of the most commonly grown varieties. Medium size fruits of elongated shape, deep violet colour and good flavour. Feed as you would tomatoes.

S/C 180 10401 £2.15

Broad Bean

There is nothing quite like the taste of a helping of tender young beans, perhaps with a creamy parsley sauce, picked an hour before on an early summer day. Autumn varieties can be sown direct into the plot from October to November. February sowings can be made into pots or root trainers in the greenhouse or under cloches in the growing site. Later sowings can be made in March or April direct into the growing site. Draw out seed drills 5cm (2") deep spacing the seeds 10-15cm (4-6") apart and spacing the rows 60cm (24") apart. Glasshouse raised plants should be transplanted to the growing site in March, 10cm (4") apart in rows 60cm (24") apart. Outdoor sowings should be thinned to 10cm (4") apart, the thinnings can be transplanted to make extra rows. When the first beans form, remove the top 6cm (21/2") to help discourage black fly. Harvest once pods become filled with succulent tasty young beans.

AQUADULCE CLAUDIA

Slightly longer pod and slightly more winter hardy than Aquadulce. In all other respects they are the same.

S/C 45 30103 £2.70

BUNYARDS EXHIBITION

Introduced over 100 years ago

Heavy cropping white seeded type with long pods of 8 or 9 beans. Good flavour and a good freezer.

S/C 50 30105 £2.70
1kg 30106 £5.95

CRIMSON FLOWERED

Tasty beans in short pods. Very attractive in both the vegetable plot and the flower garden. Heritage variety.

S/C 50 30126 £2.70

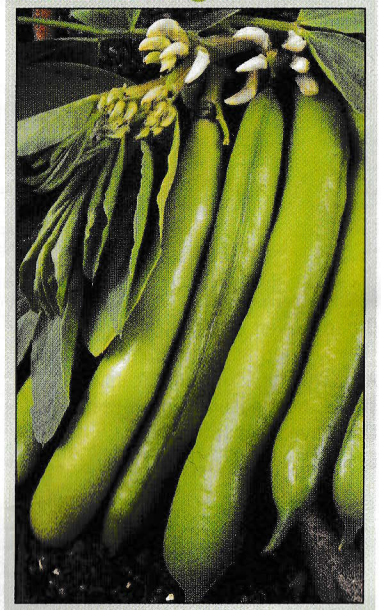

DE MONICA

The earliest maturing from a spring sowing, often ready to harvest at the same time as Aquadulce sown in the autumn. Dual purpose variety as it can also be autumn sown for an early harvest. Heavy cropper producing 15cm (6") pods with 5-6 large beans per pod.

S/C 50 30129 £2.70

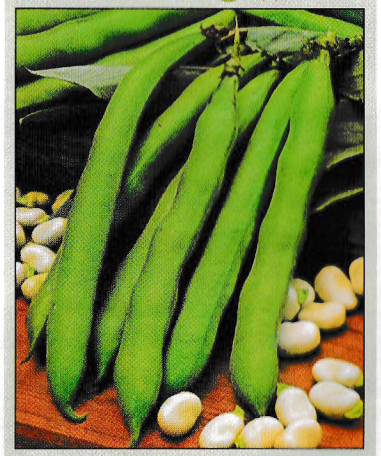

STAR BUY
DREADNOUGHT

Quick growing variety giving good size pods of white seeded beans. Good flavour and they freeze well.

S/C 50 30107 £2.15

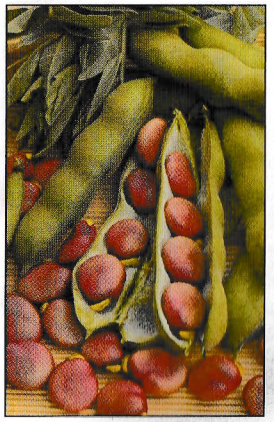

EXHIBITION
GIANT EXHIBITION

Our own specially re-selected stock, ideal for the show bench. Heavy crops of extra long pods of white seeded, excellent flavoured beans.

S/C 50 18152 £2.65

KARMAZYN

An unusual bean with carmine-pink seeds. Compact growing, producing a large crop of tasty colourful beans. Mid-early maturity.

S/C 45 30127 £2.45

Kings say... "broad beans are an excellent source of vitamins A, C and E and protein."

MASTERPIECE GREEN

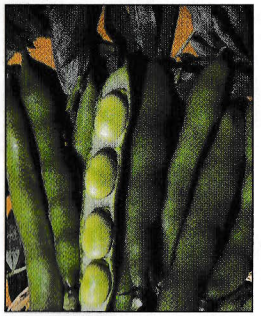

Our own favourite and freezes well

Long pods with bright green beans giving outstanding flavour. Gives an early and heavy crop.

S/C 50 30115 £2.65

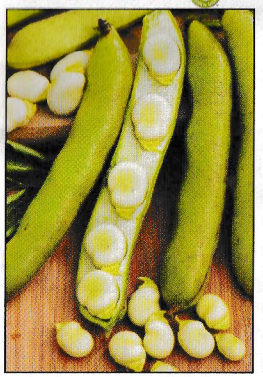

THE SUTTON (DWARF)

Bush variety but yields as well as most taller varieties. White seeded beans of good flavour. Can be autumn sown under cloches.

S/C 50 30117 £2.65

WITKIEM MANITA

If you are unable to sow Aquadulce in November, this is the rescue plan. In most years it matures almost as early as Aquadulce but from an early spring sowing.

S/C 50 30121 £2.65

Order line: 01376 570000/572456

Borecole

see Kale page 32

Broccoli

A very British vegtable. Sturdy plants which produce numerous spears for harvesting from February to April. Once the central head has been removed this will encourage further smaller spears to be produced from the plant which can be cut as required and lightly steamed or boiled. Sow seeds from April to May in a well prepared seed bed 1.5cm (1/2") deep. Alternatively sow the seeds into trays or modules under glass at 13°C. Transplant to their final planting positions 60cm (24") apart and 90cm (36") between the rows to grow on to maturity. Start harvesting the following spring when the spears have formed but before the flowers start to open.

BIENNIAL

BURBANK F1

A white hybrid, maturing mid-February to early April. Strong vigorous plants with a high yield of succulent white spears. (Ideal replacement for White Eye).

S/C 25 10715 £2.50

Kings say...

"Broccoli is a good source of vitamins A and C, and iron."

PURPLE SPROUTING CLARET F1

Large vigorous plants produce heavy yields of quality purple spears, late maturity in April and May. Replacement for Cardinal.

S/C 25 10716 £1.95

PURPLE SPROUTING TYRIAN F1

A new development in summer purple sprouting broccoli.

Unlike other purple sprouting varieties, Tyrian has both purple stems and heads of excellent flavour and texture. Tasty and nutrious eaten cooked or raw.

Sow early Feb to late May for cropping from late April to late October depending on sowing time.

S/C 20 10717 £2.65

NINE STAR PERENNIAL

A rare heritage variety re-introduced from Kings own crop. Very hardy, produces a largish, central cauliflower-like white head each spring. Surrounded by up to 15 smaller white multi-heads. Tastes slightly stronger in flavour than cauliflower, more like a cross between cauliflower and broccoli. Grows approximately 1 meter high and will last for up to 3 years before plants lose vigour.

S/C 25 10701 £2.65

RE-INTRODUCTION TO KINGS

PURPLE SPROUTING LATE CARDINAL

Ideal for extending the harvest season, producing a heavy crop of tasty large purple spears from late March to Mid-May the year after sowing.

S/C 80 10718 £2.10

STAR BUY

PURPLE SPROUTING EARLY

The most popular of the sprouting varieties produces an abundance of dark purple spears in March, which turn green on cooking. Very hardy.

S/C 750 10702 £1.75

RUDOLPH

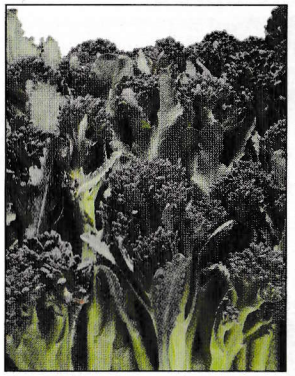

Large spears

Extra early purple sprouting type with large spears from late January.

S/C 100 10709 £2.30

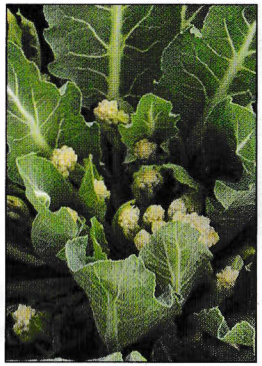

SUMMER PURPLE

A high yielding versatile variety for summer to early autumn cropping from late June to October depending on sowing date. Produces high quality, excellent flavoured coloured spears and shows good heat tolerance.

S/C 100 10710 £2.15

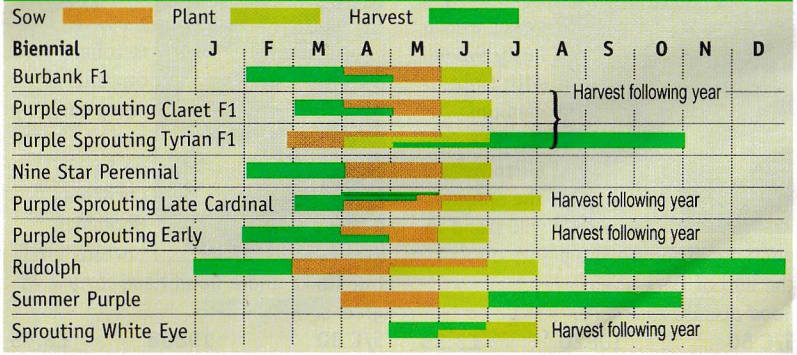

SPROUTING WHITE EYE

One of the earliest white sprouting to crop with superb quality and flavoured tender white spears early in the season. Cropping from February to March.

S/C 50 10714 £2.15

Broccoli Sowing and Harvesting Times

Brussels Sprout

What would Christmas Lunch be like without them? The old varieties have the best flavour but the modern hybrids have the ability to hold the small tight buttons for a long time on the stem. Older varieties will quickly open and lose their button-like tightness. Harvest from the bottom sprouts upwards. Sow the seeds from March to April in trays or modules under glass at 13°C. Later sowings can be made outdoors into a seed bed 2cm (3/4") deep. Transplant to final planting positions 60cm (24") between plants and 90cm (36") between the rows. Depending on variety harvesting can start from September onwards.

BRENDAN F1

Late season variety ready mid-December to January / February. Long holding ability and performs best on fertile soils, shows *good resistance to leaf diseases*. Good length stalks with a good number of medium sized dark buttons.

S/C 50 10829 £3.10

BRIGITTE F1

Deliciously sweet with a nutty flavour with tight, medium sized buttons. The sprouts will stand in good condition on the plants until the end of December. *Good disease tolerance.*

S/C 50 10820 £3.35

BRODIE F1

Outstanding flavour

Regularly comes top for flavour in recent taste panels. Good leaf and button disease resistance and holds well. Mild sweet, non-bitter, peppery taste. Sold for best flavour in supermarket.

S/C 50 10828 £3.10

CRISPUS F1

Club Root resistant

Early to mid-season production of dark green buttons which stand well on the plant for several weeks. Pick from September to November. The answer to many gardeners' prayers.

S/C 20 10822 £4.00

MARTE F1

Ready to harvest October onwards if sown early and will carry on to Christmas. Good size buttons on full stalks and a good head for use as greens.

S/C 30 10808 £3.65

MAXIMUS F1

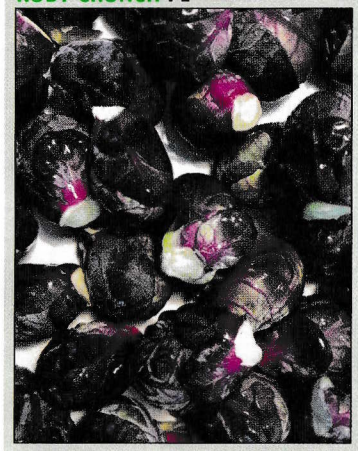

A high quality variety with a good flavour. This is an ideal replacement for Peer Gynt. Distinctive smooth buttons.

S/C 30 10819 £3.65

NEW TO KINGS

RUBY CRUNCH F1

A British bred red Brussels Sprout! Possibly the best red Sprout we have ever seen, as unlike others, Ruby Crunch produces good quality tight button sprouts, that stay red when cooked. Makes a delicious and colourful addition to the festive menu. Matures from November to January.

S/C 20 10831 £2.75

Organic Brussels Sprout are in our Suffolk Herbs section pages 145 & 146.

RE-INTRODUCTION TO KINGS

TRAFALGAR F1

The Christmas Sprout! A British bred medium height F1 hybrid producing heavy crops of very sweetly flavoured tight button sprouts that even children will love to eat. Matures December to March. Height 75cm.

S/C 50 10832 £2.95

FLOWER SPROUT PETIT POSI (KALETTES®)

Like a tiny cabbage with green frilly leaves, streaked with purple. Fantastic complex taste of a sprout with the mild, sweet nutty taste of kale. Winter hardy and full of vitamins A, B and E.

S/C 30 10827 £3.10

LONG ISLAND

An old Heirloom semi-dwarf variety approximately 60-70cm (24-28in) tall, producing stout stems of closely spaced sweet sprouts, for picking over a long harvest period from November to January. Ideal replacement for Darkmar 21.

S/C 500 10830 £1.85

RED BULL

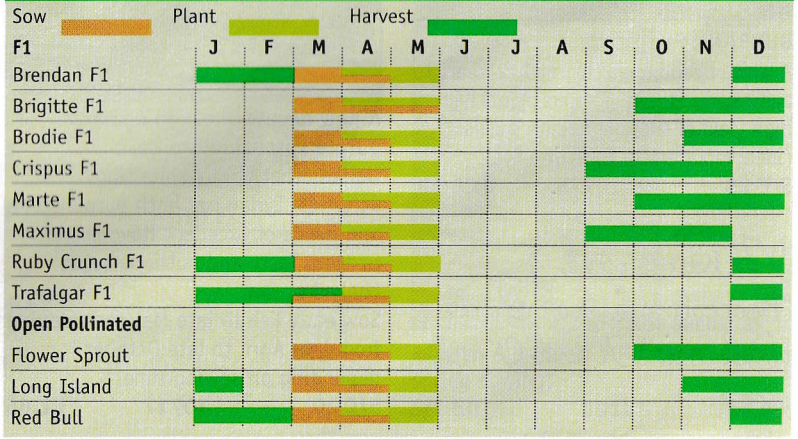

Excellent flavour

Novelty red brussels sprout that deepens in colour as the weather gets colder. Medium sized buttons.

S/C 100 10823 £2.15

"They are rich in A & B and contain more vitamin C than any other vegetable"

Brussels Sprout Sowing and Harvesting Times

Order line: 01376 570000/572456

Cabbage

Cabbage when cooked properly or used raw, is one of the most versatile of vegetables. With planning it is possible to grow different varieties to produce them all year round. The range listed below has been divided into sections according to harvest period.

SPRING HARVESTING

Sow seed in July or August in a prepared seed bed in shallow drills 2cm (3/4") deep. In September or October, once plants reach 10-15cm (4-6") tall, transplant to their final growing site spaced 35-40cm (14-16") apart. Keep well watered during hot dry spells.

POINTED TYPES

DUNCAN F1

Useful for both spring and summer production. Dark green upright leaves cover tight pointed hearts.

S/C 50 10921 £3.45

APRIL

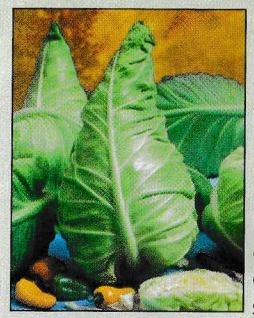

An early spring variety with compact heads on dwarf plants. Can be planted at 30cm (12") spacings as it makes few outer leaves.

S/C 500 10901 £2.15

STAR BUY

WHEELERS IMPERIAL

Dark green leafy heads, compact plants. Has the advantage of being suitable for spring sowing for autumn use.

S/C 450 10907 £1.95

WINTER GREEN

Improved selection for winter hardiness, ideal for January to March spring green production. *Good bolt, tipburn and frost tolerance.* Will eventually make a loose pointed heart.

S/C 200 10908 £2.45

COLLARD

HI CROP F1

A hybrid collard or spring green that never hearts up so could be used as a cut & come again cabbage, pulling the leaves from the centres as they are required or cutting as a whole looseleaf spring green. Good vigour, lovely flavour, cooked or raw and shows good disease tolerance. Can be used for spring or autumn greens.

S/C 50 10959 £2.60

SUMMER & AUTUMN HARVESTING

Sowings can be made from March to May in trays or modules under glass at 13°C. Alternatively later sowings can be made in a seed bed outdoors into shallow drills 2cm (3/4") deep. Once plants have 5 to 6 leaves transplant to their final planting positions spacing plants 45cm (18") apart between plants and 45-60cm (18-24") between the rows. Plant firmly and water well. Keep roots moist throughout the growing season.

POINTED TYPES

CARAFLEX F1

Improved Hispi variety, slightly larger pointed heads that stand a little longer. Just as versatile for sowing and harvesting. Very fast growing. Can be sown under glass in October.

S/C 50 10940 £2.65

DUTCHMAN F1

Very good bolting tolerance

Ideal replacement for Duchy F1 with an exceptional mild, sweet flavour.

S/C 50 10946 £3.20

REGENCY F1

Excellent flavour and can be grown throughout the summer. Holds well.

S/C 50 10944 £3.40

Organic Cabbage are in our Suffolk Herbs section page 146.

GREYHOUND

An early maturing variety with compact heads which are produced quickly. Few outer leaves and good solid hearts so can be grown at 30cm spacings. Suitable for sowing under glass in February.

S/C 500 10911 £1.80

Cabbage continued

BALLHEAD TYPES

ATTRACTION F1

Less susceptible to early winter frost, can withstand late planting on many soil types. Makes the tastiest coleslaw ever!

S/C 50 10947 £3.30

EXHIBITION BRIGADIER F1

Flat round 4-6kg heads, mid-late white cabbage. Very good flavour high in sugar and vitamin C. Ideal for growing a whopper for exhibition or heavy class.

S/C 40 10953 £3.10

CABBICE F1

Super sweet, an intense sweet flavour with crisp thick leaves giving you a crunchy texture. Perfect raw in salads.

S/C 50 10948 £3.30

FELICITY F1

An unusual Japanese flat cabbage, producing quality heads weighing 800g to 1.2kg. Excellent flavour and texture, ideal used for salads, coleslaw or use whole leaves as a wrap for sushi or as part of a healthy sandwich.

S/C 25 10954 £2.85

STONEHEAD F1

The heads are so solid you could stand on them. Lovely crisp texture to the creamy white hearts. Can be planted at 30cm spacings and stands well over a long picking period.

S/C 75 10925 £3.20

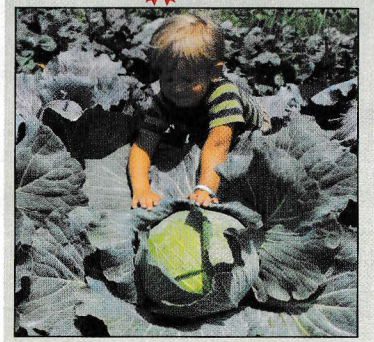

VIVALDI F1

Ideal if short of space, bred for producing small -baby size- heads of good flavour and mid pale green colour. Small 750g-1kg heads from 45cm (18in) spacings or if spaced at 30cm x 30cm (12inx12in) baby heads of 250-500g can be produced. Vigorous and reliable over a wide range of growing conditions, with good uniformity and holding ability. Can be sown from October to early May for successional harvests. ***IDEAL FOR MINI VEG.***

S/C 50 10957 £2.95

EXHIBITION BRUNSWICK

The big one! Produces really large solid heads of medium green. Stands well before splitting.

S/C 500 10915 £1.95

STAR BUY GOLDEN ACRE (PRIMO II)

One of the most popular for the home garden, solid ball-shaped heads ideal for eating raw in salads as a tasty coleslaw or cooked.

S/C 500 10920 £1.65

HOLLAND LATE WINTER

A real winter standby. Large heads with firm close textured creamy white hearts. Ideal for coleslaw, salads and cooking. Stores well in a frost free shed over winter.

S/C 450 10929 £2.30

RED TYPES

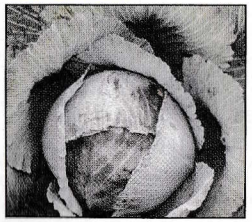

REDCAP F1

A delightful small red cabbage, bred for high density planting to produce small to baby size heads. Small 750-800g heads from 45cm (18in) spacings or if spaced at 30cm x 30cm (12inx12in) baby heads of 250-500g can be produced. Ideal if short of space, delicious cooked or raw in salads. Ideal for September to November harvesting. ***IDEAL FOR MINI VEG.***

S/C 30 10956 £2.45

RED LODERO F1

1st club root resistant red cabbage

First club root resistant red cabbage, produces good size heads that stand well. Very tasty when eaten raw, cooked or pickled!

S/C 25 10951 £3.45

KALIBOS

A sweet flavoured pointed red cabbage, perfect raw in salads. Harvest August-October from a March-May sowing.

S/C 150 10943 £2.15

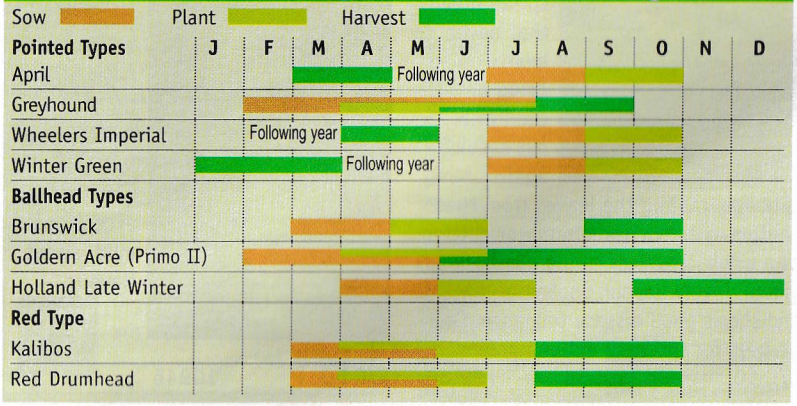

RED DRUMHEAD

Solid round heads with crisp hearts of purple/red colour. Ideal for pickling and cooking.

S/C 500 10934 £1.95

Open Pollinated Cabbage Sowing and Harvesting Times

WINTER HARVESTING

Sow seed from late April to June into trays or modules under glass at 13°C, alternatively later sowings can be made into a seed bed outdoors in shallow drills 2cm (3/4") deep. Once plants have 5 to 6 leaves transplant to their final planting positions spacing plants 45cm (18") apart between plants and 60cm (24") between the rows. Plant firmly and water regularly whilst plants establish.

Order line: 01376 570000/572456

WINTER HARVESTING TYPES

DEADON F1

January King type, sweet flavoured. Can be sown early May for Aug.-Sept. cropping and July for late Nov.-Jan. cropping.

S/C 50 10941 £3.30

JANUARY KING MARABEL F1

Following the unfortunate departure of old favourite January King, here is the next best thing Cabbage Marabel a high yielding and very long standing Hybrid January King selection. Looks and tastes just as good as the original January King with the added benefit of hybrid vigour providing outstanding garden performance.

S/C 50 10955 £2.15

KILISTOR F1

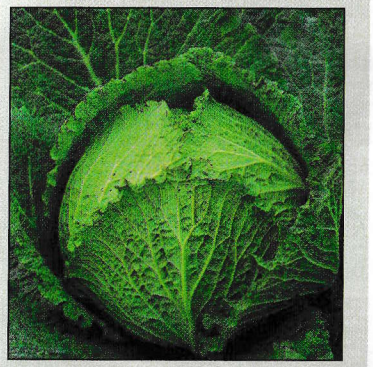

Club root resistant and stores well A high yielding variety, producing excellent quality ball shaped heads 2.5kg-4kg with a good resistance to clubroot and white blister. Stores well and is the **Ideal replacement for Kilaton.**

S/C 30 10958 £4.35

RE-INTRODUCTION TO KINGS

TUNDRA F1

Possibly the most frost-hardy cabbage available! Matures quickly, has a sweet flavour and holds well, staying in good condition without splitting for many months.

S/C 125 10933 £3.20

Cabbage, Savoy

The hardiest of all the cabbage family. Familiar for their crinkled and blistered leaves. They will withstand the hardest of our winters to give welcome green stuff when fresh produce is short in supply. Sow using the same techniques as Winter Harvesting Cabbages on this page. Harvesting begins from September depending on the variety.

CORDESA F1

Club root resistant The latest development in club root resistant brassicas. A compact, heavy dark green savoy of excellent quality and flavour.

S/C 25 14110 £3.95

RESOLUTION F1

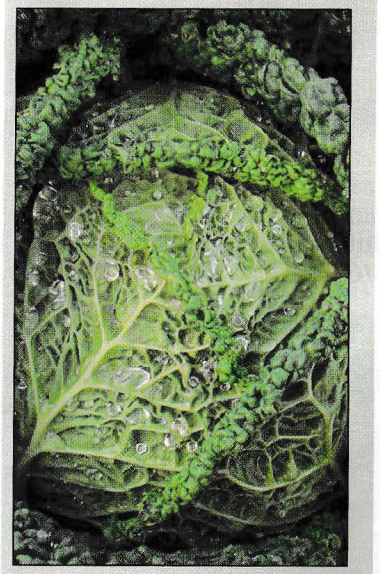

Mid-green and attractive with solid round heads. Maturing mid-season.

S/C 75 14108 £2.65

NEW TO KINGS

SPINEL F1

A vigorous late heading Savoy, producing high quality small to medium sized heads, ready to harvest from December to March. Keeps a good dark green colour throughout the winter, holding well, very hardy with excellent frost tolerance.

S/C 50 14111 £2.50

WINTESSA F1

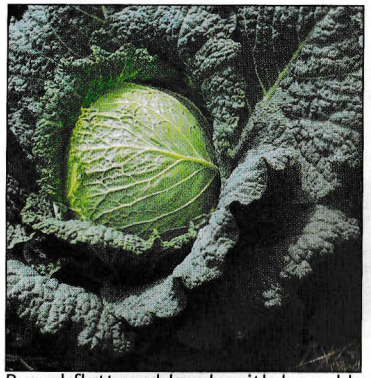

Stands well once mature

Very late maturing variety. Heavy heads with fine blistering, medium green. Harvest from February to April.

S/C 50 14106 £2.55

BEST OF ALL

Round flattened heads with large blue green leaves. Solid hearts of good texture and flavour.
Harvest September to November.

S/C 500 14101 £1.95

VERTUS

Flat round heads of greyish-green leaves, very hardy. Late to mature, stands well without splitting.

S/C 400 14107 £2.30

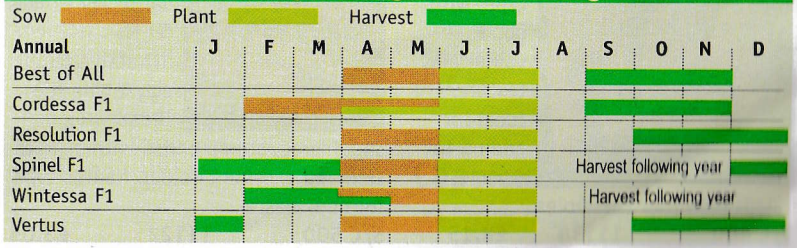

CABBAGE COLLARS

Protect your brassicas from cabbage rootfly. At the same time, keep your soil warm, moist and weed free. 30 discs. See page 133.

1 pack 45170 £4.45
Buy 2 packs 45172 £7.95

Cabbage, Savoy Sowing and Harvesting Times

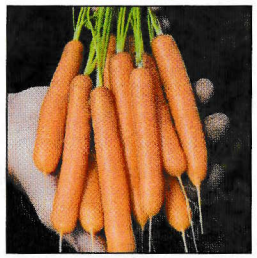

Calabrese see page 16

Carrot

One of the least demanding of crops and probably the widest grown vegetable in British gardens. If it has a drawback, it must be the possibility of attack by carrot fly which is attracted by the scent given off when thinning the crop, the most obvious way to hope to avoid the problem is to sow carefully and thinly so that thinning is not necessary. If you have to thin the seedlings, do so in the evening and after a good watering. Some old hands believe that planting onions next to carrots helps as the onion scent puts off the predator. Sow in shallow drills 2cm (3/4") deep with 30cm (12") between rows. Aim for the roots to be 5-7cm (2-3") apart. Depending on the variety, sowing can start under cloches as early as Feb for a first picking in June.

ADELAIDE F1

Small finger carrot, for forcing like Amsterdam Forcing, but with superior quality.

S/C 500 11143 £2.15

ATTILLO F1

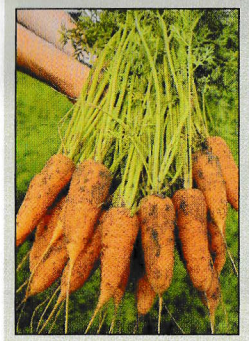

Sweet succulent Nantes type, with good colour and texture. Ideal for adding to summer salads or winter casseroles.

S/C 400 11138 £2.15

NEW TO KINGS

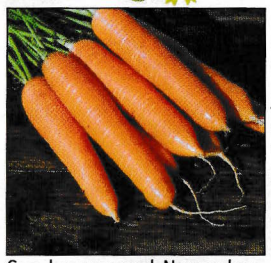

COVENTRY F1

A new and improved Chantenay Hybrid! Very uniform, smooth, attractive, rich coloured roots with good standing ability and healthy upright foliage. Similar in shape to Carrot Favourite from yester-year but vastly improved and sure to win at village shows in the future.

S/C 500 11149 £2.50

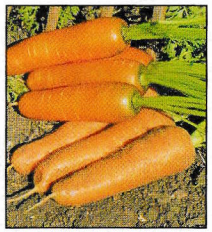

ESKIMO F1

High tolerance to frost and disease. Will stand well in frosty conditions. Can be cropped November- January. Good strong stems for easy harvest.

S/C 400 11133 £2.15

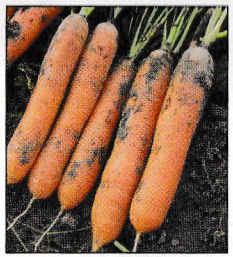

FLYAWAY F1

First variety to show good tolerance to Carrot Fly as it is far less attractive to the egg laying flies. Broad shouldered, stump ended with smooth skin and excellent colour. Nantes type for mid-season.

S/C 500 11122 £3.05

MARION F1

Nantes type, grows all year and stays in good condition in the ground for several months. Will over-winter in some areas, providing tasty carrots for several months of the year. Cylindrical with a blunt tip 15-17cm long. Rich orange with no green shoulders, outstanding flavour

S/C 500 11142 £2.45

NAIROBI F1

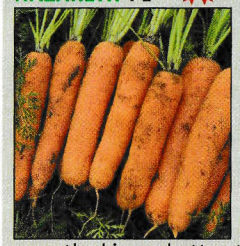

An early Nantes type bred for vigour and speed. Good colour and flavour with smooth cylindrical roots with little core. Early and main crop.

S/C 500 11121 £2.75

EXHIBITION

NAZARETH F1

Mid Season maturity with outstanding, healthy vigorous foliage. The uniform smooth skin and attractive appearance make this a possible contender for prizes on the Showbench. The rich orange roots are well buried in the soil, preventing green shoulders and gives roots good frost tolerance.

S/C 500 11146 £2.40

PURPLE SUN F1

Striking purple skin and flesh, colour does fade during cooking. Adds fun and colour to hot or cold dishes. Very sweet when eaten raw. Nantes type.

S/C 300 11139 £2.65

ROMANCE F1

Smooth rich orange finger carrots with the sweetest of flavours. Nantes type with uniform roots. Very early to harvest ready in as little as 80 days from early sowings.

S/C 500 11140 £2.80

RUBYPRINCE F1

Crisp, good tasting red carrots; red on the outside and the same inside, full of lycopene. Delicious and attractive added raw to salads. Best sown late spring/early summer and harvested for main crop carrots.

S/C 300 11145 £2.80

SUGARSNAX 54 F1

Sweetest of all and early maturing Sweet cylindrical type with semi-blunt tips. *Good disease tolerance.* Suitable for baby carrot production.

S/C 500 11127 £2.65

EXHIBITION

SWEET CANDLE F1

Exceptional taste, high yielding, uniform cylindrical shaped roots. The exhibitors' favourite winning many prizes.

S/C 300 11134 £3.00

AMSTERDAM FORCING 3

Very sweet flavour, good colour and small core. First choice for early sowing under cloches. Small cylindrical roots that freeze well.

S/C 1,000 11101 £1.95

Order line: 01376 570000/572456

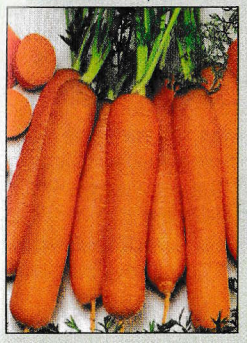

AUTUMN KING 2

A firm favourite main crop and storing variety. Heavy yields, long thick roots, good colour and flavour. Can be pulled as required during the winter.

S/C 2,000 11103 £1.95
Large Grower Pack
S/C 10,000 11104 £5.10

STAR BUY
BERLICUM

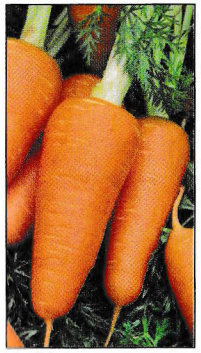

Main crop type having cylindrical stump roots. Excellent colour and texture. Roots regularly reach 20cm length in good soil.

S/C 1,000 11120 £1.65

CHANTENAY RED CORED 3

Often chosen for exhibition

Stump rooted, excellent colour and texture with smooth skin and small core. Tastes good too!

S/C 2,000 11105 £1.85

STAR BUY
CHANTENAY ROYAL

Fine selected variety with all the attributes of Chantenay Red Cored but improved uniformity.

S/C 2,000 11106 £1.80

EARLY MARKET

Shorter stump rooted variety for good but not wonderful soil depth. Colour and flavour is good and can be sown early or late in the season.

S/C 2,000 11108 £1.80

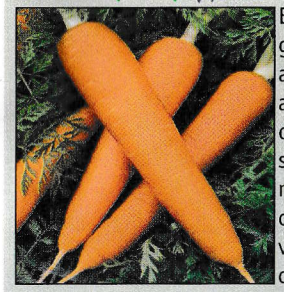

EARLY NANTES 2

The favourite for successional sowing with blunt ended cylindrical roots and very small core. Superb flavour and colour.

S/C 2,000 11109 £1.85
Large Grower Pack
S/C 10,000 11110 £4.35

STAR BUY
FLAKKEE (FLAK)

Easy to grow and, although considered a main crop variety, can be successionally planted to give a continuous crop, producing large, thick roots, with very good colour and flavour. It will even thrive in rather poor soils, but give it some encouragement and you will be amazed.

S/C 700 11116 £1.95

JAMES SCARLET INTERMEDIATE

Reliable old favourite for main crop and exhibition. Broad shouldered tapering roots of deep orange with great taste.

S/C 2,000 11112 £2.05

KATRIN

The best open pollinated Chantenay type we have seen for 30 years. 11-13cm good triangular shaped roots with a blunt end and nice tap root and no greening on the shoulders. Excellent flavour for use in the kitchen or for exhibition. Shows good bolt resistance.

S/C 3,000 11141 £1.80

MIXED

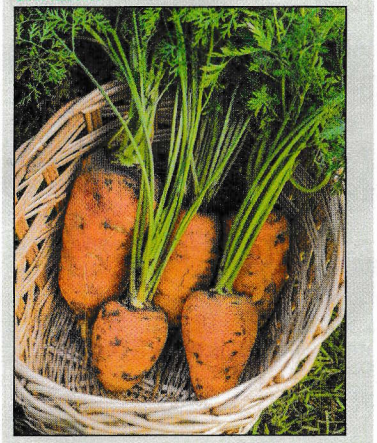

A mixture of purple, orange and yellow carrots to add colour and interest to salads or cooked meals.

S/C 500 11128 £2.65

Kings say..."carrot is high in anti-oxidant beta carotene."

NEW TO KINGS

OXHEART

An Heirloom French variety!
Grows well in containers or shallow soils as the roots grow no longer than 12-15cm and can achieve shoulders 10-12cm wide, creating a stumpy 'Oxheart' shaped root. Sweet and tender with less foliage than you would expect from these large roots. Stores well.

S/C 1,000 11148 £2.10

PARIS MARKET 5 ATLAS

Can also be used as mini veg

Almost spherical roots which have good colour and flavour. Ideal for shallow soils.

S/C 750 11115 £2.10

RAINBOW MIXED

An eye catching range of Nantes shaped roots in pastel shades from orange to yellow/white, very vigorous with strong foliage. A good sweet taste, it is perfect for lunch boxes.

S/C 500 11130 £3.15

ST. VALERY

Probably the best known variety of carrot with long tapering roots. Heavy yields but with good flavour.

S/C 2,000 11117 £2.10

STAR BUY
VITA LONGA

An excellent selection of Autumn King with long heavy roots, small core and uniform shape. Outstanding colour and flavour.

S/C 750 11118 £1.90

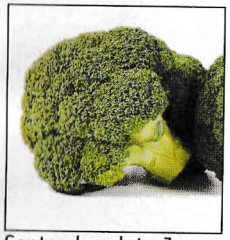

Capsicum

see Pepper pages 47 to 50.

Calabrese (Green Sprouting Broccoli)

A much milder flavour than the purple and white sprouting types. The hybrid varieties produce a large central green head and once this has been harvested, a second crop of smaller individual spears is produced where the leaf stem joins the main stem. Sow the seed in April or May into trays or modules under glass at 13°C. Alternatively later sowings can be made outdoors into a seed bed in shallow drills 2cm (3/4") deep. Once plants have 5 to 6 leaves transplant to final positions spacing plants 45cm (18") apart between plants and 45cm (18") between the rows.

EOS F1

Good size heads with fine beads and dark green in colour. Multi-purpose variety suitable for late September, late January/early February sowings, for June harvest. *Good resistance to White Blister. Blind tolerant.*

S/C 40 11013 £3.15

GREEN MAGIC F1

Produces a large central head first followed by delicious smaller healthy shoots. *Plants show good resistance to white rust.*

S/C 75 11010 £3.10

IRONMAN F1

Top seller

Best selling calabrese for quality heads that stand well over a long period with outstanding flavour. A main crop variety that performs well in hot/dry conditions. *Excellent disease resistance.*

S/C 50 11012 £3.10

MARATHON F1

Large blue-green heads which are slow to run to seed. *Good disease resistance and cold tolerance.* This allows later sowings and extended harvest period.

S/C 100 11008 £2.55

MONCLANO F1

Club root resistant

The answer to many gardeners' prayers. *A club root resistant variety* which stands well and has firm domed heads of excellent flavour.

S/C 30 11011 £3.60

PARTHENON F1

Head weight 400-600g (14-21oz), maturing within 80-85 days. High yielding and excellent quality.

S/C 50 11009 £3.45

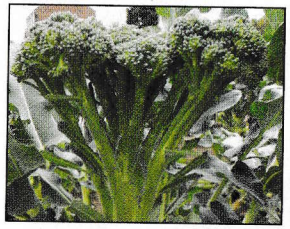

PURPLE RAIN F1

A purple cape type. Can be cut as a close head like a cauliflower and used as florets or allow the heads to stretch and cut as tips or short spears like calabrese. Delicious cooked or raw. Harvest September to October.

S/C 25 11016 £2.50

STEMIA F1

A unique broccoli, producing a central head with individual florets with no yellowing. Produces enough side shoots for a meal per plant. Cut heads like green sprouting broccoli, followed by tasty broccoli tips, enjoy the tender stems.

S/C 25 11015 £3.20

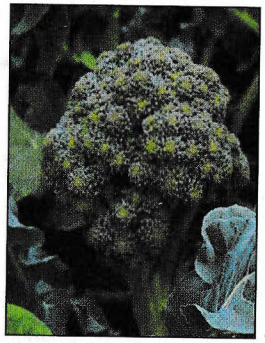

SUN KING F1

Very tasty large blue, green heads, with good leaf cover and an abundance of side shoots. Outstanding heat tolerance making it ideal for summer or autumn harvests.

S/C 40 11017 £2.30

GREEN SPROUTING

Produces a fine crop of central green heads followed by a succession of tasty green spears after the main head has been cut.

S/C 600 11001 £1.90

Kings say... "calabrese is an excellent source of iron & vitamins A and C."

Cardoon

Victorian gem

Tall graceful plants needing a lot of room. Stems are tied to blanch them and used like celery. Sow seeds under glass in February to March at 18°C. When large enough to handle, plant out 1m apart. Matures in December.

S/C 60 15211 £2.10

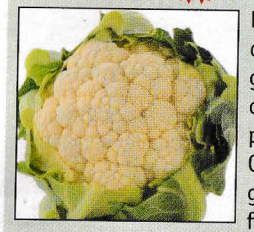

Cauliflower

Regarded by many old hands as the test of a real gardener. Certainly not the easiest of vegetables to produce at its best but good planning, regular care and a few doses of common sense can work wonders. It is possible to have cauliflower on the table pretty well all year round. The biggest enemy is a check in growth. Sowings can be made in trays or modules under glass at 13°C. Later sowings can be made outdoors into a seed bed in shallow drills 2cm (3/4") deep. Gradually harden off indoor sowings before planting out. Outdoor sowings should be thinned to 7-10cm (3-4") apart, then once plants are 15cm (6") tall, they can be lifted and transplanted to their final planting positions. Water well and regularly, particularly in high summer. Dig and prepare the soil for the cauliflower bed the previous year and tread afterwards to make it really firm, (they hate loose soil for their roots) or the wind will rock and loosen the plants. Choose a sunny position protected from the worst of the wind. Plant spacing varies but as a general rule the longer the plants are in the ground the more space they require.

SUMMER AND AUTUMN HARVESTING

EXHIBITION

ATALAYA F1

Deep solid curds with good leaf cover protection. Can be grown for harvest between July to late October from various sowings. Can also be used for October sowing for mid-June to mid-July harvests.

S/C 25 11240 £2.85

Order line: 01376 570000/572456

BARCELONA F1

Ideal replacement for Alpha Jubro. Ideally suited for October sowing. Produces exceptionally high quality white curds in early summer.

S/C 20 **11239** **£3.15**

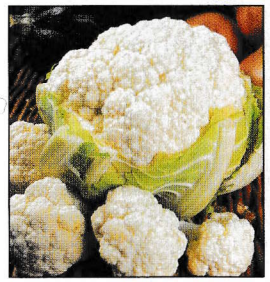

EXHIBITION BORIS F1

Summer or early autumn cauliflower (85-90 days). Can also be October sown. Excellent plant vigour makes it versatile on any soil type, holding well, producing good size pure white curds.

S/C 25 **11244** **£2.55**

CANDID CHARM F1

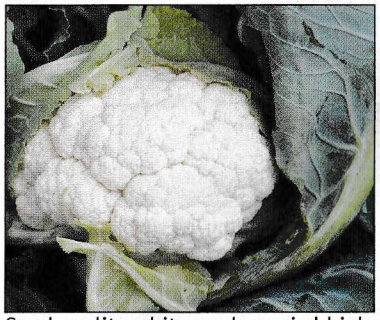

Large pure white heads covered by dark green leaves, very fast to maturity. Ideal for freezing.

S/C 50 **11208** **£3.10**

CLAPTON F1

Clubroot resistant

Good quality white curds carried high off the ground so are kept very clean.

S/C 25 **11231** **£3.95**

SKIPPER F1

Dwarf and compact

With the increased need for gardeners to grow brassicas under cages for bird and pest protection, Skipper makes the ideal choice. Shorter and more compact foliage, but still producing a well covered heavy pure white curd. Maturing in approx 85-90 days for summer and early autumn harvesting.

S/C 25 **11248** **£3.45**

Organic Cauliflower are in our Suffolk Herbs section page 147.

TIRZA F1

The Hybrid All Year Round Cauliflower From succesional sowings January to October you can harvest nearly all the year round. For the earliest harvest sow in October in a coldframe and plant out in March. Compact and versatile with delicious tight curds.

S/C 50 **11249** **£2.40**

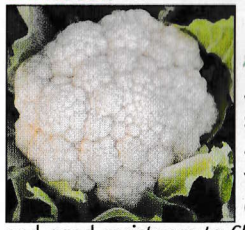

WHITEX F1

The latest breeding brings a unique cauliflower that stays whiter longer, even after harvest. Bred to stay White and show slower signs of discolouration or pinking than traditional varieties. Outstanding quality curds and superb flavour.

S/C 25 **11250** **£3.60**

ZARAGOZA F1

Clubroot resistant

A high-quality summer and autumn variety, with] great flavour and good *resistance to Club root*, producing dense and heavy, crisp white curds. Stands well and the large leaves ensure the pure white curds are well protected.

S/C 25 **11245** **£3.20**

Kings say...

"cauliflower is a good source of iron, manganese & anti-oxidants."

ALL THE YEAR ROUND

Good old standby variety. Very reliable producing white curds from early summer to autumn from successional sowing.

S/C 225 **11201** **£1.95**

IGLOO

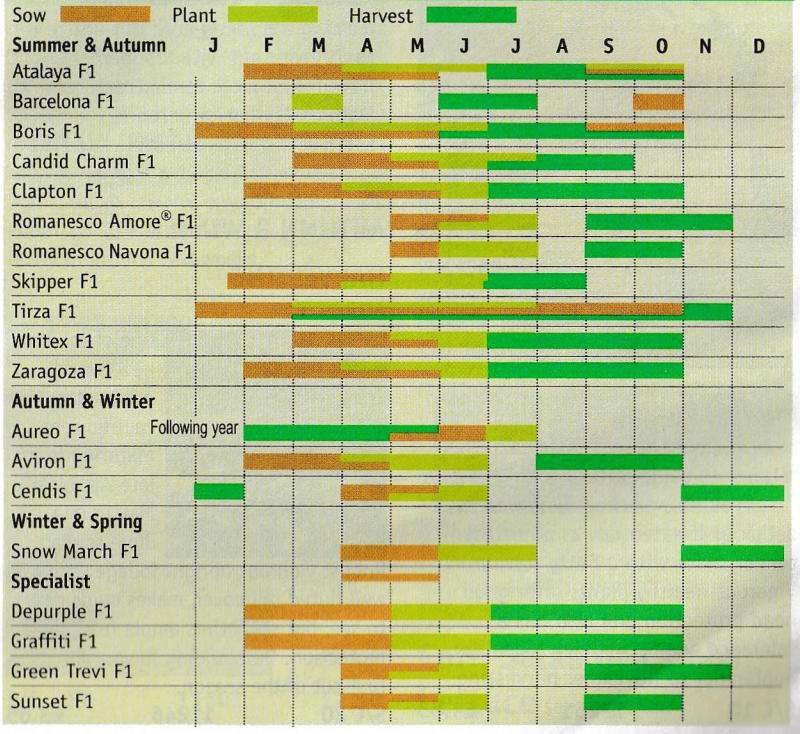

Can be used as mini veg

An early variety with good, clean, white heads. Can be used as a mini-vegetable when grown close together, or at wider spacing for larger heads.

S/C 70 **11230** **£2.15**

F1 Cauliflower Sowing and Harvesting Times

Courgette

The courgette is probably the most popular form of all the marrow family. Picked young for use in a whole host of different dishes. Constant cropping is required to keep the plants in production. Sow seed on edge 1.5cm (1/2") deep to prevent rotting in pots during April to May under glass at 20°C using good quality seed sowing compost. Sow outdoors mid-May to June direct into growing site 1.5cm (1/2") deep 2 to 3 seeds in each position 60cm (24") apart. Greenhouse sowings should be gradually hardened off once they have developed the first pair of rough leaves and transplanted to growing site in late May to early June 60cm (24") apart. Outdoor sowings should be thinned to one plant per station. Water regularly and feed often.

AMBASSADOR F1

Very popular

An early cropping variety producing an abundance of uniform dark green fruits.

S/C 15 11809 £2.15

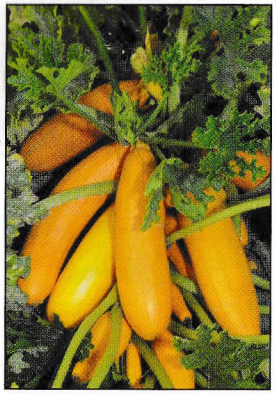

ASTIA F1

One of the best garden courgettes. Vigorous plants, very productive with slim uniform fruits and the added benefit of showing good tolerance to powdery mildew, giving a longer harvest season.

S/C 8 18121 £3.20

ATENA POLKA F1

Brighten your dish with this bright yellow fruited variety. Excellent flavoured courgettes and very prolific.

S/C 10 11814 £2.15

BLACK FOREST F1

Climbing courgette

A climbing variety, suitable for scrambling up a trellis or fence, where it will produce an abundance of dark green fruits. Tie the stems in regularly to help support the weight of the fruits.

S/C 6 11819 £3.50

Kings say.."courgette is an excellent source of vitamins A, C and E."

BOLDENICE F1

Attractive green stripy round fruits, delicious harvested when young from the size of a golf ball, up to larger mature fruits that can be used for stuffing. Highly productive, erect plant habit and shows good resistance to powdery mildew.

S/C 10 18162 £2.65

CLARION F1 (LEBANESE TYPE)

Very early into fruit. Compact bush habit with light green mottled fruit in good quantities and slightly tapered shape. Harvest 12-15cm long.

S/C 15 11806 £2.20

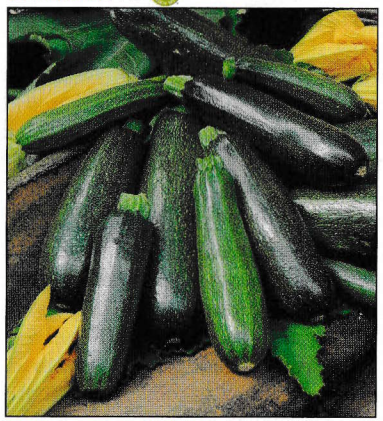

DARKO F1

Producing large quantities of very dark green small fruits.

S/C 10 18159 £3.20

DEFENDER F1

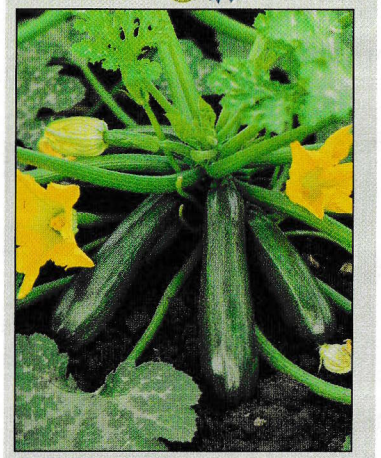

Resistant to Cucumber Mosaic Virus

Heavy yielding variety. Deep green fruits are produced all summer long if cropped regularly. Bush habit

S/C 10 11808 £2.65

STAR BUY

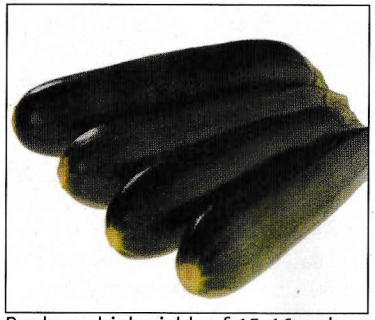

EARLY GEM F1

Very early crop of dark green fruits with a lighter green stripe. Dual purpose as the fruits can be left to form good shaped marrows.

S/C 15 11802 £1.65

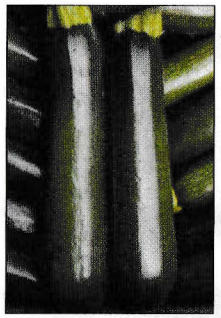

JACKPOT F1

Produces high yields of 15-16cm long medium-dark green lightly speckled fruits slightly ridged near the stem. Open plant bushy habit with few spines making fruits easy to harvest.

S/C 10 11821 £3.65

MIDNIGHT F1

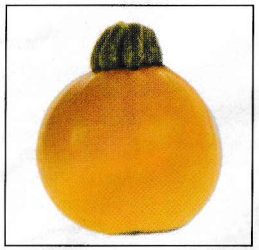

Can also be used as mini veg

Ideal for growing in containers. Completely spineless which makes picking easier. Slightly speckled with a good flavour, compact bushy plant.

S/C 15 11812 £3.10

ONE BALL F1

Unusual bright yellow round fruits of excellent flavour. Bushy plants produce good yields of round courgettes, ideal for roasting and stuffing. Can be harvested from the size of a golf ball up to the size of a tennis ball.

S/C 10 18165 £2.85

Order line: 01376 570000/572456

ORELIA F1

Almost spineless plants for easy picking, intense golden coloured fruits are produced in abundance with a superb flavour.

S/C 10 11816 £2.15

SHOOTING STAR F1

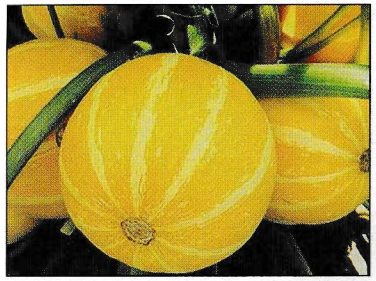

Climbing yellow courgette

British breeding brings the first climbing yellow courgette. Has an upright, climbing habit that is well suited to growing in smaller gardens or containers. Grow against a trellis and tie the stems in regularly to help support the weight of the fruits. Both decorative and productive.

S/C 10 11820 £3.15

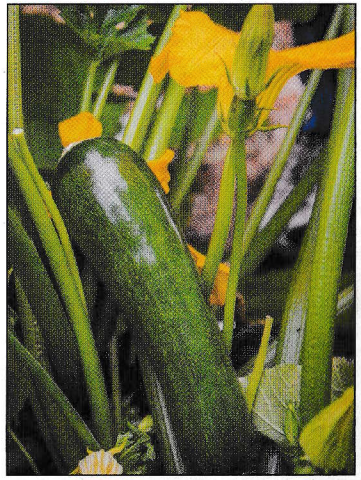

SUMMER SUN F1

Early, high yeilding, versatile and attractive round yellow striped vibrant fruits that can be harvested at any size. Baby fruits are delicious on BBQ skewers or larger tennis ball fruits are ideal for stuffing. Any you miss can be left to produce large round marrows. Compact plants have very few spines for easy harvesting. Formerly known as Summer Holiday

S/C 10 11822 £2.15

SURE THING F1

The answer to many gardeners prayers, as this Parthenocarpic courgette reliably bear fruit early in cool, cloudy conditions, even when there are no bees or male flowers around for pollination. A good cropper with tasty fruits, enhanced by a strong flavour.

S/C 15 18167 £2.15

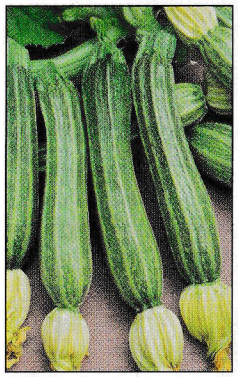

ALL GREEN BUSH

High yields of dark green fruits that should be cut when about 8-10cm long. Crops over a long period when harvested regularly.

S/C 25 11801 £2.10

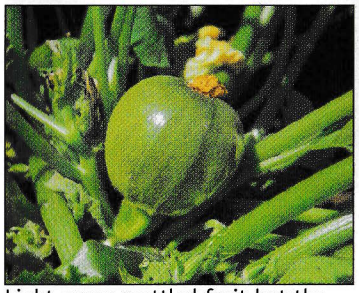

ROMANESCO

A lovely courgette with characteristic ribs down the striped fruit. It has excellent flavour and texture, even when quite large.

S/C 15 11818 £1.75

TONDO CHIARO DI NIZZA

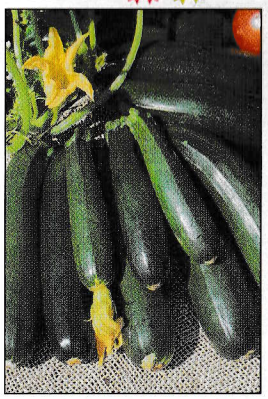

Light green mottled fruit but the difference is that Tondo is round. Pick when the fruits are about 10cm in diameter. Trailing habit, needs space.

S/C 15 11807 £2.05

ZUCCHINI

Top seller

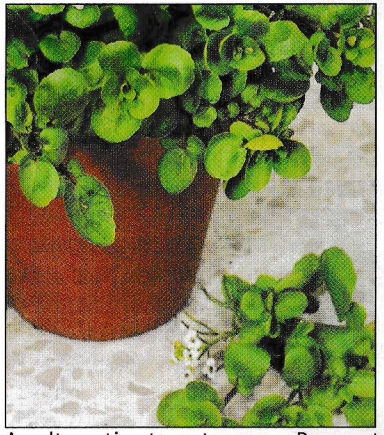

Smooth skin of really dark green fruit. Slim and cylindrical with excellent internal quality. Heavy cropper.

S/C 20 11805 £2.05

Cress

Often associated with the small punnets bought in shops and children growing it on tissue paper and saucers. The "Cress" in shops is actually Salad Rape, see page 61.

AMERICAN OR LAND

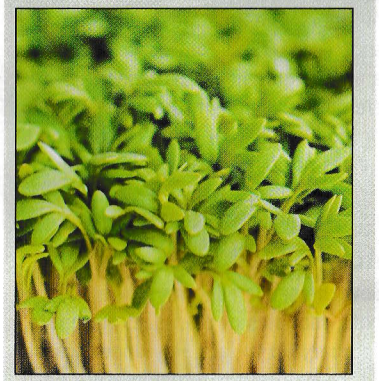

An alternative to water cress. Does not need copious water as it is grown under normal conditions. Strong flavour like water cress. Sow the seeds 1.5cm deep in rows 30cm apart in March for summer use, in September for winter cuttings. Prefers a shady spot and watering in dry spells.

S/C 1,500 11901 £1.95

STAR BUY

PLAIN

All the attributes of the curled variety but a slightly stronger flavour with different leaf formation.

S/C 4,500 11903 £1.80

Kings say... "cress is rich in vitamins B and C."

WATER

Strong flavour and tall growing. Does not require running water but needs moisture at the roots at all times. Sow the seeds in a seed tray in March, prick off when large enough to handle into a large container lined with polythene to retain moisture. Keep moist and in a shady position. Remove any flower buds as they appear. Cut plants 4cm above the soil to allow re-growth.

S/C 2,000 11904 £1.95

French Beans, climbing & dwarf

One family of beans that goes under a multitude of names; French, Dwarf, String and Snap beans more often than not refer to the same thing. Sowings can be made from April to June, early sowings can be made under glass at a temperature of 16°C, sow 3 seeds per 8cm (3") pot filled with seed sowing compost. Outside sowings can be made from May onwards into the growing site 5cm (2") deep. Sow 2-3 seeds every 20cm (8") apart with rows spaced 45cm (18") for dwarf types and 60cm (24") apart for climbing types. Seedlings sown under glass should be gradually hardened off before planting outside in late May to the above spacing, once all risk of frost has passed. Successional sowing is recommended. Pick pods regularly to encourage new growth. Climbing varieties should be supported with nets or canes in the same way as runner beans.

Kings say... "French beans are a good source of folic acid & vitamins A & K."

CLIMBING VARIETIES

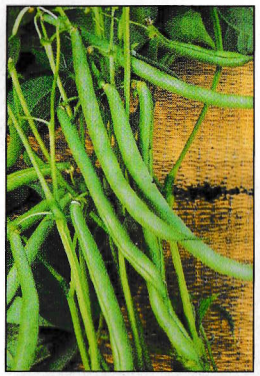

BARLOTTA LINGUA DI FUOCO

Easier to grow than pronounce. Bright green flat pods splashed with red which disappear on cooking. Can be used as a flageolet type. Height 2-2.25m.

S/C 75 30222 £2.70

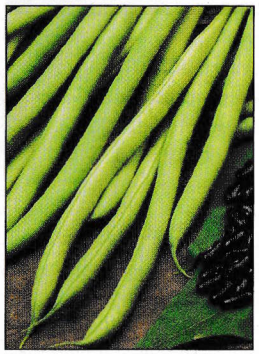

BLUE LAKE

Can reach 2.25m in height. Pencil podded stringless type of medium green with pure white beans which can be used as haricot beans at the end of the season.

S/C 125 30201 £2.75

COBRA

Best for flavour

Black seeded. Pods about 7mm in dia. and are long and straight and can be harvested over a long period for early indoor or outdoor crops. Height 2-2.25m.

S/C 50 30229 £2.75

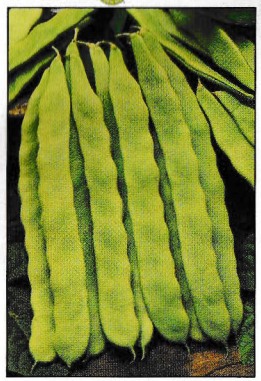

COSSE VIOLETTE

Deep purple pods which turn dark green on cooking. Fine flavour. Harvests over a long period in either glasshouse or in the open. Height 2-2.25m.

S/C 70 30204 £2.70

HUNTER

Bright green flat podded stringless type ideal for forcing under heated glass, unheated polytunnels or maincrops outside. Very prolific. Height 2-2.25m.

S/C 100 30203 £3.35

LAZY HOUSEWIFE

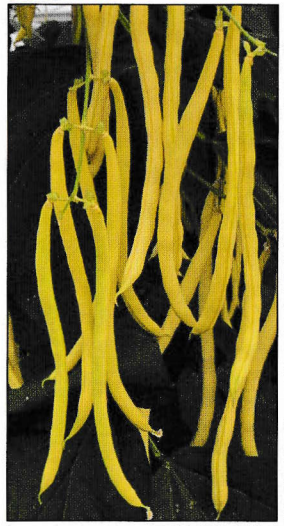

Originally introduced by W. Atlee Burpee Co. in 1885. Green, entirely stringless pods are easy to prepare in the kitchen. Harvest young for snap beans and enjoy a buttery flavour when cooked. Alternatively use the dried and shelled white beans in a variety of dishes offering a richer, creamy taste.

S/C 70 30326 £2.70

Kings recommend when not sowing directly into your vegetable plot you sow your seeds into a good quality seed sowing compost and watering only with tap water. Do not use butt water as this can contain harmful pathogens, resulting in poor germination.

SUNSHINE

From the same breeder as Cobra, producing 17-18cm long attractive yellow wax pods, and 9-10.5 min diameter. Pods are carried in clusters and produce a heavy crop over a long period outdoors as well as undercover to extend the picking season.

S/C 50 30220 £2.95

VINE

Attractive climbing french bean from the same breeder as Cobra. Pods are very straight 14-16cm long and carried in clusters. The Pod colour is slightly darker than cobra with a hint of a glossy shine like the green 'Vine' snake. Crops well over a long period.

S/C 50 30238 £2.70

Yard Long Beans

See Oriental Vegetables - page 43

DWARF VARIETIES

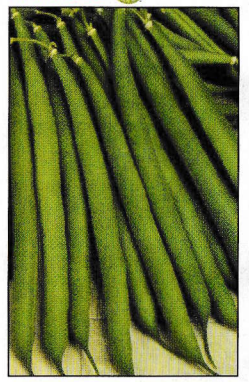

AMETHYST

A heavy cropper producing attractive and very tasty 15cm (6") purple pods of superb quality. (Buff light brown seeds).

S/C 100 30233 £2.95

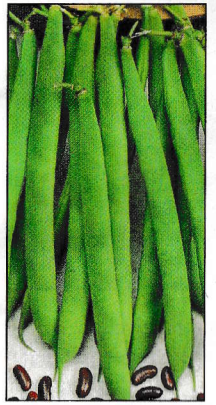

ANNABEL

Specially bred to produce a large quantity of stringless pods for harvesting when about 8-10cm long and cooked whole. Height 45cm.

S/C 125 30205 £2.95

CANADIAN WONDER

Reliable old favourite

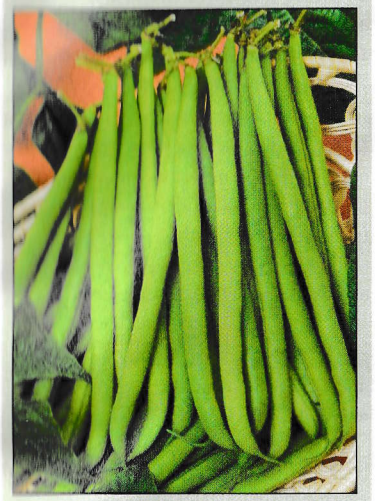

Gives heavy crops of oval to flat pods with excellent flavour. Attractive bright green pods which must be picked young. Height 35-45cm.

S/C 150 30207 £2.95

Order line: 01376 570000/572456

NEW TO KINGS

DELINEL

An early cropper, producing green stringless 18cm long pods of excellent flavour. An excellent yield over a long period, if harvested regularly. Black seeded. Ideal replacement for Elba

S/C 150 **30242** **£2.50**

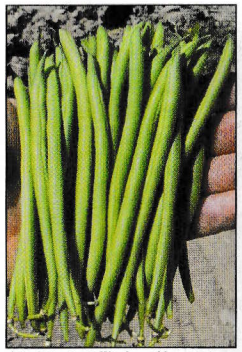

DIOR

Yellow waxy pods, of very good flavour, produced on compact plants. Exceptionally uniform pods and pod set, producing pods 13cm (5") in length, and shows an attractive deep yellow colouring fairly early on as beans develop. Height 50cm (20"). Harvest in approx 70 days.

S/C 125 **30234** **£2.65**

FARADAY

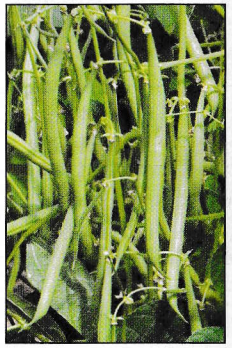

Can also be used as mini veg

Probably one of the best, if not the best newly introduced Dwarf French Bean. Uniform pods 6.5-8mm (0.25-0.3") in diameter, 13-14cm (5-6") long and straight with a good colour. Height 50cm.

S/C 100 **30230** **£3.10**

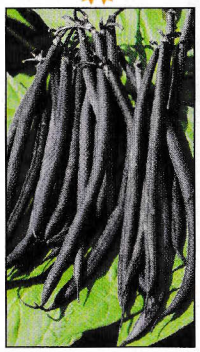

MASCOTTE

Extra fine, productive and tasty. White flowers and masses of pods sit well above the foliage. The perfect bean for growing in containers or window boxes.

CROP FAILURE

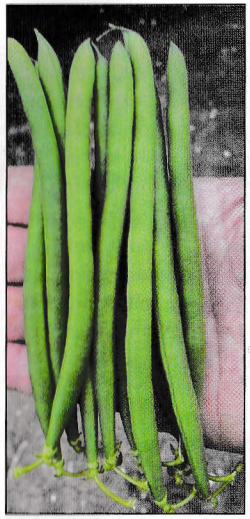

MISTIK

The world's first purple podded 'daisy type' French Bean! A heavy cropper with all pods held well above foliage for easy picking. Stunning in the vegetable garden or containers with attractive purple flowers and masses of slender 15cm long beans.

S/C 100 **30235** **£2.85**

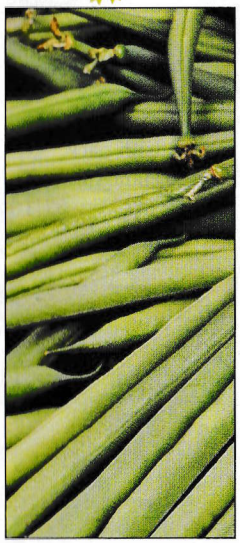

QUARTZ

Attractive 16-17cm long and dark green pods, showing a slight glossy shine. In recent trials has shown good tolerance to heat. A heavy cropper with very good disease resistance. White seeded and white flowered.

S/C 125 **30239** **£2.70**

SAFARI

Late maturing, strong and vigorous with very fine pods carried high on the bush. Pods are round, stringless, straight and dark green, about 12cm in length. Sometimes known as Kenyan beans. *High level of resistance*. Ht. 45cm.

S/C 125 **30227** **£3.20**

STANLEY

Smooth, round slender beans 12-13cm long with excellent flavour. Very prolific, producing extremely high yields for the home gardener and is the reason it has become one of the biggest selling commercial varieties. Shows good disease resistance. White seeded and white flowered.

S/C 125 **30240** **£2.85**

TENDERGREEN

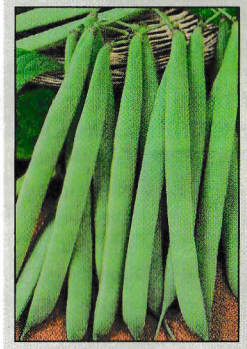

Medium long pencil podded type of light green colour and excellent flavour. Virtually stringless and good for the freezer. Height 35-45cm.

S/C 150 **30217** **£2.95**

EXHIBITION STAR BUY

THE PRINCE

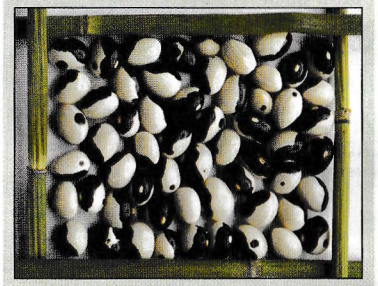

A most popular variety with long, uniform slender pods which crop for a long period with outstanding flavour. Ideal for the kitchen or the show bench. Height 45cm.

S/C 125 **30219** **£2.95**

NEW TO KINGS

YIN YANG

An intriguing dual purpose bean, that can be harvested as fresh young, tender and tasty green beans. Or they can be left to mature, then shelled to reveal the attractive black and white beans, that can be dried and added to winter casseroles.
The remarkable black and white bean colour pattern, gives them the appearance of a three-dimensional representation of the well-known Yin Yang symbol of Chinese astrology. Sometimes also known as the Orca bean as coloured like the killer whale.

S/C 50 **30241** **£2.95**

If you are an organic gardener go to our Suffolk Herbs section, where you will find a wide range of organic vegetable seeds, see pages 144 to 154.

Gourd see Squash & Pumpkin pages 61 -63

Garlic

HERITAGE VARIETY

CARCASSONNE WIGHT (hardneck)

Exceptional, pink cloved hardneck showing great vigour in UK climate. Good skin cover, great strength and carry through coupled with superior (in our opinion) bouquet and character.

2 bulb pack 31627 £7.10

Kings say... "garlic is high in minerals and vitamins A, B and C."

CAULK WIGHT (hardneck)

Selected from the best purple stripe garlic found in Russia and Eastern Europe. Large cloved, easy peeling and vigorous. They grow particularly well in our relatively soft UK climate, north or south but can withstand temperatures down to -20C. Once dried the outer leaves fall away to reveal the most beautiful marbled purple stripe bulb. Ideal for planting November to January. Harvest in June.

2 bulb pack 31645 £7.10

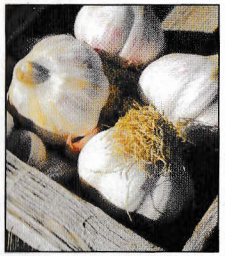

ELEPHANT

A fresh, juicy, mild sweet flavour. Ideal for baking and roasting. Each bulb is approx 12.5-15cm (5-6") across. Not a true member of the garlic family, closer to leek, to which it bears a closer flavour. Plant in autumn.

10 cloves 31615 £13.90

KINGSLAND WIGHT (hardneck)

Bright white skins with fierce and spicy flavours which are the signatures of this hardneck from Czech Republic with plump purple cloves. One of the very hot and strong varieties commonly planted in the UK. Autumn planting. Approx. 8-10 cloves.

2 bulb pack. 31647 £7.10

MADDOCK WIGHT (softneck)

White skinned juicy cloves, good keeping quality and excellent flavour. 8-14 cloves per bulb.

2 bulb pack 31649 £7.10

MERSLEY WIGHT (softneck)

A classic "Silvererskin" type, ideal for late winter or spring planting. One of the best for keeping qualities, can store up to June the following year. Mersley Wight has outstanding vigour and is larger and bolder than similar types, ideal garlic for the UK gardener. Ready for harvest end of July.

2 bulb pack 31644 £7.10

HERITAGE VARIETY

PICARDY WIGHT (softneck)

A strong flavoured garlic that has a distinct "pink" hue in appearance. Approx 15 cloves per 2 bulb pack. Plant spring.

2 bulb pack 31621 £7.10

PROVENCE WIGHT (softneck)

Large white bulbs with purple streaks that approach Elephant garlic size. Large fat cloves, like many Mediterranean types, responds to heavy watering in the months before harvest. Warm subtle flavours.

2 bulb pack 31625 £7.10

RHAPSODY WIGHT (softneck)

A robust early purple garlic that produces large bulbs. Originating from the village of Cadours in South West France. Wonderful, zingy flavour when harvesting in June. 5-12 cloves per bulb.

2 bulb pack 31648 £7.10

ROSE WIGHT (hardneck)

With a rosy pink and white outer skin and deep pinkish cloves, this garlic has a strong flavour. Originally from northern Spain, it does well in UK conditions. Plant September – November, Harvested: June

2 bulb pack 31646 £7.10

SOLENT WIGHT (softneck)

An improved selection of Solent Wight, producing larger quality bulbs. Keeps well to March and beyond next year. An aroma and bouquet without compare - giving excellent length and strength. Approx 30 cloves per 2 bulb pack. Plant autumn or spring.

2 bulb pack 31620 £7.10

PLEASE NOTE On arrival garlic should be laid out to prevent sweating and sprouting. Any apparent deterioration in quality should be notified to us within 7 days of receipt of goods.

It is easy for any gardener to grow good garlic. It grows well over most of the UK provided it is grown in a free draining soil, that is not too acid (pH levels should be over 6.7) and kept well watered and weed free.

BULBS ARE AS DUG. Delivery from mid October onwards. Sorry, no garlic available after 28 February.

SOFTNECK versus HARDNECK

There are two distinctive types of cultivated garlic. Softneck is easier to grow, has plenty of cloves and stores well. Hardneck produces fewer but larger cloves and because they have a thinner skin have a shorter shelf life. It also produces flower stalks as part of its natural growth.

GARLIC TWIST CROSS CUTTER

This handy kitchen utensil is the must have for garlic lovers. Fun and easy to use. Handy to crush and peel garlic. Minces garlic to an ideal texture. No waste or fuss. NOTE: Colour may vary from item illustrated.

46066 £19.00

GARLIC FERTILISER

A blend of minerals specially formulated to produce strong, healthy and tasty garlic. Apply at 25-35g per sq. m.

300g tub 45120 £9.50

Order line: 01376 570000/572456

Green Manures

Improve your soil fertility, increase the humus content, improve the structure of the soil or simply to blanket the bare soil and suppress weed growth whilst the ground is not in use. Choose the species that is suitable for either the job required or fits the time period that the area is not needed for growing crops. Some species are not winter hardy, this often means that you will not need to specially dig in the plants in the spring as the root system will have done its work and normal spring cultivation can take place.

CHOOSE THE RIGHT GREEN MANURE FOR YOU

ALFALFA
Sow: Broadcast April - July
Soil type: Poor, not acid
Dig in: From 2 months - 1 year
Nitrogen fixer - yes
Covers: 40 sq m/45 sq yd

BUCKWHEAT
Sow: Broadcast March - August
Soil type: Poor
Dig in: 2 - 3 months, before flowering
Nitrogen fixer - no
Covers: 15 sq m/18 sq yd

CLOVER, CRIMSON
Sow: Broadcast March - August
Soil type: Light sandy
Dig in: 2 - 3 months, before flowering
Nitrogen fixer - yes
Covers: 30 sq m/35 sq yd

CLOVER, WHITE
Sow: Broadcast February - September
Soil type: Most soils
Dig in: 2 - 3 months, before flowering
Nitrogen fixer - yes
Covers: 30 sq m/35 sq yd

FENUGREEK
Sow: Broadcast March - August
Soil type: Well drained
Dig in: 2 - 3 months, before flowering
Nitrogen fixer - no
Covers: 15 sq m/18 sq yd

FIELD BEANS
Sow: In rows September - November
Soil type: Heavy
Dig in: March - May, before flowering
Nitrogen fixer - yes
Covers: 6 sq m/7 sq yd

MUSTARD
Sow: Broadcast March - mid-September
Soil type: Fertile
Dig in: 1 - 2 months, before flowering
Nitrogen fixer - no
Covers: 25 sq m/30 sq yd

PHACELIA
Sow: Broadcast March - mid-September
Soil type: All
Dig in: 1 - 3 months, before flowering
Nitrogen fixer - no
Covers: 25 sq m/30 sq yd

Sow: Broadcast August - November
Soil type: All
Dig in: Early spring
Nitrogen fixer - no
Covers: 6 sq m/7 sq yd

TREFOIL
Sow: March - August
Soil type: Light dry, not acid
Dig in: 3 - 4 months
Nitrogen fixer - yes
Covers: 35 sq m/40 sq yd

WINTER TARES
Sow: March - May/July - September
Soil type: Heavy, not acid or dry
Dig in: 2 - 3 months, before flowering
Nitrogen fixer - yes
Covers: 10 sq m/12 sq yd

OVERWINTER MIX
Sow: Mid-September to mid-October
Soil type: All
Dig in: April - May before flowering
Nitrogen fixer - yes
Covers: 16 sq m/19 sq yd

SUMMER QUICK FIX MIX
Sow: May to July
Soil type: All
Dig in: After 10 weeks
Nitrogen fixer - yes
Covers: 60 sq m/71 sq yd

ALFALFA

Deep rooting plants improve the structure of the subsoil. Grows to about 1m high and winter hardy.

40 sq.m. pack 80502 £1.95

BUCKWHEAT

Deep rooting to break up subsoils and makes a lot of growth to increase humus content. Added benefit of attracting hoverflies which will feed on greenfly in the garden. Dig or rotovate in before frosts for humus improvement. Fast into growth so good for weed suppressing.

15 sq.m. pack 80506 £1.95

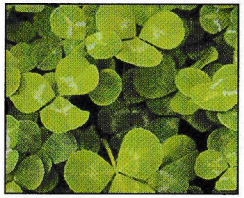

CLOVER, CRIMSON

Best for sandy soils to add humus. Very attractive to bees if left to flower.

30 sq.m. pack 80508 £1.95
1kg for 300 sq.m. 31406 £11.20

CLOVER, WHITE

Dense foliage for undersowing crops to build fertility and nutrients.

30 sq.m. pack 80510 £1.95

FENUGREEK

Grown mainly to increase humus content. Quick into growth to suppress weeds but slower to flower than Mustard.

15 sq.m. pack 80512 £1.95
1kg for 250 sq.m. 31408 £16.90

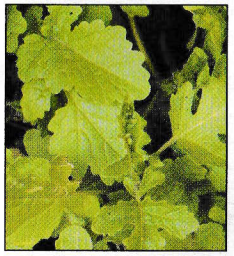

FIELD BEANS

A winter hardy species.

6 sq.m. pack 80504 £1.95
2.5kg for 125 sq.m. 31432 £16.90

MUSTARD, AGRICULTURAL WHITE

One of the fastest growing of green manures. It is susceptible to clubroot so do not use where this is a problem.

25 sq.m. pack 80516 £1.95
2.5kg for 850 sq.m. 31414 £17.50

PHACELIA TANACETEFOLIA

Quick to start up and suppress weeds, winter for spring digging in. Adds humus content to soil.

25 sq.m. pack 80518 £1.95

RYE, GRAZING

Not to be confused with ryegrass. Extensive root system for improving soil structure.

6 sq.m. pack 80520 £1.95
2.5kg for 150 sq.m. 31419 £16.90

TREFOIL

Low growing winter hardy plants.

35 sq.m. pack 80522 £1.95

WINTER TARES

An annual fast growing vetch once established. Winter hardy. For the best weed suppression mix with Rye.

10 sq.m. pack 80524 £1.95
2.5kg for 100 sq.m. 31423 £16.90

OVERWINTER MIX

Growing a nitrogen lifter and fixer is the best way of improving soils over winter. Cereal rye and vetch are excellent companions and usually very reliable.

16 sq.m. pack 80527 £1.95

SUMMER QUICK FIX MIX

The purpose of this is to build soil nitrogen. A fast growing annual mix that is best sown into warm soil. It should be broadcast or shallow drilled at no more than 10mm.

60 sq.m. pack 80528 £1.95

www.kingsseeds.com

Herbs

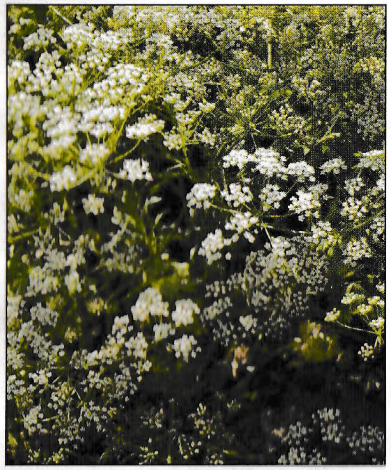

SUFFOLK HERBS

See organic and unusual herbs in Suffolk Herbs section - see pages 154 to 162.

Nothing adds flavour to cooked dishes and salads so simply as freshly picked herbs. Most can be grown in containers so they can be brought under cover in the winter to extend the season.

A Annual B Biennial P Perennial
Annuals and biennials should be sown in spring direct into the growing position but like most herbs can be sown earlier under glass in pots or modules and transplanted when the conditions are suitable. Perennials should be sown in spring or early summer and harvested gently during the first year.

ANISE HP

Delicate plant growing to about 30cm. Leaves used in cooking and salads, seeds have a stronger flavour, obviously of Aniseed.
S/C 250 80002 £2.00

Basils

All the basil family are very frost tender. Start off under glass at 18°C but should not be planted out until June.

ARISTOTLE A

Highly aromatic basil which forms an almost perfect round ball. Ideal for the window sill.
S/C 50 80203 £2.80

NEW TO KINGS
BEAUJOLAIS

SPECIAL TRIAL PRICE ONLY 95p

Beaujolais is a stunning new purple leaf basil selection, with the most consistent dark leaf colour of any basil on the market. Ideal used as a baby leaf as a microgreen or as a salad leaf where the leaves are 97% dark purple from an early stage. Also when mature makes an eye-catching addition to containers or on the windowsill with its attractive aroma and flavour.
S/C 300 80275 95p

BOSHAM A

A robust, upright basil with compact mid green flat leaves with a slightly curled edge. Ideal for growing in pots all year round on windowsills.
S/C 750 80274 £2.00

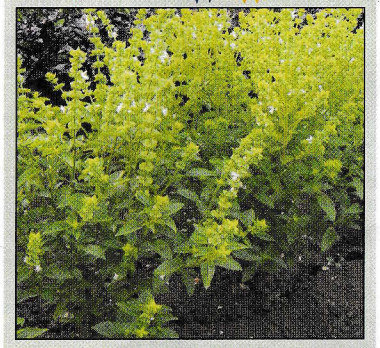

BASIL, BRITISH A

Specially selected for growing outdoors in UK conditions. Very robust bright green leaf that is more resistant to colder conditions, will not discolour and retains its traditional intense flavour.
S/C 500 80263 £2.00

STAR BUY

BASIL, BUSH A

A very fine leaved variety with traditional strong basil flavour makes a beautiful little pot plant. Grows to about 45cm tall.
S/C 500 15204 £2.00

BASIL, CINNAMON A

A distinct type of basil with the added flavour of a touch of cinnamon. Leaf size similar to Sweet Basil and grows to about 45cm tall.
S/C 250 15205 £2.00

BASIL, GREEK A

Very compact strain with tiny leaves.
S/C 200 80249 £2.00

BASIL, HOLY A

The sacred basil of Thailand used for growing around the Buddhist Temples. A small pretty plant with pinkish-mauve flowers and deep purple stems. Delicious scent when used in stir-fries with hot peppers and either chicken, pork or beef.
S/C 250 15248 £2.00

BASIL, LEMON A

A special basil with delightful fragrance for use in tea and to flavour meats or fish.
S/C 250 80269 £2.00

BASIL, PURPLE A

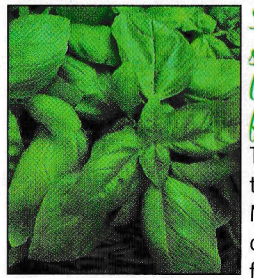

Deep purple leaves with out-standing aroma and taste.
S/C 300 80204 £2.00

BASIL, SIAM QUEEN A

An out-standing strain of Thai Basil with dark green leaves and deep purple flower stems. Excellent spicy aroma and flavour.
S/C 250 15210 £2.00

BASIL, CLASSIC ITALIAN A

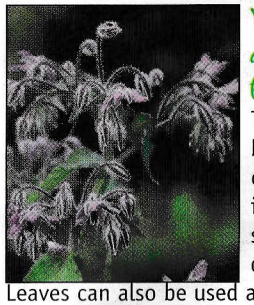

Sweet, strong and bold flavoured
The traditional Mediterranean companion for tomatoes. Should be added to cooking only minutes before use to retain strength.
S/C 750 80205 £2.00

BERGAMOT HP

Showy flowers in shades of pink/purple which can be dried. Leaves have a citrus tang to them and make delightful teas. Grows to about 60cm (24").
S/C 75 15207 £2.00

BORAGE A

Very attractive to bees
The beautiful blue flowers can be used in salads and summer drinks. Leaves can also be used and have a cucumber flavour.
S/C 75 80206 £2.00

BURNET, SALAD HP

Attractive plant growing to about 30cm tall. Dark green leaves of slightly bitter flavour for salad use. Pretty little red flowers. Evergreen.
S/C 95 80207 £2.00

Order line: 01376 570000/572456

CARAWAY HB

Leaves are used as a garnish or salad addition. Seeds, often roasted, are used in bread and cake mixtures and added to casseroles. Height about 60cm (24").

S/C 450 **80208** **£2.00**

CAT GRASS (DACTYLIS GLOMERATA) HP

For your pet, eaten to help eliminate fur balls especially when your cat is home bound. A good aid to missing vitamins and minerals in its diet. Grow in well drained potting mix with slow release fertilizer on a well-lit window sill. Approx. 10g (2 sowings in a standard seed tray.)

10g approx. **15259** **£2.00**

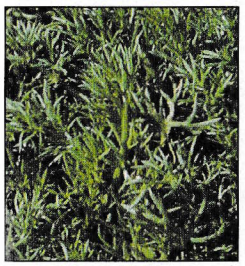

CATNEP HP

Cats find this plant irresistible. It makes an excellent tea.

S/C 500 **80209** **£2.00**

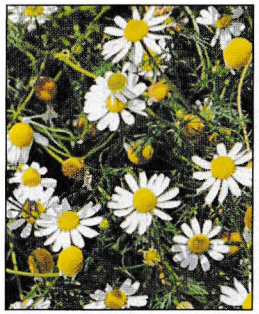

CHAMOMILE LAWN HP

Very similar to ordinary chamomile but plants have a more spreading habit and much more scented. Sow in seed tray and transplant seedlings 10cm apart. Once established, cut regularly but not too short.

S/C 1,000 **80210** **£2.00**

CHAMOMILE A

The pretty daisy like white and yellow flowers are used to make a tea for insomnia, a skin wash and a shampoo for blonde hair. Height about 60cm (24").

S/C 400 **80211** **£2.00**

CHERVIL, CURLED A

Delicate fern-like leaves giving a slight aniseed like taste in mild flavoured dishes. Alternative garnish to parsley. Prefers shady position. Height 30cm (12").

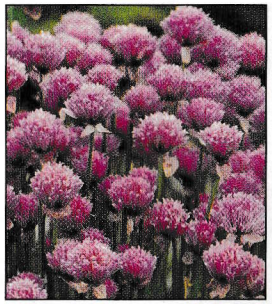

S/C 700 **80212** **£2.00**

CHERVIL, PLAIN A

Leaves are long and straight and stronger tasting.

S/C 750 **15253** **£2.00**

CHIVES HP

Mild onion flavour to both the leaves and flowers. One of the most popular of herbs. Cut leaves about 2cm from ground level. Height about 30cm (12").

S/C 300 **80213** **£2.00**

CICELY SWEET HP

A strong aromatic plant with Hairy feathery leaves and attractive white umbelliferous flowers which turn into striking seed heads.

S/C 8 **80244** **£2.00**

COMFREY (SYMPHYTUM OFFICINALE) HP

Its leaves can be harvested several times a season and used as a compost activator to help breakdown other compost materials. Can also be used as a mulch, or to make a liquid manure. **NOT EDIBLE.**

S/C 50 **15267** **£1.70**

CORIANDER A

The standard variety for seed or leaf production. It runs to seed very quickly to maximise seed production.

S/C 120 **80216** **£2.00**

Kings say... "coriander is rich in anti-oxidants. Use the leaves and seeds in cooking."

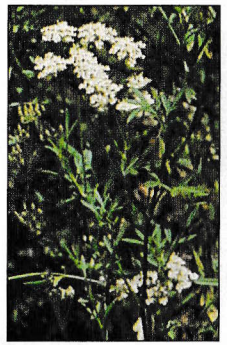

CORIANDER, LEISURE A

Specially bred for its ability to produce a lot of leaf and bolt much slower than traditional old types. Good flavour and colour. Height 60-90cm.

S/C 125 **15216** **£2.00**

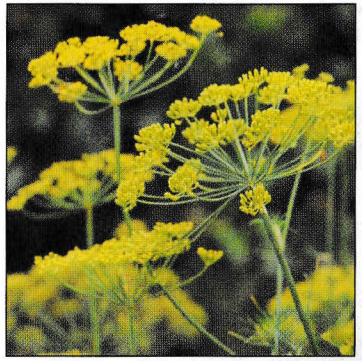

CUMIN A

Seeds are used in Indian cooking particularly curry type dishes. Sow as early as possible as a long growing season is needed. Height 15cm (6").

S/C 350 **80217** **£2.00**

DILL A

The seeds are a common ingredient in pickles and sauces. A site in full sun to give its best yield. Height about 90cm (36").

S/C 500 **80218** **£2.00**

FENNEL, BRONZE HP

Delicate feathery bronze/red leaves which have a pleasant aniseed flavour, not quite as hardy as the green type. Seeds and leaves used in pickles and cooking. Grows to about 150cm.

S/C 300 **80219** **£2.00**

FENNEL, COMMON OR GREEN HP

Bright green feathery foliage with aniseed flavour. Bright yellow flowers make it suitable for the back of flower beds. Height 150cm.

S/C 200 **80250** **£2.00**

GARLIC CHIVES HP

Similar in habit to chives but the leaves are flatter and the flowers are white. Delicate flavour of garlic and onion. Height 30cm (12").

S/C 120 **80214** **£2.00**

Herbs continued

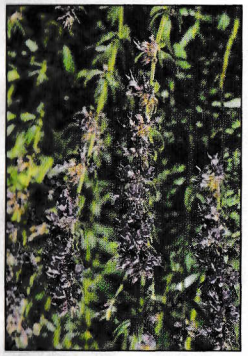

GOOD KING HENRY HP

The leaves can be used as an alternative to Spinach, hence its other name of Lincolnshire Spinach. This can be sown in spring or early autumn and reaches a height of about 60cm.

S/C 200 80222 £2.00

HYSSOP HP

Adored by bees

Small amounts of leaves can be added to salads but its pride is the show of blue flowers on a shrubby plant. Height 45cm (18").

S/C 350 80223 £2.00

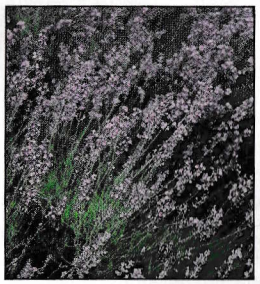

LAVENDER, MUNSTEAD DWARF HP

Attract bees and other insects. Make excellent cut or dried flowers. Grow in containers, or as a low hedge to soften paths. Just be sure to plant it where you can savour its beguiling fragrance. Height 30-40cm (12-15").

S/C 200 80253 £2.00

LAVENDER, VERA P

Tall growing type suitable for hedging or individual plants. Silvery foliage and lilac flowers, highly scented. Height 90cm. Slow and erratic germination.

S/C 350 80225 £2.00

LOVAGE HP

Shrubby habit needing a lot of space. Distinct flavour to leaves and stems which can be used as an alternative to celery. Can reach 2m tall.

S/C 120 80227 £2.00

MARIGOLD, POT A

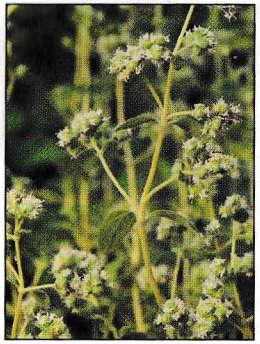

Use the pretty flowers in salads

Petals have very delicate taste and will add orange colouring to rice and other dishes.

S/C 100 80228 £2.00

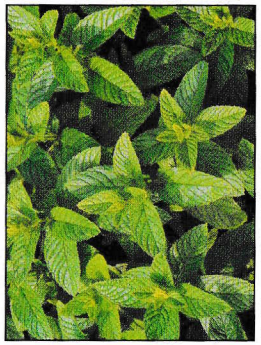

MARJORAM, SWEET HP

Only perennial in very mild areas or if given winter cover. Fine flavoured grey green leaves. Prefers full sun. Height 30cm (12").

S/C 1,500 80230 £2.00

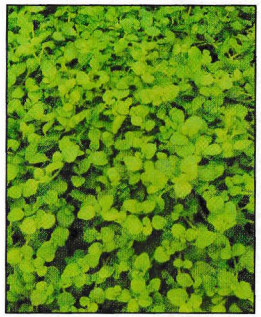

MINT, GREEN HP

Leaves used for the traditional mint sauce or mint tea. Once established the roots can be invasive so plant out with care. Height about 40cm (16").

S/C 1,000 80231 £2.00

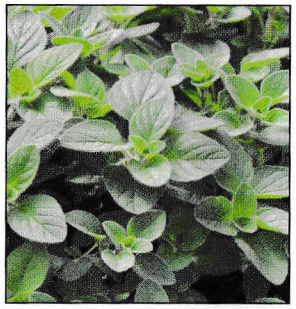

MINT, MINI (CORSICAN MINT) HP

An unusual trailing habit and very small foliage. Ideal for growing in containers or as ground cover through cracks in paving. Used for making the drink Creme de menthe. Quick to germinate in 5-7 days, Hardy down to -5°C.

20 multipellets 82068 £2.35

OREGANO, GREEK HP

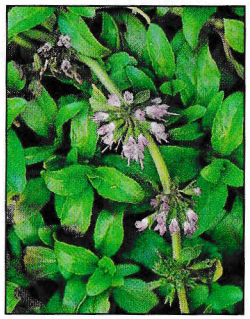

Considered to be the best of all the oregano types for flavour. The growth habit and leaf size varies but height is about 50-60cm (20-24").

S/C 1,000 80251 £2.00

Parsley see page 44

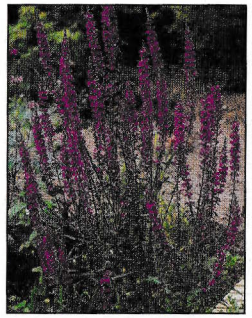

PENNYROYAL HP

Small leaved but strong peppermint flavour. Should not be taken by pregnant women or people with kidney problems. Height 60cm (24").

S/C 750 81007 £2.00

PURPLE LOOSESTRIFE HP

Tapering spikes of purple-red flowers from June-August. Dark green leaves, stately and colourful. An excellent gargle and wound cleaner. Rapidly stops bleeding. Height 1-1.5m (3-4').

S/C 250 80226 £2.00

PURSLANE, GREEN A

Succulent leaves used sparingly in salads or as a cooked vegetable. Bright green shiny leaves make an attractive plant. Height about 30cm.

S/C 750 80038 £2.00

ROCKET, WILD A

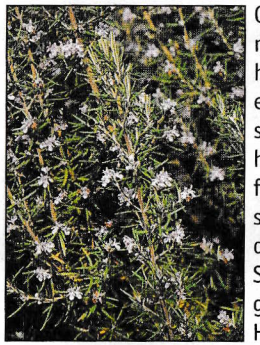

Leaves are much more serrated and darker and it has a stronger, more peppery flavour than the standard Rocket.

S/C 500 15261 £2.00

Rocket Salad see Rocket page 59

ROSEMARY (Salvia Rosmarinus) HP

One of the most popular herbs with evergreen shrubby habit. Prefers full sun and well drained soil. Slow erratic germination. Height 90cm.

S/C 100 80236 £2.00

Order line: 01376 570000/572456

SAGE HP

One of the best known herbs. Evergreen habit, needs cutting back every year to avoid going straggly. Height 60cm (24").

S/C 35 80238 £2.00

SAVORY, SUMMER A

Fine bright green leaves with a spicy flavour used most often to flavour beans but also good to add to cooked dishes. Height 45cm (18").

S/C 1,500 80240 £2.00

SAVORY, WINTER HP

Stronger flavour than the annual variety. Has pretty little white flowers. Can be grown in pots and brought into the kitchen. Height 30cm (12").

S/C 700 80045 £2.00

SORREL, FRENCH GREEN DE BELLEVILLE HP

The oldest cultivated sorrel around. Belleville was domesticated in France during the 1730s. A small cultivar with pale green leaves 8cm (3") long having a citrus lemon flavour. It is hardy, fast growing and productive under almost any conditions.

S/C 350 80241 £2.00

STRAWBERRY STICKS (Chenopodium foliosum) A

Highly attractive dual purpose plant for both the herb and flower garden. Base branching habit growing to about 40cm high, the light green leaves can be cooked and used like spinach. This is then followed by strawberry like fruits along the stems which are very tasty picked and eaten fresh.

S/C 75 15246 £2.00

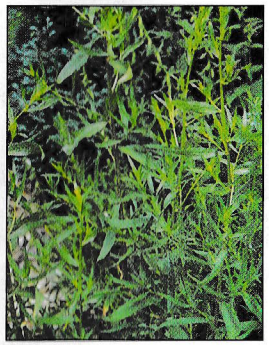

TANSY HP

Fern like leaves with strong aromatic flavour. Yellow button like flowers. Height 120cm.

S/C 500 80093 £2.00

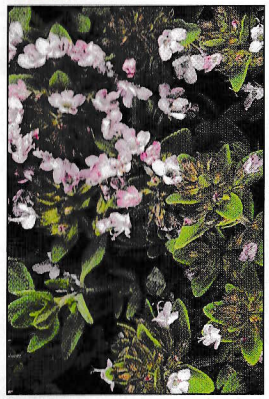

TARRAGON, RUSSIAN HP

Tarragon is a popular herb but the true French variety does not seed. Russian has an inferior flavour but is much hardier. Height 90cm (36").

S/C 300 80252 £2.00

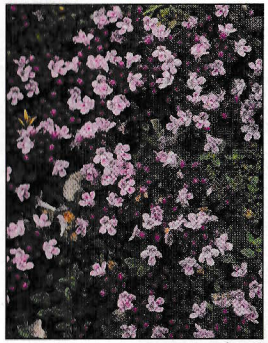

THYME HP

Very decorative low growing herb with lovely flavour. Used in a whole host of dishes. Pretty pink flowers attractive to bees. Height 30cm (12").

S/C 450 80245 £2.00

THYME, CREEPING HP

Once established it needs very little attention - a trim perhaps once or twice a year at the most - and, of course, you can use those trimmings in the kitchen.

S/C 200 80246 £2.00

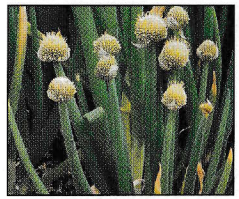

TREE SPINACH Chenopodium giganteum A

Vigorous plants with smooth stems striped red and green, producing large leaves of a brilliant magenta colour and eventually bearing long spikes of tiny reddish flowers. The young leaves are covered with a pink crystalline powder looking just like glitter and are very tasty eaten as a baby leaf, or cook older leaves similar to spinach. Can grow 6-8 ft tall. Decorative in containers on the patio.

S/C 250 80267 £2.00

WELSH ONION HP

Like chives the leaf is used for flavouring. Mild onion taste but much bulkier than chives. Height 50-60cm.

S/C 250 80051 £2.00

HORSERADISH THONGS

Home-made horseradish sauce - once you have made it yourself, you will never buy from the shop again! Five thongs once established will give you enough to supply you all the year round.

Delivery date end March early April. Last orders please, 28th February.

5 thongs 91030 £11.00

HERB COLLECTIONS

Individual foils of **5 different garden herbs**, ideal for adding fragrance to the herb garden and a variety of flavours to dishes. 1 each of Thyme, Mint, Sage, Chives and Oregano Greek

80266 £4.35

www.kingsseeds.com

Kale (Borecole)

An ideal vegetable for winter greens. Extremely hardy plants producing tasty leaves which should be picked when young and tender. Sow seeds thinly in a well prepared seed bed 1.5cm (1/2") deep from May to June. Alternatively sow the seeds thinly in seed trays or modules under glass at 13°C. Transplant to their final planting positions in June or July 45- 60cm (18-24") apart and 60cm (24") between the rows to grow on to maturity. The first young leaves should be ready to harvest from September or November depending on variety.

OLDENBOR F1

The most up to date Breeding in Curly Kale, offering a good size leaf with much **improved winter hardiness** compared to other varieties. Outstanding flavour and a longer harvest period from September right through to late February.

S/C 30 10613 £2.30

REDBOR F1

Deep red densely curled leaves for autumn to early winter maturity. Tall plants with open habit.

S/C 50 10607 £3.25

WINTERBOR F1

A hybrid variety bred for its winter hardiness. Produces a mass of dark blue/green heavily curled leaves for late autumn and winter cutting.

S/C 50 10604 £2.40

HERITAGE VARIETY

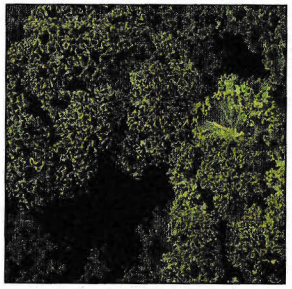

COTTAGERS P

A fine Heritage variety - put back into seed production by Kings Seeds due to increased popularity in growing kales. Cottagers has unusual green/purple leaves, is extremely hardy, providing a tasty supply of leaves throughout the winter and unlike other kales, a secondary crop of tasty side shoots up the stems in early spring. Originated from a cross between a kale, brussels sprout and then recrossed with purple sprouting broccoli. *This breeding was found of interest by Charles Darwin and mentioned in his writings of the Gardeners Chronicle of 1860, and in his book "Animals and Plants under Domestication" in 1868.*

S/C 50 10612 £2.20

DWARF GREEN CURLED

Very frizzy curled deep green leaves held on plants 50-60cm tall which need no staking. The older larger leaves will be more bitter so best to use only young leaves.

S/C 425 10602 £2.00

EMERALD ICE

Ornamental looking but has the best eating quality of all kales and is starting to appear in supermarkets. The textured, ruffled leaves develop a striking contrasting white centre as they mature and have a very sweet flavour. Even the leaf stalks are very sweet and have the crispest texture. Ideal used for baby leaf, and suitable for multiple cuts prolonging the harvest period.

S/C 20 10611 £2.75

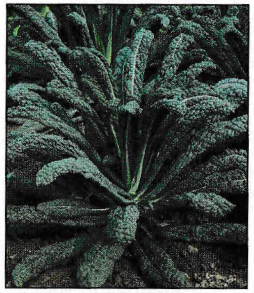

MIDNIGHT SUN

Stunning ornamental looking variety, starting to appear in supermarkets with a deep red textured leaf and a striking pink mid vein. Suitable for multiple cuts, and is very versatile. One of the best varieties for use as a baby leaf kale but also works well as a mature plant

S/C 20 10610 £2.75

NERO DI TOSCANA

An Italian type of curly kale sometimes known as Black Russian or Cavolo Nero. Tight, long and heavily blistered leaves of dark green.

S/C 175 10606 £2.00

RED RUSSIAN

Large flat, tooth edge leaves with deep purple veins. Very tender and full of flavour to use raw in salads or cooked. Hardy and stands for a long time.

S/C 150 10608 £2.00

SCARLET

Violet-green leaves that turn violet-blue after the first frost. A mid to late season variety. *Highly frost* 80-120 cm (32-48") tall.

S/C 200 10609 £1.70

Kohl Rabi

A member of the brassica family. The stem just above ground level swells to form the vegetable. The flavour is not unlike a turnip but milder. Sow seeds from March to June into shallow drills 1.5cm (1/2") deep in rows spaced 30cm (12") apart. Alternatively sow two seeds per cell in modules under glass at 13°C. Outdoor sowings should be thinned out to 15cm (6in) apart and grown on to maturity. Modules should be thinned to one seedling per cell and gradually harden off before planting out to the same spacings as detailed above. Harvest when young from the size of a golf ball up to the size of a tennis ball from June onwards.

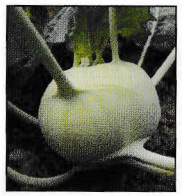

BALLOT F1

An early variety with blue stems which is intended for spring and autumn growing. Good bolt resistance. 75-80 days from sowing to harvest.

S/C 30 12407 £2.20

KORFU F1

A very early hybrid variety suitable for forcing and for all year. Bolt resistant and quick to mature. Globular stem which is light green, good quality tender flesh. 75 to 80 days from sowing to harvest.

S/C 50 12406 £2.30

GREEN DELICACY

Pale green skin with pure white flesh. Fine texture and flavour when harvested the size of a tennis ball. Earliest of all.

S/C 500 12401 £1.95

KOSSAK F1

A giant variety that is capable of easily producing swollen stems 20cm (8in) across and up to 4kg in weight. Despite its size it remains tender and has an excellent sweet taste cooked or raw and it keeps a good structure and flavour even when very large. Has been grown for use in a heavyweight class up to 15kg. Can also be stored in a cool environment for up to four months.

S/C 30 12408 £2.50

PURPLE DELICACY

Later and hardier than its green counter-part. Deep purple skin with white to light green flesh. Also at its best when harvested young.

S/C 500 12402 £1.95

SUPERSCHMELZ

This giant tender flesh, white and light green variety can reach 8kg without becoming stringy. Slow to bolt.

S/C 130 12405 £2.50

Order line: 01376 570000/572456

Leek

Not only is the leek a well known tasty winter vegetable but its root system has the added advantage of improving heavy soils. Leeks are in the ground for quite a long time and do take a fair amount of hard work but are well worth the effort and it is not surprising that they will be found on every vegetable plot. Early sowings can be made under glass in January or February at 14C. Sow the seed into pots or trays and cover the seed with a sprinkling of compost or vermiculite. Once early sowings have germinated transplant into individual pots and grow on under glass until April before moving to a cold frame to harden off before planting out at 25-30cm (10-12in) apart in the row and 45cm (18in) between rows. Outdoor sowings can be made March to April, sowing the seed thinly, 1.5cm (1/2in) deep in drills 30cm (12in) apart. Water ground regularly, especially during dry periods. Once leeks are large enough to handle, carefully lift plants and transplant to the same spacings as above using a trowel or dibber, and water in. If using a dibber do not fill in the hole but water in each hole to settle plants in. To increase the length of blanch gradually earth up the plants as they grow, taking care not to allow any earth between the leaves. Earthing up should be complete by October. Winter varieties can be left in the ground as they are very hardy.

AUTORA F1

Perfect for all soil types, uniform bulb free stems of early maturity from October to end of January. **Foliage shows some good rust tolerance.**

S/C 50 12526 £2.65

BATTER F1

An outstanding main crop variety, with a good length clean white shank and strong green foliage. Shows good tolerance to rust and resistance to thrip damage. Stands well, keeping in good condition over a long harvest period.

S/C 50 12525 £2.65

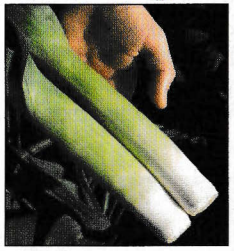

BELOW ZERO F1

Pure white stems with dark leaves that stand well over a long period without bolting. *Rust resistant with extreme cold resistance.*

S/C 75 12522 £2.95

OARSMAN F1

Medium to dark flag leaf, the plants remain *virtually free from bolting* even when direct drilled.

S/C 75 12521 £2.95

BLUE SOLAISE

A traditional French variety with deep blue-purple leaves. Very very hardy. Produces good size white stems of outstanding flavour.

S/C 225 12508 £2.15

GIANT WINTER

Excellent late variety with fine, long, white stems which will stand in the ground for a long time.

S/C 500 12503 £2.15

JOLANT

Can also be used as mini veg

Very early variety with a mild flavour. Use for mini-veg or grow on to harvest from August onwards. Grows vigorously and gives a high-density stem.

S/C 100 12518 £2.65

LYON

Uniform habit produces long thick white stems. Ideal for the showbench. Matures from early autumn onwards.

S/C 300 12510 £2.15

EXHIBITION

MAMMOTH BLANCH

A superior exhibition variety with extra long white blanch and thick,broad flag. Sow at 15°C. Do not overwater seedlings as this may cause damping off. Harden off and plant out from early May.

S/C 75 18163 £3.05

EXHIBITION

MAMMOTH POT

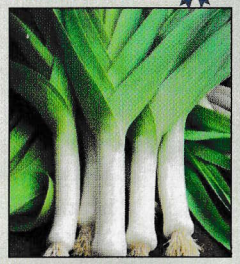

A true exhibition variety producing very large, heavy leeks.

S/C 75 18164 £2.90

STAR BUY

MUSSELBURGH

Strong growing habit with thick stems.Very winter hardy, ready from November onwards. Outstanding flavour.

S/C 425 12506 £1.75

Large grower pack

S/C 2,000 12507 £4.95

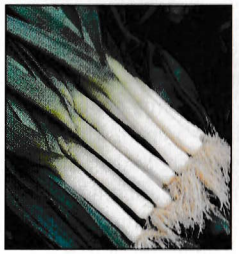

PORBELLA

An outstanding garden variety with excellent winter hardiness and *good resistance to rust*. Produces good yields of sturdy, pure white, thick stems with dark green leaves. Ready for harvesting from October to February.

S/C 300 12524 £2.50

TADORNA

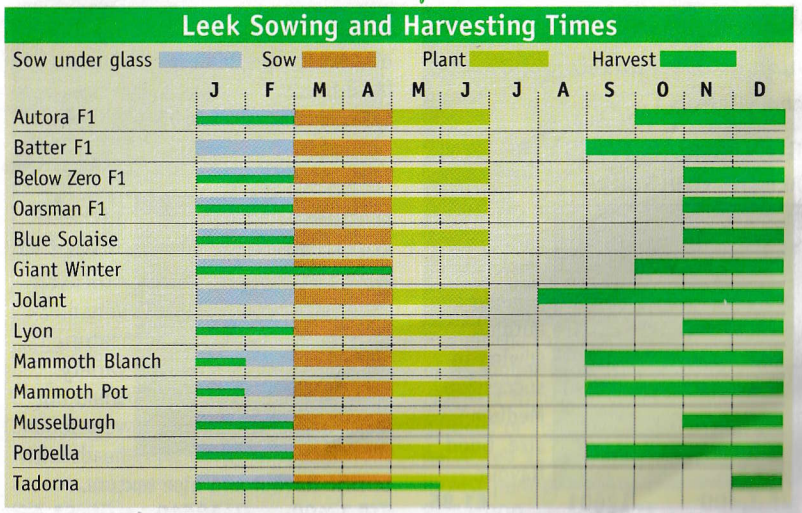

Medium length, very upright habit and extremely winter hardy. Crops from December to March.

S/C 250 12520 £2.60

Kings say... "leeks are a good spirce of folic acid, potassium and vitamins.

Leek Sowing and Harvesting Times

Lambs Lettuce

See Salad Leaf on pages 58

Lettuce

Sowings can be made under glass from February. Sow seeds into pots or trays of seed sowing compost at a temperature of 15-20°C and lightly cover seeds with a sprinkling of vermiculite or compost. Sowings made underglass can be pricked out into individual pots or module trays and grown on until ready to harden off and plant out into the vegetable plot 30cm (12") apart between the plants and the rows. Alternatively sow seeds from April thinly along rows 1.5cm (1/2") deep direct in the vegetable plot. Seedlings sown direct outside can be thinned once large enough to handle to 30cm (12") apart. Thinnings can also be transplanted into other rows, watered in well during hot dry spells. Early and later sowings can benefit from cloche protection. A handy tip if sowing seeds during hot weather, place the seed packet in the fridge overnight and sow the next day. This cooling down of the seeds will help improve germination.

Kings say... "lettuce is high in anti-oxidants, folic acid and vitamin C."

BUTTERHEAD TYPES

ALL THE YEAR ROUND

A superb variety for spring, summer and autumn sowing in succession. Medium size. Good flavour.

S/C 1,400 12601 £1.85

EXHIBITION

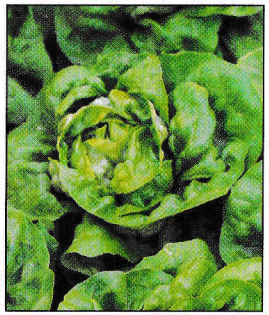

ANALENA

Voluminous heads have a wonderful fresh green colour with excellent flavour. Stands well over a long period without bolting. Impressive and outstanding variety.

S/C 300 12651 £2.15

BUTTERCRUNCH

Actually somewhere between a butterhead and crisphead. Soft outer leaves but with a creamy green heart of much crisper texture. Medium to large heads.

S/C 1,400 12605 £1.95

TOM THUMB

Can also be used as mini veg

Very quick maturing variety. Small but very solid heads with terrific flavour and nice texture.

S/C 1,400 12610 £1.65

CRISP AND ICEBERG TYPES

COSBERG

A unique variety offering the best of both, a cross between an Iceberg and a cos lettuce. unusual boat-shaped leaves with the taste of an iceberg the texture of a cos. Its crunchy texture is suited to salads, or leaves can be picked whole and used as serving boats for hot or cold accompaniments.

S/C 100 12680 £2.80

GREAT LAKES

Slow to bolt in hot weather

Medium to large heads with bright green leaves. Very crisp, first class quality for summer crops.

S/C 1,400 12614 £1.95

ICEBERG 4

Not the "Iceberg" found in super-markets. Large slightly open hearts with crisp leaves tinged red on the edge.

S/C 750 12615 £1.95

MINIKO

A mini Iceberg producing tasty heads 280-350g full of crunch. Ideal if short of space allowing the harvest of one lettuce per meal. Ideal for spring, summer or autumn maturity.

S/C 300 12681 £1.65

SALADIN

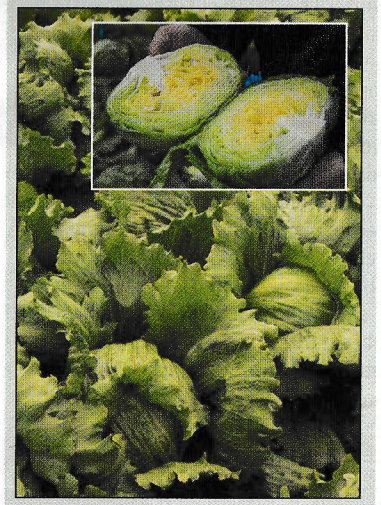

Probably the "Iceberg" on the grocer's shelf, large well wrapped heads of shiny bright green leaves. Very crisp and stands well at maturity.

S/C 1,200 12619 £1.70

NEW TO KINGS

TIMES

A compact iceberg type lettuce with a neatly wrapped solid green heads. Suitable for Summer and early autumn harvesting. Has excellent mildew resistance.

50 pills 12685 £1.90

WEBB'S WONDERFUL

Probably the most popular and widely grown of all varieties. Large frilly crisp heads. Slow to run to seed even in hot weather.

S/C 1,400 12621 £1.70

Large Growers Pack

S/C 7,000 12622 £4.00

Order line: 01376 570000/572456

COS AND SEMI-COS TYPES

NEW TO KINGS

CORBANA

A large dark green Romaine lettuce of excellent quality with crunchy leaves and juicy hearts. Ideal for Summer or Autumn cropping outdoors. (Sow March - July, harvest May to October).

S/C 200 12684 £1.70

CRISP MINT

Romaine Cos type. An old Heirloom that still has a place in the garden today. Large, succulent, mint-green bubbly outer leaves surround crystal-white hearts with a mild, sweet and crunchy flavour. Stand well in early spring or autumn.

S/C 1,000 12676 £1.85

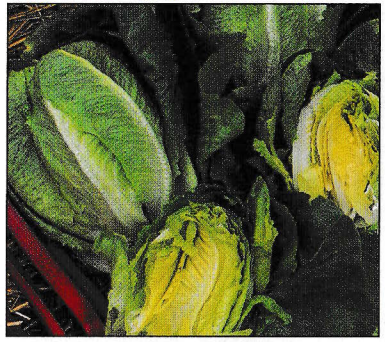

FRECKLES

A very tasty semi-cos variety with attractive spotted leaves. It *holds well without bolting*, ideal for planting in flower borders.

S/C 300 12657 £2.15

LITTLE GEM

Can also be used as mini veg

Small compact heads of bright green. Slightly more open than other varieties but outstanding for its flavour.

S/C 1,400 12624 £1.65

Large Growers Pack

S/C 7,000 12625 £4.50

SALAD BAG

Enjoy salad crops throughout the season, grow up to 8 lettuce plants in each bag. See page 126.

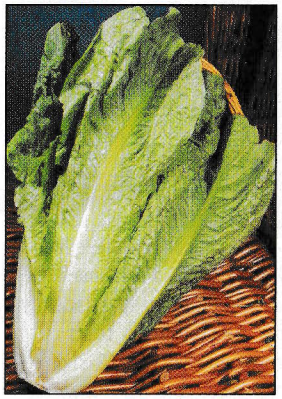

LITTLE GEM PILLS

The most popular lettuce in pill form for easy sowing.

S/C 40 12666 £2.55

LOBJOITS COS

A real old favourite. Deep green outer leaves, colour is retained in the heart. Very crisp and well flavoured. Ideal for spring and autumn sowings.

S/C 1,400 12627 £1.65

MONTERREAL

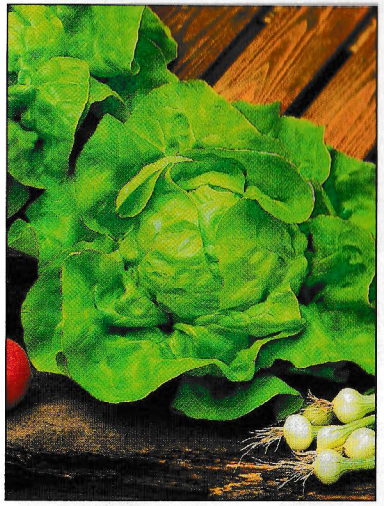

Good sized romaine cos heads with plenty of crunch and flavour. Bred in Spain, spotted in UK trials during the hot summer of 2022 and performing very well and coping easily with the heat. Shows good mildew and bolt tolerance. Ideal replacement for Claremont

S/C 750 12683 £1.85

OVER-WINTERING TYPES

All the types listed can be brought on a few weeks earlier by placing cloches over the crop in January or February.

ARCTIC KING

Very hardy butterhead type for growing outside during the winter. Compact bright green heads ready in spring from autumn sowing.

S/C 1,400 12638 £1.95

WINTER DENSITY

Outstanding winter hardiness

Semi-cos type with dark green heads with crisp leaves. Ready in spring from an autumn sowing.

S/C 1,400 12640 £2.00

WINTER IMPERIAL

Very hardy variety for autumn sowing. Butterhead type with dark green, plain crunchy leaves.

S/C 1,000 12641 £2.00

LOOSE LEAF AND SPECIAL TYPES

Most of the following varieties can also be sown and used during the winter given cold glass protection.

BABY OAKLEAF

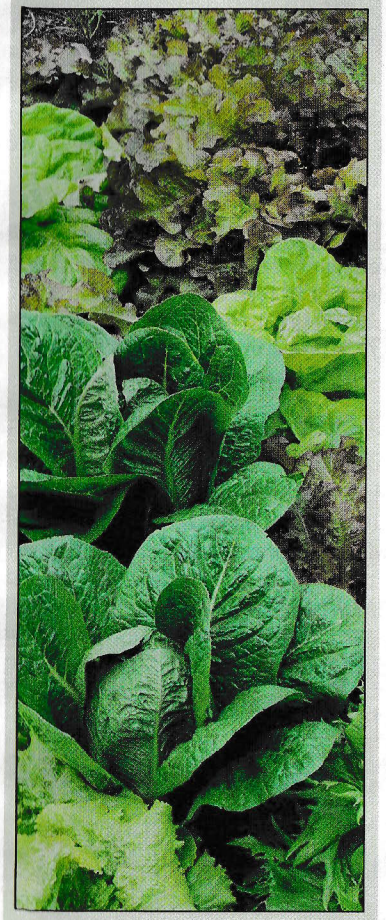

Has all the taste and beautiful texture of its bigger Oakleaf siblings in a compact form that's perfect for small gardens or containers. Leaves can be harvested as required over a long havest period. Slow to bolt.

S/C 1,000 12675 £1.95

Lettuce continued

STAR BUY
MIXED LEAVES

A good economic, single packet with a mixture of butterhead, cos, crisp and loose leaf types to give you a spread of varieties, colours and and textures in one row. Mix contains: Salad Bowl, Red Salad Bowl, Lollo Rossa, Winter Density, Little Gem, Lobjoits, Great Lakes, All Year Round, Marvel of Four Seasons and Webbs Wonderful.

S/C 1,200 12618 £1.70

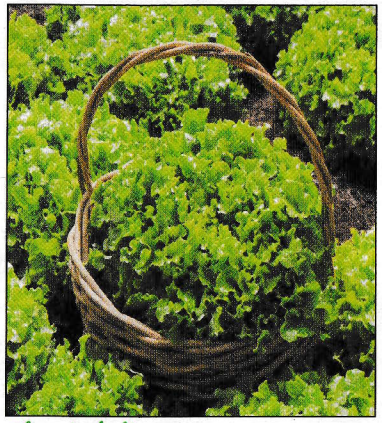

OAKLEAF SMILE

Superb in appearance with bright green colour and sweet flavour coupled with the soft delicious texture. *Resistant to tip burn and mildew.*

S/C 150 12670 £2.15

SALAD BOWL

Slow to bolt

The first of the "cut and come again" types to arrive in our gardens. Bright green serrated leaves form large heads.

S/C 1,000 12646 £1.70

Kings say... *"lettuce is high in anti-oxidants, folic acid and vitamin C."*

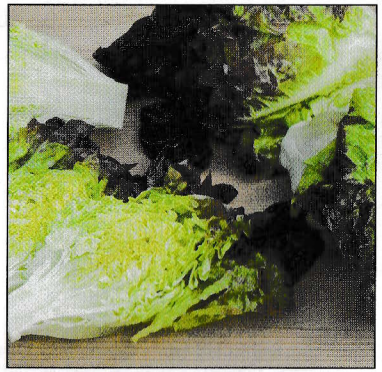

RED TYPES
ACHERITO

An attractive red small romaine/gem lettuce. Although small offers much crunch, flavour and colour to salads. Bred in Spain, spotted in UK trials during the hot summer of 2022 and performing very well and coping with the heat. Shows good mildew and bolt tolerance.

S/C 500 12682 £1.90

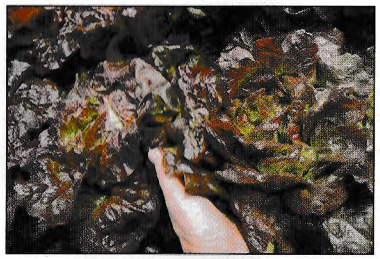

AMAZE

A red little gem with glossy maroon red external leaves and a yellow interior and a soft buttery texture. A tasty and attractive addition to salads.

S/C 300 12679 £1.70

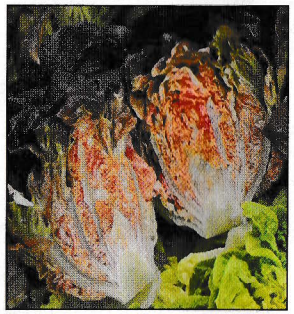

CERVANEK

An attractive pinkish/red butterhead that produces firm heavy heads with a tender, slightly blistered leaf. This versatile variety shows **good resistance to bolting** and holds its deep red hues well in sunny weather.

S/C 300 12678 £2.00

INTRED

An upright compact little gem with reddish-purple outer leaves and an appealing red heart and flavour. Ideal for adding colour to salads.

S/C 175 12652 £2.15

LOLLO ROSSA

Delightful deep red tinge over most of the loose leaves. Distinct texture.

S/C 550 12643 £1.70

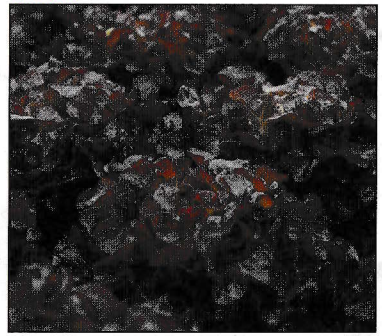

MARVEL OF FOUR SEASONS

A real stunner to add colour to a salad. Deep red outer leaves and light green at the heart. Excellent flavour. Butterhead type.

S/C 750 12607 £2.00

OAKUS

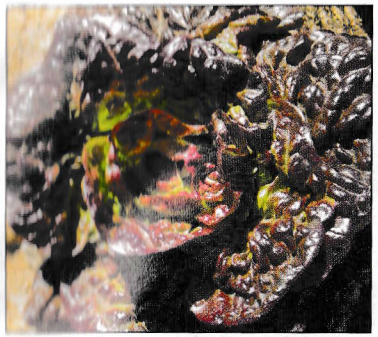

Triple red oak leaf with very deep dark red almost black leaves. Adds colour and flavour to salads.

S/C 100 12677 £2.40

Kings recommend...
when not sowing directly into your vegetable plot sow your seeds into a good quality seed sowing compost and watering only with tap water. Do not use butt water as this can contain harmful pathogens, resulting in poor germination

Order line: 01376 570000/572456

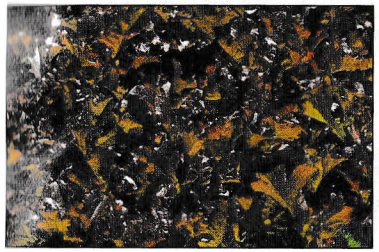

PIGALE PILLS

Stunning, very attractive, early to mature, small compact red little gems with crisp sweetheart centre. *Good resistance to bolting, tipburn and mildew.* Very sweet taste.

S/C 50 **12668** **£3.20**

RED SALAD BOWL

Sometimes referred to as Oak leaf type. Large heads made up of a mass of serrated leaves of dark red for individual picking. Ideal for "cut and come again" use.

S/C 1,200 **12645** **£1.85**

Mulch Mats

Retains moisture and warmth in the soil, protects crops from soil and rain splashes. Keeps lower leaves clean and dry. See page 127.

EASY POLY TUNNEL

Protect your lettuce from frost, harsh weather and pests. Gives that extra boost to early planting. 3 metres long x 45cm wide x 30cm high. See page 128.

Mangel

MANGELS were once grown for feeding to livestock through the winter. Now used for small scale animal feed, favoured over Fodder Beet as the texture of Mangel is softer and does not wear down the teeth as fast. Popular with wine makers for Mangel Wine. Sow in shallow drills 2cm deep with 30-40cm between rows in February and March. Thin to 30cm spacing. Water regularly and keep weed free. Lift from September.

MANGEL YELLOW ECKENDORF

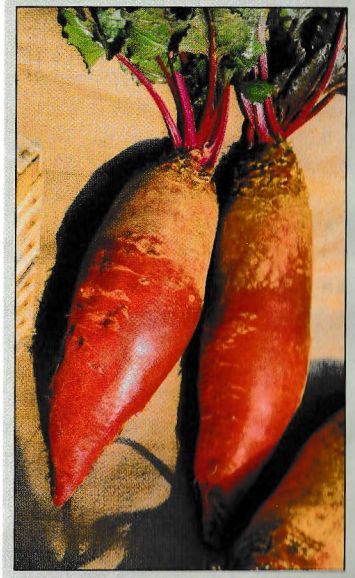

Large golden orange roots of a high quality. Stores well in frost free conditions.

S/C 300 **12701** **£2.15**

RE-INTRODUCTION TO KINGS

RED MAMMOTH

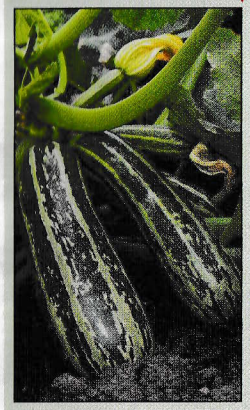

Long cylinder type with red tinted flesh. Low dry matter, with 30% of root in soil and medium size tops.

S/C 300 **12702** **£1.90**

Marrow & Summer Squash

Marrows can be cut before the first frost and stored in a frost free but cool area and used during the winter. However, unlike courgette the skin is tough and is either removed before cooking or just after. Raise and grow as courgettes (see page 20).

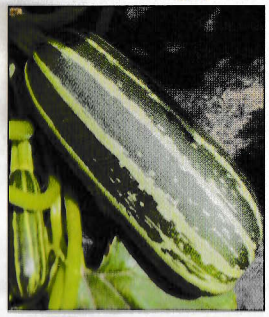

EXHIBITION
TIGER CROSS F1

Traditional looking fruit of dark green with lighter green stripes, bush habit. Can be harvested young as courgettes or left until 30cm (12") long for marrows.

S/C 10 12808 £2.15

BUSH BABY

Compact dark green fruits with a pale green stripe, ideal for growing in pots. 15-20cm (6-8") long. Very attractive when picked young as a courgette.

S/C 10 12809 £2.15

CUSTARD WHITE

Creamy white flat fruits with a scalloped edge. Bush habit. Keeps for a long time.

S/C 25 12801 £1.80

EXHIBITION
LONG GREEN BUSH 4

Has all the attributes of Green Trailing but with a bush habit for more limited space. Highly productive.

S/C 20 12803 £2.00

PATTY PAN GREENDISC F1

A high yielding scallop shaped patty pan squash with attractive medium green fruits with speckled stripy outer skins. Most tender when harvested at no more than 5-7cm in diameter.

S/C 15 12855 £2.50

PATTY PAN TWINKLE F1

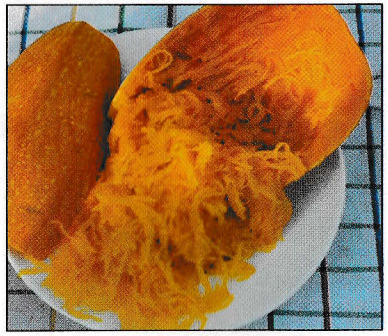

Unusual yellow Scallop/Patty pan, producing a high yeild of good quality fruit over a long picking season. Delicious harvested small or a little larger. Ideal replacement for Sunburst

S/C 6 12810 £2.65

Kings say... "squash is a good source of vitamins B1, C and anti-oxidant."

VEGETABLE SPAGHETTI

Harvest when about 20cm long, cooked whole and the flesh inside scooped out, which looks like a form of spaghetti. The plant has a trailing habit.

S/C 8 85019 £2.00

Winter Squash and Pumpkin on pages 61 - 63

Melon

From February to May sow the seed on its edge to prevent rotting at 1.5cm (1/2") deep in individual 9cm (31/2") pots under glass at a constant day and night temperature of 21°C. When the plants are about 10cm (4") tall, plant out into final positions, into large pots or growbags under glass. Provide some form of support and tie in stems. Hand pollination will be required, remove male flowers after they have been used. Melons require training, once the main stem reaches 60cm (24") pinch out the growing tip to encourage side laterals to grow. Select the four strongest laterals then pinch these out once they have produced 3 more leaves to encourage more side breaks. These side breaks should be pinched out after 2 leaves, then allow a further side break to grow and pinch out after 1 leaf.

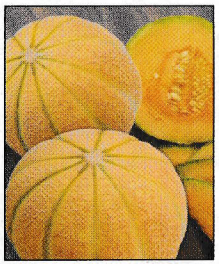

EMIR F1

Very tasty, fragrant and sweet. Tolerant to low temperatures, round to oval shape with a greyish-green outer skin colour, turning orange as it matures.

S/C 10 12906 £2.30

MALAGA F1

Clearly ribbed fruit, flesh very thick, juicy, with a sweet and aromatic taste. Deep orange inner flesh. A very heavy cropper. Good replacement for Sweetheart

S/C 20 13723 £2.15

BLENHEIM ORANGE

Old and tried variety of wonderful flavour, slightly netted skin.

S/C 10 12901 £1.95

OGEN

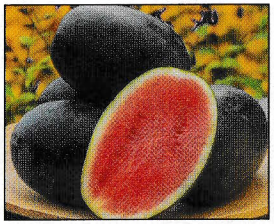

An old favourite, small 15cm (6") diameter fruits with pale green flesh and a delightful aromatic, sweet flavour.

S/C 10 12902 £2.00

Melon, Water

Not normally associated with British gardens but, given an early start, a fair summer and regular watering, good crops can be achieved. The plants have a trailing habit so need a lot of room or training around and within posts. Sow in the same way as traditional melons but start off as early as possible to get the full season of growth. Polytunnels can be used to get even better results.

LITTLE DARLING F1

A more compact variety although still trailing, producing small ruby ball shaped fruits which contain seeds but have a rich, sweet deliciously juicy flavour. Grown under glass each plant can produce three to four fruits.

S/C 6 15003 £2.30

Order line: 01376 570000/572456

CHARLESTON GRAY

Light grey green skin, marrow shaped, bright red flesh. Can grow very big in good growing conditions.

S/C 15 **15001** **£2.05**

SUGAR BABY

Sweet flesh

Small round exotic fruits about 20cm in diameter averaging 4kg in weight. Skin turns almost black when ripe.

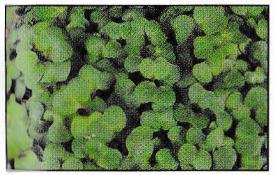

S/C 20 **15002** **£1.80**

Misticanza see salad leaf page 58

Mustard

The other half of the popular sprouting mixture "Mustard and Cress". If sowing both types you need to sow Mustard about 2-3 days after Cress to obtain sprouts of both at the same time. Sow in same manner as cress.

WHITE

Our own selection of the traditional "white" mustard. Produces crisp sprouts with a hint of spicy flavour.

S/C 2,000 **13001** **£1.80**

Mushrooms

Plug spawn
Fifty wood plugs are the perfect way to inoculate a 1m hardwood log. Your first crop will come around 1 year later. After the initial flush, harvests can appear every 3-5 months, for up to 8 years in the cases of some mushroom varieties.

Grain spawn
Use grain spawn at the ratio 1L per m2 in outdoor beds or mulching. This allows for strong colonisation and fruitful harvests. Alternatively, a 100ml bag is perfect for smaller scale projects, such as a coffee ground grow in buckets.

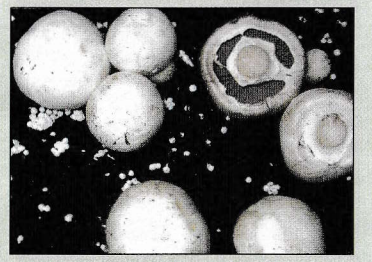

Kits
Kits come ready to go which contains the spawn fresh on arrival. They are the perfect way to make a foray into the world of mushroom growing, with clear instructions and access to many more resources.

Please visit our website for more information.

BUTTON MUSHROOMS

Button mushroom spawn promises large harvests.
Our fresh living spawn is double-tested and axenic, meaning that it is free from all other competing species. So, from the moment your delivery arrives, you can grow a guaranteed crop of button mushrooms.
A perfect venture for those looking at growing edible mushrooms naturally contain high levels of Vitamin D.

WHITE BUTTON MUSHROOMS SPAWN

The White Button Mushroom has a very gentle, classic 'mushroom' flavour. The small caps mean you can get a lot of fruit from not a lot of space. All of these versatile qualities help demonstrate what a good grow this is if you are making a foray into the world of edible mushroom growing.

1L Grain Spawn 47043 £26.99

BROWN BUTTON MUSHROOMS SPAWN

The Brown Button Mushroom is also known in its later stages about the portobello mushroom. This strain will produce small fruits, with tight dark brown caps, that have a more earthy flavour than their White Button Mushroom counterpart. They are great for slow cooking in stews or as part of a pasta dish.

1L Grain Spawn 47044 £26.99

DELIVERY ALL YEAR.
However please check guide on each variety.
Direct delivery for **all** mushrooms

Full growing instructions included with every pack.

PINK OYSTER

With a strong meaty flavour, the pink oyster mushroom is a great meat substitute that is high in protein and fibre. More resilient in the summer months, the brightly coloured caps will bring a cheerful addition to any kitchen or garden space.
Outdoor Use: Spring-Summer
Indoor Use: All year

100ml(PO)Grain Spawn 47020 £10.99
1L (PO) Grain Spawn 47021 £26.99
Pink Kit 47024 £23.50

BLUE-GREY OYSTER

A fast growing strain of the oyster mushroom, the Blue-Grey will persevere through all seasons to bring you multiple clusters of elegant, pearly grey mushrooms. With a strong earthy flavour and versatile forms, this one is a fan favourite.
Outdoor Use: Spring-Summer
Indoor Use: All year

100ml(BO)Grain Spawn 47025 £10.99
1L (BO) Grain Spawn 47026 £26.99
Blue-Grey Kit 47029 £23.50

YELLOW GOLD OYSTER

A radiant shade, the yellow caps grow tightly together bringing you a plentiful harvest. It has a slight citrus flavour, with a sharper taste profile than other gentler strains. It is ideal for summery pasta and salads, despite its ability to also grow through colder autumnal months.
Outdoor Use: Summer
Indoor Use: All year

100ml(PO)Grain Spawn 47030 £10.99
1L (PO) Grain Spawn 47031 £26.99
Yellow Gold Kit 47034 £23.50

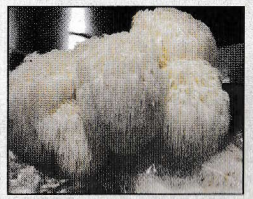

SHIITAKE

Internationally renowned for its rich taste and iconic use in gourmet dishes, the shiitake mushroom is a great addition to any grower's garden. They have potential to fruit for up to eight years in hardwood logs. **Log not included.**
Outdoor Use: All year
Indoor Use: Not suitable

50X plugs (SM). 47040 £11.99
Shiitake Log Kit(SM) 47041 £23.50

LION'S MANE

Also known as 'The Hedgehog Mushroom', this prized medicinal mushrooms' iconic white spines have a fabulous flavour. Best started in Spring or Autumn, Lions Mane fruits around summertime.
Outdoor Use: All year
Indoor Use: Not suitable

50X plugs (LM) 47042 £11.99

Okra (Bhindi or Ladies Finger)

Okra is common throughout the world. Sow and raise in the same way as aubergines. Pick the pods when they are about 7cm (3") long.

PURE LUCK F1

Vigorous and prolific

Grows to about 80-90cm so less need for support. Will produce outside in a sun trap area, flowers are stunning.

S/C 20 13102 £2.00

CLEMSONS SPINELESS

Rich green pods of an angular shape. The plants can reach up to 1.3m so some support with canes is recommended.

S/C 50 13101 £1.80

Onion, Leek and Garlic Fertilizer
A specially formulated granular fertilizer to give tastier and increased yields of quality onions, shallots and garlic. (N4 P6 K4). See page 131 for details

Onion

One of the most popular crops for the gardener. The family covers such a wide range of types from chives (see Herb section), small pickling bulbs, salad or spring onions, traditional cooking onions for fresh use and winter storage, "Japanese" varieties for autumn sowing and summer use, brown, yellow and red skinned types and as well as seed sown varieties there are sets and shallots for planting out from February for an early crop (see pages 42 and 60). Early sowings can be made underglass from December for large exhibition types and up to February for other bulbing types. Sow into pots or seed trays, and lightly cover with a sprinkling of vermiculite or compost, and place at a temperature of 14°C. Greenhouse sown seedlings can be pricked out into individual pots or modular trays. Move plants to a cold frame in April to harden off before planting outside 15cm (6") apart. Outdoor sowings can be made in April, sow seed thinly in shallow drills 1.5cm (1/2") deep, with rows spaced 30cm (12") apart. These can be gradually thinned until plants are 15cm (6") apart, then leave to mature as smaller bulbs for storing. Spring or salad onions can be sown from April direct outside as above and harvested as required without the need for thinning. Alternatively they can be multi-sown early under glass into modules and planted out and harvested as clusters. Do not sow "Japanese" varieties before mid-August and thin in the spring.

BULBING TYPES

ARMSTRONG F1

Very productive maincrop. Rijnsburger type with beautiful coloured strong skin. Excellent long keeping quality.

S/C 110 13231 £2.50

BONUS F1

An extremely uniform medium sized onion with an almost perfect round shape and medium dark skin. The sweet, mild, less pungent flesh is extremely versatile and ideal for using raw or cooked. Early maturing, showing a good tolerance to downy mildew. Ideal replacement for Golden Bear

S/C 250 13240 £3.05

EXHIBITION

FASTO F1

An early maturing variety producing attactive deep golden skinned bulbs of exceptional quality and shape. Stores well and has recently become a favourite on the Show Bench.

S/C 250 13237 £2.45

ONION MAGNATE F1

One of the deepest red onions we have ever seen and superior in colour and quality than any other red onion! Ideal for storage, producing quality bulbs up to 130g.

S/C 250 13238 £2.15

SANTERO F1

Good tolerance to downy mildew

A breeding break-through, it is one of the first varieties to be resistant to downy mildew. Globe to slightly flat shape with copper/golden skin. Main crop maturity with good yields and stores well.

S/C 200 13232 £2.65

NEW TO KINGS

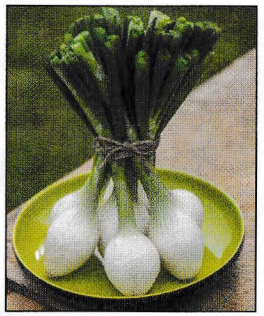

TOUGH BALL F1

A quality onion, and proven show bench winner, producing deep golden brown globe shape, uniform bulbs. Shows good tolerance to Botrytis and Downy Mildew. Can be sown August/September and planted out under cover in October for early crops or sow in January in the greenhouse and planted out in Spring.

S/C 200 13243 £1.95

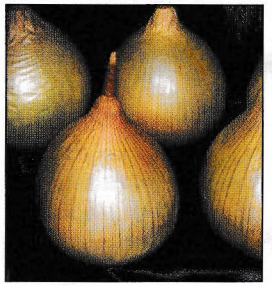

WHITE STAR F1

Three types of onion from one sowing, the perfect multi-purpose onion. Ideal to produce continental sized salad onions or if left to mature snow-white bulb onions, plus the thinned onions can be used as spring onions. Versatile and full of flavour.

S/C 500 13242 £2.15

AILSA CRAIG

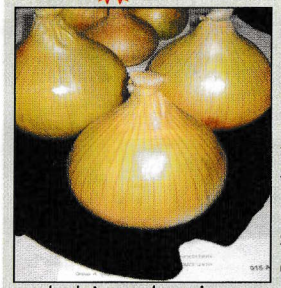

Large globe shaped bulbs with mild flavour and golden straw coloured skin. A good exhibition onion but does not store for long periods. Use in early winter.

S/C 400 13201 £1.85

EXHIBITION

GLOBO

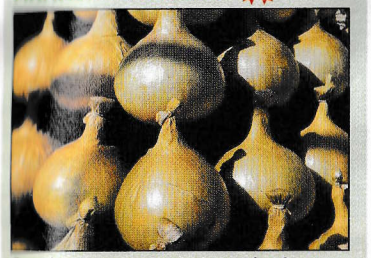

Large straw coloured onion which is tasty raw in salads or cooked A regular winner on the **show bench**.

S/C 250 13233 £2.65

Order line: 01376 570000/572456

EXHIBITION
MAMMOTH IMPROVED

Can be grown to over 2.5kg in weight. Sow late December to late February at 15°C. Do not overwater. Harden off seedlings for planting outdoor from mid-April.

S/C 100 18105 £3.20

EXHIBITION
MAMMOTH RED

Largest red onion in cultivation. Excellent flavour and keeps well.

S/C 100 18168 £3.20

RED BARON

Beautiful deep blood red colour with slightly flattened globe shaped bulbs that will keep into the new year. Late main crop maturity with good skin and thin necks.

S/C 250 13227 £2.05

RED BRUNSWICK

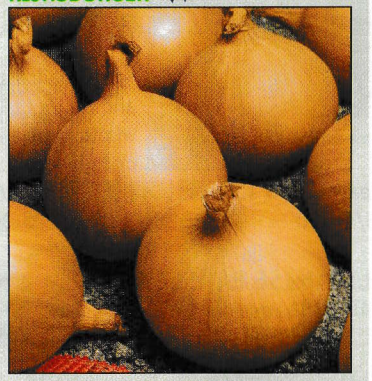

Excellent flavour

Late maturing semi-flat bulbs of dark red. Medium to large in size. Very decorative, fresh in salads or cooked with pasta. Ideal for long term storage.

S/C 275 13223 £1.70

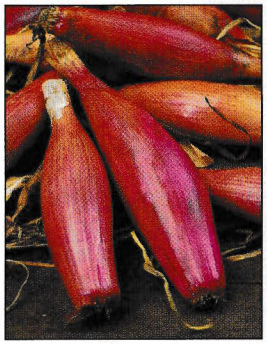

STAR BUY
RIJNSBURGER

Excellent Dutch variety producing large globular bulbs. Golden skin with solid white flesh. Stores very well.

S/C 400 13207 £1.65

ROSSA LONGA DI FIRENZE

Traditional torpedo shaped red onion from Italy. Good size bulbs with deep purple-red colour.

S/C 250 13224 £2.00

TOSCA

Unique torpedo shaped onion with yellow-ish brown skins. Suitable for winter storage. Ideal if looking for a smaller, easier to prepare onion for the kitchen.

S/C 250 13235 £1.75

RE-INTRODUCTION TO KINGS
WALLA WALLA

This American Heirloom, produces large round bulbs full of sweetness and crunch but very few tears, due to its mild taste and lower aroma compared to other onions. Delicious and sweet from the first bite when eaten raw in salads or sandwiches.

S/C 200 13244 £2.50

JAPANESE ONIONS
Over-wintering types

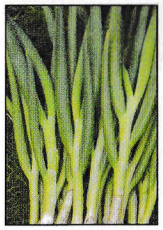

SENSHYU YELLOW

Heavy yielding variety for August sowing and June harvesting. Semi-globe shaped bulbs with golden skin and white flesh.

S/C 150 13213 £1.90

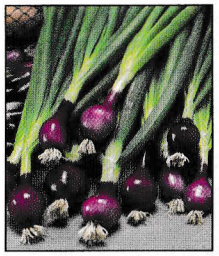

SALAD AND PICKLING ONIONS
GERDA

Very versatile, one of the few all year round spring onions. Sow from March to early September. Dark erect leaves with bright white shanks. A mild onion flavour which is highly versatile in the kitchen, either raw or cooked in salads and stir fries.

S/C 500 13241 £2.00

LILIA

Shiny intense red inner core with dark green leaves. Stunning addition to salads. Can also be grown as a main crop. Mild tasting.

S/C 500 13234 £2.15

LONG WHITE ISHIKURA

Japanese bunching type of onion. Long white stalks with short green tops. Looks almost like a young leek. Does not form a bulb. Fine mild flavour.

S/C 300 85017 £1.90

NORTH HOLLAND BLOOD RED

Rich crimson outer skins and round generous bulbs. Eat them raw or roasted. Can be used as a salad onion. An excellent companion plant with carrots to help deter carrot fly. Plant in Spring for large onions, or Autumn for salad onions.

S/C 250 13230 £1.70

PARIS SILVERSKIN

Can also be used as mini veg

Dual purpose. If you like a good size bulb on "spring" onions pull them young or leave to mature and crop as small onions for pickling. Easy to grow and matures very quickly.

S/C 500 13216 £1.70

STAR BUY
WHITE LISBON

The traditional "spring" onion. Long white stems with bright green tops which are slow to form a bulb. Mild flavour.
Sow from March to July.

S/C 800 13217 £1.70
Large Grower pack
S/C 4,000 13218 £5.00

WHITE LISBON WINTER HARDY

Variety that produces the same onion as White Lisbon but has been selected for its winter hardiness, suitable only for Autumn sowing for an early Spring harvest.

S/C 600 13219 £1.70

S/C All seed counts are approximate

Onion Sets

(for Shallots see page 60)

Available from November to March
Last order date 31 January 2025

On arrival onion sets and shallots should be laid out to prevent sweating and sprouting. Any apparent deterioration in quality should be notified to us within 7 days of receipt of goods.

RED KARMEN

Attractive red skinned flattened globe shape onion. Flesh is white with light crimson circles between the scales. Exceptionally fine sweet taste, ideal for salads or cooking. Stores well.

Approx. 500g when packed
150 sets approx 31525 £5.50

RUMBA

British bred. Improved Sturon type with improved vigour, shape and storage.

Approx. 500g when packed
150 sets approx 31523 £5.50

STURON

Excellent globe shaped bulbs with light golden skin, excellent crisp flesh and having long storage qualities.

Approx. 500g when packed
150 sets approx 31504 £5.50

STUTTGART

Semi-flat bulbs with pleasant firm texture and nice golden skin colour. Popular variety for many years.

Approx. 500g when packed
31507 £5.50

Organic Onion are in our Suffolk Herbs section pages 150 and 151.

Oriental Vegetables

The interest in what we have classed liberally as "Oriental Vegetables" increases every year. Plant spacings can vary tremendously according to what is required, for instance, White Celery Mustard (similar to a Pak Choi) can be grown closely together and picked whole as small plants, further apart for larger plants and even further apart to be used as a "cut and come again" vegetable. The vegetables are all fast growing, most produce at their best in spring, autumn and winter. The height of summer is full of traditional vegetables so that is no bad thing. They are used both raw in salads or lightly cooked for stir fry dishes and numerous Chinese meals, so they are versatile. We have tried our best with the names we have given them but within China they have various names and it gets more complicated as you travel further afield. We hope you will be tempted to give some of them a try.

CHINESE CABBAGE (CHINESE LEAVES)

Sow the seeds about 1.5cm (1/2") deep in rows 30cm (12") apart, thin to 30-35cm (12-14") apart as the seedlings grow. They can be sown in modules and transplanted 4-6 weeks later. Sow from April to July.

YUKI F1

Short cylindrical heads well wrapped and very tasty. Vigorous in habit and matures early from spring planting.

S/C 150 85005 £2.00

WONG BOK

Large barrel shaped heads with crisp light green leaves. Can be grown by broad-casting in small blocks and harvesting individual leaves.

S/C 375 30501 £2.30

CHINESE CELERY

KINTSAI

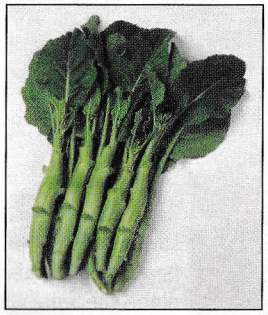

Leaves and stalks are vivid green and have a distinctive flavour and aroma. Sow anytime, fast to mature, about 2 months from sowing.

S/C 200 30603 £2.10

CHINESE KALE

Grown in the same way as Chinese Cabbage but can be closer together for harvesting young. Flower stems and leaves are used and the stem itself can be eaten but usually needs peeling and slicing.

KAILAAN

White flowered variety, the name is Cantonese for Chinese Kale. Fast growing, 60 days from trans-planting. Can be sown all through the growing season.

S/C 200 85029 £2.10

CHOPSUEY GREENS

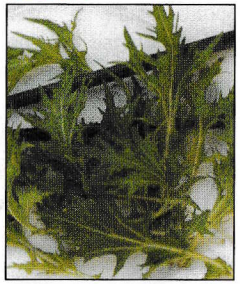

SHUNGIKU

Also known as Garland Chrysanthemum. Sow by broadcasting in small blocks, harvest when about 10cm high and cook like spinach. Sow Spring and late Summer.

S/C 500 30801 £2.10

JAPANESE GREEN

MIZUNA

Dark green leaves on long white stems. Used raw in salads or in stir fry. Sow broadcast and pull whole plants or individual leaves. Sow all year.

S/C 500 85264 £2.00

JAPANESE PARSLEY

MITSUBA

Good in cold temperatures

The leaves resemble plain leaf parsley but the flavour has hints of celery and parsley. Sow broadcast in spring or late summer, extend the season with cloches. Pull whole plants or treat as "cut and come again".

S/C 500 31001 £2.00

MUSTARD GREENS

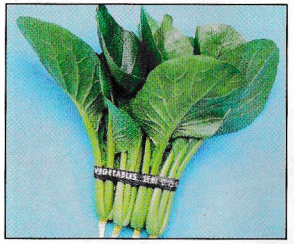

SOUTHERN GIANT

Mild flavoured, dark green, fringed leaves. Ideal for both Spring or Autumn cropping from young leaves or full plant. Very tasty greens with mild mustard flavour for use raw in salad or lightly cooked.

S/C 500 31250 £2.00

MUSTARD SPINACH

KOMATSUNA

The leaves resemble turnip leaves, spicy flavour which increases with maturity. Leaves can be used individually, seedling plants used whole or the flower stems can be picked when first produced. Fast to produce, one month from sowing. Sow spring onwards and will survive winter with some cover.

S/C 500 31101 £2.00

ORIENTAL GREENS, HERBS & OTHER VEGETABLES

BEAN (LABLAB BEAN)

A climbing plant grown as an annual, reaches about 2m. Flowers are borne in pretty spikes from white to rich purple. The pod is flat, blunt and slightly curved and is about 10cm long. Use fresh or dried, the leaves are also edible.

S/C 75 31304 £2.20

CUCAMELON

Grape-sized cucumbers with a taste of water melon and a fresh tinge of lime. Rampant trailing vines produce a constant stream of fruit throughout the summer.

S/C 20 85280 £2.25

Order line: 01376 570000/572456

EDAMAME GREEN SHELL

As easy to grow as French beans. Edamame are popular snacks in supmarket restaurants and a delicacy in Japan. Small pods contain green beans which can be cooked in the pods and popped out into your mouth to give a nutty flavoured snack. Direct drill sow in mid-May, harvest Aug/Sept.

S/C 100 **85030** **£2.55**

INDIAN MUSTARD - AMSOI

Delicious tender greens with a mustard tang for stir fry or salads. Sow June to September for autumn use and late sowings will usually survive the winter for spring cropping.

S/C **200** **31152** **£2.10**

MALABAR SPINACH SELECT GREEN (BASELLA ALBA)

A tropical edible climbing vine from Asia, very productive and vigorous best grown undercover as does not tolerate cold. Highly nutritious, fleshy, succulent leaves that can also be grown as a baby leaf. It is a tender perennial, best treated as an annual and used the same as regular spinach.

S/C 100 **14414** **£2.40**

MALABAR SPINACH SELECT RED (BASELLA RUBRA)

A red selection of this edible climbing vine, very productive and ornamental best grown undercover. Highly nutritious, leaves can be grown as a baby leaf. A tender perennial, best treated as an annual and can be used the same as regular spinach.

S/C 100 **14415** **£2.40**

YARD LONG

A type of Oriental bean, also known as Asparagus Bean. Vigorous climbing habit reaching a height of 2.5 metres. Pods are very long, (up to 45cm) round, thin and stringless, as well as being very tasty. Can be grown outside but best in large polytunnels or glasshouses.

S/C 40 **30226** **£2.25**

TEXEL GREENS

A really tasty salad green or stir fry vegetable. Fast growing and very productive for cropping throughout the summer. Mild mustard flavour.

S/C 500 **31302** **£1.95**

ORIENTAL FRUIT
CAPE GOOSEBERRY

Tall growing plant up to 2 metres high. Star shaped flowers in July and August are followed by green cyclos which turn bright orange-red when the fruits are ripe. Delicious eaten raw or made into jam. Exotic fruit.

S/C 450 **85015** **£1.95**

PAK CHOI

This group has been grown in China for about 1500 years. Used whole when young as baby leaf or grown larger for use of the individual leaves. Use raw or when cooked the flavour is slightly spicy. Space plants from 10cm apart up to 25cm depending what size plant you require. Avoid the height of summer but they grow very fast and young whole plants can be ready in about 35 days.

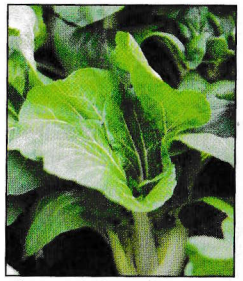

STAR BUY
GOLDEN YELLOW F1

Ideal for Micro greens or a baby leaf, producing large rounded leaves of bright golden yellow colour with a stark white stem. Ideal for adding contrast in a salad.

S/C 200 **85004** **95p**

JOI CHOI F1

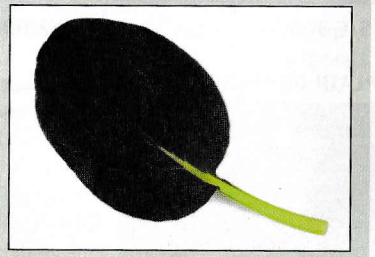

Can also be used as mini veg

Excellent variety with dark green leaves and pure white stems, *slow to bolt and has good frost resistance.* Ideal as baby leaf.

S/C 125 **85001** **£2.15**

NEW TO KINGS
PURPLE RAIN F1

Ideal for Micro greens or a baby leaf, where the very deep red, both cotyledons and true leaves show a deep purple/red colour from the start. Can be grown on to a mature Pak Choi if so desired.

S/C 150 **85006** **£1.50**

RED CHOI F1

Excellent flavour

Red-tinged leaves as the plant matures. *Good disease resistance.* Break off leaves so plant continues to grow

S/C 150 **85003** **£2.15**

SHUN LI CHOI F1

Possibly the smallest Shanghai green stemmed Pak Choi available, producing miniature Pak Choi weighing 50-75g with traditional spoon shaped petioles. The perfect baby veg or use mature whole heads in a stir fry. Plant at higher densities for baby leaf.

S/C 100 **85002** **£2.40**

YOU QING CHOI F1

Club root tolerant

Dark green leaf with the traditional cylindrical shape with "spoon" shaped petioles.

S/C 40 **85279** **£2.75**

CANTON WHITE

Known as Baby or Squat Pak Choi, with a dwarf compact habit producing short, broad, thick, pure white petioles and dark green, glossy, slightly savoyed leaves. *Good heat tolerance.* Sow from late spring to early autumn.

S/C 150 **31204** **£2.00**

GREEN

Vigorous, producing heavy yields in just 6 weeks from sowing. Smooth round leaves on pale green thick stems. Sow from late spring to autumn.

S/C 200 **31205** **£2.00**

NEW TO KINGS
SHANGHAI GREEN STEM

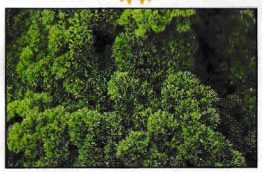

Ideal for Micro greens or a baby leaf. This non hybrid green pak choi is ideal for growing at high density, and a competitive price.

S/C 200 **85008** **95p**

Parsley

The most popular and widely grown of all the herbs, so much so that it warrants its own section. Rich in vitamins it is used raw as a garnish and in salads and added to many recipes and sauces during cooking. It can be frozen but as it is fairly hardy it is not really necessary. Early sowings can be made into pots or trays under glass at 15°C, lightly covering the seed with a sprinkling of compost. Glasshouse sowings can be pricked out into individual pots or trays and grown on under glass before gradually hardening off in a cold frame and planting out after all risk of frost has passed. Sowings can also be made at regular intervals into small pots of compost on a warm light windowsill all year round and harvested as required. Alternatively sow seed thinly April to May direct outdoors where they are to crop, 1.5cm (½") deep, into finely prepared soil. Outdoor sowings should be gradually thinned to an eventual spacing of 25cm (10").

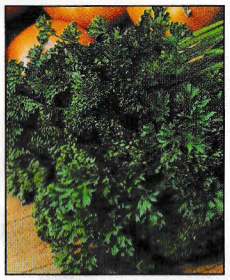

AFRODITE

Deep green upright. Extra curled. Early into production.

S/C 500 13306 £2.00

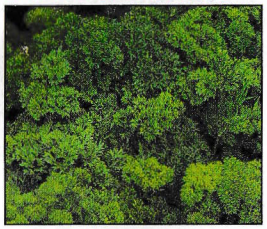

DARKI

Compact plants, ideal for pots, producing dark green leaves with dense curling on long stalks for ease of cropping.

S/C 800 13301 £2.00

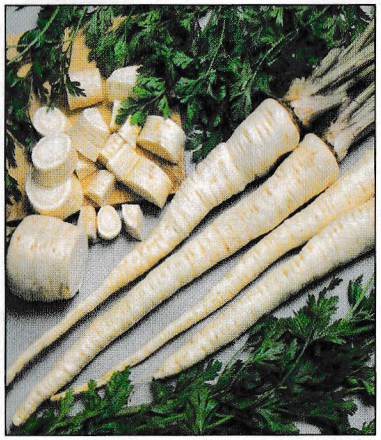

EXTRA TRIPLE CURLED

Our own selected variety giving prolific supplies of lush green leaves with heavy curling. Fine flavour.

S/C 500 13302 £2.00

HAMBURG ROOT BERLINER

Eat the leaves and the roots

A dual purpose vegetable with parsley like foliage which can be used for garnish or in dishes like parsley. Below are smooth tapering roots which can be roasted like parsnips or grated into a salad. Roots are winter hardy and can be lifted as required.

S/C 750 13303 £1.95

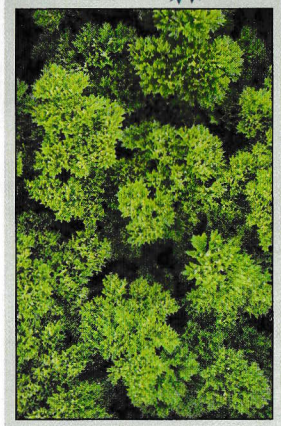

ITALIAN GIANT

Vigorous, aromatic plant with large bright green plain leaves.

S/C 450 80235 £2.00

STAR BUY
MOSS CURLED

Medium green curled leaves on long stalks, sturdy growth from good size plants.

S/C 500 13304 £1.75

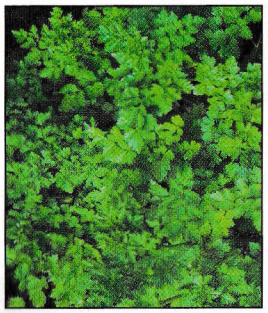

PAR-CEL

Looks like parsley but tastes of celery. Excellent for flavourings or as a salad garnish.

S/C 300 80232 £2.00

PLAIN OR FRENCH

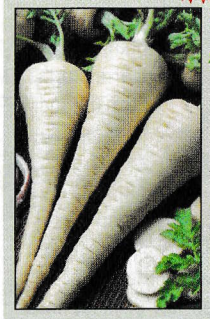

Also known as Italian Parsley. This is the variety that is used all over Europe. Flat dark green leaves with the most outstanding flavour of all the varieties.

S/C 1,000 13305 £2.00

Parsnip

A particularly British vegetable because of its winter hardiness it is now reviving thanks to more imaginative use. Roast with the Sunday joint, or par-boil, roll in flour and Parmesan cheese and roast. Sow thinly direct into the growing site from March to mid May, 2cm (¾") deep in rows 45cm (18") apart. Try to choose a stone free tilth growing site. Parsnips can take up to 8 weeks to germinate depending on soil temperatures. You are better to delay sowings if soils are wet and cold. Do not transplant seedlings. As soon as seedlings appear, they should be gradually thinned until plants are 10cm (4") apart. Hoe regularly, taking care not to damage the crown of the root. Roots can be left in the ground and dug as required from September onwards.

EXHIBITION
GLADIATOR F1

Canker resistant

Slightly larger than standard types but has refined shape of hybrid quality. Smooth white skin.

S/C 500 13412 £2.15

PALACE F1

Shallow crown

An established leader in the market place. Early to main crop with outstanding high yields. Smooth skinned roots. *Shows some resistant to canker.*

S/C 500 13413 £3.10

EXHIBITION
SABRE F1

Possibly the whitest skin seen on any parsnip. Early to mature with an exceptional skin finish and sure to become a **show bench** favourite, as it is capable of reaching 150cm (5ft) long if grown in barrels.

S/C 500 13416 £2.50

EXHIBITION
VICTOR F1

An early variety that carries its weight evenly along the whole length of its long tapering roots making it ideal for exhibitions. Already won many prizes at NVS Shows and expected to be the No. 1 parsnip grown by exhibitors in the future.

S/C 500 13415 £2.60

Order line: 01376 570000/572456

HOLLOW CROWN

A favourite for the **show bench**. Long tapering roots of nice white skin and well textured flesh. Needs good deep soil for best results.

S/C 800	13403	£1.70
Large Grower Pack		
S/C 4,000	13402	£4.40

STAR BUY
IMPERIAL CROWN

Chosen for its long smooth roots but has a small crown. Excellent flavour and texture. Good exhibition variety.

S/C 800	13404	£1.70

STAR BUY
STUDENT

Creamy flesh and smooth skin

Long slender roots with a small central core and pleasant mild flavour. One of the first cultivated varieties.

S/C 800	13406	£1.75

TENDER AND TRUE

One of the most popular varieties. Very uniform, pale coloured skin and outstanding flavour. Good choice for the **show bench.**

S/C 800	13407	£1.70
Large Grower Pack		
S/C 4,000	13408	£4.80

WHITE SPEAR

Some gardeners ask for a shorter parsnip, white spear produces smooth skinned, chunky shorter roots, but just as tasty roasted or added to winter casseroles.

S/C 500	13417	£1.85

Pea

Many young people today have never seen a pea-pod and only recognise peas if they come out of a plastic bag. This is a sad state of affairs as home-grown peas are like a different vegetable. Although peas do freeze very well, to get the sweetest flavour they require picking young and cooking within 30 minutes of harvest before the sugar has changed to starch. Only the tallest varieties require support in the form of netting, allow about the same distance between rows as the height of the variety. Regular watering is essential once the plants are in flower and pod. Two main predators attack peas when first sown, mice will steal seeds so set traps under tiles, birds delight in eating the young seedlings, either twine between sticks or best of all wire or netting covers shaped like cloches to keep them at bay. The worst pest in mature crops is Pea Moth causing maggots within the pods, spray with a suitable chemical about 7 days after flowering begins. The list has been divided into First Early, Second Early and Maincrop to help plan a succession of crops but good results can be achieved by successional sowing. Pick the pods from the bottom of the plant upwards, using two hands to avoid damage to the stem. Pods do have a habit of hiding under the foliage, seek them out as yields will be much less if pods remain on the plants to get old and large. Prepare a flat bottom drill 5cm (2") deep and 10cm (4") wide. Space seeds 5cm (2") apart throughout the drill allowing 60cm (24") between the drills, then cover over with soil and gently tamp down with the back of a rake. Alternatively very early spring sowings can be made in February or March into a length of plastic gutter or modular cells under glass and then slide the contents of gutter into a shallow drill made in the plot or space modular plants 10-15cm (4-6") apart once hardened off. If tall varieties are being grown add support as soon as possible after the seedlings appear. *Sow varieties marked* **AS** *in October and November for an early crop from May onwards.*

FIRST EARLY VARIETIES

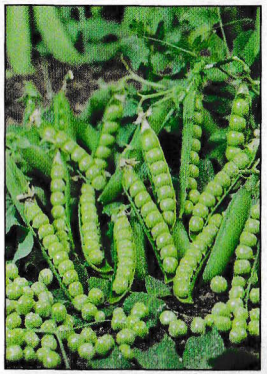

RE-INTRODUCTION TO KINGS
AVOLA

A first early freezer type, also used for fresh picking. Large seeded with full foliage. Height 60cm (24in).

S/C 250	30351	£2.50

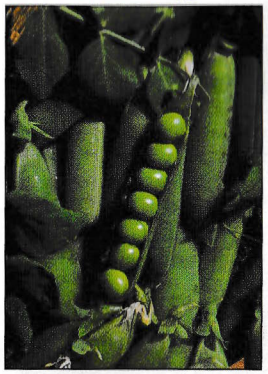

DOUCE PROVENCE AS

Early dwarf variety, with voluminous curved pods. Light green foliage with smooth dark green peas (8-9 per pod). Can also be sown as a main crop. Ideal replacement for Feltham First. Height 75cm (30").

S/C 250	30355	£2.95

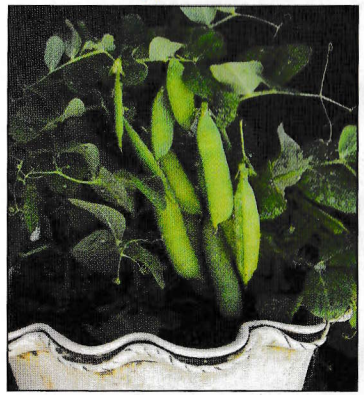

EARLY ONWARD

Blunt pods of dark green with good flavour, some 10 days earlier than Onward. The pods are well filled and prolific. Height 60-75cm (24-30").

S/C 350	30303	£2.95
1kg	30304	£6.00

HALF PINT

Also known as Tom Thumb. Very dwarf, ideal for containers. The petite plant produces full sized pods, each filled with delicious bright green peas. *Very good cold tolerance.* Height 30-38cm (12-15").

S/C 100	30358	£3.45

PEA AND BEAN WIGWAM GRIPS

Use with six canes or stakes to make a wigwam or tepee type of support. Simply push the canes in. See page 138 for more details.

www.kingsseeds.com

Pea continued

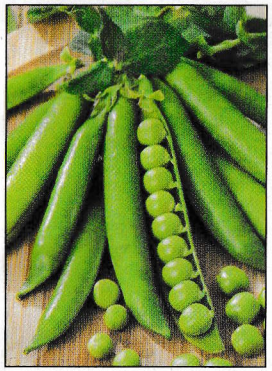

KELVEDON WONDER

Very popular variety, highly suited to successional sowing. Heavy crops of excellent flavoured small peas. Height 45cm (18").

S/C 350	30309	£2.95
1KG	30310	£6.00

METEOR AS

Very dwarf growing with small but well filled pods. Excellent flavour and ideal for exposed sites. Height 40-45cm (16-18").

S/C 350	30313	£2.95

PEA AND BEAN RING (WIGWAM CLIP)

Ideal for runner beans, peas or sweet peas. Holds 8 canes, no tying required. Will last for years.

2 rings	48150	£5.50

SECOND EARLY VARIETY

EXHIBITION

HURST GREEN SHAFT

Very popular

Heavy crops of long pointed pods produced in pairs containing about 10 peas of wonderful flavour. Height 60-75cm (*24-30"*). *Good disease resistance.*

S/C 350	30321	£2.95
1kg	30322	£6.00

MAINCROP VARIETIES

RE-INTRODUCTION TO KINGS

ALDERMAN

We are pleased to be able to once again offer this tall growing heirloom variety. Vigorous plants produce a heavy crop of long pods, each containing up to 11 large peas of excellent flavour. Suitable for use in both the kitchen or for exhibition. Height 1.5-1.8m (5-6ft)

S/C 350	30325	£2.50

NEW TO KINGS SECOND EARLY VARIETY

MINERVA (THE CARLIN PEA)

A classic drying Pea with an amazing history! Decorative purple and lilac bicoloured flowers, and unique brown coloured seeds and nutty flavour that can be used as an alternative to chickpeas or lentils. Also, popular with pigeon fanciers who feed Mapel peas (Carlins) to their birds.

Up until the late 1970's it was traditionally eaten in Northern England on the Sunday before Palm Sunday, known regionally as Carlin Sunday.

The peas were soaked in salt water bringing to a gentle heat and left to cool overnight. Then boiled again with a hint of vinegar for approx. 1 hour until soft, but not mushy. Allow to cool and serve with rum and brown sugar or alternatively douse in beer or mint sauce. Some say the tradition commemorates the arrival of a shipload of peas in besieged Newcastle in 1644 during the Elizabethan first English civil war saving many from starvation.

S/C 350	30364	£2.25

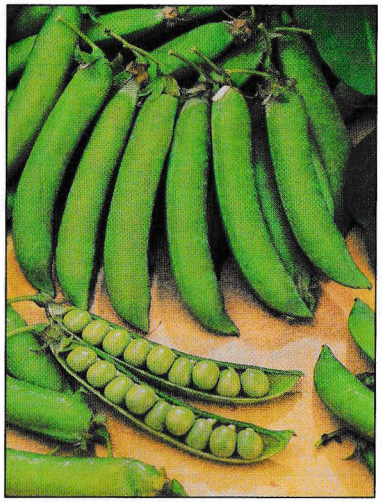

AMBASSADOR

Semi-leafless type with dark green blunt pods that have good tolerance to bad weather. *Excellent resistance to powdery mildew and fusarium wilt*. Up to 7 or 9 peas per pod. Height 75cm (30").

S/C 200	30347	£2.75

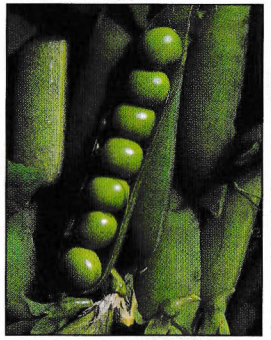

LINCOLN

A heritage maincrop variety, producing good quality slightly curved pods, each containing up to nine deliciously sweet tasting pea. Height 60cm

S/C 250	30327	£2.35

ONWARD

The most popular of garden peas. Plump blunt ended pods produced in pairs with large peas of super flavour. Height 60-75cm (24-30").

S/C 350	30333	£2.75
1kg	30334	£6.00

PURPLE PODDED

Very pretty to look at and good to eat as long as you pick them small. Tall growing plants. Height 100cm (40").

S/C 100	30354	£3.30

TERRAIN

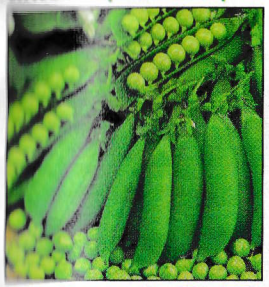

The most mildew resistant pea available

Resistant to Powdery Mildew and scores 8 out of 9 for Downy Mildew tolerance. It is a heavy cropper producing 2 pods per node, with 7-8 very sweet flavoured peas per pod. A late maincrop variety. Ideal for late summer sowing enabling peas to be picked into November. Height 90cm (36").

S/C 300	30360	£2.35

Order line: 01376 570000/572456

WAVEREX (PETIT POIS)

Can also be used as mini veg

Masses of pods are produced containing tiny incredibly sweet flavoured peas. So sweet they can be eaten raw in salads. Height 60cm (24").

S/C 200 **30335** **£3.10**

Pea Shoot, Serge

see page 59

MANGETOUT & SNAP VARIETIES

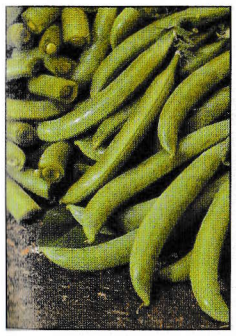

CAROUBY DE MAUSSANE

Tall growing mangetout variety with attractive purple flowers. Large pods up to 11cm long. Good sweet flavour. Height 1.5m (60").

S/C 250 **30337** **£2.95**

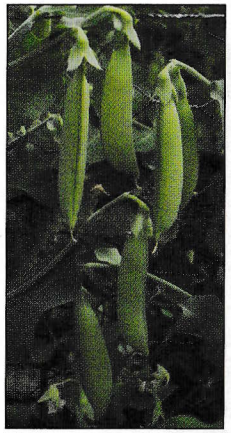

DELIKETT

This improved variety produces a high yield of 8-9cm (31/2-4") pods with excellent flavour, all on a compact plant. 65cm (26") tall.

S/C 250 **30352** **£2.95**

NAIROBI

One of the best snap peas, with sweet, crunchy pods that remain totally stringless at picking stage. Nairobi is a taller bush variety and is usually grown using a little support. The 8-9cm pods are also 1.5 cm in diameter with an attractive medium, dark green colouring. Early to mid-maturity, well yielding variety with a *high tolerance against powdery mildew*. Height 60cm (24").

S/C 250 **30361** **£2.95**

OREGON SUGAR POD

Tall growing mangetout type producing really large broad flat pods. For the sweetest flavour pick when the peas are just forming in the pod. Height 90-100cm (36-40").

S/C 250 **30341** **£3.05**

Kings fine grade vermiculite, ideal for seed sowing. See page 128.

SWEET SAHARA

A mangetout snow pea, with a very compact plant habit, making this versatile variety suitable for growing both in the garden or containers. White flowers produce a bumper crop of uniform, sweetly flavoured 8cm long and 21mm wide stringless pods at the picking stage. Height 65-70cm.

S/C 250 **30363** **£3.05**

Edamame Bean

see page 43

ASPARAGUS PEA

One of our all time favourites. Small winged pods should be harvested when about 3-4cm (1-2") long, superb flavour akin to asparagus. Will crop all summer long if picked regularly. Brilliant scarlet flowers. Needs no staking but pods camouflage well in the foliage so search well. Sow in drills 2cm (3/4") deep in May in the growing site with 35cm (14") between rows. Can be started earlier under cloches. To cook, just top and tail the pods, steam or lightly boil and serve with a knob of butter – delicious!

S/C 50 **10301** **£2.45**

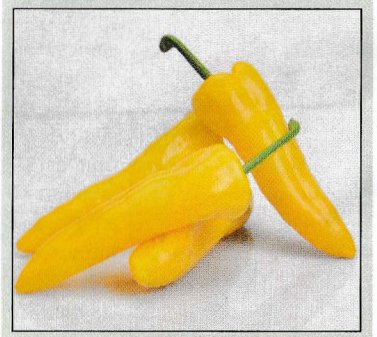

Pepper (Capsicum)

As easy to grow as tomatoes and requiring virtually the same treatment. Can be grown outside but only in a sheltered sunny position, best results are obtained in polytunnels or a glasshouse. Sow seed from February to April on the surface of a free draining compost in pots or trays and cover with a fine sprinkling of compost or vermiculite and place at a temperature 18-21°C until seeds germinate. Prick out seedings when large enough to handle into 7cm (3") pots and grow on under glass. Once plants reach 10cm (4") high transplant into growbags or 25cm (10") pots and grow on under glass. Feed once a week with tomato fertiliser when first fruits have set. To help support the weight of the crop it is best to tie plants to some canes as they grow. Fruits can be harvested whilst still green, but will eventually mature further to their final colour.

SWEET VARIETIES

NEW TO KINGS

AGUS F1

Long, straight, shiny yellow conical shaped fruits with thick flesh 14 to 16 cm long and 4 to 5cm in diameter. *Early to mature and ideal to replace Astor.*

S/C 10 **13669** **£2.60**

NEW TO KINGS

BENDIGO F1

Uniform plants producing thick walled, small blocky fruits. Ideal for growing in a heated greenhouse or polytunnel through the summer. Fruits can be harvested red or green and added to salads or stir-frys.

S/C 10 **13664** **£2.50**

BEAUTY BELL F1

Large thick walled square shaped fruits of dark green turning to brilliant red. Good flavour and very prolific.

S/C 25 **13606** **£2.50**

Organic Pepper are in our Suffolk Herbs section page 152.

Pepper continued

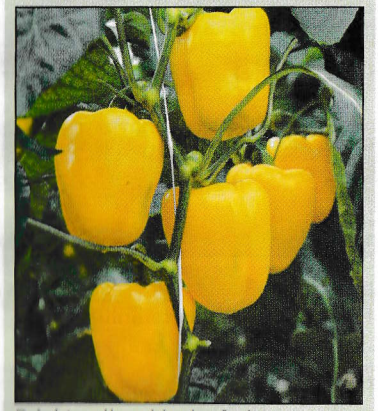

NEW TO KINGS
DELIRIO F1

A beautiful dark-orange blocky Pepper. Strong open plants produce a good crop of firm fruits with very uniform shape. Perfect for adding colour to salads or stir-frys. *Ideal replacement for Ariane.*

S/C 10 13665 £2.50

NEW TO KINGS
FIESTA F1

Bright yellow blocky fruits, on strong plants producing an early and high yield. Ideal to add colour to salads or stir-frys.

S/C 10 13666 £2.50

NEW TO KINGS
SWEET HYBRIDS MIXED F1

An attractive Hybrid Mixture of bright coloured blocky peppers, adding red, yellow, orange, purple and green fruits to salads or stir-frys.

S/C 12 13667 £2.60

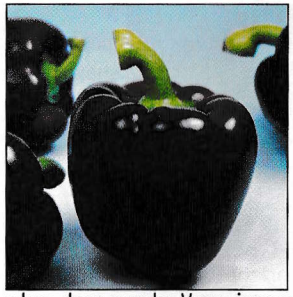

NEW TO KINGS
MARMARA F1

Smooth, shiny conical shaped fruits mature from dark green to an intense red colour. A heavy crop of fruits are 18 to 20 cm long and 5 to 6 cm in diameter, with an average weight of about 150 g. Early maturing. *Ideal replacement for Thor.*

S/C 10 13668 £2.60

MAVRAS F1

Yet another colour choice. Fruits finish a deep red but can be picked earlier when deep purple. Very vigorous and early to fruit.

S/C 10 13608 £3.00

NEW ACE F1

Very productive & early

Slightly spreading habit. Dark green fruit turning bright red as they mature.

S/C 25 13612 £2.50

RED KING F1

The King of sweet peppers, producing very large 17.8cm long and 12.7cm wide blocky fruits, ripening from green to red. Ideal for stuffing.

S/C 10 13647 £2.60

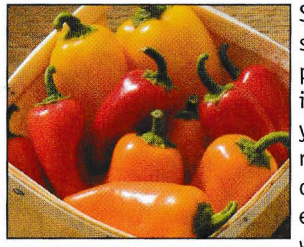

REDSKIN F1

Very dwarf, ideal for containers on a patio. Many medium size fruits slightly pointed of bright green turning to red.

S/C 10 13609 £3.15

SNACKBITE MIXED F1

Small snacking peppers in yellow, red and orange, each with a small seed cavity. Very sweet, making them ideal for eating in a salad or adding to children's lunch boxes to snack upon.

S/C 6 13638 £3.15

LONG RED MARCONI

Long thin fruits with mild sweet flavour, medium green turning deep red on maturity. Very productive.

S/C 75 13601 £1.70

NEW TO KINGS
PARAGON

The perfect variety for growing in containers under glass or outside on the patio. These compact and bushy plants are highly productive, capable of producing over ten sweet and juicy, dark green/ripening to red peppers per plant.

S/C 15 13674 £1.95

SWEET GRANOVA

A high yielding large red blocky pepper with an average fruit weight of 220g. Matures from yellow/green to red.

S/C 50 13663 £1.80

Kings fine grade vermiculite, ideal for seed sowing. See page 128.

Order line: 01376 570000/572456

INTRODUCTION
KINGS
...ONIA MIXED

...tasty mix of mini bell peppers ...40g in weight. An abundance of ...uits are produced per plant ...ening from green to orange, red ...chocolate. Fruits are sweetest ...hen fully ripe. Height 90cm.

...C 20 13646 £3.25

...IDAS

A sweet, very mild chilli bred from a cross between a bell pepper and a thick fleshed chilli and combining the best characteristics of both parents. ...ompact plants fruit early, and carry a ...uge crop of medium sized peppers with ...lovely fresh flavour suitable for ...ooking or eating raw.

...C 10 13650 £2.00

CHILLI - NO HEAT

AJI DELIGHT™

A real rarity, a Capsicum baccatum cultivar with a full baccatum flavour, but no heat. Easy to grow vigorous plants produces a huge crop of good size bullet shaped red chillies.

...C 10 13652 £2.00

BISHOPS CROWN

Exotically shaped bright red fruits, have a crisp texture, a sweet pleasant flavour and only a mild pungency. Great to eat raw as an edible decoration in salads or a cold buffet.

S/C 15 13662 £2.10

HAVANA GOLD

Early open habit plants that produce an abundant crop of rich orange, crisp, thin fleshed, chillies, quite mild with a rich, complex flavour. Excellent for eating fresh when the flavour can be really appreciated or can be dried to make a tasty chilli powder which can be used as a general condiment alongside salt and pepper.

S/C 10 13654 £1.70

TRINIDAD PERFUME

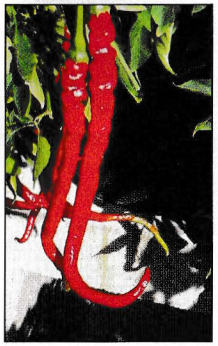

A unique, remarkable pepper which is without any heat, but has authentic Habanero flavour.

S/C 10 13626 £2.75

CHILLI HOT VARIETIES

FIERY TONGUES F1

Semi erect plants, produce up to 30cm long curly fruits, ripening from green to deep red with a glossy sheen and wrinkled tops. The fruits have some heat containing 28,000 Scoville heat units.

S/C 8 13657 £2.10

NEW TO KINGS

PIKITO F1

Compact and early fruiting capsicum frutescens type, bred for pots or patio containers, and capable of producing over 75 fruits per plant. Fruits are 5-6cm long and approx. 2g in weight, and ripen from bright green to red and have a medium-strong heat, with a Scoville heat rating of 40,000 SHU. *The ideal alternative for Apache.*

S/C 10 13671 £1.95

QUICKFIRE F1

The fastest maturing Chilli we have ever seen! Plus you can sow and grow all year round on your windowsill. Neat compact plants, can provide at least three months of small fiery red fruits if picked regularly. Sow in succession for all year round harvesting.

S/C 10 13655 £3.15

NEW TO KINGS

RAGING BULL F1

An early fruiting Chinense hybrid, producing compact plants with unique sweeter, fuller flavoured fruits of good heat. Ideal for growing in containers, producing a good yield of unusual shaped green turning to red fruits, even under cooler conditions, making this a reliable variety for growing outside on the patio. Scoville heat rating 40,000 SHU. Plant height 40cm

S/C 10 13670 £2.45

BASKET OF FIRE

Prolific compact plant dripping with small hot fruit making it ideal for containers. Fruits mature in colour from deep purple through to cream and orange to bright red. *Good tolerance to cold weather.*

S/C 10 13623 £3.15

BHUT JOLOKIA

Not for the faint hearted, measuring just over 1 million Scoville heat units. Please note this is a chinese type and takes slightly longer to germinate than other peppers so requires an early sowing and higher temperature of 27-32°C to germinate and is best grown under glass. Use sparingly and handle with care.

S/C 8 13633 £3.10

CAYANNETTA

Attractive, neat, compact, branching cayenne type chilli ideal for baskets or containers. A large crop of 10cm (4in) tapered bright red fruits sit under the showy leaf canopy. A sister line to Apache but less hot at 20,000 Scoville.

S/C 6 13653 £2.55

Chilli Hot Varieties contined

DEMON RED

The ideal variety to grow on the windowsill or patio. Very dwarf plants that produce bright red fruit which are very hot.

S/C 15 13620 £3.45

FIERY FLAMES

Compact plants 30-35cm tall make a stunning patio plant, capable depending on pot size to produce up to 50 fruits per plant. Each 3cm fruit ripens from dark green to bright red, full of flavour and a strong heat up to 86,000 Scoville heat units.

S/C 20 13656 £2.10

GOURMET JALAPENO

A very popular and versatile Mexican chilli which can be eaten both green and red, and when ripe can remain on the plant for several weeks without deteriorating. The thick walled fruits are moderately hot, and are often stuffed with cream cheese before being cooked. Produces a good crop over a long season.

S/C 20 13658 £1.70

HABANERO ORANGE

Fiery hot and very pungent and used a lot in West Indian sauces. Small tapering fruits of 5cm in length range from dark green to pale orange when ripe. Best grown under cover.

S/C 50. 13604 £2.15

HOT THAI

Very compact, productive and highly ornamental. The pungent chillies are excellent for drying or for chilli powder. One of the best chillies for growing in pots as the plants branch very freely, and naturally develop an attractive shape which displays the ripe green to red chillies to great advantage.

S/C 15 13659 £2.15

NEW TO KINGS

HOT POT

These compact early fruiting chilli plants are ideal for growing in containers or on the kitchen windowsill. Small 2.5 x 5cm bell shape fruits ripen from green to red, adding a spicy flavour to a variety of dishes, including as stuffed fruits. Scoville heat rating 5,000 SHU.

S/C 20 13672 £1.95

HUNGARIAN BLACK

Sturdy 60cm (24") high plants, loaded with 8cm (3") black Jalapeno shaped fruit which ripen to red. Medium hot matures about 75 days from transplanting.

S/C 10 13625 £2.50

JAZZ

A fantastic compact, dwarf, edible and ornamental chilli, only growing 25cm tall and is sure to look attractive on a windowsill. A plentiful supply of early maturing upward facing 8cm fruits that ripen from green to yellow, orange, purple and red with a spicy flavour.

S/C 10 13660 £2.00

MACHU PICHU

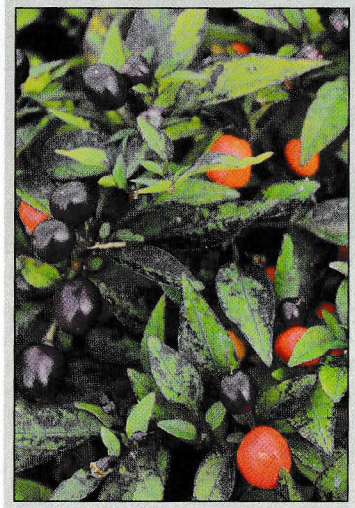

The elongated, slightly wrinkled chillies have a rich flavour and a fairly mild to medium pungency. The chillies dry well and make an excellent chilli powder, but can equally well be used fresh.

S/C 10 13648 £3.00

NEW TO KINGS

ODESSEY

Dwarf, low growing, almost trailing habit only 15cm tall, ideal for growing in containers or baskets. Eye-catching purple green foliage, purple flowers, followed by masses of small 2cm diameter round purple/black fruits ripening to red. Fruits may be small but they pack a punch with their hot spicy flavour.

S/C 20 13673 £2.50

SCOTCH BONNET RED

Not for the faint hearted although fruits are small they are very hot. Often used in Caribbean cooking.

S/C 50 13640 £2.00

TABASCO

One of the world's most recognised chillies. Fruits grow upwards rather than hang down from the stems. Colour changes from light yellow to green to orange before ripening fully red.

S/C 15 13641 £2.00

TRINIDAD SCORPION

An extremely pungent chilli when red with a strong aroma and fruits can be 750,000 - 1.4 million Scoville heat units, so please handle with care! Plants can grow very tall under glass in UK conditions. Needs warm conditions, both day and night for optimum yield potential.

S/C 10 13661 £2.75

TURKISH PICKLING

Compact, very productive plants produce very hot red chillies when ripe, but are traditionally harvested and pickled while still green and less pungent. A very popular side dish in Turkey.

S/C 10 13651 £2.1

Order line: 01376 570000/572456

Potatoes

A specially selected range, giving the most comprehensive choice of varieties and types. All seed potatoes are Scottish EXCEPT Anya, which is grown in Cumbria (part of the UK Protected Region for seed potato production). The Scottish certified seed labelled as Elite grade, size approx 35 x 55mm (varies according to variety). Sourced from Safe Haven farms reducing the risk of quarantine diseases. All packed in strong mesh nets.
Delivery approx. from **MID-JANUARY TO MID-MARCH DEPENDING WHEN ORDER IS PLACED**.
(2kg equals 15-20 tubers, 2.5kg equals 20-40 tubers - according to variety).

Radish

The thought of sowing radish seed brings back childhood memories for countless gardeners who were given this vegetable to grow as an introduction to gardening. Probably the easiest and quickest vegetable to grow. Nowadays though the range includes; Japanese or Mooli radish, the traditional winter radish and a variety grown for its tasty seed pods. Sow summer radish from March to September thinly in shallow drills 1.5cm (1/2") deep with 15-30cm (6-12") between the rows. During hot weather water the base of the seed drills first before sowing seeds and covering with dry soil. Sow a few seeds in any spare areas for a quick crop, and they will be ready to harvest approximately 4 weeks from sowing. Winter varieties can be sown in July and August and harvested as required during the winter months.

SPRING AND SUMMER VARIETIES

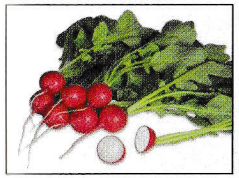

BACCHUS F1

Purple radish, with white inner flesh. Very good flavour and not too hot.

S/C 250 13724 £2.45

CRUNCHY KING F1

Outstanding deep red cherry shaped roots with pure white internal colour. Very uniform and full of flavour with a high tolerance against internal pithiness, extending the harvest period. Ideal for across the season sowings outdoors.

S/C 250 13731 £2.00

BREAKFAST MIXED

A unique 4 colour mix of French Breakfast long rooted types. Contains roots that are pure red, red with white tips, pure white and a unique purple with white tips. Ideal for adding colour and interest to salads. Mix contains varieties Forum, Slovana, Rampouch and Felicia.

S/C 500 13729 £2.15

CHERRY BELLE

Can be used as mini veg

Cherry shaped and cherry coloured. Pure crisp white flesh which is slow to go pithy and woody. Mild flavour.

S/C 1,200 13701 £1.70

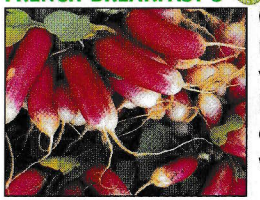

DIANA

A first, unique purple and white two toned round roots, offering a colour contrast for salads with a peppery flavour.

S/C 250 13727 £2.15

FRENCH BREAKFAST 3

One of the most famous varieties. Long roots of red with a white tip.

S/C 1,200 13702 £1.70

Large Grower Pack

S/C 5,000 13703 £4.50

MIXED

A special blend of various colours to brighten up any salad bowl. Each colour has its own distinct flavour.

S/C 1,000 13704 £1.70

MUNCHEN BIER

Plants should be about 6-8cm apart. Quickly goes up to flower and produce seed pods which should be used when green and crisp and can be snapped easily. Raw in salads or in a stir-fry. Spicy flavour.

S/C 750 85009 £2.20

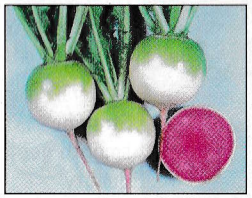

PINK LADY SLIPPER

Very attractive radish in delicate pink which really adds that little something different to a salad. Crisp, crunchy and a stunning colour.

S/C 250 13732 £2.20

RED MEAT

Large round roots with red topped white skin and delightful deep rose coloured flesh. Slice fresh or stir-fry.

S/C 150 13721 £2.20

SPARKLER

Attractive bright red round roots with a white tip. Mild flavour and crisp flesh.

S/C 1,200 13711 £2.00

WHITE ICICLE

Medium long pure white roots with crisp white flesh. Very quick growing.

Excellent sweet flavour.

S/C 1,000 85011 £2.15

Kings say... "radishes are rich in vitamin C and potassium.

WINTER VARIETIES

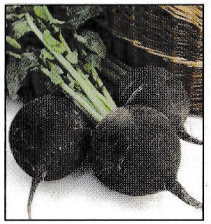

BLACK SPANISH LONG

Long tapered roots with dark brown skin and pure white flesh. Can be left in the ground and harvested in winter or stored in dry sand in frost free shed.

S/C 750 13716 £2.15

BLACK SPANISH ROUND

The round version to the above. Both have crisp tasty flesh which can be sliced or grated into winter salads.

S/C 750 13717 £2.05

CHINA ROSE

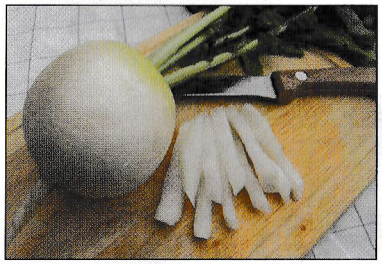

Medium large oblong shaped roots with rose pink skin and pure white flesh. Can be harvested in autumn and stored in dry sand in frost free area.

S/C 975 13718 £2.00

MOOLI VARIETIES

ACCORD (ROUND DIAKON)

A round Diakon radish, tennis ball size, with a delicious creamy texture and taste. Ideal for direct sowing from June to the end of August.

S/C 300 13726 £2.20

MOOLI

Japanese type giving long white roots with crisp flesh. Use peeled and sliced in salads or added to stir fry cooking. Sow June to September.

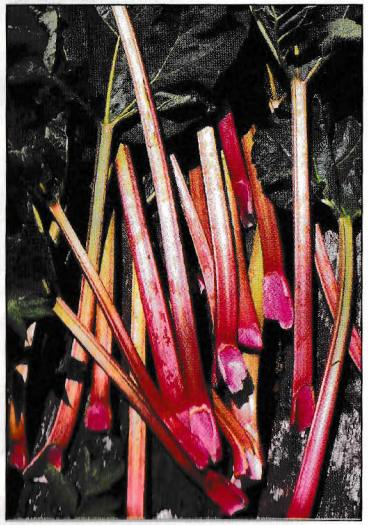

S/C 50 85007 £2.00

Organic Radish are in our Suffolk Herbs section page 152.

Rhubarb Seed

Not normally thought of as a seed raised plant but is fairly easy to grow and well worth the effort. Early sown seeds can produce plants that will crop in the first season, later sowings should be left until the following year before pulling any sticks. Sow the seeds in a seed bed 2cm deep in February to April in rows 30cm apart. Thin seedlings to 15cm apart. Lift the strongest plants with as much soil as possible 4-6 weeks later and plant out in the permanent site allowing 90cm all round. First stems should be ready to harvest from late summer, subsequent years will produce crops from May onwards.

GLASKINS PERPETUAL

Heavy cropping, large juicy bright red sticks. Very easy to grow from seed in any odd corner of the garden. Excellent for tarts, pies and jams.

S/C 40 13801 £2.00

Rhubarb crowns

see soft fruit on page 71.

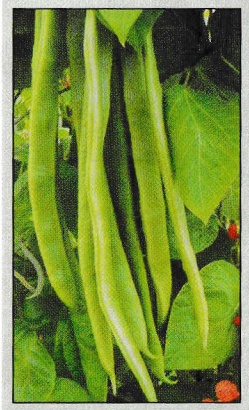

Runner Bean

Of all the different types of pulses, Runner Beans are probably the most popular for home growing. Thinking ahead will achieve the best crops, do not wait until sowing time as the most important time is the autumn.
It is then that the ground should be prepared by choosing the site and digging well and incorporating a good quantity of manure. Early sowings can be made under glass in April at a temperature of 16°C, sow 3 seeds per 8cm (3") pot filled with seed sowing compost. Seedlings sown under glass should be gradually hardened off before planting outside in late May once all risk of frost has passed.
Outside sowings can be made from May onwards into the growing site 5cm (2") deep, sowing 2-3 seeds every 20-30cm (8-12") apart.
Rows are best spaced 60cm (24") apart.
Canes are then placed at each plant leaning to form triangles and cross members are added at the top and all tied together to form one long arch which the plants can then cover.
In smaller areas the canes can be formed into wigwam shapes. Regular watering is essential once pods have started to form and no pods should be left on the plants to get old or the production of new pods will cease.
Pinch out the growing tip when the plants reach the top of the canes.
Harvesting should start in July until the frost arrives.

Kings say... "nothing is nicer than picking your own Runner Beans fresh from your own garden.

EXHIBITION

BENCHMASTER

Deep red flowers producing long straight tender pods that reach up to 40cm (16") in length. Produces an abundance of high quality beans that hang in clusters.

S/C 40 30439 £3.50

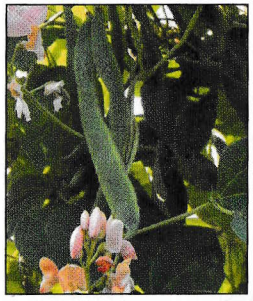

BUTLER

Vigorous growing variety producing large quantities of stringless pods with very good flavour and good length.

S/C 45 30401 £3.50

CELEBRATION

A very heavy cropper

Attractive salmon flowers. Straight, smooth good quality fleshy pods.

S/C 40 30436 £3.50

STAR BUY

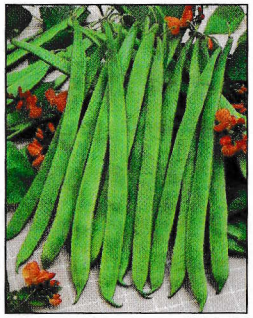

CRUSADER

Very long straight pods of top class quality and flavour. An old favourite with many gardeners because of its very reliable cropping.

S/C 35 30403 £2.75

ENORMA

Very heavy cropper, the commercial favourite. Superb flavour. Good exhibition choice. Improved long slender pods especially selected strain for quality beans.

S/C 45 30407 £3.30

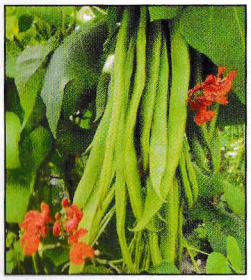

PEA AND BEAN RING (WIGWAM CLIP)

Ideal for runner beans, peas or sweet peas. Holds 8 canes, no tying required. Will last for years.

2 rings 48150 £5.50

FIRESTORM

Self pollinating

A truly outstanding self pollinating runner bean and easy to grow. Attractive scarlet flowers which produce stringless, slightly thicker, sweeter and more tender beans than other varieties. Sets well even in poor weather.

S/C 40 30438 £3.50

HESTIA DWARF

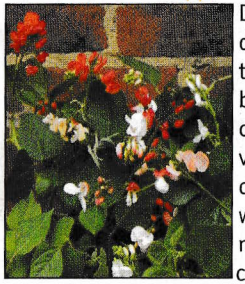

Can also be grown as mini veg

Produces beautiful red and white flowers followed by 20cm slim, stringless runner beans on bushy plants. Early to crop, often before standard types.

S/C 45 30431 £3.50

JACKPOT MIXED

Dwarf, decorative and tasty runner beans, ideal for containers in various flower colours, white, pink, red and a bi-colour. Improved cropping and bean quality when compared to other dwarf varieties.

S/C 45 30440 £3.50

Order line: 01376 570000/572456

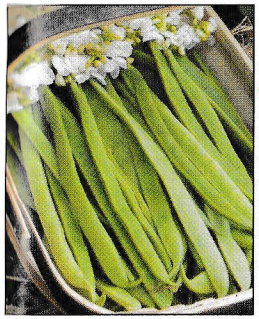

LADY DI

Attractive and first class quality as the name would suggest. Long slender stringless pods on vigorous plants. Recommended for the show bench.

S/C 45 30413 £3.45

MOONLIGHT

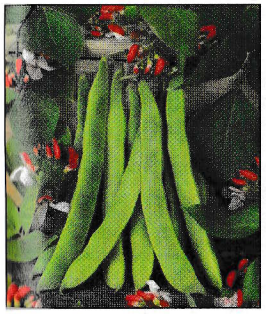

Self pollinating

White flowering, self-pollinating. Excellent flavoured pods, smooth and fleshy, approx. 23cm (9") long. High yielding. It has all the attributes of a climbing French bean plus the flavour of a runner bean.

S/C 45 30437 £3.45

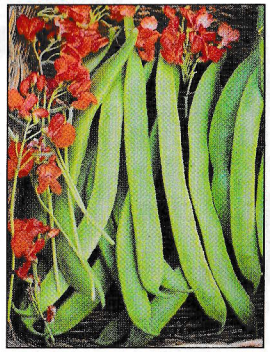

PAINTED LADY

Old variety offering beautiful white and red flowers and tender pods with particularly fine flavour.

S/C 45 30415 £3.45

POLESTAR

Stringless, bright green, smooth, fleshy pods. Early and heavy cropper.

S/C 45 30429 £3.45

PRIZEWINNER

As the name implies this variety has won many a trophy on the show bench over the years. Long pods of excellent quality.

S/C 45 30419 £3.10

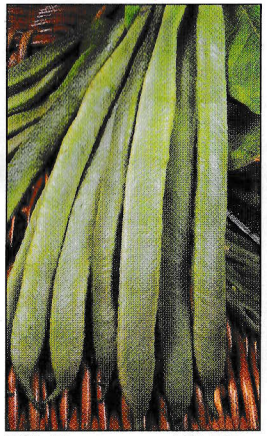

SCARLET EMPEROR

An old favourite. Early into production, shorter growing and slightly rough pod texture but outstanding flavour.

S/C 45 30423 £3.10

STREAMLINE

Reliable heavy cropping variety that has been popular for many years. Pods are long and smooth and good flavoured.

S/C 45 30425 £3.10
1kg 30426 £19.00

SUNSET

A heritage runner bean with a difference. Sunset has an unusual peachy pink flowers, followed by tasty green beans 20-25cm (8-10in) long. When in flower it looks attractive on the vegetable plot or used as an annual climber in the flower border.

S/C 40 30442 £2.75

Kings say... "runner beans are a good source of vitamin C, folic acid and iron."

RE-INTRODUCTION TO KINGS

TENDERSTAR

Unique Red and Pink bicolour flowers, producing masses of 20cm (8in) long, virtually self setting pods. Tenderstar combines the valuable characteristics of french beans with those of runner beans, resulting in extra smooth, very fleshy, stringless pods with an exceptional tender texture and true runner bean flavour, whatever the summer weather provides.

S/C 45 30441 £3.40

WIGWAM CLIPS

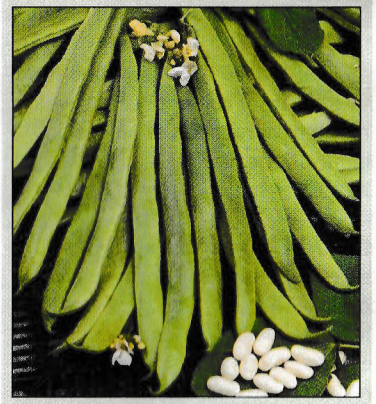

Use with six canes or stakes to make a wigwam or tepee type of support. Simply push the canes in.

Pack of 2 45972 £3.65

NEW TO KINGS

WHITE EMERGO

A very heavy cropping variety with creamy white flowers and white seeds that develop into good quality smooth runner beans 25-28cm in length of very good flavour.

S/C 45 30427 £3.20

WHITE LADY

A premier variety in every way

The long, mid-green pods with white seeds which hang in numerous clusters, and are both smooth and stringless. The result is a delicious vegetable, which can be sliced or eaten whole. The pure white flowers are less prone to being picked by birds, so the resulting crop is much greater.

S/C 45 30433 £3.10

Salad Leaf & Micro Salad

SALAD LEAF Grow your own tasty colourful salads which are full of nutrients. Cut and come again varieties can be grown in pots and tubs if space is limited.

MICRO SALAD Harvest at the seedling stage. Plant every week to ensure a continual harvest. Create your own signature blend of colours, tastes and textures. Micro salads do not store well, so serve and eat straight away.

AMARANTH, RED Leaf Calabo

The leaves become intense red as they develop. Excellent for colour in salads. It is more vigorous than the standard green type. Use leaves or as sprigs.

S/C 150 85260 £2.00

BASIL, DARK OPAL

Beautiful, deep purple, glossy leaves also look good in the flower bed. Harvest at the seedling stage for micro salad.

S/C 250 54201 £2.00

BEET, BULLS BLOOD

An impressive deep red beetroot leaf. Ideal for adding colour to salad when picked very young. The colour intensifies as the plant matures.

S/C 80 85252 £2.00

BORECOLE, RED RUSSIAN

Large flat, tooth edge leaves with deep purple veins. Very tender and full of flavour to use raw in salads or cooked. Ready in 7 to 10 days for micro salads.

S/C 150 10608 £2.00

CLAYTONIA Winter Purslane

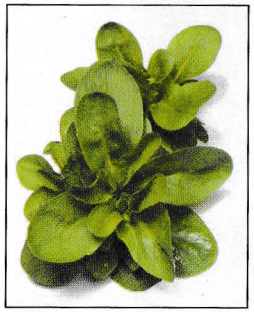

A very hardy salad vegetable also known as Winter Purslane or Miner's lettuce. Sow in rows or broadcast in July or August just covering with soil, to produce leaf from autumn and through the winter.

S/C 325 11650 £2.00

CORN SALAD GROTE NOORD HOLLANDSE

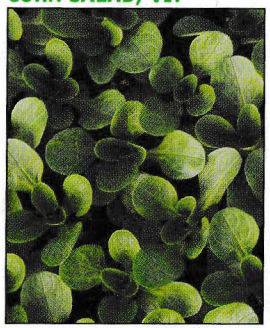

Can be grown any time of the year but most commonly sown in late summer for overwintering under cloches.

Also known as Lambs Lettuce or Mache. Large leaved variety. Very dark green leaves, can be blanched by placing a pot or box over the plant a few days before cutting.

S/C 450 11701 £1.80

CORN SALAD, VIT

Very vigorous variety for spring, autumn and will overwinter. Long glossy green leaves with delicious tender mild minty flavour.

S/C 450 11702 £1.80

KOHL RABI, PURPLE

Easy to grow indoors in containers. The attractive Kohl Rabi adds colour, texture and visual appeal to mixed salads.

S/C 500 12402 £1.80

MISTICANZA, MISCUGLIO

Mixed Italian salad of chicories including red radicchio. This mixture contains no lettuce and is ideal as a perennial mixture for cut and come again. Red radicchio can be left over winter to head up or blanched for tender pink leaves. Green varieties can be left to grow on.

S/C 750 85256 £2.00

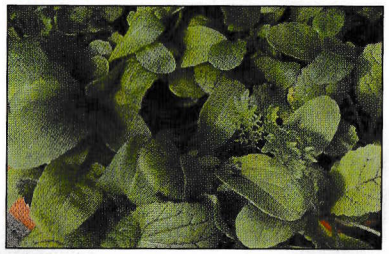

MIXED, ORIENTAL SALAD LEAVES

A mixture of Pak Choi and Mizuna to give you the taste of the Orient in your salad leaves.

S/C 200 85276 £2.00

MIXED, SPICY LEAF

Mixture of Rocket, Mizuna, etc, to give extra spicy flavour to your mixed salads.

S/C 250 85274 £2.00

MIZUNA

Dark green peppery flavoured leaves can be picked over a long period. Mizuna is *very bolt resistant*. Ideal to use in mixed leaf salads or in stir fries. Can be used all year round. Prefers fertile soil and light shade.

S/C 500 85264 £2.00

MUSTARD, GOLDEN STREAKS

Very finely serrated leaves with a good texture. It has a sweet mustard taste with a hint of new potatoes. Excellent in salads.

S/C 150 31253 £2.00

Kings fine grade vermiculite, ideal for seed sowing. See page 128.

Order line: 01376 570000/572456

MUSTARD, RED FRILLS

Superb deep red and green shoots with a mild fiery mustard flavour. Easy and fast growing.

S/C 200 85282 £2.00

NASTURTIUM, BLUE PEPE

A unique variety, small round leaves which are steel blue with purplish undersides. Fabulous peppery taste. Will also produce vivid red flowers for your salads.

S/C 20 85281 £2.00

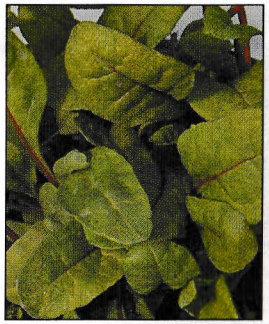

PEA SHOOT, SERGE

A vining pea that is semi-leafless and is ideal when used for sweet tasting pea shoots in salads and garnishes.

S/C 400 85284 £3.25

RHUBARB CHARD, RED

Adds colour to your salad with remarkable red mid ribs and veins, or can be grown on to use like spinach.

S/C 60 85258 £1.85

ROCKET SALAD

Adds that delicious peppery flavour to your mixed salad leaves. Use as a cut and come again. Perennial form of wild rocket.

S/C 1,000 85262 £2.00

ROCKET ASTRA

Serrated leaves that have a traditional peppery taste. Quicker and more vigorous to grow than other salad rockets, even under poor weather conditions.

S/C 500 85285 £2.00

ROCKET WASABI

"Wasabi" rocket is a new development with a flavour that's surprisingly similar to wasabi or horseradish. Compared to standard Wild Rocket, this strain is more vigorous, has a different leaf shape and is considerably more spicy. Leaves are a deep green colour and have strong texture and can be harvested for baby leaf at 30-35 days from sowing.

S/C 500 85286 £1.85

SORREL RED VEINED

Add colour with this delicious sharp lemon flavoured salad leaf. Sorrel is a perennial plant, one of the last to die down for winter and one of the first to appear in spring.

S/C 200 85278 £2.00

Salad Rape See Sprouting Seeds page 61

Salsify

It has never gained the popularity it enjoys in Europe. The roots are not unlike a thin parsnip in appearance but the delicate flavour is delightful. Easy to grow and well worth trying. Sow the seeds in batches of 3 seeds at 15cm intervals in April. Thin to single seedlings as soon as possible. Keep weed free and water regularly. Lift roots carefully from October onwards. Can be left in the ground and harvested as required through the winter.

SANDWICH ISLAND

Also called Vegetable Oyster. Light brown skins with creamy white flesh. Needs a good soil for best results.

S/C 150 14001 £1.95

HERB GARDEN NEW

- Ideal raised bed for growing daily-use herbs.
- A perfect companion for grow-your-own cooking,
- Fits on a patio or balcony .
- Waterbased preservative
- Individual liners for up to 8 different herbs
- Easy working height
- Protection from pests

See page 141 for more information.

46326 £99.00

Scorzonera

Long roots with dark brown to black skins, so it needs deep soil. The flavour is superior to Salsify and the growing method is identical.

LONG BLACK MAXIMA

Heavy yields of very long roots. Not a pretty root crop to look at but outstanding for flavour. *Some resistance to bolting.*

S/C 130 14201 £1.95

Seakale

Requires a permanent site like rhubarb. The roots are forced into growth during the winter to produce blanched stems which are steamed and eaten like asparagus.

LILYWHITE

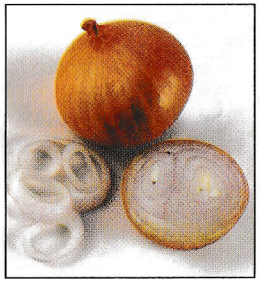

Not to be confused with Seakale Beet which is another name for Swiss Chard. This vegetable has a far more lofty pedigree.

CROP FAILURE

Shallot sets

Available from November to February
Last order date 31st January 2025
Please Note On arrival shallot sets should be laid out to prevent sweating and sprouting. Any apparent deterioration in quality should be notified to us within 7 days of receipt of goods. *Shallots have a sweeter milder flavour than onions and contain twice the amount of vitamin C. They are high in vitamin A, B & E.*

BIZTRO

Heavy cropping, improvement on Red Sun. Perfect for cooking, salads and pickled. Sweet in flavour.

500g approx 50 sets 31654 £5.50

YELLOW MOON

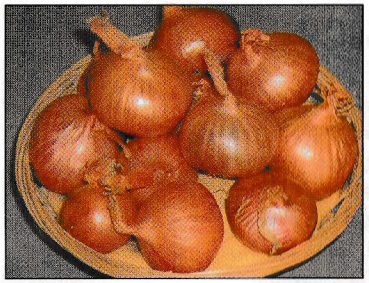

Improvement on Golden Gourmet with a higher bolt tolerance. Stores well for all culinary uses throughout the winter.

500g approx 50 sets 31601 £5.50

Shallot seed

MATADOR F1

High yielding, deep red globes

Growing from seed allows each seed to become a shallot so there is no need to break up at harvest time.

S/C 125 14200 £2.80

ZEBRUNE (BANANA SHALLOT)

Long brown bulbs tinged with pink. Best on well-drained soil in a sunny location. *Good resistance to bolting*. Sow February to April

S/C 150 14199 £2.15

Onion Sets see page 42

ONION, LEEK AND GARLIC FERTILIZER

Specially formulated granular fertilizer with essential nutrients, in the correct balance, to give tastier and increased yields of quality onions, shallots and garlic in easy to apply granules. These mini-granules are easy to apply at a rate of 50g per square metre. NPK 4-6-4.

3KG 45202 £11.00 6KG 45222 £17.80

Perpetual Spinach

See page 7

Spinach

Pick when young and add raw to salads, and as long as the leaves are picked regularly and young they will remain tender and of mild flavour. The water on the leaves after a thorough washing is sufficient for cooking them. Sow every few weeks from March onwards for a regular supply. Sow the seeds thinly 2cm deep in rows 30cm apart, thin as soon as possible to leave 15cm between plants. Water regularly. Winter varieties should be sown during August and September for spring harvesting.

COLUSA F1

A smooth leaf spinach with the highest resistance level against downy mildew in the market so far. The smooth medium green leaves have a round-oblong shape, good vigor and flavour. Ideal replacement for spinach Amazon.

S/C 200 14416 £1.80

Kings say... "spinach is a good source of vitamins A and C, lutein and dietary fibre."

MONTEREY F1

A versatile variety suitable for sowing virtually all year round, outside during warmer months and undercover during colder months. Quick growing with dark green leaves a good resistance to downy mildew, delicious added to mixed salads. Ideal replacement for Spinach Trombone.

S/C 200 14417 £1.80

GIANT WINTER

Winter variety with large dark green leaves of good flavour. *Very hardy and stands for long time* when ready. Sow July to September and harvest from October onwards.

S/C 225 14407 £1.85

SEED SOWER

Don't waste expensive seed - use this handy seed sower. It will take most sizes of seed with five hole sizes to choose from, from fine to large seeds.

46202 £4.65

MATADOR

Deep green succulent leaves for a summer long crop. Ideal for sowing in succession for a constant supply of fresh leaves. A slow bolting variety

S/C 225 14411 £1.95

MEDANIA

Can be autumn sown for spring cutting but its *slowness to bolt* means it can be sown in spring and summer and used young. Sometimes called "red rooted".

S/C 225 14406 £1.95

NEW ZEALAND

Not a true spinach. Has a dwarf and trailing habit. Pinch out the growing point to encourage bushiness. Not frost hardy. Sow April to June.

S/C 50 14404 £1.95

Order line: 01376 570000/572456

Spring Onion See page 41

Sprouting Seeds

A simple way to produce nutritious vegetables all year round. Like beansprouts there are other seeds which can be raised in the same way to give different flavours. They can be grown in the same way as Cress (see page 21) but with the following types the whole seedling is eaten. The most common method employed is to use a glass jar. Do not try to grow too much in one jar, it is amazing how much room a few seeds take up, so experiment to get the dose right. Soak the seeds overnight in tepid water after washing them. Drain the seeds and place them in a clean jar. Use a piece of muslin or old tights for a cover and secure with a strong rubber band. Fill the jar with water and then pour off leaving nicely moistened seeds in the jar. Lay the jar on its side with a small block under the solid end so any excess water gradually drains off. Keep in a warm place and repeat the wetting and draining twice a day. Insufficient water and the sprouts will die, too much retained water and mould will form and kill the sprouts. All sorts of seeds, including radish, peas, onion and mustard can be sprouted in the same way.

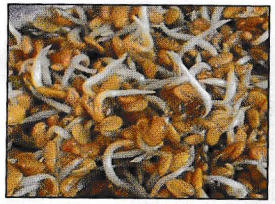

ALFALFA

The sprouts are fine like cress but taste like peas! Harvest when 2-4cm long after 4-5 days.

S/C 10,000 15101 £1.95

FENUGREEK

Spicy flavour, the seeds are used in curries. Sprouts are used in salads, stir-fry and soups. Harvest when 2-5cm long after 6-8 days.

S/C 6,000 15102 £1.95

MUNG BEAN

Popular Chinese bean sprout, white sprouts used in salads and stir-fry and numerous Chinese dishes. Harvest when 3-4cm long after 4-6 days.

S/C 900 15103 £1.95

RADISH

Grows in 4 to 5 days producing delicious radish flavour spicy shoots for salads or stir-fry.

S/C 2,000 15104 £1.95

SALAD RAPE

Add flavour to that egg sandwich or as a garnish on foods. Sow in the same way as Cress - see page 19. For sprouting in containers or in small patches outside. Sow successionally for regular supply. Ready in about 10 days.

S/C 2,500 13901 £1.95

Squash, Winter & Pumpkin

A mixture of names for similar vegetables. What they have in common is that the growing and sowing is just the same as for courgettes. The planting distances vary according to the variety and whether it trails or has a bush habit. Some of the varieties are for eating fresh and some for storing and eating during the winter months. They are all fascinating and different and will be the envy of your neighbours.

WINTER SQUASH

AUTUMN CROWN F1

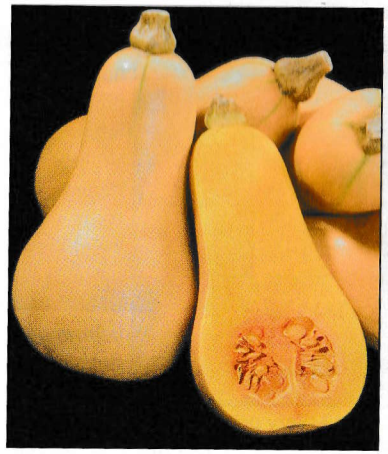

Bred specifically for the UK climate, including the North of England. It combines the best features of colour and sweet taste of a butternut type along with the familiar shape of Crown Prince.

S/C 15 12350 £2.75

If you are an organic gardener go to our Suffolk Herbs section, where you will find a wide range of organic vegetable seeds, see pages 144 to 154.

BUTTERNUT HUNTER F1

British bred for superior garden performance. Early and prolific plants produce good size fruits with sweet tasting bright orange inner flesh. Mature and ready to harvest 15 weeks from sowing.

S/C 15 12352 £2.15

Kings say... Kings say "pumpkins are a good source of vitamins A, B1, C and E."

CROWN PRINCE F1

Renowned for its eating qualities

This steel grey skinned squash with deep orange flesh will grow to about 4kg (9lbs) in weight. *It is excellent for long term storage.*

S/C 6 12348 £2.65

HONEY BEAR F1

Deliciously sturdy and tasty! The small acorn type fruits are just the right size halved for single servings.

Compact, bushy, with an average 3-4 fruits yield. *Resistant to powdery mildew.* Approx 85 days to mature from sowing.

S/C 10 12328 £2.45

SUNSHINE F1

A bright red orange skinned Kabocha type squash, with a sweet nutty flavour. String-less when baked or steamed. The flesh can be sliced like carrot stick for a tasty raw snack.

S/C 10 12329 £3.30

BLUE KURI

Unusual fruits with a blue-grey skin and deep orange flesh. *Virus tolerant* and early maturing. Small sized fruits of about 1kg in weight on plants with a trailing habit.

S/C 10 12320 £2.00

Squash, Winter & Pumpkin continued

BUSH BABY

A winter squash with small light grey fruits with orange inner flesh. Fruits vary in size from 1-4kg producing 2-3 fruits per plant. Stores well.

S/C 10 12330 £1.95

BUTTERCUP

A winter squash with delicious dense firm flesh and superb sweet flavour. Use for roasting with the joint, soups and pumpkin pie. Unusual shape with grey-green skin. Weight 1.5kg.

S/C 15 12316 £1.95

DELICATA

This type has a sweet and nutty flavour with uniform deep yellow flesh.

S/C 15 12319 £2.70

GOLDEN HUBBARD

Vigorous trailing habit producing large, slightly ridged fruits weighing up to 3kg. Orange-yellow flesh of excellent flavour. Very good for winter storage.

S/C 15 12314 £2.20

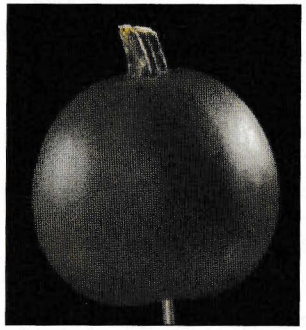

GOLD NUGGET

Early to mature these globe shaped fruit are lovely golden orange weighing up to 1kg each. Bush habit so plant at 80-90cm spacings.

S/C 15 12302 £2.20

LITTLE GEM ROLET

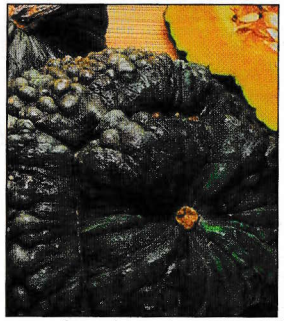

Can also be used as mini veg

Cricket ball size fruit with dark green skin. A very heavy cropper and very early to mature. Good flavour.

S/C 8 12349 £2.40

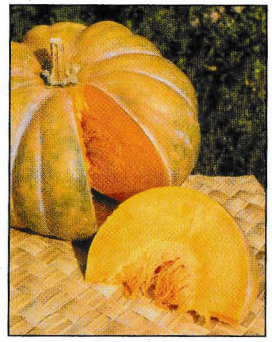

MARINA DI CHIOGGIA

Medium sized, flattened globe fruits with knobbly grey-green skin. *The fruits will store for a long time.* The delightful yellow-orange flesh improves in flavour after a few weeks.

S/C 15 12318 £2.10

MUSQUEE DE PROVENCE

Large round, semi-flat scalloped fruits weighing up to 10kg. Skin turns from green to golden brown on maturity and the flesh is a dense orange colour of excellent flavour. *Very long storage ability* and plants have trailing habit.

S/C 15 12323 £2.10

QUEENSLAND BLUE

Beautiful and tasty. The vigorous vine produces bluish-green, deep ribbed fruit, 6 to 10lbs each in approximately 100 days. *Stores well.*

S/C 15 12322 £2.55

SWEET DUMPLING

Unusual skin colouring of stripes of light and dark green and flesh of creamy orange. Best cooked whole or stuffed. Plant at 80cm spacings.

S/C 15 12307 £2.00

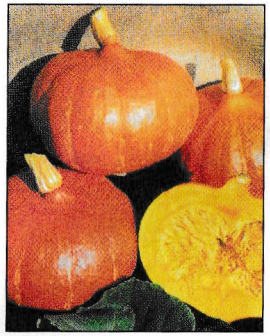

TURKS TURBAN

Shaped rather like a cottage loaf, unusual and attractive fruits are very good to eat. Perfect for stuffing and stores well. Space plants 90-100cm apart.

S/C 15 12309 £1.95

UCHIKI KURI

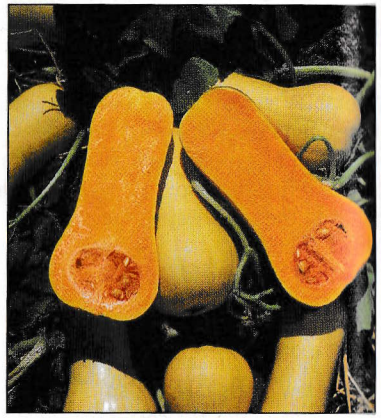

A lovely nutty flavour

Also called the onion squash because of its shape. Bright orange skin and flesh. Late summer maturity. Plants need 100cm.

S/C 15 12310 £2.15

WALTHAM BUTTERNUT

Delicious baked

Elongated pear shaped light orange golden colour with deeper orange flesh. Matures in late summer for winter storage. Delicious baked.

S/C 15 12301 £1.95

PUMPKIN

CASPERITA F1

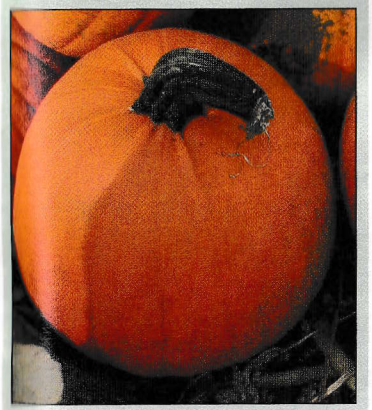

A very attractive, small white munchkin type pumpkin, producing a uniform crop of 5-10 fruits per plant each weighing approx. 750g with an excellent skin finish and strong handles.

S/C 10 18176 £3.40

Order line: 01376 570000/572456

NEW TO KINGS

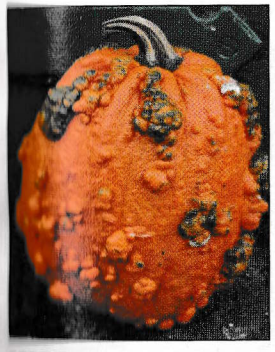

GOLD MEDAL F1

A reliable performing large orange variety, consistently producing fruits 10-12kg ready for Halloween. Ideal for carving or made into a pumpkin pie.

S/C 6 12357 £3.10

GOOSEBUMPS F1

Unusual warty skinned pumpkin, producing fruits 3-6kg in weight. Very decorative for the Halloween season.

S/C 6 12354 £2.65

Kings say... Kings say pumpkins are a good source of vitamins A, B1, C and E."

Organic Squash are in our Suffolk Herbs section page 153-154.

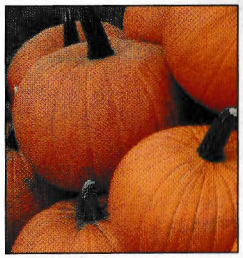

POLAR BEAR F1

Extra-large white pumpkin which retains its colour well after maturity. Fruits can reach 15kg upwards, making them popular in decorative displays.

S/C 6 12355 £3.25

RACER F1

Medium sized pumpkin with a great looking rib and big dark green handle. Vigorous and highly productive semi bush vines producing 2-3 fruits per plant 5-6kg in weight.

S/C 10 12356 £2.50

NEW TO KINGS

WICKED F1

British bred! Producing superb quality large 'monster' 6-8kg Halloween pumpkins, suited to UK conditions. Early maturing with deep orange smooth skins, that are easy to carve and delicious in a pumpkin pie.

S/C 10 12358 £2.40

BABY BEAR

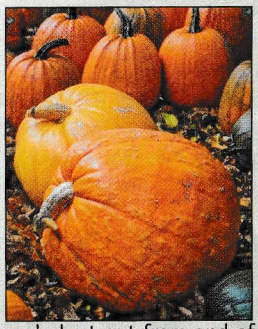

The perfect mini pumpkin. Baby Bear is small enough for children to lift themselves. Seeds are semi-hulless so are ideal for roasted snacks. A slender handle ideal for lifting the small fruits up to 1kg in weight.

S/C 10 18175 £2.10

EXHIBITION

BIG MAX

Bright orange skin and firm sweet tasting flesh. Sow early March to mid-May at 15°C and plant out from end of May in rich, well prepared ground. Will grow to a giant size.

S/C 10 18173 £3.10

HUNDREDWEIGHT

The traditional Halloween pumpkin. Can attain huge weights if grown singly. Oval to round with pinkish skin colour and orange flesh. Allow 200cm between plants.

S/C 15 12303 £1.70

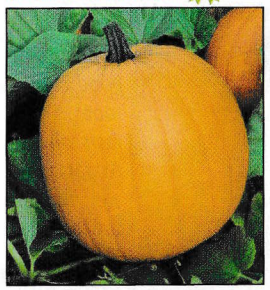

JACK BE LITTLE

Beautiful medium-orange small round flattened, ribbed fruits of 170-350g. Make the perfect serving dish for pumpkin soup once the flesh has been used. Late summer and autumn crop. Plant at 60cm (24") spacings.

S/C 15 12304 £2.10

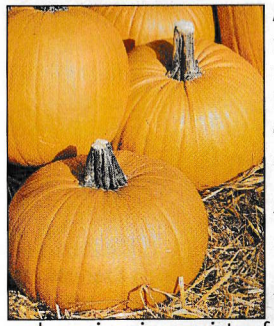

JACK O'LANTERN

Perfect size for Halloween lights. Skin is golden orange and flesh is fine flavoured and deep orange. *Stores through the winter.* Plant at 90cm (36") spacings. Ready in about 4 months from sowing.

S/C 15 12305 £1.70

TOM FOX

A well ribbed, medium to large deep orange colour Halloween type with great handles. They grow on long vines in a variety of shapes, very thick walled and heavy for their size. Size 12-24 lbs.

S/C 15 12325 £2.50

Strawberry Seed

The alpines produce a mass of tiny fruit which have a flavour all their own. Both are well worth growing. Sow the seeds in trays in gentle heat from January to April. As soon as the seedlings are large enough to handle, prick off into individual pots. Harden off as soon as possible and plant in the permanent site from March onwards.

ALPINE ALEXANDRIA

Very attractive plants producing masses of small fruits. Does not throw out runners, so remains tidy.

S/C 200 80243 £2.25

Kings say... "strawberries are high in folic acid & fibre and very high in vitamin C."

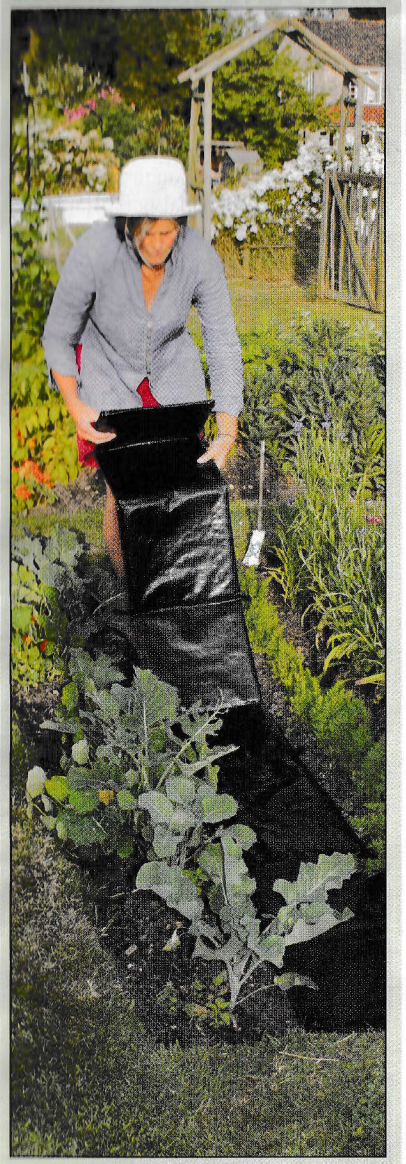

GOLDEN ALEXANDRIA

Yellow Alpine Strawberry. Yellow foliage with bright red fruit. Ideal to grow on your patio or in amongst your flower border. The fruits produce a rich sweet flavour.

S/C 200 14503 £2.90

EASY PATH

Instant fold-out pathway. Ideal for placing between rows of vegetables, herbs, flowers and fruits. Strong internal grid provides support for wheelbarrows and wellies. Easy to use and easy to store. 3m x 30cm.

46097 £12.70

Swede

Swedes are hardy winter root vegetables and are easy to grow. Sow direct outdoors in May or June into shallow drills 2cm (3/4") deep and 45cm (18") between the rows. Gradually thin the seedlings as they grow to a final spacing of 10-15cm (4-6") apart. Water regularly to avoid woody or split roots. A very hardy vegetable so can be left in the ground and harvested as required from October onwards.

SWEDE TWEED F1

Club root resistant

Vigorous growing hybrid with *good club root resistance*. Attractive well formed uniform globe shape with purple shoulders and cream flesh.

S/C 250 14606 £2.15

SWEDE MARIAN

Purple top with paler yellow flesh. Good uniform shape. Has *resistance to club root and mildew*. Stores well, frost free shed in dry sand.

S/C 900 14603 £1.70

Sweet Corn

A tender vegetable that needs a good summer to produce at its best. Given a sheltered spot and using early varieties, this delicious vegetable is now quite at home in northern counties. Early sowings can be made from April into pots or modules under glass at 21°C. These can be gradually hardened off in a cold frame before transplanting into the plot once all risk of frost has passed. Do not plant in rows, but plant in blocks, spacing plants 45cm (18") apart each way to aid pollination by wind. Later sowings can be made direct into growing site from mid-May, sowing 2 seeds per sowing station. Regular watering is important once the cobs start to form. The cobs are ready when the tassels or silks at the end turn brown. To check, ease back some husk and squeeze a kernel, if the juice is milky the cob is ready. Pick as close to cooking time as possible to get the sweetest flavour.

AMAIZE F1 SH2

Unusual cream/pale yellow kernels bred for perfect taste and texture. After many years of development the deliciously sweet kernels have an improved succulent, crunchy texture. One of the most delicious corns tasted in recent trials.

S/C 30 14726 £3.25

Sweetcorn varies in sweetness Varieties are available in three different types which, wherever possible, should be grown quite separately to prevent cross pollination which may result in tough starchy kernels in the extra sugary types.

SU Normal sugar **SE** Sugar enhanced

SH2 Super sweet with shrunken kernels - this type will need much more moisture to ensure successful germination.

EARLIBIRD F1 SH2

A breakthrough in early high quality super sweet sweet corns. Recorded as the earliest cropping sweet corn in Europe. Sweet and tasty, containing many rows of kernels per cob, full to the tip.

S/C 50 14720 £2.30

EARLIKING F1 SU

Early maturing variety, producing stocky plants, so ideal for growing in exposed areas. Early to harvest sweet cobs of a very good size. Reliable cropper.

S/C 50 14721 £2.15

GOLDCREST F1 SH2

Mid-season variety with a clean tidy habit and excellent husk protection. Outstanding sweet flavour from 19-20cm (8") long cobs with 14-16 rows of kernels per cob.

S/C 50 14722 £2.15

INCREDIBLE F1 SE

A mid-season variety. Reliable, heavy cropping and an incredible flavour! Plants show *good tolerance of common rust* helping to keep plants healthy during wet summers.

S/C 50 14723 £2.15

MIRAI PICNIC F1 SH2

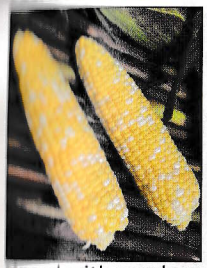

Exceptional medium sized 10-12cm cobs full to the top are packed with Super sweet kernels. Although small these extra tender cobs have the sweetest of flavour, measuring 17-18% on the Brix Sweetness scale. Delicious cooked on the barbecue or eaten raw as a healthy snack.

S/C 30 14727 £2.65

Order line: 01376 570000/572456

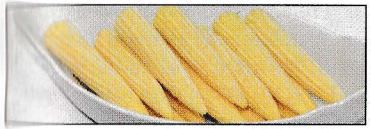

PICASSO F1 SU

One of the sweetest varieties tasted! An edible ornamental producing purple flowers and the stalks & cob leaves are also tinged with purple making them stand out on the plot or even the flower garden. Incredibly sweet tender and juicy, 20cm long bi-coloured cobs, even when eaten raw.

S/C 40 **14724** **£2.50**

SNOBABY F1 SU

Unique white 'baby corn'! Earlier to crop producing many tender and delicious 'baby corns' per plant. Delicious added to oriental cooking, stir fries or salads.

S/C 40 **14725** **£2.25**

SWIFT F1 SH2

Extra tender and sweet

A first early extra tender variety. Heavy cobs of superb taste and texture with 14 to 16 rows of golden kernels.

S/C 50 **14718** **£2.65**

MINIPOP SU

Specially bred to produce baby sweet corn so popular in stir fry and salad dishes. Plant very close together.

S/C 50 **14716** **£2.15**

Tomatillo

Hugely popular in Mexico this vegetable is part of the tomato family, grown in the same manner and is mainly used in salads and salsas giving a tarter, tangier flavour. Fresh ripe tomatillos will keep in the refrigerator for about two weeks. They will last even longer if husks are removed and stored in a sealed bag. Sow February/March.

VERDE

The deep green fruit are the approximate size of a large cherry tomato. When ripe the paper-like husk turns brown and breaks down.

S/C 40 **14750** **£2.65**

BEST SELLER

VERMICULITE

Kings fine grade vermiculite, ideal for seed sowing. An easy way to cover seeds, allowing light and retaining moisture around the seeds, improving germination, and reducing the risk of seedlings damping off. Can also be mixed into compost for taking cuttings or used for storing dahlia and begonia tubers.

5 litre **48157** **£6.50**

Tomato

There can hardly be a glasshouse in the country that does not have a few tomato plants growing in it. Nothing tastes quite like a tomato freshly picked from your own garden. The range of colours, shapes and sizes is wide as is obvious from our list of over 30 varieties. Even if you only have a window box you can produce your own tomatoes but they are not without their problems. Tomato plants are very delicate, they can succumb to disease, they need a fair amount of attention and just a smell of a hormone spray from a neighbouring garden or field can result in deformed fruits and plants - but they're still worth the effort. Most of the varieties listed can be grown outside, in greenhouses or in polytunnels. Outdoor crops will always be later to start fruiting, the best results under cover come from F1 hybrid varieties which have the best disease resistance.

Sow seeds under glass from January to April 0.5cm (1/4") deep in pots or trays of good seed sowing compost and lightly cover with a sprinkling of vermiculite or compost. Place containers in a propagator at a temperature of 18-21°C. Prick out seedlings, once large enough to handle, into 9cm (31/2") pots. Transplant to the greenhouse border soil, or individual large pots, or 3 plants per growbag when 20cm (8") high. Can also be planted outdoors once all risk of frost has passed 45cm (18") apart and 75cm (30") between rows. Some varieties will require sideshooting, removing the small shoots as they appear at the leaf joint. Stake and support plants for the best yields. Take out the growing point when plants reach the glasshouse eaves or after 4-5 trusses if growing outdoors. Water and feed plants regularly with a high potash feed once the first truss has set. Uneven watering can cause fruits to split and black blotches to form on the base of fruits - known as blossom end rot. If growing outdoors try growing one of the blight resistant varieties.

INDETERMINATE TYPES - *single stem, remove side shoots*

DETERMINATE - *bush type, do not remove side shoots*

SEMI-DETERMINATE - *similar to determinate, slightly taller, do not remove side shoots*

Kings say... "tomatoes are high in vitamin C and lycopene."

INDETERMINATE TYPES

AKRON F1

Long trusses of typically 8 to 11 deep red fruits, with good inner flesh colour and excellent flavour. The highest yielding variety in the RHS trials of 2013.

S/C 12 **14873** **£3.10**

BAUNA F1

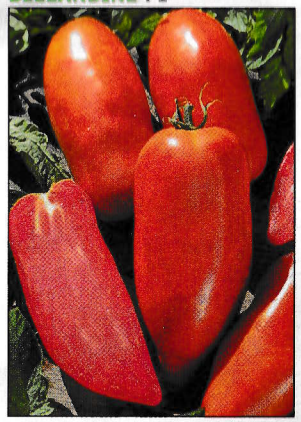

A new improved Shirley type from the same breeder, that is earlier to mature and produces a higher yield of excellent quality 95-115g fruits.

A classic round red tomato of very good flavour on balanced open plants, producing good size trusses of nicely shaped fruit. Ideal for growing under glass or in a polytunnel.

S/C 10 **18187** **£3.10**

BELLANDINE F1

Offers the divine taste of the Andes. Long plum shaped fruits of superb colour & flavour with virtually no seeds. Very productive with fruits 180-200g.

Good resistance to blossom end rot.

S/C 6 **14885** **£3.60**

Tomato continued

BIG DADDY F1

Tasty, big beefsteak. Fruits up to 425g (15oz). Large meaty red fruits with very few seeds, full of flavour. Easy to slice for a sandwich or perfect for frying.

S/C 15 14874 £2.15

NEW TO KINGS
BUFFALOPINK F1

An unusual rosy pink, large, slightly flattened and ribbed Marmande type beefsteak that is early to ripen for its size. Large fruits, 250-300g on average, but capable of reaching 750g are produced in clusters of 3-6 per truss. Delicious added to sandwiches and salads. For growing under cover or outdoors. **Shows good late blight resistance.**

S/C 6 18198 £3.65

NEW TO KINGS
BUFFALOSTEAK F1

Large, fleshy, slightly ribbed Marmande type, red Beefsteak fruits with a very good flavour and are juicy with very few seeds but firm flesh. Ideal for slicing into sandwiches or adding to salads or burgers. Fruits are typically 250-350 grams in size but capable of reaching up to 500 grams. For growing under cover or outdoors.

S/C 6 18197 £3.50

BUFFALOSUN F1

A very productive yellow beefsteak with a red flame through the flesh. Exceptional flavour and good late blight resistance so ideal for growing outside or under cover. **Blight Resistant.**

S/C 6 14886 £2.55

CHERROLA F1

A vigorous, high yielding, early hybrid variety of cherry tomato, for growing inside or out. *Moderate tolerance to potato blight.*

S/C 15 14859 £2.90

COCKTAIL CRUSH F1

A standard size red tomato with fruits weighing 35-40g, sweet to taste with a slight acid tangy flavour. Similar in habit and flavour to old favourite Ailsa Craig, ***but with the added benefit of showing good blight resistance.*** Ideal for growing outdoors or in a cold glasshouse.

S/C 10 14881 £3.10

SOLUBLE TOMATO FOOD

This soluble fertiliser for dissolving in water and watering plants will provide every major and minor nutrient in the perfect balance for tomatoes.

See page 131.

EXHIBITION

CROKINI F1

Tasty red cherry fruits, vigorous and naturally resist several diseases that affect tomatoes including Blight. Crops very well and the red Crokini fruits don't split easily. *Becoming a regular on the show bench for cherry classes and starting to pick up a few prize cards.* **Blight Resistant.**

S/C 10 14887 £2.65

FANDANGO F1

Vigorous, with heavy crops of deep red fruits up to 150g (5oz) in weight with very good flavour. **Blight tolerant and is resistant to fusarium and verticilium wilt.**

S/C 25 18181 £3.30

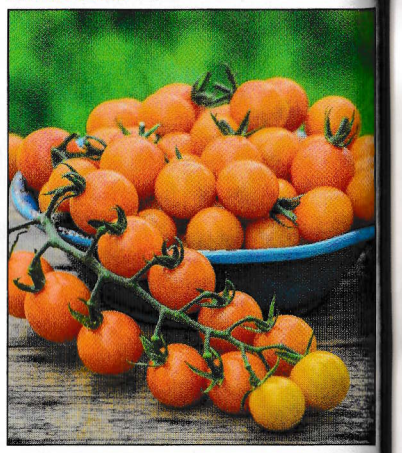

GIGANTOMO F1

Possibly the largest tomato ever. Fruits 700g-1kg in weight with excellent flavour and a single fruit can be sliced to feed the whole family. Thinning the number of fruits per truss helps to achieve mega fruits.

S/C 10 14875 £2.60

HONEYCOMB F1

An exquisitely flavoured golden-orange cherry tomato weighing on avarage 15gms, all elegantly arranged on long trusses. The exceptional flavour is a result of a high level of sweetness combined with other aromatics that provide a delightful aftertaste, somewhat like honey. Shows a good resistance to splitting unlike similar looking varieties.

S/C 12 14890 £2.15

HONEY MOON F1

A tomato with a difference, like dynamite in your mouth! Large 250-300g pink fruits are fleshy, sweet with an explosion of flavour unlike any other tomato we have tasted. Also shows **good resistance against late blight.**

S/C 6 14880 £2.65

Order line: 01376 570000/572456

EXHIBITION

MAISEY F1

Named after Charles Maisey who had so much success on the show benches over so many years. A good shaped and flavoured, round, deep red tomato with a good size calyx, already showing promise on the showbench and in the kitchen. To get the best shape and size for exhibition, trusses can be thinned down to 5 or 6 fruit per truss.

S/C 10 14893 £3.30

NEW TO KINGS

SAHEL F1

Large 125-130g red plum shaped fruits of sweet flavour with a good resistance to cracking. Plants have good vigour producing a productive crop on good sized trusses. Ideally suited to growing under cover. Delicious eaten fresh or used to create pasta sauces.

S/C 6 18199 £3.50

SHIRLEY F1

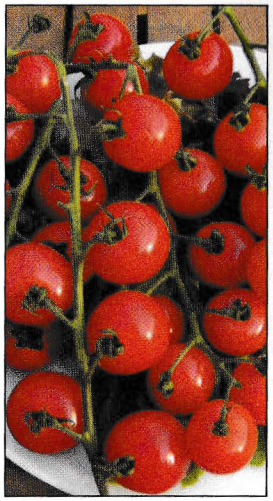

Very popular

Early into production with large trusses of medium size fruits on strong plants.

S/C 15 14821 £3.50

SWEET MILLION F1

Heavy cropper

Sweet shiny, red cherry size tomatoes which keep well over a long period. They can easily be grown on a sunny patio or in a cold greenhouse

S/C 20 14841 £2.80

VIVACIOUS F1

Introducing a superfruit break-through! Luminous orange-scarlet fruits burst wih perfectly balanced flavour and a high beta-carotene levels amounting to 50% of the recommended daily intake of vitamin A in one tomato. Attactive large (up to 120g) oval shaped fruits taste meaty, yet juicy with just the right combination of sweetness and acidity. **Delicious and nutrious: vitamin A promotes eye health and glowing skin**

S/C 15 18191 £2.25

ORANGE WELLINGTON F1

Unusual orange beef-steak, bursting with flavour. Smooth, plump and firm fruits with a dense meaty almost seedless flesh. Delicious in salads, sandwiches or roasted.

S/C 10 18186 £2.65

SANTA VICTORIA F1

Early cropping, long trusses of 15-18g red fruits with a good calyx and a very good flavour. Produces a very high yield when grown under glass. *The ideal replacement for the ever poplar Santa and Santonio.*

S/C 8 18189 £2.85

SUNGOLD F1

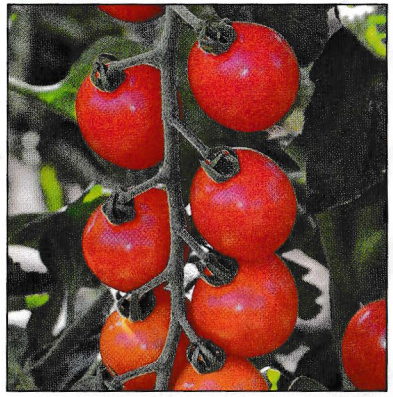

Extra sweet cherry type with many heavily laden trusses of rich orange, highly tasty fruit, from early summer to late autumn. Grow inside or out and it is *resistant to fusarium and TMV.*

S/C 10 14823 £3.20

Organic Tomato are in our Suffolk Herbs section page 154.

TODDLER F1

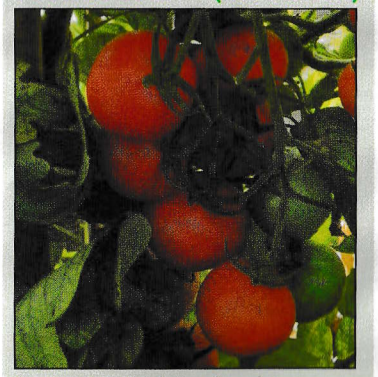

We believe this is going to become the hybrid version of Gardeners Delight in future years. Toddler is one of the most dynamic introductions for years with well proportioned long trusses that bear 12-16 mid-sized glossy red cocktail tomatoes. Crack resistant fruits are super sweet with a 10% Brix and a pleasing acid tang. **Plants have a strong package of disease resistance**, including late blight, helping provide a trouble free production all season long.

S/C 15 18190 £1.95

EXHIBITION

Y DDRAIG GOCH F1 (RED DRAGON)

A superb British bred variety, developed from crossing past show favourites Gold Star and Cedrico, resulting in outstanding quality rich red tomatoes with a large calyx. A vine ripe variety with long standing abilty, making it ideal for the show bench.

S/C 10 14883 £3.25

Tomato continued

AILSA CRAIG

A tried and tested variety renowned for its flavour. Green-back type giving good crops of medium size fruit.

S/C 75 14801 £1.85

ALICANTE

Best described as an improved Money-maker type. Heavy crops of uniform, smooth, medium size fruits of good flavour which mature quite early.

S/C 75 14802 £1.95

BITE SIZE

Very sweet tasting of great appeal to children and adults alike. Long branched trusses of small bright red cherry tomatoes 8 to 12 grams in weight with a high brix and low acidity, which stand well on the plant without splitting.

S/C 10 14882 £2.55

BLACK OPAL

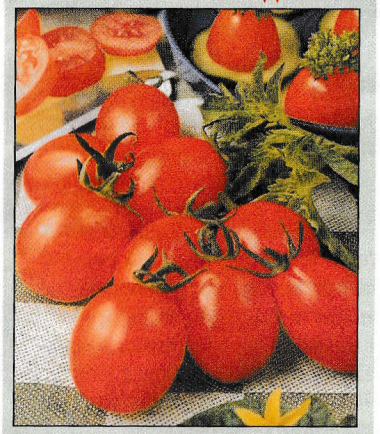

A dark chocolate coloured cherry tomato with a tangy/sweet flavour and excellent texture. Small fruits on long, branched trusses produce approx. 150-200 fruit per plant in an average growing season. *Shows good disease tolerance.*

S/C 20 14869 £2.55

EXHIBITION

BRITAIN'S BREAKFAST

Lemon shaped red fruit that does not split when ripe. Produces very large spreading trusses with sometimes over 60 fruit. Greenhouse or outdoor.

S/C 25 18178 £3.10

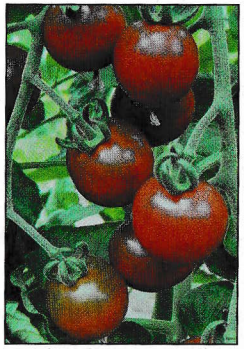

GARDENER'S DELIGHT

One of the most popular varieties producing trusses with large crops of small fruits but with outstanding flavour. Genuine seed.

S/C 50 14806 £1.95

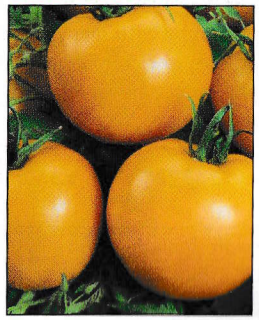

GARNET

A large cherry tomato with a fresh tangy flavour. Heavy trusses of attractive rich bronze tomatoes have an excellent balance and flavour with good resistant to cracking. Crops over a long season. Bred from the very popular Sweet Aperitif.

S/C 20 14892 £2.15

GOLDEN SUNRISE

One of the best flavoured

The golden yellow fruits are medium size, nice and fleshy.

S/C 75 14807 £1.80

STAR BUY

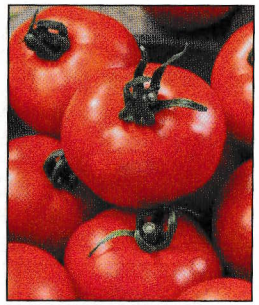

HARBINGER

Early and heavy cropping, giving good flavoured medium size fruits. Can be grown under unheated protection.

S/C 75 14808 £1.85

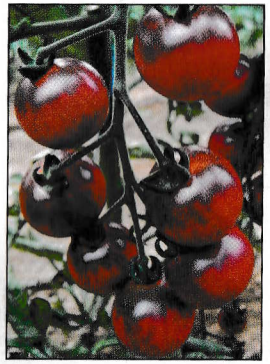

MONEYMAKER

Probably the most famous variety. Heavy crops of medium size fruit of average flavour but very reliable.

S/C 75 14810 £1.95

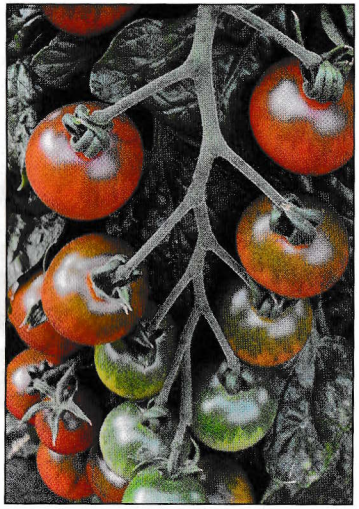

ROSELLA

Unique deep pink, cherry tomato, tasting of a blend of summer fruits.

S/C 10 14865 £2.65

RUBY FALLS

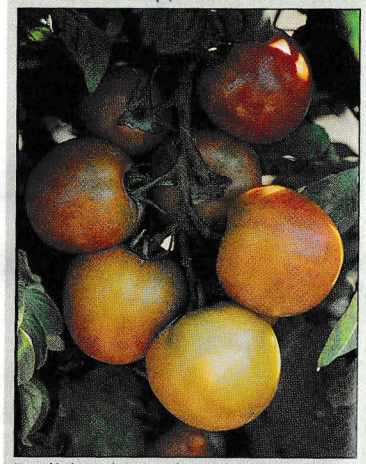

Attractive deep red cocktail tomato approximately 40g in weight with a rich flavour. Compact plants are very productive over a long picking period.

S/C 20 14894 £2.65

STAR BUY

ST PIERRE

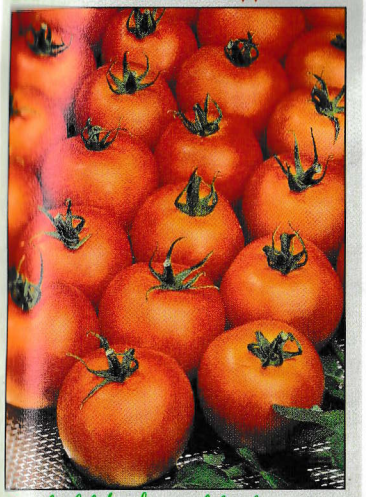

Traditional French variety producing a late crop of really tasty bright red fruit. Superb for slicing in sandwiches.

S/C 30 14833 £1.90

Order line: 01376 570000/572456

EXHIBITION

TONOR'S EXHIBITION

Good old fashioned taste

The classic showbench variety with uniform round, red fruit. Greenhouse or outdoor.

S/C 25 18179 £3.15

SWEET APERITIF

British bred, a heavy cropper producing long trusses of super sweet bite-sized red fruits. Often comes out top in tests for sweetness, as each fruit has a high sugar content combined with the right amount of acidity for a refreshing taste.

S/C 10 14871 £2.45

ZLATAVA

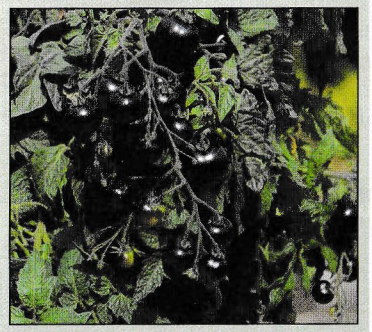

Orange on the outside and red like a blood orange on inside. Round to heart shaped fruits of excellent flavour and eye appeal when sliced. 80g fruits.

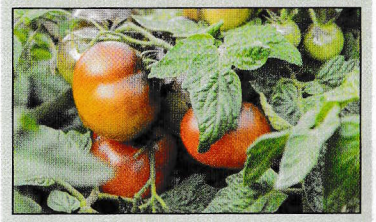

S/C 30 18184 £1.90

DETERMINATE TYPES

NEW TO KINGS

AKOYA F1

An eye-catching basket or patio container variety, that is sure to create a talking point. These compact plants with attractive purple-dark green foliage produce unusual cocktail-sized fruits ripening gradually from green to black, **changing to orange red when they will be fully ripe and at their best to eat.** *Has shown to have good late blight tolerance.*

S/C 10 18192 £2.10

NEW TO KINGS

CHERRY BLAST F1

A trailing variety from same breeder as Tumbling Tom, offering a slightly larger sweet cherry sized 20-25g fruits, and the added benefit of Late Blight resistance. A heavy cropper over a long period from a hanging basket.

S/C 15 18193 £2.45

CHERRY FALLS F1

Compact bush type ideal for hanging baskets or patio containers. Deep red cherry fruits of exceptional flavour ripen early in northerly climates, producing a flush of ripe fruit over a 4-5 week period.

S/C 15 14889 £2.65

NEW TO KINGS

ORANGELLO F1

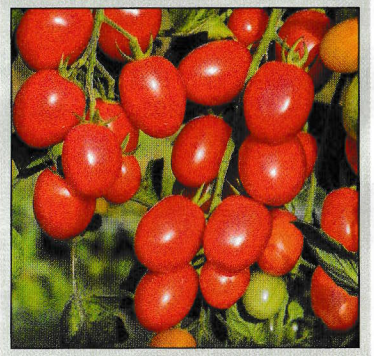

The sister of Romello, producing long trusses of very sweet orange plum shaped fruits on compact bushy plants ideal for growing in large patio containers. *Has shown good disease resistance in recent trials, but as yet unproven to be as fully Blight resistant as its brother.*

S/C 10 18194 £2.50

NEW TO KINGS

ROMELLO F1

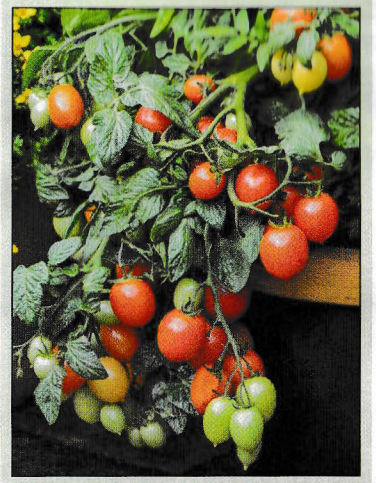

A strong bush variety with exceptional late blight resistance. Produces a heavy crop of long clusters of sweet red cherry plum fruits towards the edge of the plants for easy harvesting from large patio containers.

S/C 10 18195 £2.50

NEW TO KINGS

SUMMER DEW F1

Very sweet red plum shape fruits on compact, mounding shaped plants ideal for baskets or containers. Has proved to be a heavy cropper in trials as well as showing good resistance to late Blight.

S/C 10 18196 £2.10

SUMMERLAST F1

A patio tomato bred to last for much longer in the garden. A dwarf (37-40cm) determinate variety with 45g fruits that can be grown very easily in a patio container. With built in late blight resistance this variety maintains very dark green and healthy foliage well into late Summer when many other varieties are past their best. **Blight resistant.**

S/C 10 14888 £2.75

Tomato continued

GARTEN PERLE

Delicious, rosy-red, cherry-size fruits. Ideal for hanging baskets. Early to crop and continues to crop all season tumbling over basket sides.

S/C 25 14850 £2.55

MICRO CHERRY

A stunning basket or large container variety, that becomes laden with 'hundreds to thousands' of teeny, super sweet red tomatoes. No sideshooting or staking required!

S/C 20 14891 £1.95

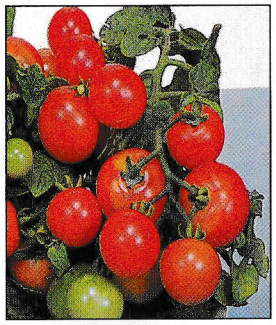

RED ALERT

One of the best for flavour. High quality fruits on spreading plants, very early. Highly recommended.

S/C 25 14830 £2.15

RED ROBIN

A very sweet, bright red cherry variety. It grows to about 30cm in height and will continue cropping till late September. Grow on the window sill or in pots.

S/C 15 14852 £3.10

ROMA VF

Medium to late producing pear shaped fruit that are ideal for cooking or bottling. Medium to small sized fruit of 60g with *good resistance to disease*. Can also be grown under glass.

S/C 75 14837 £2.05

TUMBLING TOM YELLOW

Can also be used as mini veg

Compact, perfect for hanging baskets and patio containers, with an abundance of cherry-sized fruits. Grow indoor or out.

S/C 10 14856 £3.20

RE-INTRODUCTION TO KINGS

TUMBLING TOM RED

Can also be used as mini veg

Compact plants, early to crop, perfect for hanging baskets or patio containers, with an abundance of 15-20g cherry-sized fruits over a long period. Suitable for growing indoors or outside.

S/C 10 14853 £3.20

SEMI-DETERMINATE TYPES

LIZZANO F1

Blight tolerant

Bright red, baby cherry sized. Vigorous, with abundant amount of fruits. *Blight tolerant*.

S/C 7 14862 £3.50

ROOTSTOCK ESTAMINO F1

Strong, vigorous rootstock with a positive generative effect on the growth of the cultivar grafted. It does not have an excessive vegetative effect on the cultivar grafted onto it.

S/C 12 14861 £4.85

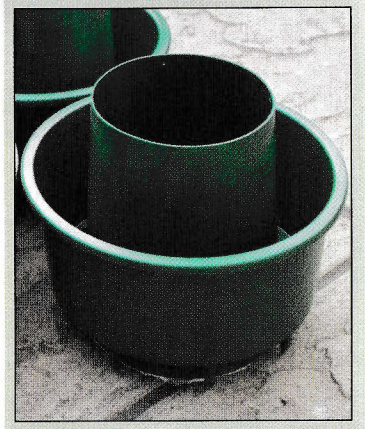

PLASTIC GRAFTING CLIPS

An essential aid for grafting to rootstock. Colour may vary.

12 clips 45973 £3.65

GROW POTS SYSTEM

Grow pots have many benefits for tomato plants, peppers and aubergines etc. in grow bags or in garden soil. They provide the essential depth for the root system to grow and support the plant and to absorb nutrients for the best fruit development. Grow pots are also a ready-made water and feed reservoir, delivering straight to the roots. They also deter slugs and snails.

Pack of 3 large suitable for tomatoes

260mm (10½") dia

1 pack 45961 £18.00

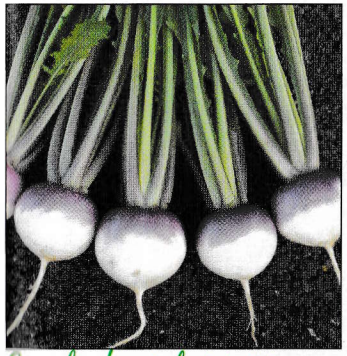

2 packs 45963 £32.00

Order line: 01376 570000/572456

Turnip

Turnips are fast growing root vegetables which add a different flavour grated raw in salads and added to casseroles or served as a separate vegetable. When pulled young they are a far cry from the woody, sad examples often seen in shops. They are a member of the brassicae group so remember this when planning rotations in the vegetable plot. Sow from late March to June. Early sowings are best made under cloches. Sow seed direct into growing site in seed drills 2cm (3/4") deep with rows spaced 30cm (12") apart. Sow in succession every 14 days to prolong the harvest period. As soon as first rough leaves appear, thin to 10cm (4") apart. Harvest from when roots are golf ball size, pull alternate roots to maximise crop. Water regularly during hot dry weather to prevent roots from going woody. Can also be multisown in modules and transplanted out as small cluster and harvested as small roots and added to salads. The smaller the roots are pulled the sweeter they are.

SWEETBELL F1

Can also be used as mini veg

Ideal for use raw in salads and stir-fries. Exceptionally sweet, firm crisp texture. Globe type with a purple shoulder. Outstanding uniformity.

S/C 250 **14909** **£2.15**

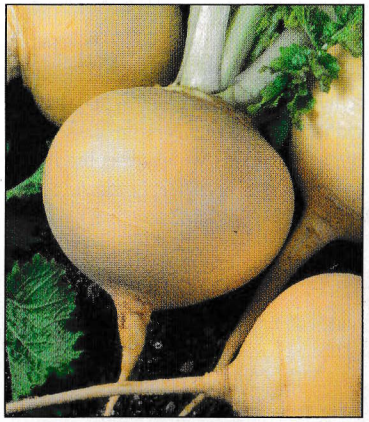

TEMARI MIXED F1

Attractive red and white salad turnips 5-10cm in diameter. Pure white succulent roots accompanied by tasty red roots with white blushed inner flesh. Delicious eaten raw in salads when young or cooked when fully mature.

S/C 250 **14910** **£2.10**

GOLDEN BALL

Sweet tasting golden yellow flesh with golden skin. Spring sowing variety maturing in about 60 days.

S/C 1,200 **14901** **£1.75**

Kings say... "turnips are high in fibre."

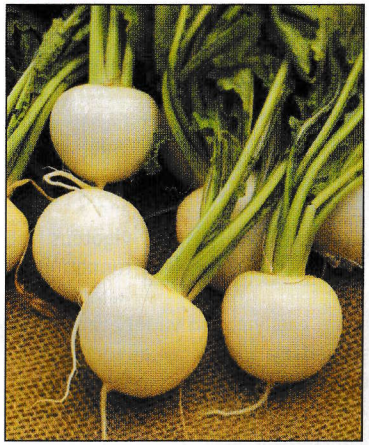

MILAN PURPLE TOP

Flat shaped roots of light purple and white with white flesh. Fast to mature and ideal for an early start under cloches.

S/C 1,200 **14903** **£1.75**

SNOWBALL

Excellent flavour

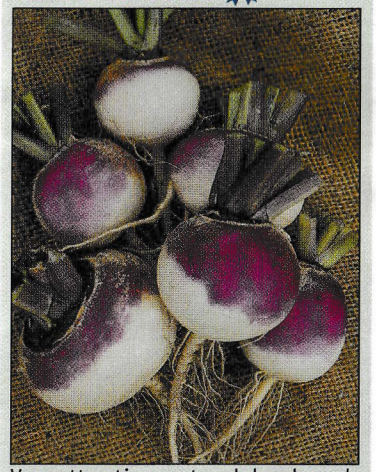

Pure white globe shaped roots. Popular choice for spring sowing and successional use.

S/C 1,200 **14905** **£1.75**

Organic Turnip are in our Suffolk Herbs section page 154.

STAR BUY

VEITCHS RED GLOBE

Very attractive roots, globe shaped with dark red skin and white flesh. Leaves can be used in place of spinach. Sow in spring.

S/C 1,200 **14906** **£1.75**

PROTECT YOUR YOUNG VEG

One of each of 4 currants £45.00
Save £6 if purchased separately.
Quote code 94022

Gooseberries

HOW TO PLANT GOOSEBERRIES

Plant the 1-year-old sturdy plants 1.5m (4.5ft) apart. We recommend you plant your bushes during November. Full growing instructions are included with every order.

CAPTIVATOR LATE SEASON

Virtually thornless, carrying sweet burgundy red berries. *Mildew resistance* and very cold hardy. One of the best dessert varieties.

1 bush **93108** **£12.95**

NEW TO KINGS

MUCURINES

Good frost and mildew resistance which makes it a very reliable and high yielding choice. Green berry fruit. *Certified Grade A.*

1 bush **93266** **£12.95**

Please choose your **PREFERRED DELIVERY DATE of SOFT FRUIT** on the order form. Order before **31 October** for an autumn delivery. Order before **28 February** for a spring delivery.

Blackberries

HOW TO PLANT BLACKBERRIES

Plant 1.5m-2m (4.5-6.5ft) apart in well prepared soil. Full growing instructions are included with every order.

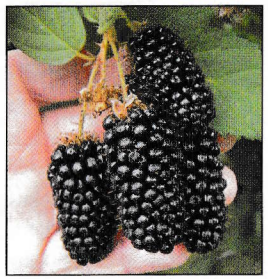

ASTERINA

Large bright shiny fruit the size of a pound coin. Excellent blackberry aroma and taste even when picked before fully ripe. First berries will ripen in mid-July.

2 litre pot **93112** **£14.25**

KARAKA BLACK

Attractive, shiny, firm dark black fruits. Lovely flavour. Although quite spiny, they are easy to pick. Named as finest variety by your local supermarket.

3 litre pot **93066** **£17.95**

LOCH NESS

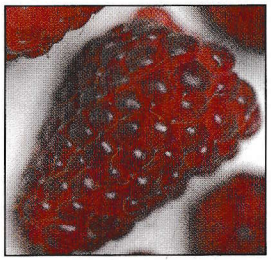

Thornless bush that can produce up to 3.6kg of large firm glossy blackberries. Grown in a large pot on a sunny patio will certainly be rewarding.

2 litre pot **93026** **£17.95**

Loganberries

HOW TO PLANT LOGANBERRIES

Plant in well-drained but moisture retentive soil in full sun or partial shade. Grow on wires against a fence or a wall, or as a single plant up a post. Space at least 2m (72") apart. Cut back to 25cm (10") after planting to promote fresh growth from the base. Full growing instructions are included with every order.

Large cone-shaped berries which are sweet and rich in flavour. Virus free they will establish quickly and fruit for many years. A delicious thornless hybrid berry. Excellent for a boundary fence or wall in full sun or light shade.

2 litre pot **93043** **£17.95**

Blueberries

HOW TO PLANT BLUEBERRIES

They need an acid soil and moist conditions. Full growing instructions are included with every order.

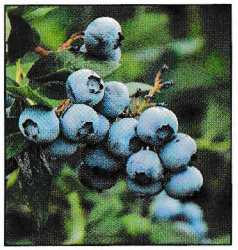

BLUE CROP

Very resistant to spring frosts and drought tolerant. Large light blue berries gather in clusters, often bending the bushes under the weight of the fruit.

2 litre pot **93024** **£17.10**

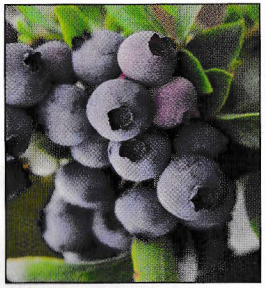

BRIGITTA

Large firm berries are gathered in loose clusters, very tasty and richly flavoured with a crisp texture.

2 litre pot **93109** **£17.10**

CHANDLER

Abundant, juicy, delicious fruit. Enormous firm berries are produced from the beginning of August until mid-September.

2 litre pot **93067** **£17.10**

EARLIBLUE

Big light blue, mildly flavoured sweet berries hang in medium size clusters. An attractive shrub bearing masses of sweetly scented creamy-white flowers.

2 litre pot **93025** **£17.10**

PINK

In the spring it produces small bell-shaped flowers with a pink hue, will change from white to a deep glossy pink. Ht. approx. 120-150cm tall. Winter hardy.

2 litre pot **93075** **£17.10**

Fruit Trees

Apple

BRAMLEY SEEDLING

Heavy cropping Cooking Apple which has led the field for over 200 years. Bright green with a red flush on the sun side. Perfect pale pink blossoms have good frost resistance. Very long lived, Bramley are regarded as the best Cooking Apple in the World. Rootstock M9.

1 tree 94062 £36.00

BRAEBURN

A New Zealand apple which has quickly become a firm favourite across the world. Very easy cropping and making a compact tree, this variety will set large crops without additional pollination. One of the easiest for the novice grower. Rootstock M9.

1 tree 94056 £36.00

COX'S ORANGE PIPPIN

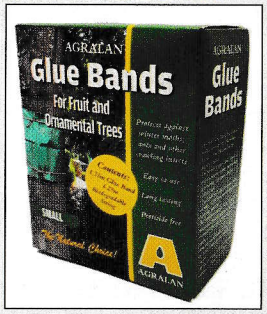

With its perfect balance of sugar and acid, Cox's OP was justifiably regarded as the finest flavoured apple grown in England. Ripening on the tree to a perfect mellowness Cox's, for many, still retains the top spot. Our English climate is perfect for growing Cox and every British garden should grow a tree to keep this superb variety for our children and grandchildren to taste. Rootstock M9.

1 tree 94079 £36.00

Protect your fruit crops

AGRALAN GLUE BANDS

The bands are coated with a non-drying glue which forms a very effective barrier against insects such as earwigs and adult vine weevil. Use from October until May to protect from winter moths.

1.75 metres 45143 £6.75

RED WINDSOR

Well coloured apples ripening in early Autumn. Regarded by many as the finest flavoured early apple grown in the British climate. A very easy cropping variety which is also regarded as a universal pollinator. A compact variety which will crop and crop. Rootstock M9.

1 tree 94111 £36.00

Cherry

HARTLAND

Big, sweet and juicy, capable of very large crops of cherries which ripen in early July. Hartland is self fertile and brings the joy of cherry growing to every garden. Rootstock Colt.

1 tree 94114 £36.00

Fig

NEW TO KINGS

BROWN TURKEY

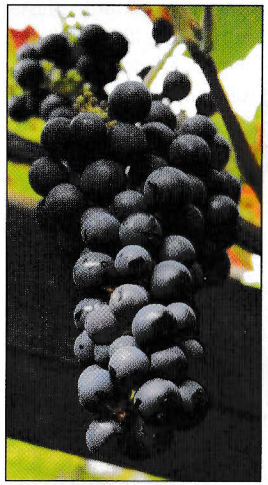

The best known fig in the UK. Large golden brown, juicy and very sweet fruits ripen in late August and September. It will thrive in large pots as well as giving very large crops in the open ground especially if planted against a wall.

1 standard 94059 £45.00

1 bush 94075 £45.00

Grape

BOSKOOP GLORY

One of the easiest grapes to crop in our UK conditions, producing very large crops of sweet black fruits which are excellent for dessert use. Very resistant to disease, with careful training, Boskoop Glory can hold and ripen well over 100 bunches of delicious fruits each year.

1 tree 94074 £42.00

PHEONIX

The perfect partner for Boskoop Glory is the bright green fruited Phoenix. Large and very full bunches of grapes, often numbering over 200 fruits are held under large leaves which are very resistant to mildew. The very sweet fruits ripen in early September and are ideal for fresh use or for juicing. Grapes grown on own roots form cuttings.

1 tree 94067 £42.00

Greengage

OULLIN'S GOLDEN GAGE

Hardly ever seen in the shops nowadays, greengages are among the best flavoured fruits in the world. Although remaining green for most of the season the fruits ripens to a magnificent golden yellow and become wonderfully sweet and juicy. Greengages require pollination and Victoria will do that job marvellously. Planted together they make the ideal mini stone fruit orchard. Rootstock St Julien.

1tree 94113 £36.00

Fruit Trees continued

Nectarine

MADAME BLANCHETTE

White flesh nectarines are a real treat to eat and are sugary sweet. This historic variety has been delighting gardeners for over one hundred years. Superb flavour and very prolific due to its self-fertility, Madame Blanchette is the ideal nectarine for fan training or to grow as a free standing bush tree. Rootstock Myrobalan.

1 tree 94098 £38.00

Peach

AVALON PRIDE®

A chance seedling from British Columbia, Avalon Pride® is still the most peach leaf curl resistant variety on the garden market. Compact growing and self-fertile, this yellow flesh peach is the easiest variety to grow, giving large juicy and very sweet peaches during August. Pick these fruits in the late afternoon after the days sun has warmed them for a truly wonderful eating experience. Rootstock Myrobalan.

1 tree 94083 £38.00

Plum

OPAL

If you are looking for a plum with superb flavour, self-fertility, compact growing and plums that ripen over a month on the tree, then Opal is the variety for you. The tree branches very easily and the compact growing habit means that even after 7 years in the ground your tree will still only be about 2.5 mtrs in height, so very easy to pick. With its dark red colour and oval shape, you will have plenty of fruit to share with family and friends in late July and early August. Rootstock St Julien.

1 tree 94124 £36.00

Quince

VRANJA

Not too many fruits can grow to a kilo in weight, but a quince Vranja can! These magnificent pear-shaped quince with their tell-tale golden bloom on the surface of the skin are a real joy to grow and to use in the kitchen. The tree can produce an enormous crop owing to their self-fertility and from the spring time blossom until the fruits ripen to their golden yellow, Vranja will always be the talking point of your garden. Rootstock Quince A.

1 tree 94093 £38.00

Pear

CONCORDE

It is hardly surprising that a pear bred by crossing Conference and Doyenne du Comice should have superb flavour and crop so heavily. Making quite a compact and upright tree, Concorde has become a real favourite with the UK gardener and commercial grower alike. Concorde will set a crop of very large bell-shaped fruits on its own, so if you only have the room for one pear, then chose Concorde. Rootstock Quince Adams

1 tree 94123 £36.00

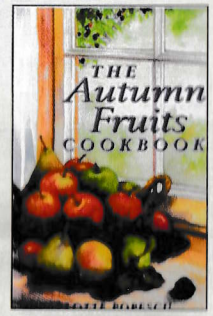

VICTORIA

The finest plum in the world dating back more than 150 years and is still the best selling fruit tree year after year. Regular crops of magnificent light violet coloured fruits are ready to pick in late August and early September. Victoria needs no pollinator. Its weeping growth habit makes it suitable for all sizes of gardens. For jam, pies or eaten fresh, ripe Victoria Plums are magnificent. No garden is complete without one. Rootstock St Julien.

1 tree 94033 £36.00

THE AUTUMN FRUITS COOKBOOK BY CHARLOTTE POPESCU

This cookbook celebrates the versatility of pears, apples, plums, damsons and blackberries with 180 delicious recipes.

49030 £6.99

DELIVERY
end of November to mid April

WHAT ARE ROOTSTOCK?
Rootstocks are used to restrict the vigour of fruit trees making them suitable to grow in a small space. They can also contribute to the disease resistance of the plant.

St Julien (semi vigorous) Ultimate height when trained as a bush 12'.

Quince A: Ultimate height 12-14'.

Colt: Colt Ultimate height 10-12'.

M9: Ultimate height 7'.

Myrobalan: Highly vigorous producing a tree with a mature height of 16ft - 20ft.

All bare-rooted trees will benefit by being placed in a bucket of water for 24 hours before planting regardless of the weather.

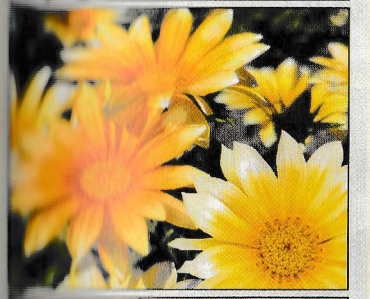

All of our trees are despatched with a tree tie and tree stake. All come with full cultural instructions.

Buy two trees or more and save £5. Please add TREE5 at the checkout or on the order

Order line: 01376 570000/572456

Kings Seeds we aim to offer our customers a wide choice of flower varieties to grow in all parts of the garden, retaining old favourites and the latest breeding. This year we have increased our flower range, so look out for the many new varieties. All have been specially selected by our experts for their quality, and most importantly they have all been tried and tested to ensure they give you outstanding garden performance.

Flower Sowing Tips

HARDY ANNUALS

Prepare the soil in the flowering site well in advance by removing any weeds and large stones so the soil is well cultivated and a fine crumbly structure. Mark out irregular shapes in the border and sow the seeds into shallow drills spaced 30-38cm (12-15") apart or alternatively broadcast over the area and lightly rake into the surface. Once seedlings have germinated and formed their first leaves, thin out any that are overcrowded so plants are 15-30cm (6-12") apart. Water only when the soil is very dry and keep weeds under control throughout the growing season. These annuals are an easy way to fill borders with summer colour with very little effort. Most varieties can be sown from March to early June, with a few that can be also sown in September and overwintered for an early spring display the following year.

HALF HARDY ANNUALS AND PERENNIALS

These should be sown undercover in a glasshouse or on a windowsill in pots or trays filled with a good quality seed sowing compost and watered with tap water, following the individual packet sowing instructions. Many will require extra warmth so using a heated propagator is beneficial.

As a general rule when sowing seeds; If once sown you can see the seed you should cover it to its own depth with a sprinkling of compost or vermiculite. If once sown you can't see the seed on the surface of the compost (Like Begonia and Lobelia which are small and dust like) you should not cover these seeds as they require light to germinate. A handy tip is mixing fine seeds with a pinch of dry silver sand which makes sowing the seeds easier as you will see the grains of sand fall on the compost.

Once seedlings germinate, remove them from the propagator and when they are big enough to handle prick out (transplant) into individual pots or cell trays. Grow these plants on in a greenhouse then move them into a cold frame to gradually harden off before planting out into summer displays once all risk of frost has passed. Follow packet instructions for sowing times.

BIENNIALS

Prepare a nursery bed or part of the vegetable plot as you would for sowing hardy annuals. Mark out rows and sow the seeds into shallow drills spaced 30cm (12") apart. Once the seeds have germinated and produced their first true leaves, thin out any that are overcrowded to 10-15cm (4-6") apart. These can grow on until September or October when they can be lifted as bare root plants and transplanted to the garden borders. Water in well after planting until established and they will reward you with a wonderful winter and spring display.

Flower Planting Guide

HALF HARDY ANNUAL For best results plants should be spaced 23-30cm (9-12") apart

HARDY ANNUAL Best direct sown into the border and seedlings thinned to 15-30cm (6-12") apart when large enough to handle.

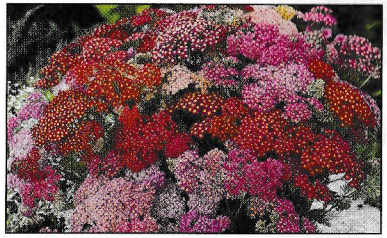

PERENNIAL Plant in groups of 3 or 5 plants 30-38cm (12-15") apart to create the fullest displays.

BIENNIAL Plant into borders as drifts spacing plants 22-30cm (9-12") apart.

Achillea HP

Sow March to May. Flowers July to Sept.

SUMMER BERRIES F2

Easy to grow, first year flowering perennial, attractive fruity colours. Attracts bees and butterflies.
Ht. 60-75cm (24-30")

S/C 40 **50203** **£2.15**

MAJOR PURPURESCENS

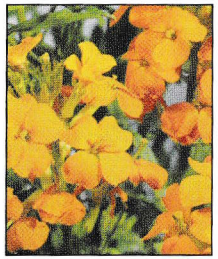

Rich purple-blue nodding flowers over deep blue-green tracts on long strong stems. Use for bedding, pots and cutting. Flowers from July onwards in the first year and May onwards the second year. Sow April to June. Ht. 60cm (24").

S/C 12 56402 £2.90

Chamomile see page 29

Cheiranthus HB

ALLIONII

Siberian Wallflower. Bright orange flowers similar to wallflower which is a member of the same family. Sow May to June. Flowers April to June. Ht. 40cm (16").

S/C 500 56501 £2.10

Chrysanthemum HP

KOREAN GLORIOUS MIXTURE

Superb bedding or pot plant producing masses of large sized blooms in a wide range of colours. Sow March to April. Flowers August to October. Ht. 60cm (24").

CROP FAILURE

Order line: 01376 570000/572456

Chrysanthemum HA

RAINBOW

Single with delightful circles of contrasting colours. Wide mixture of colours. Sow March to May. Flowers June to September. Ht. 60cm (24").

S/C 500 56609 £2.15

SNOWLAND

Blooms from June to August

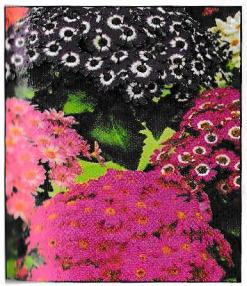

Mini-Marguerite with much improved uniformity. Early into bloom, with large flowers of white with yellow centre. Sow April to June. Ht. 15cm (6").

S/C 75 56606 £2.10

Cineraria GB

Sow spring. Flowers December to June.

EXCELSIOR

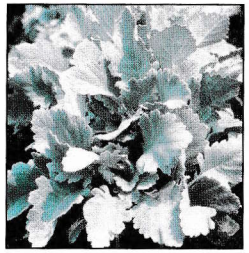

Large leaved and large flowered variety in a pleasant colour range. Ht. 30-45cm (12-18").

S/C 75 56702 £2.55

Cineraria maritima HHP (treat as HHA)

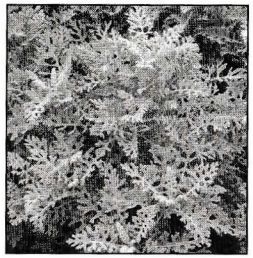

CIRRUS

Perfect large silvery foliage make it ideal for containers. It is compact and bushy with oval, non-serrated leaves that look good with dark flowers. Use as a dot plant or edging. *Weather resistant*. Sow January to April. Ht. 25cm (10").

S/C 75 56703 £2.50

SILVER DUST

Dwarf strain of this popular edging and contrast plant. Lacy finely cut silver foliage. Sow January to April. Flowers June onwards. Ht.30cm (12").

S/C 150 56801 £2.10

Clarkia HA

ELEGANS DOUBLE DELIGHT

Easy to grow

Lovely bright colour range with double flowers which look best in bold clumps. Sow March to May. Flowers July to September. Ht. 60cm (24").

S/C 1,800 56901 £1.70

Clary HA

BOUQUET

Very decorative mixture of pink, blue and white flowers from June to September. Makes a good dried flower. Sow March to May. Ht. 45cm (18").

S/C 375 57001 £2.05

Cleome HA

CHERRY QUEEN

Spirally scented sprays in deep pink requires fluctuating temperatures to germinate well. A bushy plant prefering a rich, light, well-drained soil. Sow March to May. Ht. 1m (3'3").

S/C 125 57126 £2.45

VIOLET QUEQEN

A sumptuous purple, which looks good with almost anything, particularly good mixed with verbenas, dahlias and sunflowers. Sow late March to mid-May. Ht. 1m (3'3").

S/C 125 57127 £2.45

Cobaea HHP (treat as HHA)

SCANDENS

A vigorous climber with bell shaped flowers from July to October. For a stunning show grow together. Sow Feb to April. Ht. 1.2-1.8m (4-6').

S/C 15 57201 £2.45

SCANDENS ALBA

A white selection of this vigorous climber with attactive bell shaped flowers from July to October. Ht. 1.2-1.8m (4-6').

S/C 15 57203 £2.30

Convolvulus minor HA

Very decorative, for just about anywhere in the garden. Sow direct into site in March or April, flowers from July to September.

TRICOLOUR

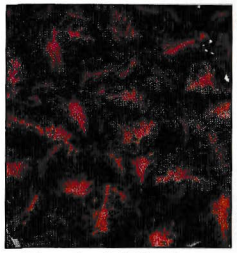

An excellent mixture of blue, pink and white shades. Ht. 30cm (12").

S/C 100 57625 £2.60

Coleus GP

Sow January to March

BLACK DRAGON

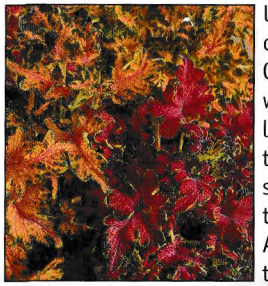

Good weather resistance

Almost black with deep pink centres. Ideal border or patio plant with velvet frilly leaves. Ht. 45cm (18").

S/C 100 57602 £3.05

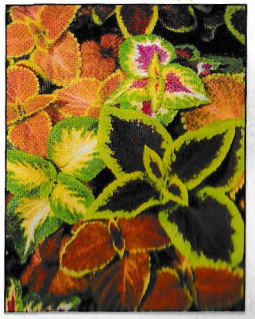

COLOCHA MIXED

Unlike other coleus, Colocha has wavy, ruffled leaf edges that are super soft to touch. Attractive two-tone mix of rose and scarlet shades, creating eye-catching exotic colours in borders, patio containers or as a houseplant, that thrives in direct sunlight as well as shady locations. Ht. 45-50cm (18-20").

S/C 30 57603 £2.85

TOP CROWN

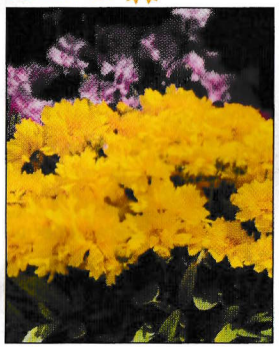

Special blend of colours and leaf type. Good bedding plant for mild areas. Just keep pinching out flower buds. Flowers summer and autumn. Ht. 45cm (18").

S/C 45 57601 £2.85

www.kingsseeds.com

Coreopsis grandiflora HP

PRESTO

The dwarfest variety available, first year flowering perennial, ideal for the front of the border or containers. Ht. 25cm (10").

S/C 30 57805 £2.85

Coreopsis HHA

Sow February to April. Flowers July to September

INCREDIBLE DWARF MIX

The result of many years breeding. Attractive multi-coloured blooms float above airy foliage. Ideal for borders or containers flowering all summer. Ht. 50cm (20").

S/C 400 57807 £1.90

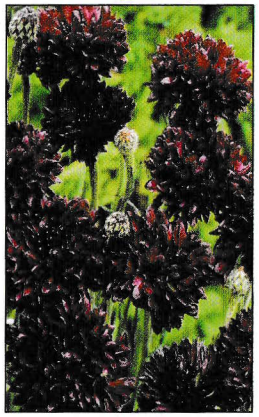

Kings recommend when not sowing directly into your borders you sow your seeds into a good quality seed sowing compost and water only with tap water. Do not use butt water as this can contain harmful pathogens, resulting in poor germination.

Cornflower HA (Centurea)

Sow March to May. Flowers May to September.

This is one of the easiest flowers to grow, simply sprinkle seeds over an area of ground where they are to flower and gently cover with a thin layer of soil. No thinning of plants is required and the mass of colourful flower heads that will be produced will be stunning.

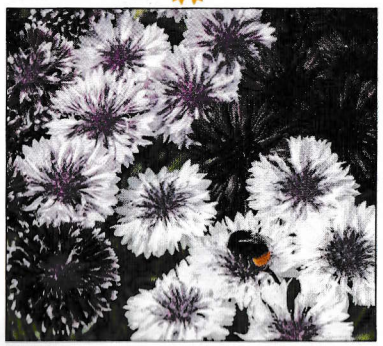

BLACK BALL

A dark mauve double flower growing to about 90cm (36"). Good cut flower or in the border.

S/C 300 57905 £2.00

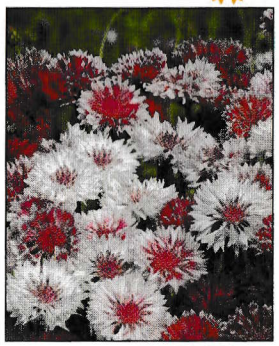

CLASSIC MAGIC

Single semi-double flowers in attractive purple to almost black shades and purple and white bi-colour. Ideal for cutting or creating swathes of colour when sown in drifts. Ht. 80-100cm (31-39").

S/C 100 57907 £2.00

CLASSIC ROMANTIC

Pink and red shades of single and double blooms. Easy to grow and long flowering. Ht. 80-100cm (36").

S/C 100 57906 £2.15

DOUBLE BLUE

You cannot have a cottage garden without the lovely blue flowers of this popular annual. Tall stems. Ht. 80-100cm (31-39").

S/C 325 57901 £2.00

DOUBLE MIXED

Shades of red, rose, maroon, blue and white form an attractive bed planted in quantity. Ht. 80-100cm (31-39").

S/C 300 57902 £2.00

STAR BUY

POLKA DOT MIXED

As this variety is much more dwarf in habit it could be used in containers as well as the flower border. Sow late March to mid May. Ht 35-45cm (14-18").

S/C 325 57903 £1.75

Cosmos HHA

Sow March to May.
Flowers July to October.

SULPHUREUS TYPES

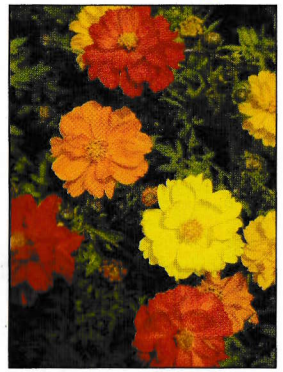

BRIGHTNESS MIXED

Dwarf floriferous mixture of gold, lemon, orange and red duplex flowers. Stunning planted en masse in borders or containers. Flowers all summer until the first frost. Ht. 30cm (12").

S/C 100 58113 £2.50

CARPET FORMULA

Delightful mini-Cosmos for bedding and pots. Compact, well-branched plants are covered in brilliant semi-double flowers in a myriad of colours. Flowers will remain vibrant when dried and pressed. Ht. 30cm (12").

S/C 100 58109 £2.25

COSMIC RED

An intense scarlet red flower which is truly eye-catching. Excellent border plant. Ht. 30cm (12").

S/C 75 58104 £2.90

MANDARIN

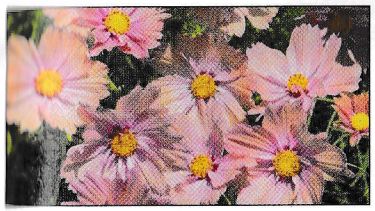

Deep orange double - semi double blooms sit above neat compact mounds of deep green foliage. Stunning when planted en masse in borders or large containers. Ht. 25-30cm (10-12").

S/C 50 58123 £2.45

Order line: 01376 570000/572456

BIPINNATUS TYPES

APRICOTA

An exceptional colour, adorable shades of apricot with a hint of pink and a lovely soft pink centre. Sure to make a wonderful display towards the back of borders, and the long stems can be cut as perfect for bouquets. Ht. 60-80cm (24-32").

S/C 50 58124 £2.35

BREEDERS CHOICE MIXED

Special mixture offering the widest choice of colours and flower types including singles, doubles, semi-double, bicolours and frizzy types. Adds height and interest to borders. Ht. 120cm (4ft).

S/C 100 58125 £2.35

CANDYFLOSS MIXED

Dwarf, compact mix of three bright colours, red, pink and white. Ideal for borders and containers, where the large blooms will add maximum impact to your displays. Ht. 60cm (24").

S/C 100 58128 £2.30

CAPRIOLA

Fleuroselect novelty. Large flowers with an extrodinary colour pattern: white with light rosy-red picotee and a dark purple-red centre. Early flowering with some blooms offering a second row of smaller petals adding to its appeal. Ht. 50-60cm (20-24").

S/C 30 58122 £2.75

NEW TO KINGS

COLLETTA PINK-WHITE

Attractive double to semi-double blooms each with irregular pink-white picotee pattens. Very free flowering, ideal for adding height and interest to borders. Ht. 100-120cm (40-47").

S/C 50 58131 £2.25

COSIMO RED-WHITE

Possibly the earliest flowering cosmos available, ideal for an early splash of colour in the border, continuing through the summer. Bushy, dwarf plants produce masses of attractive red and white bi-coloured blooms. Ht. 50-60cm (20-24").

S/C 50 58111 £2.50

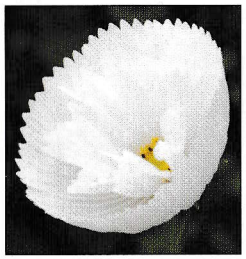

CUPCAKES BLUSH

Gorgeous cupcake shaped flowers that over time change from white to blush pink, delicately fused together to form a single cup, above bushy plants. Eye-catching border annual. Ht. 1.2m (48").

S/C 40 58130 £2.35

CUPCAKES WHITE

A distinctly different type of cosmos, with pure white petals, delicately fused together to form a single cup, sitting above fine airy foliage. A truly eye-catching addition to the back of a border. Ht. 1.2m (48").

S/C 40 58129 £2.35

STAR BUY

DAZZLER

Early flowering, bright crimson-red blooms that are sure to dazzle in any border display. Ht. 110cm (44").

S/C 100 58120 £1.55

DOUBLE CLICK BICOLOR PINK

Delightful and eye-catching colour, full double flowers, stronger stems holding each flower upright. Long flowering period. Ht. 60-90cm (24-36").

S/C 50 58108 £3.05

DOUBLE CLICK ROSE BON BON

Bright splashes of colour until late summer

The first separate colour for a fully double Cosmos bipinnatus, will add height to the border. Sow February to March or April and May. Ht. 60-90cm (24-36").

S/C 75 58106 £3.10

DOUBLE CLICK SNOW PUFF

Spectacular white, pom-pom flowers with a delicate hint of purple. Adds height and interest to borders all summer long. Prefers a sunny position in light, well-drained soil. Ht. 60-90cm (24-36").

S/C 50 58107 £3.05

DWARF PURPLE PICOTEE

One of the earliest flowering Cosmos with masses of pinkish purple picotee blooms over a 5-6 week period. Ideal for an early splash of colour. Regular deadheading may prolong flowering period. Ht. 40cm (16").

S/C 100 58127 £2.25

ORIGINAL PHOSTROGEN PLANT FOOD

See Sundries page 132.

www.kingsseeds.com

Cosmos continued

NEW TO KINGS

FANDANGO

Gorgeous, double to semi-double flowers of the deepest, most vibrant dark pink, enhanced by the wispy central petals and rich yellow eye. Early flowering, compact and not too tall for planting towards the middle of borders. Winner of Fleuroselect Novelty award. Ht. 60-80cm (20-25").

S/C 50 58132 £2.25

FIZZY MIXED

A bubbly mixture of attractive semi-double flowers adding height and interest to summer borders. Ht.100cm (40").

S/C 100 58116 £2.45

FIZZY ROSE PICOTEE

Eye-catching blooms with semi-double rosy white flowers with a ruby edge. Adds height to border displays flowering from July to the first frosts. Ht. 100cm (40").

S/C 100 58114 £2.45

HUMMINGBIRD LILAC

The next in the Humming-bird series, producing attactive and unusual lilac tubular flowers on compact bushy plants. Ideal for growing towards the front of the border. Ht. 45cm (18").

S/C 40 58119 £2.90

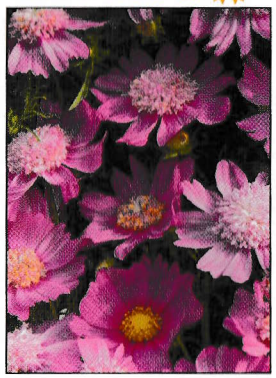

HUMMINGBIRD WHITE

Striking tubular shaped white flowers. An easy to grow, very compact and low growing variety. Ht. 45cm (18").

S/C 40 58110 £2.85

PINK POPSOCKS

Unusual mix of fully double pompom, anemone and the odd single flower. Very compact, ideal for borders or containers. Ht. 60cm (24").

S/C 50 58118 £2.40

PURITY

Delicate pure white flowers on feathery foliage. A must for the back of borders. Ht. 90cm (36").

S/C 100 58105 £2.70

RUBINATO

Stood out in our trials. Strong, compact and well branched plants, very floriferous, with deep burgundy flowers maturing to old rose adding to its appeal. Fleuroselect Novelty. Ht. 50cm (20").

S/C 30 58117 £2.50

STAR BUY

SEA SHELLS MIXED

Unusual tubular shaped flowers in a mix of attractive colours, adding interest to borders. Ht. 80cm (32").

S/C 100 58121 £1.45

SENSATION MIXED

Large single daisy like flowers in shades of pink, red and white all with small yellow centre. Ht. 90cm (36").

S/C 200 58101 £2.45

VELOUETTE

Unique contrasting colour pattern, with deep red blooms and clear white stripes. Large flowered creating an eye-catching feature to an annual border. Ht. 80-90cm (32-36").

S/C 100 58115 £2.45

XANTHOS

Fleuroselect gold. The first yellow flowered cosmos that reliably flowers in the UK. Soft yellow blooms with lighter edges. Ht. 50-60cm (20-24").

S/C 30 58112 £2.85

XENIA

Remarkable terracotta orange blooms with rose edges, with changing tones deepening on the sunlight intensity. Compact well-branched plants and a prolific bloomer for summer borders and the cutting garden. Ht. 50-60cm (20-24").

S/C 30 58126 £2.75

Cyclamen GP

LATINIA MIXED F1

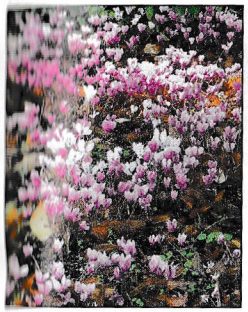

Produces traditional large flowers but the plant remains very compact. Attractive and perfumed flowers, good for floral displays. Sow December to March. Ht. 20cm (8").

S/C 15 58803 £3.55

Order line: 01376 570000/572456

Cyclamen HP

NEOPOLITANUM

Shade or under trees, as long as it never dries out, is the perfect setting for these small pink and white cyclamen. Sow autumn to spring. Flowers August to November. Ht. 10cm (4").

S/C 15 58805 £3.80

Dahlia HHP (treat as HHA)

The advantage in growing dahlias from seed is that you get the best of both worlds. The first year will provide a very economical collection of delightful flowers and each plant will produce tubers that can be carefully lifted at the end of the season for storing and re-planting the following year. Sow February to April. Flowers July to October.

BISHOPS CHILDREN

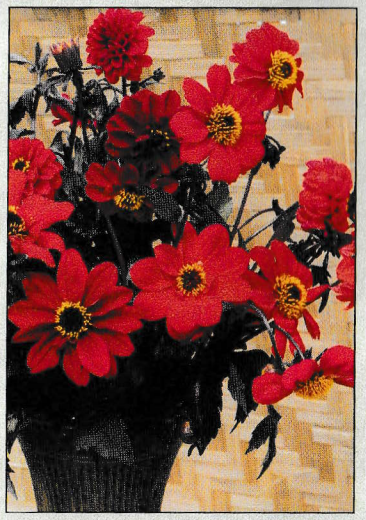

Bred on and developed from Bishop of Llandaff. A fiery, mid-height dahlia mix in a range of striking colours, all enhanced by the rich bronze foliage. Stunning in borders. Ht. 60-75cm (24-30").

S/C 100 58914 £2.85

NEW TO KINGS

BLACK FOREST RUBY

The most uniform dark pinnate leaved Dahlia from seed. The dramatic dark, almost black foliage is a striking contrast to its selection of single, semi-double to double blooms in attractive deep red shades. Ideal for adding interest to borders, containers or as as a decorative cut flower. Ht. 70cm (28").

S/C 50 58917 £2.50

CACTUS MIXED

Large double blooms formed with slender pointed petals. Makes a lovely garden display and a superb cut flower. Ht. 90-120cm (36-48").

S/C 35 58901 £2.15

COLTNESS HYBRIDS

A delightful bedding variety. Compact plants with single flowers in a wide colour range. Ht. 45-60cm (18-24").

S/C 60 58902 £2.05

DOUBLE POMPONE

Particularly attractive ball shaped flowers in double form. Bright solid colours in a wide band of shades. Ht. 90-120cm. (36-48").

S/C 35 58905 £2.05

DWARF CACTUS MIXED

Dwarf plants with a wide range and a very high percentage of cactus flowered blooms. Ideal for borders or containers. Ht. 40cm (16").

S/C 50 58916 £2.45

FIGARO IMPROVED

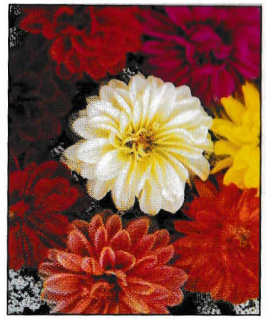

Compact and early into flower

As its name suggests, a much improved strain of double and semi-double flowers. Blooms in a wide range of really bright striking colours. Ht. 40cm (16").

Tufty plants with glossy green leaves topped by trumpet shaped flowers in the most brilliant of deep blues. Sow July to September. Flowers May and June. Ht. 8cm (3").

S/C 125 62001 £2.30

Order line: 01376 570000/57...
www.kingsseeds.com

Geranium HHP (treat as HHA)

(now officially Pelargonium)

Although flowering a little later than Geraniums grown from cuttings, seed sown types will produce a mass of flower heads throughout the summer and on into the first frosts. Sow seed under glass at 21°C in January and February - even March will give flowers by August. Prick out in 5 or 6 weeks for planting out in tubs, beds or hanging baskets from late May, flowering from July to October.

CABARET MIXED F2

One of the finest mixes of summer flowering Geraniums, perfect for borders, containers or baskets. Replacement for Paintbox. Ht. 30-35cm (12-14").

S/C 15 62121 £2.45

STAR BUY

Order line: 01376 570000/572456

Impatiens (Busy Lizzie) HHP (treat as HHA)

Sow Feb to April. Flowers June to October.

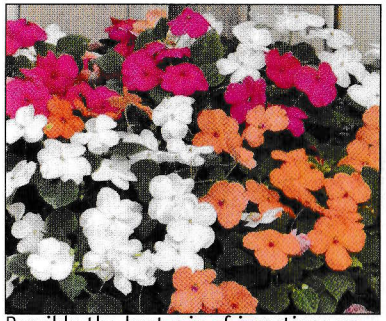

BEACON SELECT MIXED F1

A breeding breakthrough! Gardeners can once again grow Impatiens without the risk of disease! Beacon's has been proven to show high resistance to the devastating Impatiens downy mildew that wiped out plants in 2012. Beacon is a six colour vibrant mix that grows stronger and shines longer in borders, baskets or containers. **Downy mildew resistant.** Ht. 25-30cm(10-12").

S/C 30 95726 £3.15

LOLLIPOP MIX F1

Possibly the best mix of impatiens we have ever offered. A stunning blend of the eight most popular colours. Outstanding performance in borders, baskets and containers. Ht.15-20cm (6-8").

S/C 20 64821 £2.75

Ipomoea HHP (treat as HHA) Morning Glory

Sow March to April. Flowers July to Oct.

CARNEVALE DI VENEZIA

A vigorous climber producing masses of spectacular, striped blue and pink blooms with intricate markings, as if painted individually. Flowers all summer, transforming your garden with all the dazzling colours of the Venice Carnival. Ideal for trellis and fences. Ht. 2m (6').

S/C 45 65003 £2.90

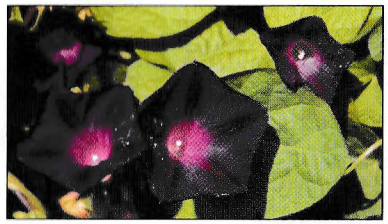

DACAPO LIGHT BLUE

Eye-catching clear blue flowers with a darker purple blue star centre, outstanding colour. Flowers earlier than Heavenly Blue. Ht. 2m (6').

S/C 40 65004 £2.15

GRANDPA OTT

Loves full sun

Dark rich purple flowers with large trumpets. Ideal for growing over an old wall or garden arch. Ht. 5m (16').

S/C 30 65002 £2.80

HEAVENLY BLUE

Vigorous climber for a sheltered spot or conservatory. Bright green foliage with stunning blue flowers, short lived but regularly replaced. Full sun is essential. Flowers June to October. Ht. 2.5m (8').

S/C 85 65001 £2.10

LAZY LUXE MIXED

Possibly the best ever mixture of Morning Glory. Top quality formula mixture of ten sparkling colours creates a stunning annual climber. Quickly covering fences, trellis or an obelisk in a container. Blooms all summer. Ht. 180cm (6')

S/C 60 65005 £2.00

TUTU

A truly stunning climber with light pink semi double flowers, each attractively marked with light - magenta blotches. Early flowering over a long period from mid June to September. Sure to create interest up a sunny garden fence or trellis. Ht. 2m+ (climbing).

S/C All seed counts are approximate

Order line: 01376 570000/572456

Linum HP

Sow March to May.
Flowers June to Aug.

PERENNE

Lovely border plant with narrow grey green leaves and delicate sky blue flowers in profusion.
Ht. 45cm (18").

S/C 700 66702 £1.95

Linum HA

Sow March to May. Flowers June to Sept.

CHARMER MIX

A blended mix of red, white, salmon and pink. Long flowering, fairly drought resistant. Ht. 45cm (18").

S/C 75 66704 £2.70

Kings recommend when not sowing directly into your borders you sow your seeds into a good quality seed sowing compost and water only with tap water. Do not use butt water as this can contain harmful pathogens, resulting in poor germination.

Lobelia HHA

Sow January to March. Flowers May onwards. New lobelia seedlings are very small and produce only a tiny root system in the early stages of growth and are unable to take up moisture as quickly as other plants such as marigolds and petunias. Therefore to avoid damping off, take extra care when watering and do not over do it.

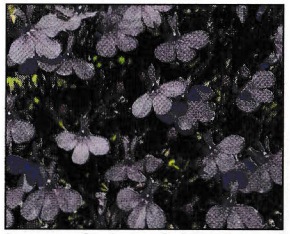

CAMBRIDGE BLUE

Good compact habit of bright green leaves topped with masses of tiny pale blue flowers.
Ht. 10cm (4").

S/C 2,500 66801 £2.10

CRYSTAL PALACE

KINGS SUNSHINE MIX

For a dazzling display of pastel shades, many bi-coloured, it creates a carpet of vivid mixed colours in the sun. Ht. 5-8cm (2-3").
S/C 325 **68003** **£2.00**

MAGIC CARPET

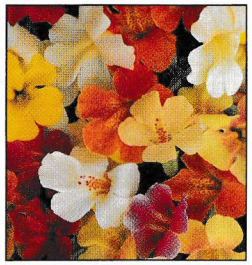

Low spreading habit of woolly light green leaves covered in daisy like bright flowers with dark centres. Needs full sun to open flowers. Ht. 5-8cm (2-3"). Also known as Livingstone Daisy.
S/C 1,000 **68001** **£2.45**

Michaelmas Daisy HP
NOSTALGIA MIXED

Highly suited for the herbaceous border where it will make a delightful cut flower. Sow May to June. Plants will bloom from August to October in shades of pink, lavender and violet.
Ht. 120cm (48").
S/C 75 **53517** **£2.05**

Mimulus HHA
MAGIC MIXED F1

Compact and very floriferous habit, producing masses of blooms in 9 eye-catching colours. Quick to flower from seed and hardy down to -4°C. Ideal for sunny or shady borders and containers. Ht. 20-25cm (8-10").
S/C 60 **68302** **£2.45**

Mimulus HHP
TIGRINUS

Well suited to moist areas in bog gardens or pool edge. Yellow and copper blotched flowers benefit from cutting back to get a second flush. Sow February to March. Flowers June to September. Ht. 40cm (16").
S/C 1,750 **68301** **£2.35**

Mirabilis jalapa HHA
Sow February to April. Flowers July to September.

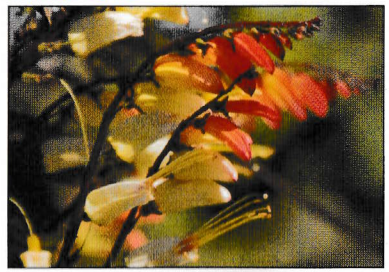

MARBLES MIXED

A spectacular formula mixture of 3 marbled varieties all with eye catching striped and bi-coloured flowers. These fragrant blooms open late afternoon, hence the common name of 4 o'clock plant, and keep blooming till the following morning filling the garden with their evening fragrance.
Ht. 60-90cm (24-36").
S/C 40 **68351** **£2.45**

Mina lobata HHA
An easy growing climber for pots or covering trellis. If growing tip is pinched out can even be used in hanging baskets. Seeds should be soaked in water for 12-24 hours to aid germination. Sow under glass at 20°C in March and April, then, after about 7 to 8 weeks, plant out from early May. Flowers June to September.

EXOTIC LOVE

Showy colourful flowers on short spikes that start scarlet and slowly change through orange and yellow to white as they mature. Ht. 1.5-2m (60-78").
S/C 20 **68325** **£2.45**

Monarda didyma HP
Sow May to July. Flowers June to Sept.

BERGAMOT

Lovely addition to a herbaceous border. The flowers are produced in shades of pink to scarlet. Produces a delightful aroma of mint.
Ht. 60cm (24").
S/C 90 **68401** **£2.10**

Myosotis see Forget-me-not

Nasturtium HA
Seed can be either sown under glass in March at 16°C or direct into open ground from late April. Flowering is from June to September. Occasionally nasturtiums attract black fly, so it may be worthwhile growing some near your broad beans to draw them away.

ALASKA MIXED

Red shades of bright flowers but the leaves are variegated cream and light green foliage. Ht. 30cm (12").
S/C 40 **68701** **£2.25**

NEW TO KINGS

S/C 500 69301 £2.00

PERSIAN JEWELS

Has all the delights of bedding, drying and cutting use but in a range of colours from pink, purple, lilac, blue and white. Ht. 40-50cm (16-20").

S/C 500 69302 £2.00

Nolana HHA

Sow March to May. Flowers July to October.

BLUE BIRD

Spreading succulent plant for ground cover or in containers to trail down and show off the sky blue flowers with white and yellow centres. Ht. 15cm (6").

S/C 50 69401 £2.10

Omphalodes linifolia HA

'LITTLE SNOW WHITE'

Common name Argentine Forget-me-not. This is a slender, branching annual with narrow grey-green leaves and open racemes of white flowers 1.5cm across in late spring and summer. Ideal for edging a border or for sowing in drifts to create a snow white cloud of long lasting colour. Ht. 40cm (16").

S/C 100 69605 £2.05

Kings recommend when not sowing directly into your borders you sow your seeds into a good quality seed sowing compost and water only with tap water. Do not use butt water as this can contain harmful pathogens, resulting in poor germination.

Oryza HHA

STAR BUY

SATIVA BLACK MADRAS

(Ornamental rice). Exotic, a touch of Asia in your garden. Easy to grow, easy to sow, keeps its very attractive deep green-purple foliage for more than 4 months. Just maintain soil moisture. Sow April to May. Ht. 40cm (16").

S/C 50 69610 £1.95

Pansy HP (treat as HHA and HB)

Also see Viola

Pansy flowering times will vary depending on sowing times.

Just about the most popular bedding plant because of its versatility. Different varieties can be sown any time between January to September in a cold frame or in a greenhouse. Once planted out Pansies will provide flowers in an amazing range of colours and shades virtually the whole year round. They will flourish in bedding, pots, hanging baskets, in full sun and even shade.

NEW TO KINGS

Penstemon HHP

(treat as HHA)

Sow February to May. Flowers June to August.

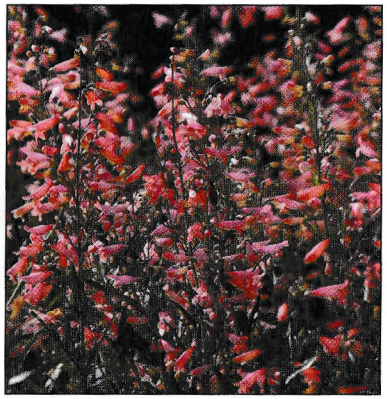

BARBATUS CAMBRIDGE MIXTURE

A compact strain flowering in less than 20 weeks from sowing. Grey-green foliage and long lasting flower spikes in shades of pink, rose, blue and purple. Ht. 30cm (12").

S/C 200 70303 £3.10

BARBATUS TWIZZLE CORAL

Fleuroselect Novelty. Tall stems covered in small coral pink, bell like flowers adding height to borders as they gently sway in the breeze, attracting beneficial insects. Flowers from summer through to autumn. First year flowering perennial. Ht. 70-80cm (28-32").

S/C 20 70305 £3.00

BARBATUS TWIZZLE SCARLET

Fleuroselect Gold. Bred to be first year flowering, yet still resembling the elegance of the wild penstemon. Tall stems covered in small scarlet, bell like flowers adding height to borders as they gently sway in the breeze, attracting beneficial insects. Flowers from summer through to autumn. Ht. 70-80cm (28-32").

S/C 20 70306 £3.00

GIANT HYBRIDS

Semi-dwarf rockery or border plant which should be used more often as the trumpet shaped flowers are beautiful. Ht. 45cm (18").

S/C 1,000 70301 £2.45

Kings recommend when not sowing directly into your borders you sow your seeds into a good quality seed sowing compost and water only with tap water. Do not use butt water as this can contain harmful pathogens, resulting in poor germination.

Order line: 01376 570000/572456

Petunia HHA

Another of the garden's versatile plants that can be grown under all conditions and different situations. Sow seed in pots or trays in the greenhouse at 18°C from February to March. Seedlings will be ready for pricking out in about 7 weeks, unless, of course, you are using plug trays in which they can be left to grow on, but do remember to give them some feed when watering. Plant out as soon as chances of frost have gone and they will flower virtually straight away and last right through from June onwards.

BONANZA MIXED F1

A multiflora double. The vigorous plants produce large numbers of medium size flowers which are fully double. Ht. 25-35cm (10-14").

S/C 100 70603 £3.75

CASCADE MIXED F1

Extremely prolific plants with extra large flowers. Although not a true trailing variety is ideal for baskets and containers. Ht. 35-40cm (14-16").

S/C 100 70604 £3.45

see Kniphofia

Rhodochiton HHP

ATROSANGUINEUS, PURPLE BELLS

A very attractive and unusual climbing plant with deep purple flowers surrounded by an interesting calyx. Ht. 2m (6' 6").

S/C 10 72303 £3.35

Ricinus HHA

GIBSONII

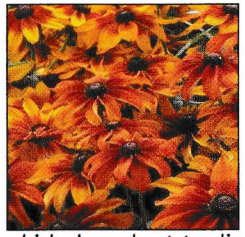

Well known castor oil plant, really quite easy to grow. Very attractive dark green stems and bronze foliage for either the garden or as a pot plant. Sow Feb to April. Ht. 120cm (48"). Poisonous seeds.

S/C 10 72420 £3.10

Rudbeckia hirta HHA

Sow March to May. Flowers July onwards.

AUTUMN COLOURS

A superb blend of large deep bronze, tapering to copper toned blooms held well above healthy foliage which showed outstanding garden performance in the 2020 RHS Trials, and winning the RHS Award of Garden Merit. Sturdy compact plants, sure to add interest to borders. Ht. 56cm (22").

S/C 25 72612 £2.55

IRISH EYES

Very different flower form. Tall plant habit with large golden yellow single flowers with green centre. Border or cut flower. Ht. 60cm (24").

S/C 450 72602 £2.25

MARMALADE

Large golden single daisy like flowers with dark brown eyes. Good cut flower and a clump in a border looks great. Ht. 60cm (24").

S/C 450 72603 £2.15

KELVEDON STAR

Bred by Ralph Gould. Free-flowering bushy variety with yellow blooms with an eye-catching dark ring in the centre adding to its appeal. Flowers all summer until first autumn frosts. *Excellent weather resistance*. Ht. 70cm (28").

S/C 150 72608 £1.90

PRAIRIE SUN

Visually stunning and outstanding in the garden. Golden yellow blooms with primrose yellow tips, ideal for adding height and interest to the garden as well as an attractive cut flower. Ht. 60cm (24").

S/C 25 72610 £2.60

RUSTIC DWARFS

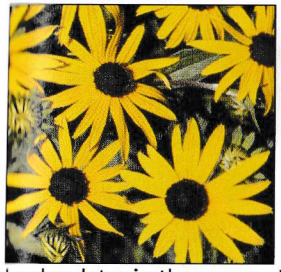

Autumn flowers of large golden blooms with streaks of mahogany on the petals and in the eyes. Ht. 40cm (16").

S/C 600 72604 £2.15

Order line: 01376 570000/572456

Rudbeckia fulgida HP

GOLDSTURM

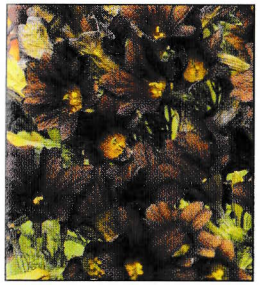

Hardy variety flowering towards early autumn adding welcome colour to borders later in the season. Produces masses of bright yellow blooms 13cm (5") across on very bushy plants. A welcome addition to any perennial border. Ht. 60-70cm (24-28").

S/C 100 72609 £1.95

Salpiglossis HHA

CAFÉ AU LAIT

An intriguing colour for Salpiglossis, coffee coloured petals with deep purple veins and golden yellow centers. Sure to add interest to a sunny border. Ht. 45-60cm (18-24").

40 pills 72803 £2.60

BOLERO F2

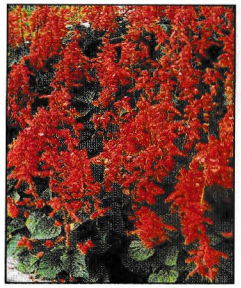

Trumpet shaped blooms with distinct veining on the petals. Lovely mix of purples, blues and yellows. Sow February to March. Flowers July to Sept. Ht. 60cm (24").

S/C 750 72801 £2.05

Salvia HHA

No garden display is really ever complete without the bright red spikes of Salvia, although now you can have a wide variety of colours to create new exciting schemes. Sow Feb. to March. Flowers July onwards.

BLAZE OF FIRE

One of the most popular varieties. Bright green foliage and vivid scarlet spikes of flowers. Ht. 30cm (12").

S/C 70 72902 £2.15

FARINACEA VICTORIA

Lovely planted in blocks

Different flower and colour form to the normal type. Dense spikes of violet-blue flowers above medium green foliage. Ht. 50-60cm (20-24").

S/C 75 72908 £2.50

Scabiosa atropurpurea HA

Sow March to May. Flowers July to Sept.

BLACK KNIGHT

Deepest maroon, almost black blooms with contrasting white stigmas. Adds height to borders. Attracts bees & butterflies. Ht. 90cm (36").

S/C 100 73202 £2.85

OXFORD BLUE

Tall stems become covered in masses of stunning mid-blue flowers. Adds height to border displays. Loved by bees and butterflies. Ht. 90cm (36").

S/C 100 73203 £2.85

TALL DOUBLE MIXED

Fully double blooms on long stems in shades of red, pink, violet and white. Beautiful border plant or cut flower. Ht. 90cm (36").

S/C 75 73301 £1.80

Scabiosa stellata HA

PING PONG

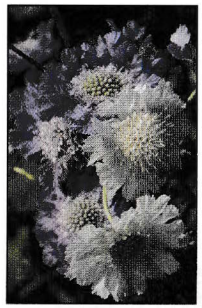

Grown primarily for the fascinating seed heads which follow the ball shaped flowers. A must for dried arrangements. Ht. 60-90cm (24-36").

S/C 65 73302 £2.10

Scabiosa caucasica HP

HOUSES HYBRIDS

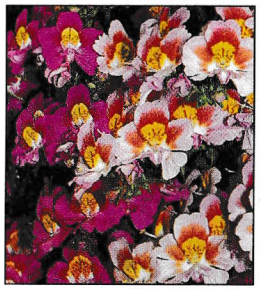

Large delicate flowers of double and single form in shades of blue, violet and white. Long lasting cut flower. Sow March to May. Flowers June to September. Ht. 60cm (24").

S/C 35 73204 £2.50

Schizanthus HHA

DR. BADGER'S

Butterfly Flower. Ferny foliage completely covered by the flowers in superb colours marked like small orchids. Sow Feb. to April or Aug. to Sept. Flowers June to September. Lovely pot plant. Ht. 30-45cm (12-18").

S/C 275 73401 £2.15

Sempervivum HP

SPECIES MIXED (HOUSE LEEK)

Rosette like fleshy leaf formations throw stems with star like flowers. Perfect for dry walls and rockeries. Sow April to June. Flowers June to August. Ht. 5-10cm (2-4").

S/C 200 73701 £2.30

Solidago HP

YELLOW SPRINGS (GOLDEN ROD)

Superb strain for the herbaceous border. Large plumes of golden yellow flowers on tall stems. Sow April to June. Flowers July to September. Ht. 90cm (36").

S/C 500 74101 £2.00

Statice (Limonium) HHA

Sow February to April. Flowers July to September.

ART SHADES MIXED

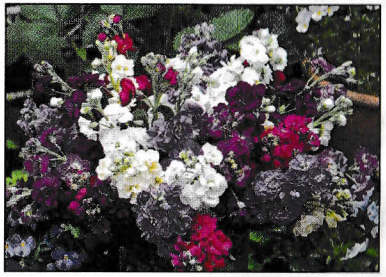

Sea Lavender. Probably the most popular of all the everlastings. Strong stems and bright flower heads in a blend of eight colours. Ht. 50cm (20").

S/C 100 74205 £2.15

Stock HHA

Sow seeds under glass in February and March at 18°C, germination is quite quick and seedlings should be ready to prick out in about 4 to 5 weeks. Transplant from early May and you will have flowers from June until September.

ANYTIME MIX

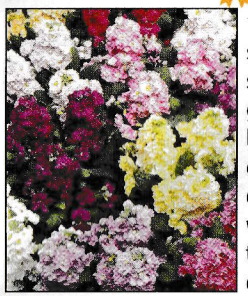

100% double selectable Stocks (After germination let seedlings cool for a few days and it will be easier to see the different colour seedlings, the pale green seedlings are doubles). A delightful mix of bright colours on tall stems, with a stunning clove like fragance, perfect for use as a cut flower. Sow Anytime from February to June, flowering 10-12 weeks after sowing. Ht. 75cm (30").

S/C 150 74111 £2.20

Stock continued

CINDERELLA MIXED

100% selectable stocks. After germination let seedlings cool for a few days and it will be easier to see the different colour seedlings, the pale green seedlings are doubles. Dwarf, compact, double flowered with an attractive mix of 6 colours each with a sweet spicy clove fragrance Ht. 20-25cm (8-10").

S/C 100 74310 £2.95

DWARF TEN WEEK MIX

Highly scented form throwing many stems of single and double flowers for display or cutting. Ht. 30cm (12").

S/C 150 74302 £2.10

VINTAGE MIX

Compact dwarf plants. High percentage of double blooms, quick into flower. Ht. 30cm (12").

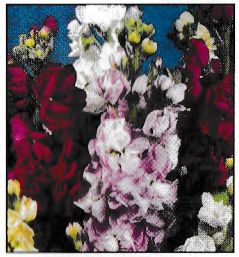

S/C 100 74305 £2.70

See also Night Scented Stock on page 102.

Stock HB

Sow June to July. Flowers June to July the following year.

BROMPTON MIXED

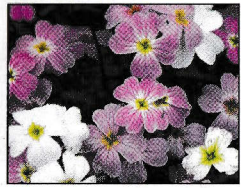

A mass of highly scented flowers in a range of whites, pinks and reds for spring colour. Ht. 40cm (16").

S/C 150 74304 £2.00

Stock HA

VIRGINIAN MIXED

Easy to sow in small patches to give splashes of colour and scent. Often mixed with Matthiola (Night Scented Stock) to give all day aroma. Sow March to July. Flowers June to July. Ht. 20cm (8").

S/C 3,500 74401 £2.10

Sunflower (Helianthus) HA

Sow March to June.
Flowers July to September.

CLARET F1

Stunning deep wine-red blooms, which as they mature develop a gorgeous metallic sheen. Tall, multi-stemmed plants are sure to create interest in borders. Ht. 2m (80").

S/C 20 74726 £2.20

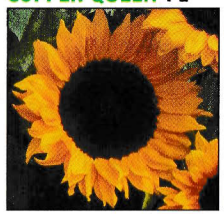

NEW TO KINGS
COLLECTION PACK

Sunflowers are easy and fun to grow for all the family. This collection offers tall, medium and short varieties. Collection contains 5 individual foils of Giant Single, Valentine, Claret, Teddy Bear and Ring of Fire

S/C 70 92040 £4.35

COPPER QUEEN F1

Pollen free
Large pollen free blooms, golden yellow with a cinnamon dusting, giving it a rich, orange appearance. Ht.180cm (6').

S/C 25 74720 £2.50

DESIRE RED F1

A breeding break-through! The first compact red sunflower for the garden border or in patio containers. Outstanding garden performance blooming for 8-10 weeks, and it makes an attractive combination planted with Dwarf Sunray yellow. Ht. 50-55cm (20-22"). Fleuroselect Gold.

S/C 10 74727 £3.05

DWARF SUNRAY YELLOW F1

Unique naturally dwarf plants branch out to bear up to fourteen 10cm (4in) yellow flowers with chocolate centres per plant. Fun to grow in borders or in containers. Ht. 50-55cm (20-22").

S/C 10 74725 £3.00

NEW TO KINGS
SUMMERTIME FORMULA MIX F1

A stunning mixture of sunflowers ideal for adding colour and height to your borders as well as vases inside as a spectacular cut flower. Blooms range in colours from orange, yellow, red, bicolours and everything in-between. Ht 1m-2m (39-78").

S/C 25 74731 £2.50

SUMMER LOVIN F1

A delightful mix of light cream pastel shade blooms, each complimented by light to dark maroon rings, and a dark centre. Tall branching habit, adding height and interest to the back of a border display. Ht.180cm (72").

S/C 25 74728 £2.25

SUNBRIGHT F1

Pollen free
Pollen free, high quality golden yellow blooms with a dark centre. Ideal for adding height to borders or used for a cut flower. Ht. 150-180cm (5-6ft).

S/C 25 82013 £2.50

BAMBINO

Dwarf, single yellow medium sized flowers with dark centres. Non-branching. Orange appearance. Ht. 40cm (16").

S/C 25 74716 £2.35

DEBILIS SOLUNA LEMON

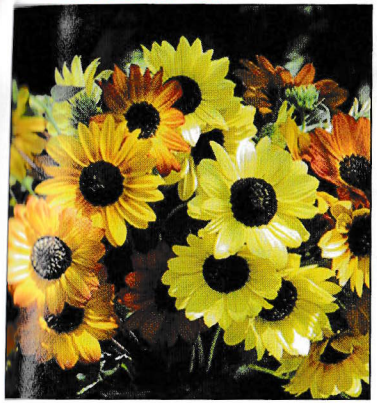

Delightful soft yellow small round blooms each enhanced by a dark centre, on short stems making them ideal for cutting and adding to smaller bouquets. Each small 8cm bloom is accompanied by many more on well branched plants. Flowering freely all summer towards the back of borders. Ht. 120cm (4ft).

S/C 30 63510 £2.30

Order line: 01376 570000/572456

DEBILIS SOLUNA MIX

Attractive autumnal shades, on small round blooms each enhanced by a dark center. Plants are well branched, freely blooming all summer providing plenty of stems to cut for smaller bouquets. Ht. 100- 120cm (40-45").

S/C 30 74729 £2.15

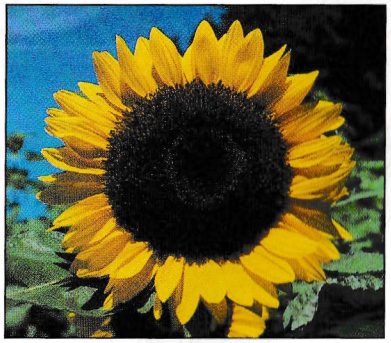

DOUBLE SUN KING

Fully double, golden-yellow, 15-25cm (6-10") blooms with masses of petals for that attractive, fluffy, powderpuff look. Tall strong single stems topped by an almost pollen free uniform bloom, making Sun King an excellent, long lasting cut flower due to its doubleness. Ht. 180cm (6').

S/C 20 74722 £2.25

GIANT SINGLE

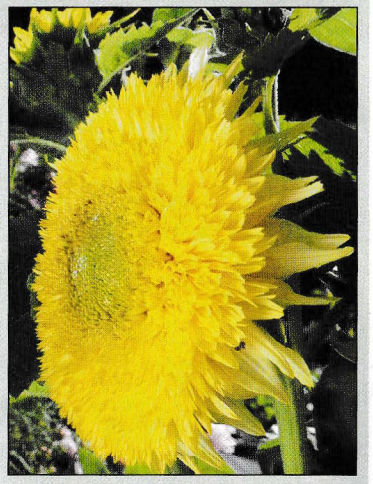

Children love it

The variety children love to grow. Tall strong stems topped with bright yellow flowers that follow the sun during the day. Ht. 2-3m (6-10') plus.

S/C 50 74701 £1.85

NEW TO KINGS

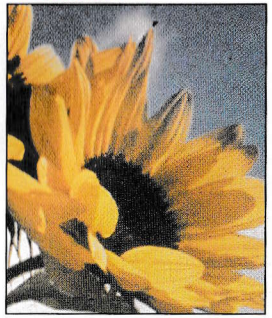

GUMMY BEAR

Spectacular semi-tall variety bearing eye-catching fully double lemon-yellow blooms, on strong plants capable of each producing up to 5 fluffy blooms. Sure to add height and interest to borders or used as a cut flower. Ht.90-120cm (3-4ft).

S/C 20 74730 £2.50

MOONWALKER

Multi-stem, tall growing variety for both garden decoration and cut flower. Large flower heads of soft yellow with dark centres. Ht. 3m (9').

S/C 35 74704 £2.20

MS. MARS

Naturally dwarf plants with dark foliage and dark purple buds on multi-headed stems. Merlot-coloured ray petal transitioning to pretty pink shades. Ideal toward the front of a border and can make an interesting cut flower. Ht. 50-60cm (20-24").

S/C 20 74723 £2.40

MUSIC BOX

Large flower heads but much shorter plants. The strong stems bear flowers in shades of cream, yellow and mahogany with dark centres. Ht. 70-80cm (28-32").

S/C 35 74702 £2.15

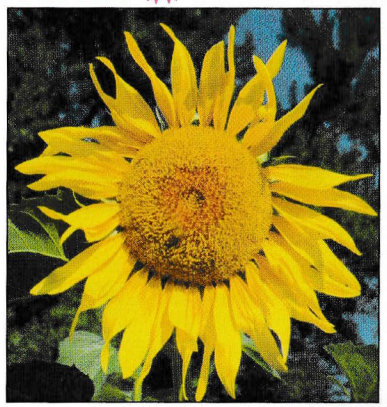

PACINO

Very showy plant for bedding or pots. Stocky plants carry many small centred, bright yellow flowers up to 12cm (5") across. As centre flower begins to open lateral branches are already in bud. Ht. 40cm (16").

S/C 30 74705 £2.10

PIKE'S PEAK

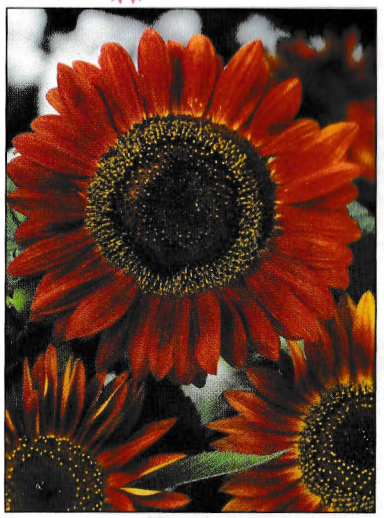

The sunflower that others look up to, with the largest sunflower seeds in the world. Huge heads contain seeds as large as 4cm (1½") long. Extra-large seeds mean extra-large plants, and these grow 3.6-4.5m (12-15') tall with luminous 35cm (14") golden-yellow flower heads.

S/C 30 74719 £1.95

Kings recommend when not sowing directly into your borders you sow your seeds into a good quality seed sowing compost and water only with tap water. Do not use butt water as this can contain harmful pathogens, resulting in poor germination.

RED SUN

Easy to grow. Stunning dark red flowers on tall stems. Brilliant for back borders and beautiful cut flowers. Ht. 1.5m (5ft).

S/C 25 74714 £2.35

NEW TO KINGS

RING OF FIRE

Eye-catching bicoloured petals with a dark red base and golden yellow tips, surrounding a dark centre. Long stems ideal for adding height to borders or as a decorative cut flower. Ht. 120cm (4ft).

S/C 25 74733 £2.40

Sunflower continued

TAIYO

An old Japanese non-branching variety, bred mainly for cut-flower use, but equally at home planted en-masse towards the back of a border. Single large 15-25cm (6-10") flower heads in tones of yellow orange, with rich chocolate centres. Ht. 150cm (5').

S/C 30 74724 £2.00

TEDDY BEARS

A dwarf, multi-headed sunflower producing an abundance of extraordinary flowers. An adorable addition to patios or borders and great for cutting too. Ht. 40-60cm (16-24"). Easy to grow and a real favourite with children.

S/C 40 74713 £3.00

NEW TO KINGS

VALENTINE

Delightful lemon yellow flowers with black centres. Basal branching with long stems ideal for cutting. Ht. 150cm (5ft).

S/C 30 74732 £1.90

VANILLA ICE

Smaller flowered cucumerifolius type with gorgeous creamy white flowers with a chocolate centre surrounded by a golden halo. Multi-headed branching habit creating masses of blooms per plant flowering longer in the border. Ht. 140cm (56").

S/C 40 74718 £1.95

Peter Miller, Kings expert on sweet peas, gives you his tips

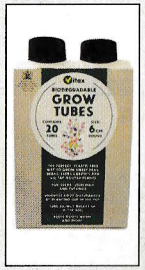

HOW TO GROW SWEET PEAS

"Seed sowing can begin in September, through to late February, but I find the optimum time is early November. Sow 5 seeds into a 3" deep pot, using a good growing medium. Keep in a cold frame, do not let the soil dry out but do not over water. In my experience I have found that chipping and soaking the seeds is not necessary.

When the plants have grown 3 pairs of true leaves, pinch out the tops to encourage side shoots for the promotion of greater flower production. Harden off, prior to planting out in early April, (weather permitting) and feed with foliage or soil dressing at fortnightly intervals. During late September or March direct sowings can also be made in the flowering site."

Get your Sweet Peas off to a good start ...

GROW TUBES

Ideal for starting sweet peas, etc, and growing on. Extra depth for good root development.

Pack of 20 tubes.

1 pack	45140	£6.50

STARRY NIGHT ✓✓✓

An old spice variety. A superb mix of deep purple and blues with touches of white.

S/C 20 76815 £2.30

Sweet William (Dianthus barbatus) HB

Sow May to July. Flowers following June to August.

ALBA

The buds are as pretty as the flowers of this pure white Sweet William. Ht. 45cm (18").

S/C 100 74906 £2.75

AURICULA EYED MIXED

Large single flower heads, make wonderful cut flowers as each has an attractive eye. Easy to grow once established with a gorgeous sweet scent. Ht. 45cm (18").

S/C 500 74905 £2.15

CROWN DOUBLE MIXED

Fully double tall mix, ideal for cutting, filling the spring air with their wonderful fragrance. Ht. 60cm (24").

S/C 500 74908 £2.05

GEMSTONES

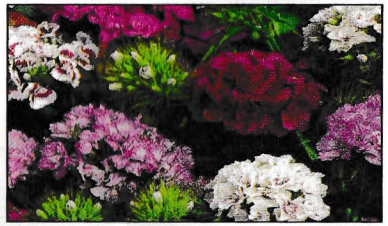

Strong bushy plants

Fully double flowers in range of shades of red, pink and white many bi-coloured. Ht. 45cm (18").

S/C 550 74901 £2.05

INDIAN CARPET

A dwarf compact variety with a very wide colour range. Excellent for cottage and wildlife gardens. As well as an ideal bedding plant. Ht. 25cm (10").

S/C 650 74903 £2.20

STAR BUY

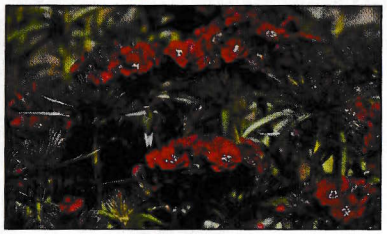

PRETTINESS

Large single flower heads on good stems for cut flower use, the bright colours make a lovely border show. Ht. 45cm (18").

S/C 500 74902 £1.95

NIGRICANS

Deep, deep crimson, sweetly scented flowers with dark leaves. Ht. 45cm (18").

S/C 100 74907 £2.80

Sweet Rocket HP (hesperis matronalis)

MIXED

Lovely scented flowers in shades of white and purple.Prefers moist feet and sun on its head. Sow May to July. Flowers June. Ht. 60cm (24").

S/C 500 74801 £2.00

Sweet Sultan HA

MIXED

Pleasantly scented summer bedding plant and useful cut flower. Frilly flowers from rose, lemon, lilac, purple to white. Sow March to May. Flowers June to September. Ht. 60cm (24").

S/C 250 74825 £2.10

Tagetes HHA

Sow February to March. Flowers June to October. Very much like a miniature, single Marigold and grown in the same way.

GOLDEN GEM

The plants form mounds of lacy bright green foliage which are smothered in star like flowers of deep gold. Ht. 20cm (8").

S/C 225 75001 £2.15

LEMON GEM

Slightly taller than the golden version but the same habit. Lemon yellow flowers and strong scent when brushed. Ht. 25cm (10").

S/C 225 75002 £2.15

STARFIRE

Mound like plant habit and the feathery foliage is covered in small single flowers in gold, yellow and mahogany, many bi-coloured. Ht. 25cm (10").

S/C 225 75003 £2.20

TANGERINE GEM

Bright orange colouring which contrasts very well against the other shades in this group. Ht. 25cm (10").

S/C 225 75004 £1.90

Thunbergia HHA

ALATA (BLACK EYED SUZIE)

Lovely climbing plant but very tender, well suited to a conservatory or baskets in well sheltered spot. Flat single flowers in shades of white, yellow and orange mostly with black eye. Sow February to April. Flowers June to September. Ht. 250cm (8').

S/C 30 75201 £2.15

Tithonia HAA

TORCH

The Mexican sunflower where it can grow up to 180cm (6ft) but closer to 120-150cm (4-5ft) when grown in the UK. Bushy plants produce luxurious, orange red flowers, adding height and interest to late summer borders as well as being a marvellous autumn cut flower lasting 7-10 days in a vase. Ht. 120-150cm (4-5').

S/C 100 75224 £2.25

Order line: 01376 570000/572456

Trollius HP

GOLDEN QUEEN

Large globular buttercup like flowers of bright yellow on strong straight stems. Sow March. Flowers May to June. Ht. 75cm (30").

S/C 100 75301 £2.10

Verbascum HP

CHAIXII ALBUM SNOWY SPIRES

Stunning floral spikes clothed in crisp pure-white florets with eye-catching magenta centers enhanced by the lush green foliage. A stately perennial loved by bees to grace borders or containers. Ht. 30-60cm (12-24").

S/C 20 75603 £3.05

PHOENICEUM

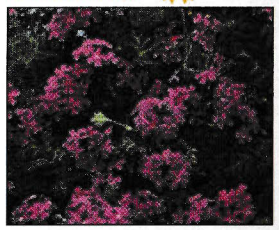

Long graceful spikes of flowers in shades of white, pink and violet, followed by distinctive seed pods. Sow April to June. Flowers May to August. Ht. 90-105cm (36-42").

S/C 2,500 75602 £2.10

Verbena HHA

Flowers June to October.

IMAGINATION

Award winner. Produces dainty branches from mound shaped plants with a spreading habit. Will trail over the sides of baskets and containers to give cascades of blue-violet flowers. Spread up to 50cm (20"). Sow March to April. Ht. 30cm (12").

S/C 75 75701 £2.45

MAMMOTH HYBRIDS

Bright green foliage and large heads of flowers held erect in a range of colours from white & red through to purple. Sow February to April. Ht. 30cm (12").

S/C 125 75702 £2.60

SCENTSATION MIXED

Unique fragrant verbena from seed! A variety of colours on semi-trailing plants, ideal for planting in borders or containers. Ht. 20-30cm (8-12").

S/C 50 75711 £2.90

Verbena HP

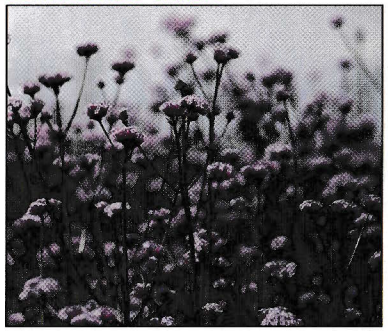

BONARIENSIS

Airy and light lilac flowers that look fabulous in a bedding border. Ideal as a cut flower. Flowers 12-14 weeks after sowing. Ht. 120cm (48").

S/C 250 83018 £2.20

BONARIENSIS VANITY

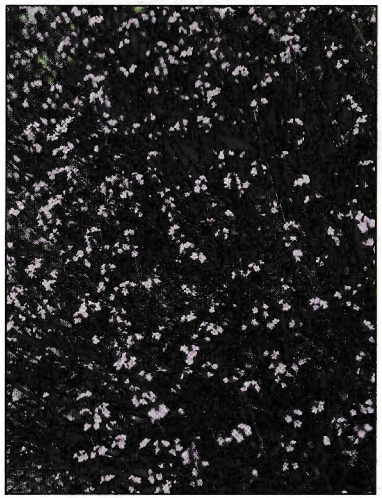

If you always thought Verbena bonariensis was too tall for your garden? Not anymore! Vanity is more compact than existing varieties, with tighter flower clusters and a more intense purple-blue colour, blooming from mid-summer until autumn frost in borders and now also in containers with this more compact variety. Ht. 80cm (32").

S/C 40 75712 £2.75

Kings recommend when not sowing directly into your borders you sow your seeds into a good quality seed sowing compost and water only with tap water. Do not use butt water as this can contain harmful pathogens, resulting in poor germination.

VERBENA OFFICINALIS BAMPTON

Named after the Devon town 'Bampton' where it was first discovered. A first year flowering perennial, with unusual purple/green tinted foliage, that compliments the airy spikes of small lilac flowers over a long flowering period. Likes to be grown in full sun and is ideal for borders or 'that' something different in patio containers, attracting many beneficial insect. Ht. 80cm (32").

S/C 50 75713 £2.35

SANTOS

First year flowering perennial, *very heat and drought tolerant*. Compact, upright plants flower throughout the summer into autumn in an attractive purple. Ht. 30cm (12").

S/C 40 75710 £2.25

Viola cornuta HP

FRIZZLE SIZZLE MINI MIXED F1

An attractive mixture of colours, ideal for autumn and spring displays as the cooler weather comes the more frilly the blooms will be. Eye catching in borders or containers. Hardy Perenial, often treated as HHA or HB.

S/C 25 76104 £2.60

SORBET MIXED F1

An early flowering compact series that has outstanding garden performance. *Very good cold tolerance* so it will flower throughout the winter months in sheltered sites. Delightful range of colours all with whiskered faces. Sow May to July. Ht. 12cm (5").

S/C 30 76009 £3.35

BACK TO BLACK

Dramatic jet-black blooms smother bushy free-flowering plants over a long flowering period. Ideal for baskets, patio containers or spring, summer and autumn bedding displays. Ht. 15cm (6").

S/C 150 76103 £2.10

Viola continued

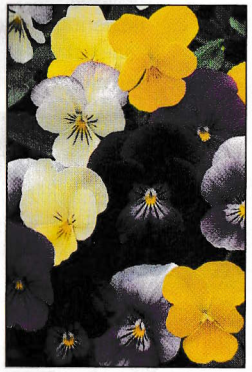

BRUSH STROKES

A mix of historic violas each with a distinct face, overlaid with multi-colour stripes, adding to its appeal. For borders or containers. Ht. 15cm (6").

S/C 50 76102 £2.25

SYMPHONIA

Our own specially selected and blended mixture of varieties to give an outstanding performance. Sow February to March or May to June. Flowers June to July. Ht. 20cm (8").

S/C 200 76005 £2.00

Viola odorata HP

SWEET VIOLET

Dark green foliage with small deep violet fragrant flowers. Something of a challenge to grow. Seed needs a frost before germinating. Sow October to November. Ht. 10cm (4").

S/C 50 76101 £2.35

Wallflower HB

Flowers April to June. For spring and early summer colour there is nothing to compare to a bed of wall-flowers. Sow in an open ground seed bed in May and July to either thin out or transplant from August to October.

SEPARATE COLOURS

For the gardener who wants a particular colour display we offer some separate colours which are chosen for the branching habit to produce many flower stems and for the quality of the flowers and fragrance. Ht. 45cm (18").

CLOTH OF GOLD - Golden yellow

Ht. 45cm (18").

S/C 500 76202 £2.00

FIRE KING - Brilliant orange

Ht. 45cm (18").

S/C 500 76203 £2.05

ORANGE BEDDER - Bright orange

Ht. 45cm (18").

S/C 500 76204 £2.00

VULCAN - Deep crimson

Ht. 45cm (18").

S/C 500 76205 £2.00

STAR BUY

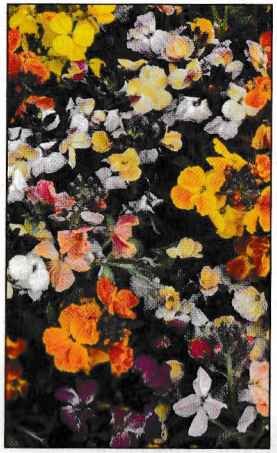

FAIR LADY MIXED

All the fragrance and flower power of a traditional wallflower but in a mixture made of more pastel shades. Ht. 45cm (18").

S/C 600 76206 £2.00

PERSIAN CARPET MIXED

Specially produced from selected coloured shades of apricot, gold, orange, purple, cream and rose. Ht. 40cm (16").

S/C 500 76207 £2.00

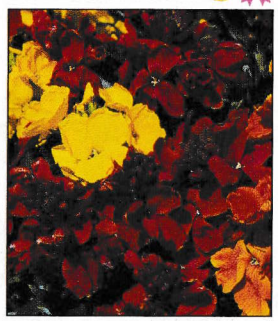

SIMPLICITY MIXED

Wide range of colours with single flowers held well on the flower stems. Good fragrance and long lasting. Ht. 40cm (16").

S/C 500 76208 £2.00

TOM THUMB MIXED

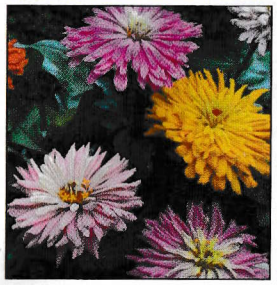

A little later into flower than others but due to its shorter structure it makes fine container displays. Ht. 20cm (8").

S/C 500 76209 £2.15

Zinnia elegans HHA

Sow March to May. Flowers July to September.

CACTUS FLOWERED MIXED

A joyful mixture of colours making these one of the most beautiful cut flowers. Attractive to bees and butterflies. Large, semi-double cactus flowers. Ht. 60-90cm (24-36").

S/C 100 76506 £2.75

CRESTO CITRUS MIXED

Excellent selection of crested flowered types in mouth-watering citrus shades, adding height to borders or interest to cutflower dispays. Ht. 75cm (30").

S/C 75 76516 £2.45

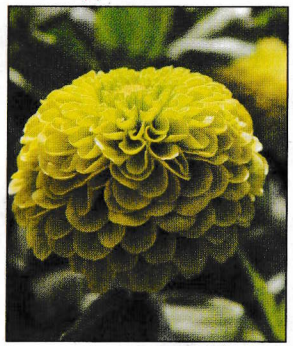

DAHLIA FLOWERED

Semi-double flowers with large flat petals in a wide range of colours on long strong stems. Ht. 75cm (30").

S/C 130 76502 £2.30

ENVY

Unusual and eye-catching lime green large dahlia flowered blooms on tall stems ideal for cutting. Ht. 65cm (26").

S/C 100 76515 £2.15

Order line: 01376 570000/572456

OKLAHOMA

Excellent for bedding or as a cut flower. Very bright coloured flowers, fully double with some semi-doubles. Ht. 75cm-100cm (30-40").

S/C 125 76505 £2.35

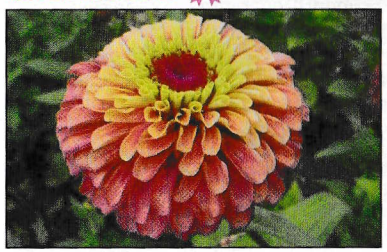

PURPLE PRINCE

Robust plants have excellent garden performance, flowering over a long period and producing an abundance of fully double, deep pink-purple, dahlia-like flowers. Ht. 90cm (36").

S/C 100 76514 £2.15

QUEEN RED LIME

Exotic and unusual with red flowers, flecked with lime, creating an eye catching border display and a spectacular cut flower. Ht. 60cm (24").

S/C 20 76510 £2.60

NEW TO KINGS

SALSIANDO

Truly stunning, fully double bi-coloured Zinnia blend of rose, creamy white, scarlet and gold. Creates an eye-catching display in summer borders. Perfect for the cut flower garden and loved by butterflies. Ht.65-75cm (25-30").

S/C 100 76518 £2.05

THUMBELINA

Very dwarf variety ideal for container use. Double and semi-double blooms in bright solid colours. Ht. 15cm (6").

S/C 75 76504 £2.00

NEW TO KINGS

ZINDERELLA FIZZ

A truly stunning scabious flowered Zinnia, where its red & white bicoloured blooms are a must for the cutting garden, as well as an eye-catching addition to borders. Winner of Fleuroselect Novelty award. (Although plants have a very high % of scabious flowers, an occasional single flower may occur). Ht.65-75cm (25-30").

S/C 20 76519 £2.55

ZINDERELLA LILAC

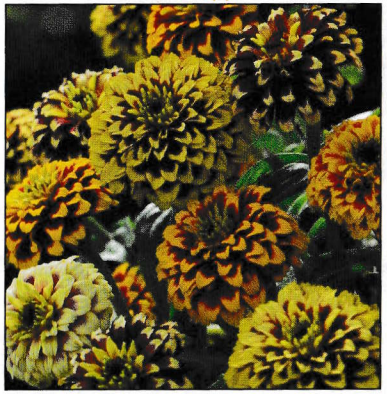

Outstanding scabious flowered selection winning a Fleuroselect novelty award. Attractive lilac pink with contrasting dark centres all with a good central crest. Attracts butterflies. Ht. 75-90cm (30-36").

S/C 20 76508 £2.65

Zinnia haageana HHA

JAZZY MIXTURE

Attractive plants, with a bushy habit and stunning bi-coloured blooms. Flowers all summer in borders or containers attracting bees and butterflies.
Ht. 35-45cm (14-18").

S/C 100 76509 £2.35

JAZZY RED

Bushy free-flowering, heat and drought tolerant plants, become clothed in closely imbricated bi-coloured petals of ruby red with soft white tips. Flowers within three months of sowing and continues until the first frosts. Perfect for borders or patio containers in a sunny position.
Ht. 45cm (18").

S/C 100 76517 £2.30

Zinnia marylandica HHA

DOUBLE BRILLIANT

Stunning double flowers in a mix of 3 spectacular colours. Outstanding garden performance when planted en masse in borders or containers. Unlike other zinnias, these have a stronger root sytem so they can be transplanted, making them more versatile for gardeners.
Ht. 40-50cm (16-20").

S/C 20 76512 £2.60

ZAHARA SUNBURST

Eye-catching large red and yellow bi-colour blooms and the first of this colour to be available from seed! Compact, dwarf and free-flowering plants, show excellent garden performance along with *outstanding disease resistance* in borders or containers. Ht. 30-45cm (12-18").

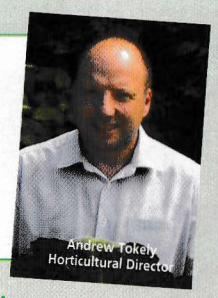

S/C 20 76513 £2.65

NEW & EXCLUSIVE TO KINGS

SEED AND CUTTING COMPOST - PEAT FREE WITH EXTRA ADDED PERLITE

Our NEW compact seeds and cutting compost.
Trialled by Kings Horticultural Director Andrew Tokely.

"If I wasn't confident it was a good alternative to peat and it will work for our customers, we would not offer it"

Perfect for
- Fast Germination.
- Enhanced aeration and drainage.
- Improved root growth.
- Rooting cuttings and growing them on.
- Also ideal for growing succulents.

Expands to 15L just need to add 5L of water
Full instructions on packaging.

Results of Kings Seed and Cutting Compost v Peat on Basil and Cabbage seedlings.
Tests undertaken by Kings Seeds Horticultural Director.

Basil

Cabbage

Our Coco Peat Free Seed Sowing Compost is easy to use and has a nice fine texture for seed sowing.

The Coco Block swells in minutes when 5 litres of lukewarm tap water is added.

Once swelled it holds moisture so if used straight away there is no need to rewet before sowing.

Germination and seedling development is equal to Peat.

Kings Peat Free Seed Sowing Compost contains Perlite to aid drainage and a small amount of feed to help seedling development.

Contains no animal products so also suitable for vegan gardeners.

15L (once expanded) **48160** **£6.95**

TOP TIPS FOR GROWING IN PEAT FREE COMPOST

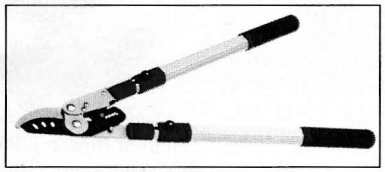

- **Check your Water**
  Peat free compost often looks dry on top but can still be wet below.

- **Feed the Seeds**
  They will need feeding with a dilute liquid feed after approx 3-4 weeks (once first true leaves have developed).

Tools

Quality stainless steel tools that will not rust or corrode. All the tools have beautiful ash handles. They will serve you well.

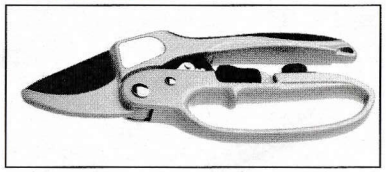

RATCHET LOPPING SHEARS

Extending handles allow you to reach high branches. The blades incorporate relief holes to reduce the pressure when cutting. 100mm cutting capacity. 12 month guarantee.

45980 **£30.00**

RATCHET PRUNER

Push-button handle lock with soft-touch grips to protect the hand.

Cuts through thicker branches easily, ideal for the gardener with less strength in their hands. Soft grip handle is designed to protect the hand. 20mm cutting capacity. 12 month guarantee.

45979 **£13.60**

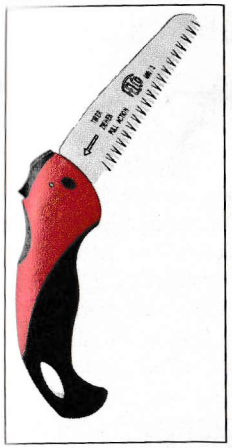

FELCO NO.5 SECATEURS

A really strong, perfectly engineered steel-handled secateurs. Will make very light work of the pruning. **Whilst stocks last.**

45152 **£40.00**

FELCO PRUNING SAW

Neat implement that folds up for easy and safe handling. The total length, when opened fully, is 39cm including the 16cm blade. Will easily cut branches up to 9cm. **Whilst stocks last.**

45943 £35.50

NEW TO KINGS

Nemaslug® and the Nemasys® Range

Refrigerate all of these living products immediately upon receipt and adhere to the 'use by' date. Please also read the IMPORTANT INFORMATION below before you order

The range uses naturally occurring different nematode species, to control some of the most common fruit and vegetable pests. Especially formulated for the home gardener, it has been specifically researched to be safe for children, pets, wildlife and bees. They can be used on all plants including food crops which can safely be harvested straight away. They are ideal for the organic gardener. Each pack contains living organisms (nematodes). **THEY MUST BE REFRIGERATED UPON RECEIPT AS IT IS A LIVING PRODUCT** and will have a use by date of 2-3 weeks. All products contain simple how-to-use instructions. All products are despatched by First Class post in padded envelopes which will usually go through the average letterbox.

NEMASLUG®

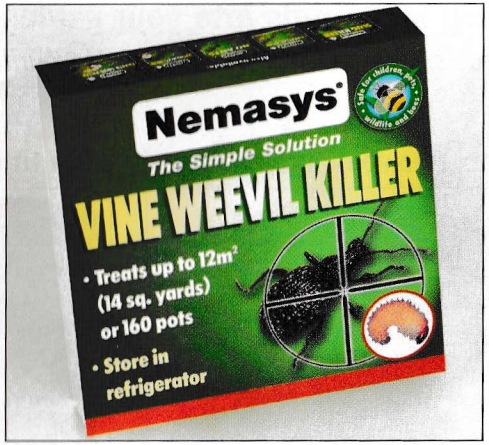

Treats all slugs, above and below ground for 6 weeks. Apply from mid-March to mid-October when soil temperature is above 5°C, using a watering can with a coarse rose, or hose end feeder, to the surface of the soil. Once opened the whole pack should be used in one application.

Slug Killer treats 40m2 (50 sq. yards)	**43120**	**£16.00**
2 packs x 40m2 (50 sq. yards)	**43188**	**£28.00**
Slug Killer treats 100m2 (125 sq. yards)	**43121**	**£32.00**
2 packs x 100m2 (250 sq. yards)	**43190**	**£58.00**

Please note we are unable to send Nemasys® products to outside U.K.

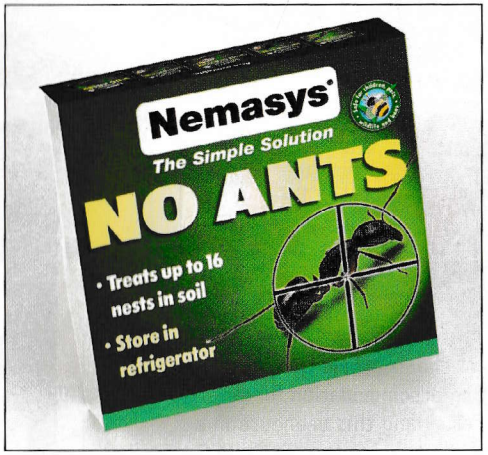

NEMASYS® VINE WEEVIL KILLER VINE

Weevil grubs attack plants roots. Adult vine weevil take notches out of the edge of leaves.There is no control for the adults. Control grubs by applying Nemasys® Vine Weevil Killer. Vulnerable plants include all plants in containers including hanging bags, recently planted container plants and plants with shallow root systems including herbaceous, rhododendron, camellia etc. Mix powder with water and apply like liquid feed to the rootball of the plant. Apply April/May and September/October when grubs will be present and soil temperature is above 5°C. For plants in greenhouses and in containers more frequent applications may be needed.

Vine Weevil Killer treats 12m² (14 sq. yards) or 160 pots	**43122**	**£13.00**
Vine Weevil Killer treats 100m2 (125 sq. yards)	**43123**	**£33.70**

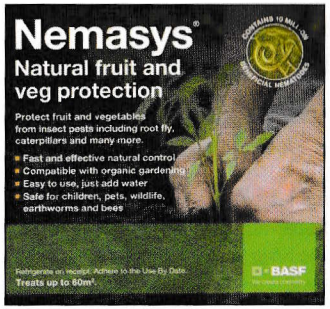

NEMASYS® NO ANTS

For treating ants in grass and in borders. Mix powder and apply with a watering can into the ants' nest. Apply when soil temperature is above 10°C and ants nests are visible. Standard pack treats 12m2/16 large nests April to September.

No Ants treats 16 nests	**43124**	**£14.35**

NEMASYS® NATURAL FRUIT AND VEG PROTECTION

Controls a broad range of pests including carrot and cabbage root fly, cutworms, onion fly, sciarid fly, caterpillars, gooseberry sawfly, thrips, shore fly and codling moth. Each pack treats 60m2 and will provide control for up to 2 weeks. Larger areas will require additional packs. Easy to use, just add water. Safe for children and pets. A fast and effective natural control which is compatible with organic gardening. Full instructions included.

FOR SOIL BASED PESTS, order the twin pack and apply at 2 week intervals.

Treats 2 x 60m² (70 sq. yards) 4 week's control
Apply 1 pack every 2 weeks

	43118	**£13.80**

FOR TREATMENT OVER LONGER PERIODS, we recommend the following programme. Order this programme and we will despatch the first 2 packs and then AUTOMATICALLY top you up with 2 fresh packs of Nemasys® Fruit and Veg Protection at 4 weekly intervals until the end of the programme.

3 x 2 packs/3 months supply
3 Month Programme consisting of 3 shipments of 2 packs at 28 day intervals

	43119	**£28.80**

TO CONTROL CATERPILLARS (INCLUDING BOX TREE CATERPILLARS), SAWFLY AND CODLING MOTH apply Nemasys® Fruit and Veg protection 3 times at 7 day intervals when the caterpillars are first spotted and re-apply as necessary to keep caterpillars at bay.

Please specify if you want to use this for CODLING MOTH as this is delivered in September.

Treats 3 x 60m² (70 sq. yards)
Apply 1 pack every 7 days

	43132	**£19.00**

IMPORTANT INFORMATION PLEASE READ BEFORE ORDERING All these pest controls are temperature sensitive and will be dispatched at the appropriate time just before the treatment is due direct from supplier. If ordering multiple packs, other than the programmes, please specify if required in single or staggered deliveries.

Nectar plant for butterflies

Plant loved by hoverflies

Wild flower

ORGANIC Organically Grown GB-ORG-05 P5847

A **Annual** A plant that completes its entire life cycle (growth, reproduction, death) in one season.

HA **Hardy Annual** Plants in this group do not need to be raised indoors, but can be sown directly into their flowering positions in the garden in spring.

HHA **Half Hardy Annual** Sown in early spring under glass or on a windowsill (see individual packet instructions). Most **HHAs** are frost-tender and must not be planted outdoors until all danger of frost has passed.

HP **Hardy Perennial** Living more than two years and usually flowering each year from the second season, unless indicated as first year flowering. Can tolerate frost.

HHP **Half Hardy Perennial** Living more than two years and usually flowering each year from the second season, unless indicated as first year flowering. Cannot tolerate frost, but maybe overwintered if given frost protection.

HB **Biennial** A plant that completes its entire life cycle in two years, growing in the first, reproducing (flowering) and then dying in the second.

G **Greenhouse** Plants generally grown as indoor plants or for summer outdoor container plants. Cannot tolerate frost, but may be overwintered if given frost protection.

F1 **Hybrid** The result of hand pollination between two parent plants resulting in a superior hybrid plant. Note: If gardeners save seeds from hybrids they do not come true.

F2 **Hybrid** The immediate descendants from selfed or inter-pollinated F1 plants. Plants have improved vigour and uniformity compared to open pollinated varieties, but will not be as strong as F1 Hybrids.

Po **Poison plant or seed** - see page 155

S **Scarification.** Rub hard seed between sand paper to hasten germination

S/C **The number of seeds** in each packet

V **Vernalisation.** Subject seed to the cold winter period for germination in spring

Vh Vernalisation is helpful, germination often improved

Plants that have received the RHS approval as perfect for pollinators

RHS Award of Garden Merit

SUFFOLK HERBS

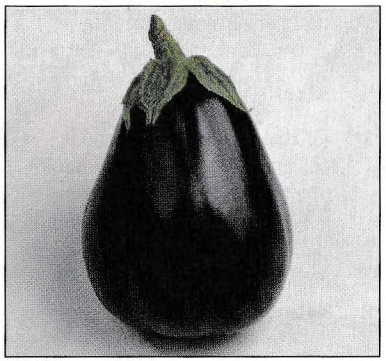

Specialist Herbs, Organic Vegetables, Country and Wild Flowers

We continue our endeavours to produce and obtain as many varieties as possible of organically-produced vegetable seed, and to offer you what is probably the largest range available.

TRADITIONAL & HERITAGE Vegetables

Aubergine or Egg Plant

BLACK BEAUTY ORGANIC

A medium early variety producing dark glossy violet coloured fruit. Oval to globe shape up to 12cm in length with dark green calyx.

S/C 50 [0V5] £2.35

LONG PURPLE ORGANIC

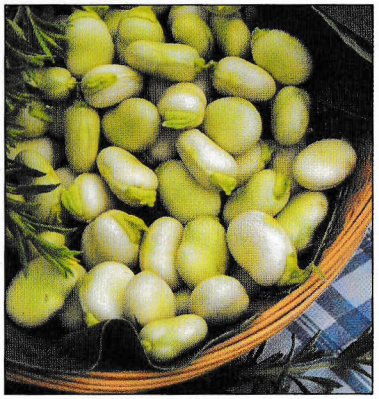

Medium size elongated fruits on very productive plants, deep violet in colour and of a very good flavour.

S/C 50 [V10401] £2.30

Beans

BROAD OR FAVA BEANS (VICIA FABA)

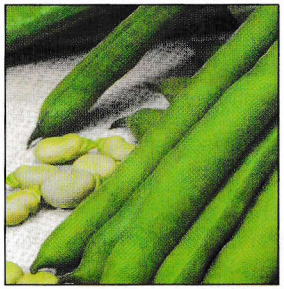

EXPRESS ORGANIC

Fastest maturing variety. Ideal for an early spring sowing and winter hardy. Excellent for freezing as it doesn't discolour. Ht. 90cm (35") spread 45cm (18").

S/C 40 [0V00143] £3.50

SUPER AQUADULCE ORGANIC

Extremely hardy for sowing late autumn. Long podded and white seeded, with white eye. Very good for freezing. Less susceptible to blackfly as very early.

S/C 40 [0V12] £3.50

Snap beans are the regular French beans that most gardeners grow. Stringless, they are delicious raw in salads, lightly boiled or steamed. Ideal for the freezer.

SNAP BEAN OR DWARF FRENCH

FARADAY ORGANIC

Can also be used as mini veg

Probably one of the best, if not the best newly introduced Dwarf French Bean. Uniform pods 6.5-8mm (0.25-0.3") in diameter, 13-14cm (5-6") long and straight with a good colour. Height 50cm.

S/C 100 [00229] £2.95

PURPLE POD, PURPLE TEEPEE

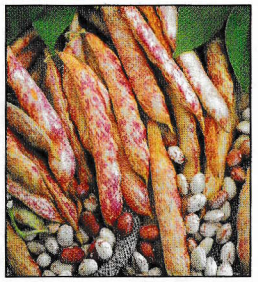

The Teepee beans hold their pods above the foliage which gives the plants the shape of a North American Indian teepee. Very easy to harvest and less prone to disease. Super flavour, round purple pods. A suitable variety for late planting and harvesting.

S/C 120 [V27] £2.90

Pole Beans are terrific value as they take up little ground space in relation to the volume of beans. The purple podded beans are very decorative so can be grown up the house or fence for decoration. Require a long growing season. In Northern areas it is a good idea to start early under cover and plant out. Harvest when pods are fully dried. Shell and dry indoors before storing in jars.

POLE BEAN - CLIMBING FRENCH

BARLOTTO LINGUA DI FUOCO ORGANIC

This is the original 'Fire tongue' strain from Italy. May be eaten as green pods but grown mainly for delicious semi-dry beans and dry beans. Spectacular green pods with red stripes make this very decorative.

S/C 65 [0V34] £2.95

COBRA ORGANIC

A black seeded variety, ideal for early production. Pods are 7mm in diameter, long and straight and can be harvested over a long cropping period. Can be grown on plot outdoors or undercover for an early crop.

S/C40 [0V00224] £3.55

Runner Beans loved by British gardeners for taste and for the profusion of flowers which make this bean a very decorative climber and screen. Requires better soil conditions for good crops than Pole beans. Best to prepare trench in autumn filled with compost, farmyard manure or any organic matter. Do not sow before soil has warmed up, late May early June. Plants will need good support.

RUNNER BEAN (PHASEOLUS COCCINEUS)

LADY DI ORGANIC

Heavy crops of excellent quality and flavoured beans with long, smooth slender pods. Red flowered variety which is completely stringless. Growing to 3m (10') high, 30cm(12") spread.

S/C 40 [0V00361] £3.80

SCARLET EMPEROR ORGANIC

An old favourite. Early into production, shorter growing and slightly rough pod texture but outstanding lavour.

S/C 45 [0V00362] £3.85

Order line: 01376 570000/572456

STREAMLINE ORGANIC

Old fashioned variety with excellent flavoured rough textured pods.

S/C 45 [OV47] £3.95

Beetroot (Beta vulgaris)

ALVRO MONO ORGANIC

A mono-germ variety (only one seed per cluster) so less thinning is required. Early cropping, producing delicious round baby beets, ideal harvested and used whole when young and succulent.

S/C 175 [00127] £2.65

BORO ORGANIC F1

An excellent quality bolt resistant hybrid beetroot, ideal for early or late sowings. Foliage shows good disease resistance and produces smooth skinned dark red roots. Very good flavoured used as a mini (baby) or standard beets, holding their flavour when stored.

S/C 200 [OV62] £2.45

BOLIVAR ORGANIC

Tender, globe shaped roots with smooth skins and a rich, deep red colour. Ideal for harvesting as baby beets while young and sweet, or let them mature for a delicious full sized crop.

S/C 250 [OV00126] £2.45

DETROIT ORGANIC

Introduced nearly a century ago and still one of the favourites for main crop sowing. Deep red flesh, marvellous flavour and stores well.

S/C 250 [OV54] £2.15

Leaf Beet or Chard

A very valuable vegetable. Produces delicious vitamin and mineral rich greens, as well as succulent mid-ribs. All are easy to grow, and very hardy, enabling the gardener to have an all year supply. Leaves should be harvested singly or cut an inch above ground and left to come again. Leaf beet has very few pests or diseases. These varieties are also very decorative in the flower borders.

ERBETTE ORGANIC

Traditional cut and come again leaf beet from Italy. Grown for its fine tasting greens of good texture.

S/C 175 [OV59] £2.45

RHUBARB CHARD ORGANIC

An attractive and useful vegetable in the kitchen. Bright red leaves and stems full of flavour when eaten as a baby leaf in a salad or mature as a cooked vegetable.

S/C 175 [OV00314] £2.30

SWISS CHARD ORGANIC

Large pure white rib with attractive dark green leaf.

S/C 175 [OV61] £2.15

Broccoli (Brassica oleracea)

SUMMER HEADING AND CALABRESE

BELSTAR F1 ORGANIC

The firm heads remain in good condition for a long time, producing plenty of side shoots once the central head is cut. Plant in succession for an ongoing harvest from late summer to autumn.

S/C 30 [OV00161] £2.45

COVINA ORGANIC F1

Strong plants produce good quality, solid stems topped with high quality medium sized heads of good colour and flavour. The heads mature in approx. 80 days from transplanting and stand well for a longer harvest period.

S/C 30 [OV00193] £2.65

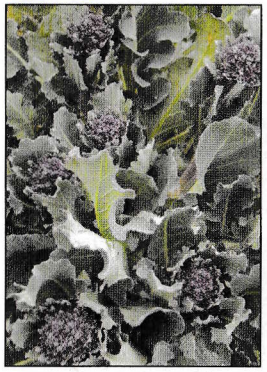

BROCCOLETTO

A speciality from Italy. A quick sweet flavoured broccoli producing a single head at about 20cm tall. Broadcast seed thinly. Sow successionally from early spring onwards. An ideal catch crop. Best cut as the head turns to flower.

S/C 250 [V62] £2.15

PURPLE SPROUTING SANTEE ORGANIC

A dual purpose variety for summer, autumn or spring harvesting. Bushy plants produce large tasty purple spears over a long picking period.

S/C 20 [OV00141] £2.90

NEW TO KINGS

RAMOSO ORGANIC

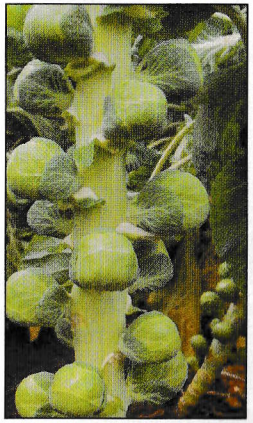

An excellent flavoured traditional Italian variety which is quick to mature, making it ideal for the UK climate. Can be harvested over a long period as after the initial central head, smaller side shoots will follow.

S/C 200 [00194] £1.95

BRUSSELS SPROUT (BRASSICA OLERACEA)

NAUTIC F1 ORGANIC

Ideal for an early harvest, producing smooth firm buttons of outstanding quality. Outstanding disease resistance.

S/C 20 [OV00142] £3.40

GRONINGER ORGANIC

Large quality sprouts over a long period. Deep green colour.

S/C 100 [OV00149] £2.45

CABBAGE (BRASSICA OLERACEA)

CARAFLEX F1 ORGANIC

An improved Hispi type with slightly larger pointed heads that stand a little longer. Very fast growing and versatile for sowing and harvesting.

S/C 25 [00131] £3.45

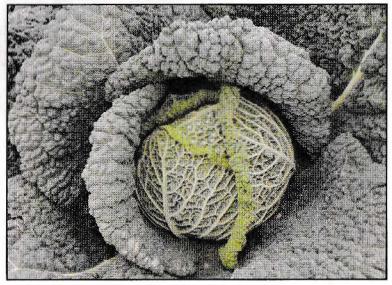

DEADON F1 ORGANIC

A January King type, sweet flavoured. A versatile variety as can be sown in early May to crop August to September, or sown in July for cropping November to January.

S/C 20 [00132] £3.10

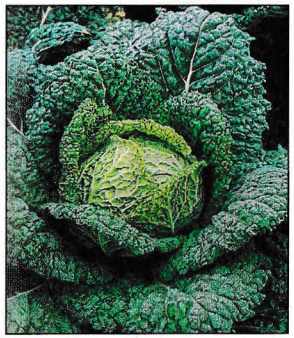

SAVOY CANTASA F1 ORGANIC

Fantastic, dark green, flattish round heads on a short stem with dark green, finely blistered outer leaves. Stands well making it ideal for late autumn and winter harvest.

S/C 30 [OV00331] £3.25

SAVOY VERTUS ORGANIC

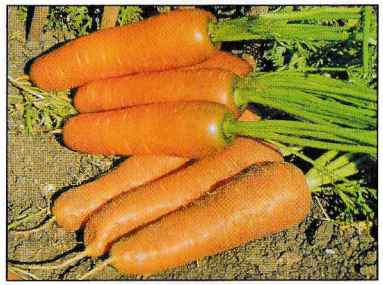

A flat round Savoy with greyish-green leaves. Medium late to mature.

S/C 200 [OV00330] £2.15

Carrot (Daucus carota)

Carrots are often thought of as the ultimate health food. You were probably told to "eat your carrots" by your parents.
It's believed the carrot was first cultivated in Afghanistan thousands of years ago as a small forked purple or yellow root with a woody and bitter flavour, nothing like the carrot we know today.
Purple, red, yellow and white were cultivated long before the orange carrot - developed and stabilized by Dutch growers in the 16th and 17th centuries.

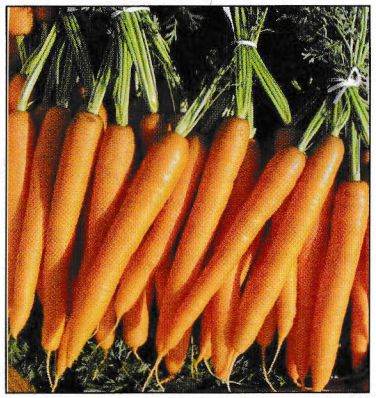

FLYAWAY F1 ORGANIC

Shows good tolerance to carrot fly as it is far less attractive to egg layng flies. A mid season stump rooted, nantes type with a smooth skin, broad shoulders and excellent colour and sweet flavour.

S/C 300 [00166] £2.35

MERIDA ORGANIC F1

A Nantes type producing sweet rich orange 18-20cm (7-8") long roots. Shows good resistance to bolting. *Ideal replacement for Carrot Starca.*

S/C 350 [00400] £2.40

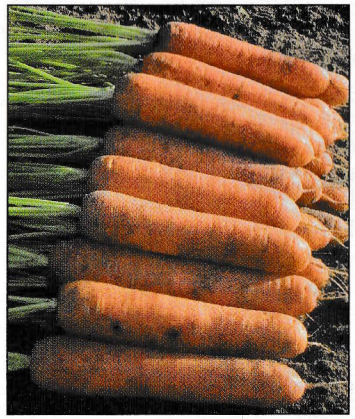

Protect your carrots

Cabbage and Carrot Fly Netting

- Ideal for organic growers.
- Controls the risk of cross pollination by insects
- Reduces the need for pesticides.

See page 127

MIAMI ORGANIC F1

High quality cylindrical roots of excellent flavour where the sweetness holds up well in storage. Well adapted for early or main season plantings producing bright orange 6-8" roots ready for harvesting from August to November or longer if given protection through the winter months.

S/C 350 [OV114] £2.65

RESISTAFLY (TOZRESIS) F1 ORGANIC

A main crop sister line to Flyaway, with larger, blunt ended, cylindrical, firm, crunchy sweet roots, bred to deter carrot fly attacks. Stores well.

S/C 300 [00159] £2.15

AUTUMN KING ORGANIC

The most popular main crop carrot. The high yield of long thick roots with good colour and flavour can be pulled as required during winter.

S/C 400 [OV00167] £2.15

EARLY NANTES ORGANIC

Vigorous grower with 16cm long cylindrical blunt ended roots of deep red/orange for mid-season use.

S/C 500 [OV107] £2.15

FLAKKEE ORGANIC

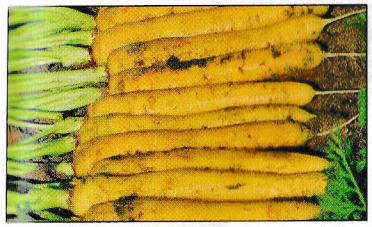

Easy to grow and, although considered a main crop variety, can be successionally sown to give a continuous crop, producing large, thick roots, with very good colour and flavour. It will even thrive in rather poor soils, but give it some encouragement and you will be amazed.

S/C 500 [OV104] £2.25

Order line: 01376 570000/572456

YELLOWSTONE ORGANIC

Attractive golden yellow roots adding colour and flavour to salads or as a cooked vegetable.

S/C 300 [OV00173] £2.45

Cauliflower (Brassica oleracea var botrytis cauliflora)

SUMMER AND AUTUMN HEADING

MEDALLION F1 ORGANIC

Produces compact deep and firm pure white curds with good leaf winter protection. Sow in May - June for harvesting February to March the following year.

S/C 25 [OV00170] £4.30

SKYWALKER F1 ORGANIC

Shows better cold tolerance than most cauliflowers, as the tight self wrapping heads help protect the dense white curds. Superb flavour and texture when cooked. *Ideal Replacement for Goodman.*

S/C 20 [00390] £4.10

ROMANESCO VERONICA ORGANIC

A Romanesco hybrid suitable for late summer and autumn harvests. Has an attractive curd packed with green florets. Stands well and is full of flavour.

S/C 30 [OV00174] £4.10

Celery (Apium graveolens)

TANGO ORGANIC

A self-blanching celery producing beautiful, smooth green stems with good flavour and crunchy texture. Shows good bolting resistance, and stands well during hot weather.

S/C 50 [00430] £1.75

UTAH ORGANIC

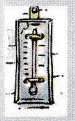

Bright green stalks, very crisp and excellent flavour. Ready from late September to December.

S/C 200 [OV129] £2.25

Chicory

Chicory/Radicchio In the UK the name Radicchio is used to describe the red and variegated leaved chicories. Some Radicchio form small tight red heads, others can be blanched to a lovely pink/white leaf and all are cut and come again crops. Radicchio is also delicious lightly cooked. All were named after the towns in N.E. Italy

Maintain at 17-18°C minimum for 3-4 weeks to ensure germination.

Chicory Succory (Cichorium intybus) A perennial plant. Native of Europe and also hardy. Grows to over 1 mtr high, has slightly hairy leaves and usually reddish stalks. Blue flowers of outstanding beauty. Lift roots as for Witloof chicory during November to December. Cut off outer leaves, cover with straw and keep in dark in warm temperature. Heads take 2-3 weeks.

Forcing This means encouraging a plant to grow, when otherwise it might not. There are various ways of doing this - by applying warmth, extra light, or sometimes by excluding light. Chicories, Sea Kale and Rhubarb are quite often forced in the dark either by lifting roots and growing them on in a cellar, garage, etc., or by covering the emerging plant early in the spring to force by blanching. An upturned black dustbin is very good for this as it warms up in the sun.

Kings recommend when not sowing directly into your vegetable plot you sow your seeds into a good quality seed sowing compost and watering only with tap water. Do not use butt water as this can contain harmful pathogens, resulting in poor germination.

RADICCHIO

ROUND RED CHIOGGIA TYPES

These new improved varieties will produce nice heads during the summer and autumn months. Even with these improved varieties results can be erratic as so much depends on the right difference between night and day temperatures over which we have little control!

PALLA ROSSA ORGANIC

Bright red, round heads that are well wrapped with numerous leaves. Ribs are white and crisp, making a tasty addition to a mixed salad.

S/C 250 [00177] £2.15

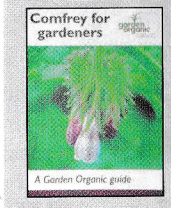

ROSSA DI TREVESO

Long pointed leaves. Foliage green in summer, turns red in cold weather. Sow broadcast or in thin rows, June-July. Roots can be forced to make the shoots paler and more tender. Dig entire root and force like Witloof. Very ancient variety recorded in the 16th century.

S/C 400 [V134] £2.10

Step-by-step Organic Gardening Booklets

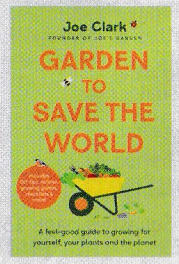

from HDRA (Henry Doubleday Research Association at Ryton Gardens) **available on page 142.**

Plus NEW TO KINGS

Chicory continued

VARIEGATA DI CASTELFRANCO

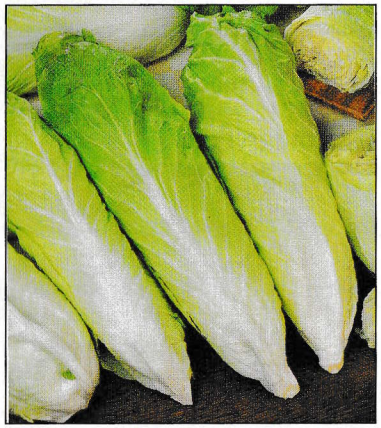

A wonderfully decorative chicory with green leaves blotched red and forming an inner loose head of red and white in autumn. An ancient variety developed in the 18th century in the Castelfranco region of Northern Italy. One of the best for eating quality. For best results force during winter.

S/C 400 [V136] £2.10

CUTTING CHICORY

PAN DI ZUCCHERO SUGAR LOAF CHICORY ORGANIC

Forms compact conical heads of crisp leaf. Sow broadcast or in rows, spring to autumn. Use as cut-and-come-again crop (at 5cm) or thin plants to 15cm for maturing. Fairly hardy and will normally over-winter outdoors or in an unheated greenhouse, especially when treated as a 'cutting' crop.

S/C 250 [OV133] £2.20

Claytonia or Winter Purslane

Claytonia Its common name, Miners Lettuce, refers to its use by Californian gold rush miners who ate it to prevent scurvy due to its high vitamin C content. It was first introduced into this country at Kew Gardens in the c18th.

MINERS LETTUCE (MONTIA PERFOLIATA) ORGANIC

A very hardy salad vegetable. Sow in rows 7 x 15cm or broadcast in July or August for a mild tasting winter salad leaf. Very nutritious, far higher in vitamin C than lettuce. Will grow anywhere even under trees

S/C 250 [OV157] £2.30

Corn Salad, Mache, Lambs Lettuce (Valerianella Sp.)

Real gourmet salad greens. Forms a fancy rosette with a delicate flowery flavour. Best to cut the whole rosette to use in salad which looks most decorative. Single leaves may also be taken off more mature plants. Sow September/ October for a spring crop. Will grow all winter under a tunnel. Cover outside crops with floating mulch for good looking soil free leaves.

VIT ORGANIC

Probably the most vigorous growing variety for spring and autumn crops and over-wintering. Long glossy green leaves with a delicious tender mild minty flavour.

S/C 350 [OV00178] £2.00

VERTE DE CAMBRAI

Traditional French variety similar to D'Olanda but with a smaller leaf and perhaps a better flavour. Sow in rows or broadcast. Harvest complete rosettes at 6 to 8 leaves and use whole in a salad. Very decorative and unusual.

S/C 350 [V155] £1.95

Courgette

See Squashes page 153.

Cress

Cress Cut, wash and dry with kitchen paper. This will keep in a refrigerator for up to a week in a plastic bag. Use in salads and sandwiches.

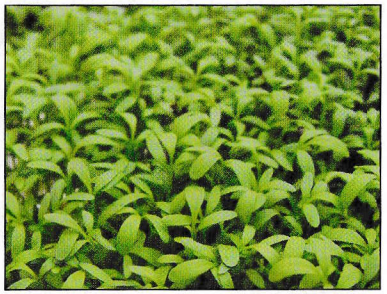

PLAIN ORGANIC

Very similar in growth to the curled variety, but has slightly larger, less serrated leaf pattern and stronger flavour.

S/C 3,000 [OV160] £2.10

SPRINT ORGANIC

As its name suggests it is very fast growing. Can be grown in punnets.

S/C 3,000 [OV00190] £2.10

Cucumber (Cucumis sativus)

GREENHOUSE AND FRAME

Cucumbers Burpless cucumbers are oriental in origin. Cucumbers are delicious cooked as well as raw.

FLAMINGO F1 ORGANIC

A high yielding variety that grows well under low light conditions, making it ideal for early or late production. Excellent quality long fruits on strong healthy plants.

S/C 4 [OV00203] £4.65

MINI CUCUMBER MID EAST/BEIT ALPHA

BEIT ALPHA F1

The best salad type cucumber smooth and tender. They are best picked when 15cm long. They have a superb bitter-free flavour with small seed cavity. Requires no pollination and is suitable for polytunnel or outdoor cultivation.

S/C 15 [V166] £2.35

OUTDOOR OR RIDGE

MARKETMORE ORGANIC

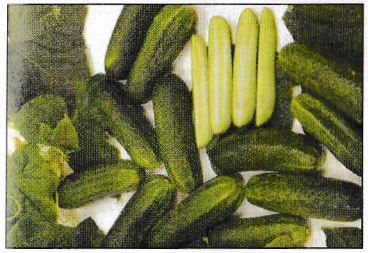

Thick dark green fruit with small white spines up to 20cm in length. Medium early ridge type for outdoor protection.

S/C 25 [OV171] £2.15

Order line: 01376 570000/572456

DIAMANT **ORGANIC**

Very vigorous and extremely high yielding gherkin variety. Excellent quality dark green, crispy fruits crop over a very long period.

S/C 8 [OV172] £2.85

TANJA **ORGANIC**

Slim dark green fruits 35cm long. Refreshing taste, with no bitterness.

S/C 20 [OV165] £2.60

Dandelion

PISSENLIT À COEUR PLEIN (TARAXACUM OFFICINALE) HP

Probably the most nutritious green there is. Very rich in minerals and vitamins. Blanching under a flowerpot will take the bitterness away, or it may be forced. See also Herbs on page 147-155.

S/C 350 [V174] £2.00

Endive Frizzy

ENDIVIA RICCIA, CHICOREE FRISEE

FINE MARAICHERE

A small and compact variety which is very frizzy and looks very decorative. Not hardy so should be grown in spring and summer.

S/C 400 [V146] £2.10

PANCALIERI **ORGANIC**

Broad bulky heads with dark green, very serrated outer leaves and creamy white hearts. Cropping throughout the year.

S/C 250 [OV147] £2.10

Endive Plain Leaved

ENDIVIA SCAROLA, CHICOREE SCAROLE

EN CORNET DE BORDEAUX

A very fine old French variety which is very hardy. Provides constant cut and come again through winter. Performs outstandingly with cold tunnel/frame culture over winter.

S/C 400 [V150] £2.10

Fennel Florence or Finocchio

Try to sow fennel direct into growing site as they do not like to be transplanted.

ORION **ORGANIC F1**

Excellent quality round shaped and smooth bulbs that show good tolerance to bolting. High yielding and very uniform variety for harvesting in early autumn. Delicious as a braised vegetable or grated and added raw to salads.

S/C 30 [OV179] £2.65

Green Manure

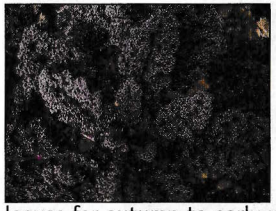

There are many non-organic Green Manures in the Kings Seeds section of this catalogue see page 27.

Herbs

We have over 100 varieties of organic and unusual herbs. We thought this justified a section of their own, please go to pages 154 to 162.

Kale

RED BOR **F1** **ORGANIC**

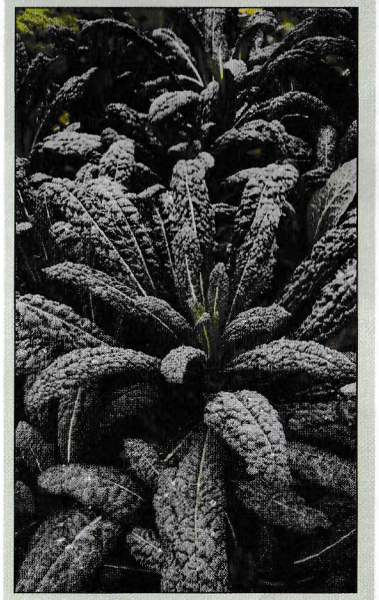

Tall open habit plants with deep red densely curled leaves for autumn to early winter harvesting.

S/C 20 [00129] £3.10

NEW TO KINGS

NERO DI TOSCANA **ORGANIC**

Sometimes known as Black Russian or Cavalo Nero Kale, producing long, heavily blistered dark green leaves of superb flavour. Very frost hardy.

S/C 175 [00128] £1.95

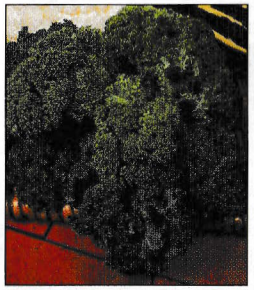

THOUSANDHEAD (BRASSICA OLERACEA VAR NAPUS)

Very hardy and prolific. Pick winter into spring. Harvest the delicious young tender shoots.

S/C 250 [V182] £1.90

WESTLAND WINTER **ORGANIC**

Large spreading plant habit with curled blue green leaves. Very winter hardy and high yielding for cropping from October to March.

S/C 50 [OV183] £2.15

Kohl Rabi

Grows on top of the ground for easy cultivation. Eat both leaves and bulbs.

RE-INTRODUCTION TO KINGS

AZURE STAR **ORGANIC**

An early variety with deep purple skin and slightly flat bulbs. Juicy white inner flesh with a nutty flavour. Ideal added to a salad or as a cooked vegetable.

S/C 150 [OV00244] £2.50

www.suffolkherbs.com

Leek

Leek Known in Egypt from the time of the Pharaohs, the leek has been cultivated in Britain since Saxon times. We believe that leeks should be available throughout the year as they are in France. With some experimentation with sowing dates the varieties listed should give you leeks for every season.

ATLANTA ORGANIC

A very frost tolerant variety. Plants stand well making them ideal for winter cropping well into the new year.

S/C 150 [OV00255] £2.35

BANDIT ORGANIC

A quality leek producing good sized blanched white stems and blue green foliage. Stands well over a long period under all weather conditions.

S/C 100 [OV00254] £2.65

CARENTAN ORGANIC

Large thick stems with blue-green foliage for cropping late October to early January.

S/C 225 [OV186] £2.80

AUTUMN 2/HANNIBAL ORGANIC

Fast growing variety for summer and early winter cropping.

S/C 225 [OV187] £2.60

Lettuce (Lactuca sativa)

CABBAGE TYPES

Lettuces Benefit by being grown with onions which help protect them from slugs and snails.

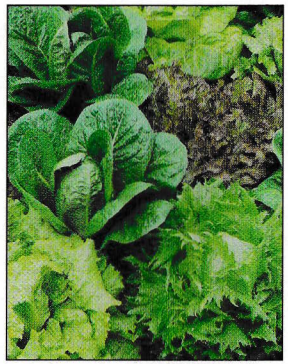

MARVEL OF FOUR SEASONS ORGANIC

Medium large compact round heads with bronze-red leaves.

S/C 450 [OV200] £2.15

MIXED ORGANIC

A good mixture of types and colours to provide a wide selection for salad use.

S/C 350 [OV203] £2.35

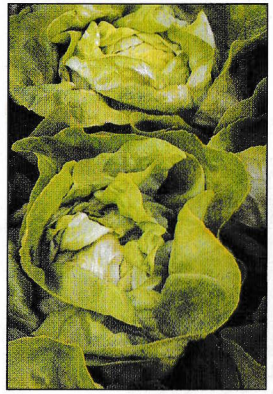

ROXY ORGANIC

Red butterhead type with very compact, heavy heads. Leaves have green base with uniform red edge and very crisp for spring, summer and autumn cropping. Highly disease resistant.

S/C 250 [OV202] £2.35

You can have lettuce all year. See the complete list on our web site, many unique to Suffolk Herbs. Quick to mature, plant between cabbages, sprouts, calabrese, etc.

WINTER CROP ORGANIC

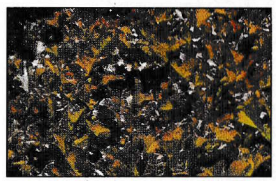

An early maturity variety that can be over-wintered. Large compact, soft heads with wide, round, pale green leaves.

S/C 450 [OV00269] £2.20

LETTUCE LOOSE LEAVED OR CUTTING

RED SALAD BOWL ORGANIC

Similar to Salad Bowl but with deep red-bronze leaves.

S/C 450 [OV216] £2.10

SALAD BOWL ORGANIC

Large spreading habit with masses of long, pale green leaves.

S/C 450 [OV267] £2.10

SALADIN ORGANIC

Compact 'Iceberg' type with good standing ability. Resistant to leaf rot and very suitable for spring and summer planting.

S/C 150 [OV268] £2.15

LETTUCE COS AND SEMI-COS

GILAAD (LRY) ORGANIC

Glossy deep red Romaine shaped leaves of excellent quality with sweet and crisp flavour.

S/C 250 [OV00258] £2.20

Cut and come again Many lettuces of the loose-leaf type are suitable for cutting young, when approx. 5cm high. They will quickly re-grow and 'come again'. They can be cut many times during the season.

MAUREEN ORGANIC

An excellent quality little gem type with well closed hearts. Full of flavour making this one of the best to grow.

S/C 150 [OV00259] £2.35

LETTUCE OAK LEAVED

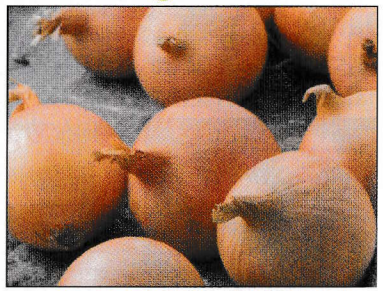

ERACLEA ORGANIC

A green oakleaf type with broad, long, pale yellow leaves and flattened round heads. Sow little and often as it does tend to bolt.

S/C 500 [OV227A] £2.20

Onion (Allium cepa)

HYBOUND F1 ORGANIC

A high yielding early Rijnsbuger variety with attractive straw-coloured outer skins and good flavoured white inner flesh. Early maturing and suitable for long term storage. *Ideal Replacemnt for Hylander.*

S/C 200 [00402] £2.15

Order line: 01376 570000/572456

RED TIDE ORGANIC F1

A hybrid red onion of excellent quality and storage capabilities, ideal for adding colour to salads.

S/C 100 [0V500] £2.20

SPRING ONION

PARADE ORGANIC

An excellent flavoured non-bulbing Japanese bunching spring onion. Good foliage colour and pure white shanks that performs well in all soil types.

S/C 350 [00401] £2.40

WELSH RED (ALLIUM FISTULOSUM)

A native of Siberia, not Wales. This is the red form nearer to the true wild Welsh Onion. Flavour is stronger and plants are hardier, often retaining their leaves through winter. Use leaves and small bulbs.

S/C 200 [V250] £2.35

WHITE LISBON ORGANIC

Sow from March to August to use as salad onions or as substitute for chives in cooking. Use as a companion plant with carrots to deter carrotfly.

S/C 400 [0V00278] £2.15

Parsley

HAMBURG ROOT ORGANIC

Eat the leaves AND the roots. A dual purpose vegetable with parsley like foliage which can be used for garnish or in dishes like parsley. Below are smooth tapering roots which can be roasted like parsnips or grated into a salad. Roots are winter hardy and can be lifted as required.

S/C 750 [0V254] £2.35

(For Parsley leaf types see Herbs page 160.)

Oriental Vegetables

CHINESE CABBAGE

Oriental and Chinese greens and vegetables Greens refers to a wide range of leafy vegetables that may be eaten lightly cooked but are increasingly eaten raw. Many of these greens are very aromatic and some have a hot tang to them. With a small variety of these greens you may pick them fresh right through the year and, especially important, over the winter months.

Chinese cabbage likes a cooler climate of between 13°C and 20°C, during its main growing period. They also dislike drought as most have shallow roots so make sure that they are well watered.

GREEN ROCKET F1

Tall cylindrical heads of bright green. Ready just 70 days after transplanting. Sow late summer for autumn and early winter harvest.

S/C 150 [CH3] £2.45

CHINESE VEGETABLES

See the Kings section of this catalogue for many more oriental vegetables on pages 42 and 43.

JAPANESE GREENS

GREEN BOY ORGANIC

Very vigorous, quick growing type that matures in 35 days in summer, and 60 days in winter when growing under glass. Can be planted very close at 400 plants per square metre.

S/C 250 [CH17] £1.90

MIZUNA ORGANIC

This oriental vegetable may be used raw in salads, as a garnish, cooked in soups or stir fried.

S/C 300 [0V00273] £2.10

MIBUNA

GREEN SPRAY

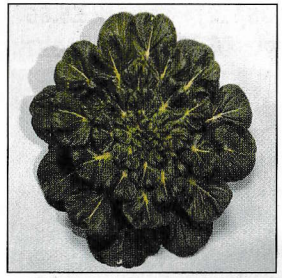

Japanese green, spray-like plant with long narrow leaves. Flavour is mild but slightly stronger than Mizuna. May be eaten cooked or raw. Best grown in cool weather during spring and autumn.

S/C 350 [CH19] £2.00

TATSOI

ROSETTE PAK CHOI ORGANIC

Japanese green for salad or cooking. Forms a compact thick rosette of small dark spoon shaped leaves. Very tender and flavoursome for salads, stir fry and soups. Long harvest period and slow to bolt.

S/C 150 [0CH31201] £2.25

Peas

KELVEDON WONDER ORGANIC

Very popular variety, highly suited to succes-sional sowing. Heavy crops of excellent small peas. Ht. 45cm.

S/C 200 [0V00288] £3.05

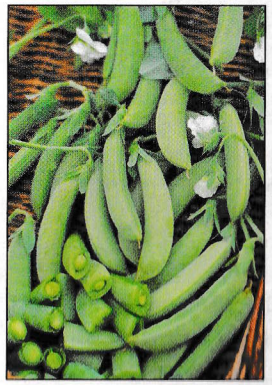

NORLI ORGANIC

Very tasty, improved sugar type with stringless pods of medium green. Vigorous plant habit, growing to 50cm, with resistance to Fusarium Oxysporium.

S/C 100 [0V269] £2.95

PROGRESS NO.9 ORGANIC

Long, pointed, dark green pods with up to 9 peas of superb flavour. Early and prolific cropper. Ht. 45cm.

S/C 100 [0V265] £2.95

www.suffolkherbs.com

Purslane (Portulaca oleracea)

GOLDEN

An excellent salad plant with mild flavoured succulent leaves. Sow from March to July. Broadcast or sow in rows 5 x 15cm. Has attractive yellow leaves. Rather rare.

S/C 250 [V295] £1.95

Peppers (Capsicum annum)

PEPPERS, SWEET

BENDIGO **F1** ORGANIC

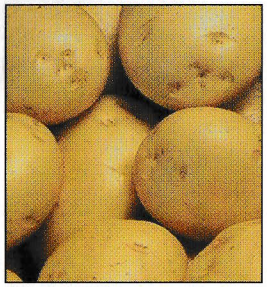

A very uniform thick walled, small blocky fruit. Ideal for growing in heated or cold glass houses. Fruits can be harvested when green or red and added to salads.

S/C 5 [OV00300] £4.10

See pages 51-54 for our full range of Potatoes

Potato

COLLEEN ORGANIC

Excellent all rounder with light yellow skin and flesh. Has a good resistance to tuber blight so ideal for the organic gardener.

2.5kg (5.5lb)
[0035100] 1 pack £6.85
Buy 2 or more £6.35 each

SETANTA ORGANIC

High yields with excellent blight resistance. Attractive red skin and excellent flavour. An ideal variety for long term storage.

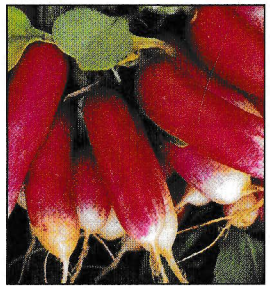

2.5kg (5.5lb)
[0035112] 1 pack £6.85
Buy 2 or more £6.35 each

Delivery approx. from mid-January to mid-March depending when your order is placed.
On arrival potatoes should be laid out to prevent sweating and sprouting. Any apparent deterioration in quality should be notified to us within 7 days.
Sorry, we are unable to send potatoes outside UK.

Radish (Raphanus sativus)

Radish Radishes like well-drained, rich moist soil, plenty of humus, but not freshly manured. Sow in an open site for spring and autumn sowings but light shade for summer sowings of ordinary radishes or they will run to seed. Sow winter radish in open, moist soil in July and August. They can be left in the soil all winter, or lift and store in sand in a dry shed.

FRENCH BREAKFAST ORGANIC

One of the most famous varieties. Lovely light red and white roots with crisp mild flavour.

S/C 500 [OV00313] £1.95

GIANT OF SICILY ORGANIC

Large round, bright red roots that grow to about 5cm across. Quick growing for late spring to autumn cropping.

S/C 250 [OV305A] £2.20

MALAGA

Bright purple skin and firm white flesh, fast growing, crisp and sweet.

S/C 300 [V13723] £2.00

MIXED ORGANIC

A special pack containing a blend of shapes and colours to give a lovely variation in one row.

S/C 300 [OV299] £2.15

SAXA ORGANIC

Round, scarlet roots that are early to mature.

S/C 500 [OV00310] £2.15

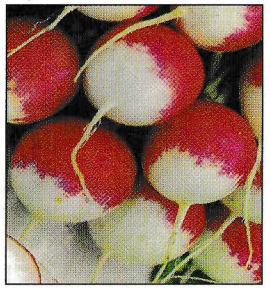

SCARLET GLOBE ORGANIC

Good traditional variety giving lovely round roots of bright red. Suitable for early cropping under cloches. Quick grower.

S/C 500 [OV302A] £2.40

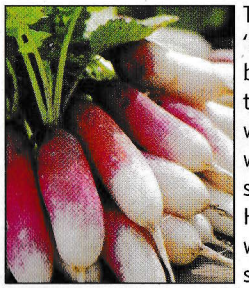

SPARKLER ORGANIC

Globe shaped roots of deep red and white.

S/C 500 [OV303] £2.15

18 DAY

The fastest 'French breakfast' type we know which is crisp with a mild sweet flavour. Has long white tipped scarlet roots.

S/C 750 [V305] £2.25

Roquette Rucola (Rocket) ORGANIC

A superb salad vegetable and a superior strain to the traditional type with leaves of a delicious rich spicy flavour. Sow at any time from February to September for an almost all year round supply. Rocket is very simple to grow and has practically no pests or diseases. If you haven't a garden you can grow it in a pot on a window sill or include in a mustard and cress mix.

S/C 500 [OV00315] £2.30

Catch cropping Catch cropping is the art of getting the most out of your vegetable plot, by growing crops on land that is 'temporarily' empty or by growing two crops where before you might have grown one. Obviously, crops start out small and grow larger, so initially they do not need all the space they have. Broccoli, brocoletto, lettuce, rocket, endive or radish can be grown in the vacant soil.

Order line: 01376 570000/572456

Spinach

Spinach Pick when young and add raw to salads, and as long as the leaves are picked regularly and young they will remain tender and of mild flavour.

RENEGADE F1 ORGANIC

Fast maturing, high yielding and sweet tasting and hardy enough to over winter in milder parts of the country. *Shows good resistance to downy mildew.*

S/C 250 [00322] £2.15

GIANT WINTER ORGANIC

Large lanced shaped medium green leaves on plants with spreading habit.

S/C 250 [OV320] £2.15

MATADOR ORGANIC

Semi-erect plant habit with medium green, large, slightly blistered leaves. Suited for early use.

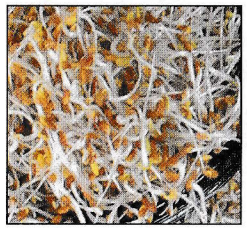

S/C 250 [OV321] £2.15

Sprouting seeds

The quick and easy way to add a healthy crunch to your diet. Highly nutritious, being particularly rich in vitamins and minerals such as iron, potassium, calcium and iodine. Be as adventurous as you can, add to soups, casseroles, curries and especially stir fries. Equally there is no reason to cook at all, just add the sprouts to your salads, sandwiches or baked potato – enjoy your meal!
Please Note that all weights are approximate

Sprouting seeds Sprout seeds in a special seed sprouter or in a jar with a muslin cover or screw top with tiny holes punched in it. The important point to remember is to keep them warm (12-21°C) and to rinse thoroughly twice a day. Sprouting can be in the dark (crisper sprouts) or in the light, or a combination of both. Sprouts may be kept fresh in the fridge for up to 4 days.

ALFALFA ORGANIC

Very nutritious and sweet tasting sprouts. Ready 4-6 days. Length 1-3cm.

50g [OSP15101] £2.75
250g [OSP15107] £6.00

CLOVER RED ORGANIC

Nutty mild flavoured sprouts.

50g [OSP15109] £2.65
250g [OSP15110] £6.00

FENUGREEK ORGANIC

With a mild curry flavour they are delicious in salads and a superb accompaniment to curries. Ready 3-5 days. Length 2-3cm.

50g [OSP15102] £4.30
250g [OSP15111] £9.00

GREEN PEAS ORGANIC

Taste like freshly picked peas. Use in salads, soups or as a finger snack. Ready in 2-3 days. Length 0.5-1cm.

90g [OSP15116] £3.55

LENTILS ORGANIC

High in vitamin C and iron. Use in salads, casseroles, and loaves or as a finger snack. Ready 2-4 days. Length 0.5-1cm.

50g [OSP15117] £3.10

MUNG BEANS ORGANIC

The popular Chinese bean sprout, white sprouts used in salads and stir fry and numerous Chinese dishes. Harvest when 3-4cm long after 4-6 days.

50g [OSP15103] £3.25
250g [OSP15119] £8.95

RADISH CHINA ROSE ORGANIC

Red stemmed sprout with really sharp spicy flavour.

50g [OSP15120] £6.05

ROCKET ORGANIC

Strong flavour. Mix with other sprouts if using jar method or grow on a damp kitchen towel. Use in salads, garnish, juices and sandwiches.

30g [OSP15115] £3.50

Squash

SUMMER COURGETTE/ZUCCHINI

GENOVESE ORGANIC

Light greyish-green, mottled fruit of delicate, delicious flavour. Early into production, the fruit will grow to about 18cm long, with a slight bulbous end. Large, open bush habit.

S/C 15 [OV325] £2.35

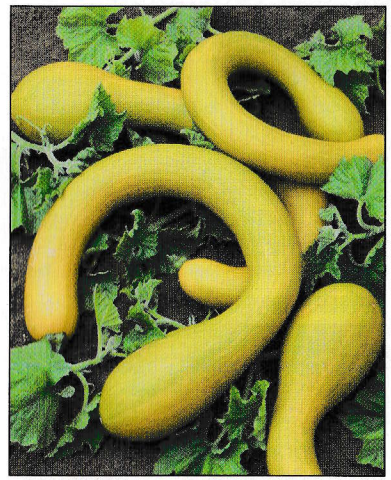

NERO DI MILANO ORGANIC

Medium early, dark green, cylindrical fruit of about 18-20cm in length. Erect, open plant habit for easy picking.

S/C 15 [OV327] £2.10

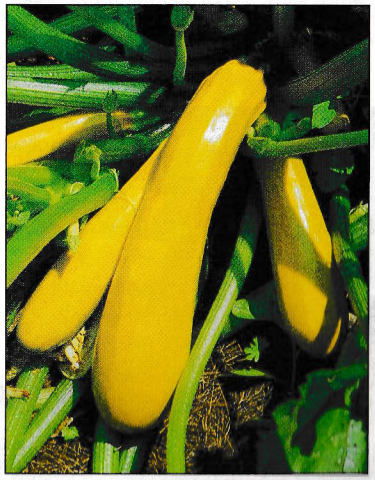

TROMBONCINO

Unlike any zucchini you have ever seen. Fruits grow long and curved with a bell at the flower end. Harvest fruits at around 30cm long. Fruits will grow to a spectacular metre long and they are still good to eat! Plants are very vigorous climbers or can trail on the ground.

S/C 10 [V330] £2.10

ZUCCHINI GOLDY ORGANIC

Fabulous bright yellow courgette with a slightly different flavour to the green varieties and a crisper texture.

S/C 5 [OV00181] £2.80

Squash continued

WINTER

Winter squashes are easy to raise and grow, and are practically pest-free. The squashes themselves have a very high food value, second only to carrots for vitamin A. Stored in a spare room they will keep for up to five months.

BUTTERNUT WALTHAM ORGANIC

Elongated fruit with small bulbous end. Skin is pale golden orange with deep orange flesh of sweet flavour that improves after storage. Produces about 4 fruits per plant, weighing up to 2 kg.
S/C 10 [0V00240] £2.15

PINK BANANA

An American heritage variety which has firm, sweet, yellow-orange flesh ideal for baking. Its skin turns pinkish-orange when mature. Trailing up to 10 ft
S/C 15 [V12350] £2.85

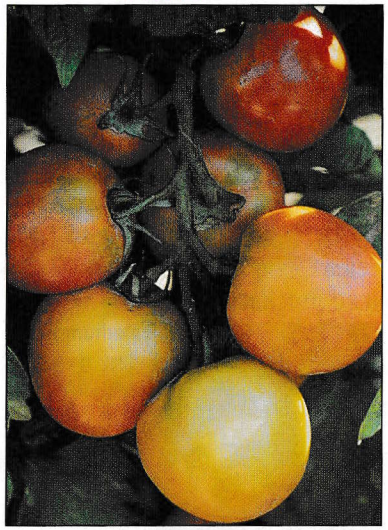

Tomato (Lycopersicon lycopersicum)

TALL VINE/INDETERMINATE TYPES

Tomatoes All greenhouse varieties and even outdoor varieties grow very well under a polytunnel.
Indeterminate types - single stem, remove side shoots.
Determinate - bush type, do not remove side shoots.

Tomatoes The best tomatoes are compost-grown, the difference in flavour really is dramatic. Interplant with Basil and French Marigolds to repel whitefly and other pests. Water regularly but sparingly for better flavour.

ST PIERRE ORGANIC

A very tasty traditional French tomato. Produces a late crop of large tasty bright red fruit, superb sliced for salad and sprinkled with fresh basil.
S/C 24 [0V368] £2.00

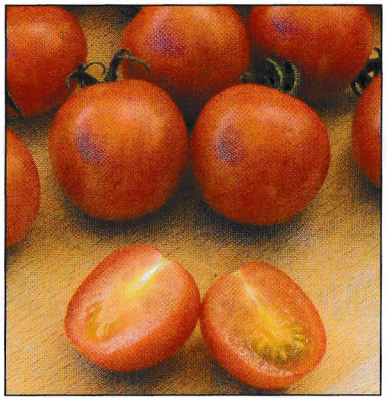

YELLOW PERFECTION ORGANIC

Smooth, round golden yellow fruits of sweet flavour. Very early to mature and a prolific cropper, adding colour to your salads.
S/C 50 [0V00348] £2.15

DETERMINATE TYPE

KORALIK ORGANIC

Blight resistent

Late blight tolerant. This early bush variety produces plants with spreading branches rather like a small oak tree, enabling it to produce clean, isolated fruit. It is perfect to grow in areas where the growing season is short and there is higher than normal rainfall as it originates from Poland, where it will produce abundant, exceptionally sweet, large cherry tomatoes.
S/C 15 [00337] £2.65

Turnip

PURPLE TOP MILAN ORGANIC

Flat shaped roots of white skin and reddish top. Very fast to mature and can be started under cloches.
S/C 500 [0V382] £2.15

Grain Crops

BARLEY

Best sown throughout the autumn for cutting July onwards. Grain highly nutritious and straw very useful as small animal feed or for mulching.
Approx. 200g [AG2] £3.25

WHEAT

Once again, best sown throughout the autumn for harvesting from early August. Grain for bread or flour, and straw for animal bedding, mulching or adding to compost heap.
Approx. 200g [AG3] £3.25

Unusual & Special Herbs

Most herbs are easy to grow from seed and will give enormous pleasure no matter whether you have a large garden or a window box. Culinary herbs are delicious used fresh and then dried or frozen for winter use. So many herbs are really decorative for use in the flower garden and the wonderful scents act as a tonic.

AGRIMONY (AGRIMONIA EUPATORIA) HP

Yellow flowers in summer. Valuable medicinal, used for wounds and as a gargle. Also made into a tea. Habitat: roadsides and wasteland. Ht. 22cm. Native.
S/C 30 [H2] £2.15

ARNICA MONTANA Also known as Wolf's or Leopard's Bane, Mountain Tobacco and Mountain Arnica. It has been used as a herbal medicine for centuries as an analgesic and anti-inflammatory.

ARNICA (ARNICA MONTANA)

HP/Po/V

Leopards Bane. The wonder bruise herb but poison if taken internally. Valuable in homoeopathic treatment. Protected mountain plant of Switzerland with golden daisy flowers. See Health Products page 160 for the massage balm. Ht. 15cm.
S/C 25 [H11] £2.25

Order line: 01376 570000/572456

BALM, LEMON HP (MELISSA)

Bushy plant of a similar habit to mint in that it can be invasive if not contained. Strong lemon flavour. Leaves used in cooked dishes, salads and for tea. Grows to about 70cm and prefers full sun.

S/C 600 [80201] £2.00

BALM ORANGE 'MANDARINA' (MELISSA) HP

A companion to Lemon Balm, Mandarina has a pronounced orange scent. A slightly trailing habit, ideal for containers or as ground cover. Use in Herbal teas, or add young fresh leaves to salads. Ht. 15-30cm (8-12in)

S/C 30 [80270] £2.15

Kings says "Nothing adds flavour to cooked dishes and salads so simply as freshly picked herbs".

BASIL

BASIL There is a wonderful variety of basils with a great range of scents and flavours. Many are very decorative and each has its own scent. All basils enjoy hot sunny weather so sowing should be delayed outside until early June and plants should not be put outside until well into June when the nights are warm. All basils will grow well in pots and do particularly well in the greenhouse, polytunnel or even the kitchen window sill. Sometimes red varieties of basil will produce a small quantity of green types. We advise that these should be removed at the pricking-out stage.

CINNAMON HHA ORGANIC

A distinctive basil from Mexico with a marvellous aroma of cinnamon. Ht. up to 45cm (18").

S/C 150 [OH18] £2.25

CLASSIC ITALIAN (OCIMUM BASILICUM) HHA ORGANIC

The most popular variety with a strong scent. Use in pasta sauces and salads especially with tomato. Combines well with garlic. Ht. 45cm (18").

S/C 150 [OH00110] £2.10

DARK RED (OCIMUM BASILICUM PURPUREUM) HHA ORGANIC

Strong basil scent, very decorative, with purple leaves setting off pale pink flowers. Ht. 45cm (18").

S/C 250 [OH19] £2.25

LEMON - INDONESIAN KEMANGIE (OCIMUM CITRIODORUM) HHA ORGANIC

A very special basil with delightful lemon fragrance. Use for tea and to flavour meat. Ht. 30cm (12").

S/C 200 [OH25] £2.35

LARGE LEAF LETTUCE/NEOPOLITANA HHA ORGANIC

Very large crinkled leaves. Distinctive flavour. Especially good for pasta sauce. The basil grown in the Naples region. Ht. 45cm (18").

S/C 250 [OH27] £2.05

MRS BURNS LEMON HHA

Fine for many culinary uses, especially soups and fried chicken. Considered to be far superior to Classic Italian. Ht. 45cm (18").

S/C 200 [V80256] £2.45

PURPLE RUFFLES HHA

Dark purple leaves which are fringed and quilted and very decorative. Pretty pinkish purple flowers. Strong basil scent. Ht. 30cm (12").

S/C 200 [H28] £2.30

QUEEN OF SHEBA HA

Highly ornamental with intense purple flowers which contrast beautifully with the bright green, very highly-scented foliage and intense flavour. So attractive in borders or containers you may choose not to pick it. Ht. 45cm (18in)

S/C 300 [80271] £2.00

RUBIN (OCIMUM BASILICUM) HHA

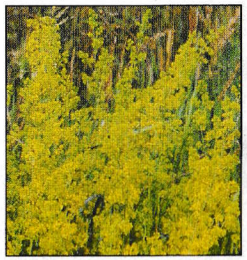

A vast improvement over Dark Opal with leaves that are virtually pure purple-bronze. Fine flavour and aroma. Ht. 40cm (16").

S/C 150 [H29] £2.75

BEDSTRAW, LADY'S Once used to curdle milk and colour cheese.

BEDSTRAW, LADY'S (GALIUM VERUM) HP

Masses of tiny golden flowers in summer. Valuable yellow dye plant. Medicinal. Habitat: dry grassland. Ht. sprawling.

S/C 250 [H81003] £2.25

BERGAMOT, LEMON (MONARDA CITRIODORA) HA/HHP

Rare annual from the USA. Lovely and unusual flowers of pink-purple which dry well for decoration. Leaves used for tea. Ht. 30cm (12").

S/C 75 [H35] £2.25

BERGAMOT, WILD (MONARDA FISTULOSA) HP

North American wild flower with strong scent. Very attractive, with lavender flowers. Leaves used to flavour meat and for tea. Ht. 1 mtr.

S/C 50 [H37] £2.25

BETONY A very valuable medicinal plant.

BETONY (STACHYS OFFICINALIS) HP

Flower spikes of red-purple. Used specially to treat headaches and for coughs and colds. Also a wound herb. Habitat: woodlands and grassland. Ht. 45cm.

S/C 150 [H81001] £2.25

Herbs continued

BURDOCK, GREATER (ARCTIUM LAPPA) HB

A bushy plant with large leaves and purple thistle like flowers. Blooms July-September. An important blood purifier. Has anti-bacterial properties and is used for many skin problems. Useful also for rheumatism and arthritis. The root may be boiled as a vegetable and the stalk, prior to flowering, may also be cooked. Habitat: waste ground.

S/C 20 [H45] £2.25

CALAMINT, LESSER (CALAMINTHA NEPETA) HP

A bushy plant with downy leaves and small drooping purple flowers from July-August. The whole plant is very aromatic and has a scent resembling Pennyroyal and Spearmint. Leaves make a soothing tea, good for stomach complaints. Habitat: dry banks and roadsides. Ht. 50cm.

S/C 150 [H48] £2.10

CAMPION, RED (SILENE DIOICA) HP

Lovely pinkish red campion flowers which look pretty growing through and between more bushy plants. A soap substitute, containing saponins which form a lather in water. Habitat: open woodland and light shade. Ht. 60cm.

S/C 100 [H50] £2.10

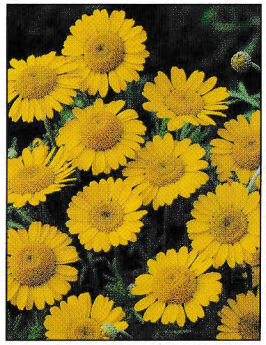

CATNEP, LEMON (NEPETA CATARIA, CITRIODORA) HP

Similar to the ordinary Catnep, but with a delicate hint of lemon scent. Excellent for tea. Ht. 80cm.

S/C 100 [H55] £2.20

CHAMOMILE, DYERS (ANTHEMIS TINCTORIA) HP

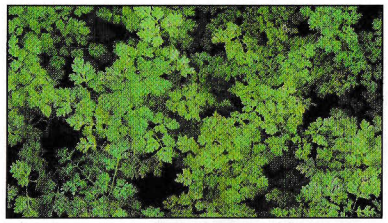

Medium sized daisy flowers in shades of yellow during August. Very decorative with deeply cut leaves. Yields yellow dye. Ht. 60cm.

S/C 250 [H58] £2.15

CHERVIL Use as a garnish like parsley.

CHERVIL (ANTHRISCUS CEREFOLIUM) HB ORGANIC

A delicate looking plant with fern-like leaves. Leaves can be used in sauces, omelettes and soups. Light shade. Very hardy. Ht. 30cm.

S/C 600 [OH61] £2.25

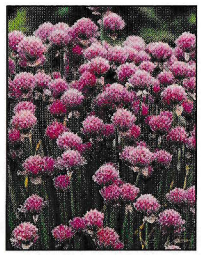

CHICORY (CICHORIUM INTYBUS) HP

Few people realise what lovely flowers the chicory has. A brilliant clear blue. Deep rooting and nutritious to humans and stock. Many good salad and root varieties. See Vegetable Section. Ht. 1 mtr. Naturalised.

S/C 1000 [H63] £2.05

CHIVES Chives and roses are a classic combination. The chives benefit the roses by protecting them from fungal diseases whilst camouflaging the often bare lower branches. Use the edible flowerheads of chive to adorn salads.

CHIVES (ALLIUM SCHOENOPRASUM) HP ORGANIC

Mild onion flavour for salads, sauces and soups. Very decorative mauve pompom flower heads. Moist fertile soil. Ht. 30cm.

S/C 200 [OH00175] £2.15

CHIVES POLYVERT (ALLIUM SCHOENOPRASUM) HP ORGANIC

Early, high yielding, fine leaved strain. Vigorous, erect growth of dark green leaves for both forcing or open ground.

S/C 150 [OH66] £2.25

CLOVER, WHITE (TRIFOLIUM REPENS) HP

An essential for permanent pasture. Marvellous ground cover and a novel lawn. Allowed to flower it will be a favourite for bees, so - watch how you step! Use also as living mulch. Ht. low.

S/C 750 [H71] £2.15

COREOPSIS (COREOPSIS TINCTORIA) HA

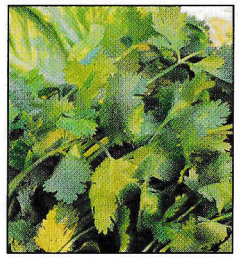

North American wild plant with jewel-like yellow and rust red flowers. Yields bright yellow/orange dye. Lovely bedding plant. Ht. 45cm.

S/C 250 [H74] £2.15

CORIANDER

CORIANDER Cook with both the leaves and seeds

CILANTRO (CORIANDRUM SATIVUM) HA ORGANIC

Our special selection for leaf production, also produces aromatic seeds. Leaves used in salads and to flavour many Indian and Chinese dishes. Seeds used for curry, chutney and cream cheese. Also known as Chinese or Indian Parsley. Ht. 60cm.

S/C 75 [OH75] £2.10

CONFETTI HA

Carrot-like foliage with that distinctive coriander taste. Easy to grow, producing plenty of leaf that can be used as a cut-and-come-again salad.

S/C 100 [H80257] £1.95

GREEN AROMA HA

Strong flavour, slow to bolt.

S/C 120 [H80258] £2.20

MOROCCAN HA ORGANIC (CORIANDRUM SATIVUM) A

This is the best variety for seed production. Quick to bolt with minimal leaf.

S/C 75 [OH76] £2.15

CUMIN, BLACK (NIGELLA SATIVA) HA

The Indian condiment and spice known as KOLONJI. Also used in Russian rye bread. Aromatic black seeds have a fennel like scent and a taste of peppery nutmeg. Grind and use like black pepper.

S/C 250 [H79] £2.05

Order line: 01376 570000/572456

DANDELION (TARAXACUM OFFICINALE) HP

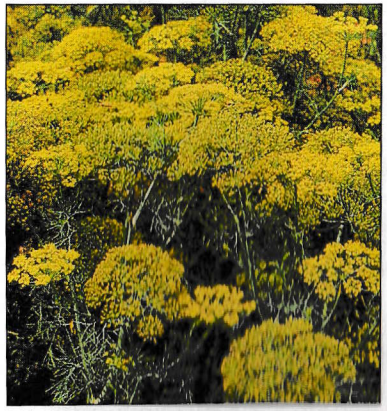

A valuable medicinal herb for all urinary problems and many other conditions. See also Vegetables page 141. Ht. 22cm.

S/C 350 [H80] £2.00

DILL Add seeds to apple pie, bean soups, pickles and potato salad. Leaves are wonderful with yoghurt, cucumber and fish, especially Gravlax. Hera produces lots of leaf before going to seed. Mammoth variety is the best for a large seed crop.

DILL, FERNLEAF (ANETHUM GRAVEOLENS) HA

Unique strain producing very dwarf plants. Dark green leaves with a slow bolting habit for longer cutting time. Ht. 45cm.

S/C 100 [H81] £1.95

DILL, HERA HA ORGANIC

A late bolting variety. Stiff growing habit with much leaf mass, dark blue green colour. Sow April-June.

S/C 250 [OH84] £2.10

DILL, MAMMOTH HA ORGANIC

This variety produces very little leaf and runs to seed very readily. Produces large productive heads which make unusual decoration and provide fragrant seeds.

S/C 250 [OH83] £2.10

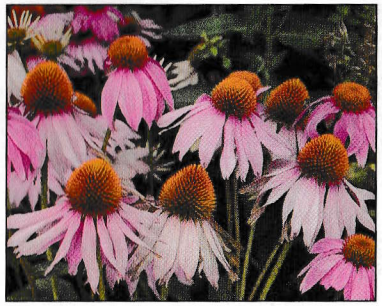

DILL, VIERLING (ANETHUM GRAVEOLENS) HA

This strain has extra strong stems, and is often used as a cut flower throughout Europe. Bluish-green leaves can be eaten as usual. Ht. 90cm.

S/C 350 [H85] £2.10

ECHINACEA, PURPLE CONEFLOWER (E. ANGUSTIFOLIA) HP

A North American native wildflower with important medicinal properties. Blood purifier and said to increase resistance to infection. Spectacular red/purple daisy flowers and attractive cone shaped heads for decoration. Ht. 1 mtr.

S/C 20 [H86] £1.95

ELECAMPANE A powerful antiseptic.

ELECAMPANE (INULA HELENIUM) HP

A most handsome plant with broad green leaves and many small ragged 'sunflowers'. The seed is loved by finches and linnets. An ancient medicinal herb used for all chest complaints, coughs, bronchitis. Ht. tall. Naturalised.

S/C 30 [H87] £2.15

FENNEL, FLOWER (NIGELLA HISPANICA) HA

Nigella hispanica has the most spectacular flowers of the nigella family, with deep purple-blue petals and crimson seed pods. Use in curries and sprinkle on bread and cakes. Make fabulous cut flowers and are perfect for drying. Ht. 30cm.

S/C 60 [H93] £2.05

GARLIC, MUSTARD (ALLIARIA PETIOLATA) HB/V

Jack-by-the-Hedge has large delicate green leaves and snow white flowers. Leaves may be used raw in salads or cooked. The leaves have antiseptic properties. This is the food plant of the Orange Tip butterfly. Habitat: hedgerows and woodland borders. We have recently discovered that the roots of this plant make a delicious substitute for horseradish. Ht. 60cm.

S/C 50 [H101] £2.05

GARLIC, WILD RAMSONS (ALLIUM URSINUM) HP/V

Broad spear shaped leaves and most attractive white flower heads composed of tiny star like flowers. Leaves and bulbs may be used as a substitute for garlic. Habitat: damp meadows and woods. Ht. 30cm.

S/C 40 [H102] £2.05

GERMANDER, WALL (TEUCRIUM CHAMAEDRYS) HP

Attractive glossy dark green leaved plant with small rosy flowers. Spreading. Ht. low.

S/C 20 [H105] £2.05

GREENWEED, DYER'S (GENISTA TINCTORIA) HP SHRUB

A smaller bush than the common broom with bright yellow two lipped flowers from June-August. Famous as a yellow dye plant. Also medicinal. Habitat: rough pastures and roadsides. Ht. 1 metre. (40").

S/C 45 [H15244] £2.35

HEARTSEASE OR WILD PANSY (VIOLA TRICOLOR) HA

The lovely tricolor pansy flower will bloom almost right through the first year. Use flowers in salads. Medicinal. Sun or part shade. Ht. 15cm. Native.

S/C 75 [H110] £2.15

HELIOTROPE (HELIOTROPIUM PERUVIANA) HHP

Very sweet scented violet blue flowers. Flowers turn with the sun. Homoeopathic tincture for clergyman's sore throat.

S/C 100 [H112] £2.15

HEMP AGRIMONY (EUPATORIUM CANNABINUM) HP

Tall downy plant, forming a clump, with dense masses of pink flowers July-Sept. Useful medicinal as a laxative, diuretic and blood purifier. Used externally for sores and ulcers. Habitat: damp ground. Ht. tall.

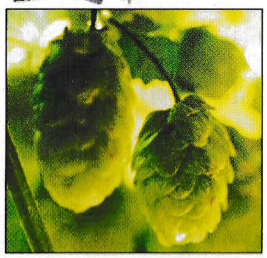

S/C 200 [H113] £2.15

HOLLYHOCK, BLACK (ALTHEA ROSEA NIGRA) HB

Beautiful deep purple-black silky flowers. The flowers are used as a natural colouring and give a lovely colour to herb teas. Flowers also used medicinally like Marsh-mallow.

S/C 30 [H118] £2.15

HOP (HUMULUS LUPULUS) HP

The decorative flowers from female plants are used in brewing. Flowers and leaves used in herb pillows to induce sleep. Climber. Native.

S/C 30 [H119] £2.15

INDIGO (INDIGOFERA SSP TINCTORIA) HHA

An ancient dyeplant producing a clear fast blue dye. A long growing season required so start early in spring under cover.

S/C 15 [H128] £3.05

JACOB'S LADDER (POLEMONIUM COERULEUM) HP

Showy cottage garden flower with blue or white flowers in early summer. Decorative ladder-like leaf formation. Medicinal. Ht. 1 mtr.

S/C 100 [H130] £2.15

JOE-PYE WEED, GRAVELROOT (EUPATORIUM PURPUREUM) HP

Stately North American native with vanilla scented leaves and large rosy flower heads. Medicinal. Ht. up to 2 mtrs.

S/C 25 [H132] £2.15

KNAPWEED, GREATER (CENTAUREA SCABIOSA) HP

Rich mauve thistle like flowers up to 5cm across from July-August. Very decorative silvery heads once the seeds have gone. Try a tea for digestive disorders and tonic effect. An exceptionally beautiful wild flower worthy of any garden. Habitat: chalky. Ht. 45cm.

S/C 20 [H133] £2.15

LAVENDER HP SHRUB

Lavenders hybridise very readily and so cannot be guaranteed to come completely true from seed. To encourage bushy growth lavenders should be pruned down after flowering. If required pruning can be quite hard.

DWARF MIXED

A unique mixture of dwarf lavenders which have been grown together including Hidcote, Twickle and Folgate. Because lavenders readily hybridise, plants from this seed are likely to produce some interesting new forms.

S/C 100 [H137] £2.15

FRENCH (LAVANDULA STOECHAS)

Quite unusual and unlike other lavenders. Grows wild in South Europe. Very strong scent and unusual purple flowers. Needs sharp drainage and a sheltered situation. Ht. 45cm.

S/C 100 [H139] £2.15

LAVENDER Likes well drained soil and full sun. They need low temperatures to germinate.

HIDCOTE (LAVANDULA ANGUSTIFOLIA)

Perfect for a low hedge. Slow growing with silvery foliage and deep mauve-blue flowers. Ht. 45cm.

S/C 100 [H140] £2.65

LEMON GRASS, EAST INDIAN (CYMBOPOGAN FLEXUOSUS) HHP

Delightful, lemon scented tea herb. Very popular for flavouring in cooking, especially stir fry. Oil also used in perfumes.

S/C 10 [H144] £2.95

LIQUORICE (GLYCHRRHIZA GLABRA) HP

The most common variety from southern Europe, source of most commercial licorice.

S/C 15 [H145] £3.05

MALLOW, COMMON (MALVA SYLVESTRIS) HP

Shiny rose petals veined purple. Leaves heart shaped. Said to be aphrodisiac! A tea is beneficial for coughs and bronchitis. The leaves are eaten in Arab countries. Juice from the leaves of mallow is beneficial against the ill-effects of bee stings. Habitat: waste ground and roadside. Ht. variable.

S/C 35 [H148] £2.25

MALLOW, MUSK Roots have similar properties to common mallow see above.

MALLOW, MUSK (MALVA MOSCHATA) HP

Delicate large rose pink flowers (sometimes white) and decorative finely cut foliage. Habitat: old pastures and waysides. Ht. 60cm.

S/C 50 [H149] £2.25

Order line: 01376 570000/572456

MARIGOLD, FRENCH (TAGETES PATULA) HHA

Lovely garden flowers, but with strong root secretions and leaf odour. Root secretions act against nematodes and leaves and roots keep down whitefly. Grow amongst tomato and many other crops. Ht. 22cm.

S/C 100 [H150] £2.05

MARIGOLD, POT (CALENDULA OFFICINALIS) HA ORGANIC

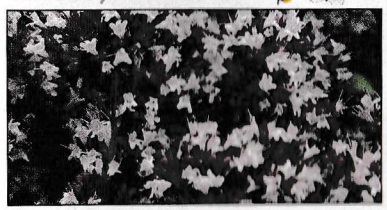

Known to everyone but should be used more. Petals have very delicate taste and will impart orange colour to rice and other dishes. Use flowers in salads. Tincture or ointment of flowers valuable for healing wounds. See Health Products on page 160. Seeds itself readily. Ht. 45cm Single flower.

S/C 75 [OH152] £2.10

MARJORAM, POT A valuable medicinal. Use for coughs, upset stomach and headache.

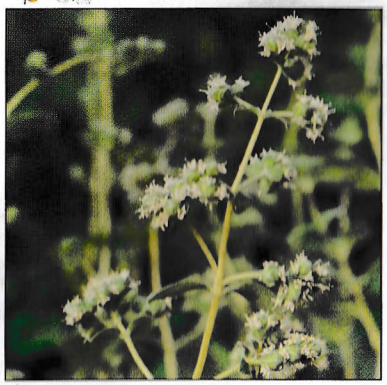

MARJORAM, POT (ORIGANUM VULGARE) HP ORGANIC

A milder flavour than the Greek Oregano, but still a good seasoning. Very handsome purply-pink flowers attract bees. Ht. 45cm.

S/C 200 [OH154] £2.15

MARJORAM, SWEET (ORIGANUM MARJORANA) HHP ORGANIC

Needs protection from frost. Neat bushy habit with grey-green leaves and white flowers. Rub into roasting joints of meat, game or poultry, and in sausages. Sun. Good soil. Ht. 30cm.

S/C 750 [OH155] £2.15

MARSH-MALLOW Soothing for all inflamed membranes and is used to treat coughs and bronchitis.

MARSH-MALLOW (ALTHAEA OFFICINALIS) HP

Handsome plant with grey-green velvety leaves and delicate pink flowers. Once used to flavour sweets. Moist situation. Grows wild in salt marshes. Ht. tall.

S/C 150 [H156] £2.15

MEADOWSWEET (FILIPENDULA ULMARIA) HP

One of our most attractive wild flowers with fragrant creamy white plumes. Used to flavour many drinks. Useful dye plant yielding a black from roots and yellow from tops. Valuable medicinal plant. Habitat: moist grassland and stream sides. Ht. 1 mtr.

S/C 75 [H157] £2.00

MIGNONETTE (RESEDA LUTEA) HB/V

Pale green floppy plant with creamy fragrant flowers in fuzzy spikes from June-September. A mild narcotic used for relief of pain and frayed nerves. Often used in combination with other herbs. Light soil. Ht. 30cm.

S/C 150 [H158] £2.15

MOTHERWORT (LEONURUS CARDIACA) HP

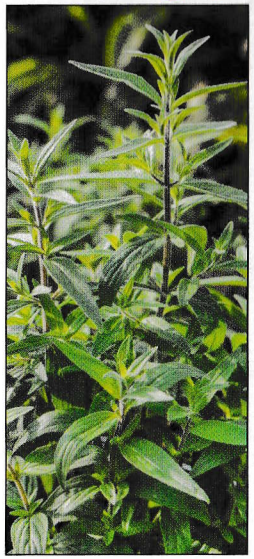

Used for strengthening the heart and for female disorders. Also for calming the nervous system. Ht. 60cm.

S/C 50 [H166] £2.00

MINT

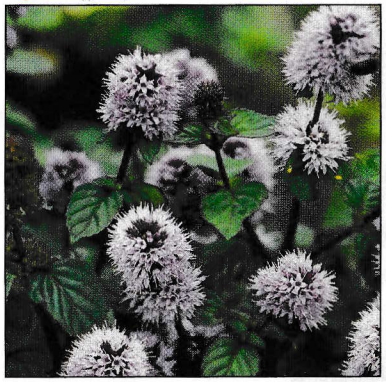

MOUNTAIN (PYCNANTHEMUM PILOSUM) HP

Not a true mint so does not spread. Leaves strongly scented of peppermint. Pale pink flowerheads are most attractive to bees and butterflies. Use instead of peppermint for flavouring. Ht 1 mtr.

S/C 150 [H162] £2.00

WATER (MENTHA AQUATICA) HP

Strongly scented wild mint with whorls of attractive pink-mauve flowers. Make a tea to treat colds and fevers as the drink encourages perspiration. Habitat: damp and marshy places. Ht. 45cm Creeping.

S/C 100 [H164] £2.15

NASTURTIUM, OR INDIAN CRESS (TROPAEOLUM MINUS) HA

Not only a colourful garden flower but a valuable herb. Very high in vitamin C. Peppery leaves are delicious in salads and the flowers add colour and are edible. Green seeds used as capers. Plant liberally amongst vegetables as a companion plant. Attracts blackfly from vegetables. Ht 22-30cm.

S/C 30 [H170] £2.15

NIGELLA (NIGELLA DAMASCENA) HA

Finely divided leaves surround lovely blue flowers. An insect repellent when stored with clothing.

S/C 350 [H171] £2.15

OXEYE DAISY (LEUCANTHEMUM VULGARE) HP

Large white daisy flowers and silvery green foliage. Young leaves eaten as a salad in Italy. Habitat: hay meadows and roadsides. Ht. 45cm.

S/C 250 81026 £2.15

PARSLEY

FRENCH HB ORGANIC

Plain leaved. Ht. 45cm.
S/C 300 [OH180] £2.15

GRUNE PERLE HB ORGANIC

Dark green extra curled. Ht. 75cm.
S/C 300 [OH182] £2.15

ITALIAN GIANT HB ORGANIC

Plain leaved. Strong flavour and vigorous. Ht. 75cm.
S/C 300 [OH181] £2.15

MOSS CURLED HB ORGANIC

Excellent quality standard strain.
S/C 300 [OH179] £2.15

PASQUE FLOWER, PULSATILLA (PULSATILLA VULGARIS) HP

A very rare native and one of our loveliest wild flowers. Silky purple flowers April-May and greyish ragged foliage. A tincture is used to treat coughs, bronchitis, asthma. Used as a nervine also. A valuable remedy. Habitat: old chalky heaths. Ht. 15cm.
S/C 7 [H183] £2.15

PLANTAIN, RIBWORT (PLANTAGO LANCEOLATA) HP

Reputed to have many medicinal properties, being used as a gargle, or poultice for ulcers and bites, also as an eye-wash. Leaves and seeds used for various stomach upsets. Largish, flat, green leaves and yellowish green flower spikes. Ht. 40cm.
S/C 200 [H186] £2.00

POPPY, OPIUM (PAPAVER SOMNIFERUM) HA/PO

A most beautiful flower, mauve, purple and red forms single or double. Has a deservedly sinister reputation but is still a most attractive plant and the ripe seeds can be used in curries and for sprinkling on bread and cakes. The dried seed capsules are most decorative. All parts, except ripe seeds, are poisonous. Ht. 60cm.
S/C 750 [H188] £2.00

ROCKET, SALAD (ERUCA SATIVA) HA ORGANIC

A superb salad with leaves of a delicious spicy flavour. See also Vegetables section Rocket, Roquette Rucola, page 146.
S/C 750 [OH194] £2.35

ROCKET, WILD (DIPLOTAXIS TENUIFOLIA) HA ORGANIC

Stronger flavour than normal salad rocket with finely serrated leaves.
S/C 250 [OH195] £2.15

ROSE, DOG (ROSA CANINA) HP SHRUB/V

The Dog Rose is a familiar and welcome sight in full flower in June. The pale to rich pink single flowers are fragrant. Flowers are followed by a profusion of scarlet flask shaped hips which are very high in vitamin C and are used to make syrup and wine. The leaves make a fragrant tea. Habitat: hedgerows.
S/C 35 [H198] £2.05

SAFFLOWER
A garland made of the flowers was found in Tutankhamun's tomb.

SAFFLOWER, FALSE SAFFRON (CARTHAMUS TINCTORIA) HA

Yellow thistle-like heads yielding a yellow or red dye. Used to colour rice and the seed oil is a polyunsaturated cooking oil. Ht. 45cm (18").
S/C 25 [H203] £2.05

SAGE As well as a good aid to digestion (especially fatty foods), is an antiseptic, anti-fungal and contains oestrogen.

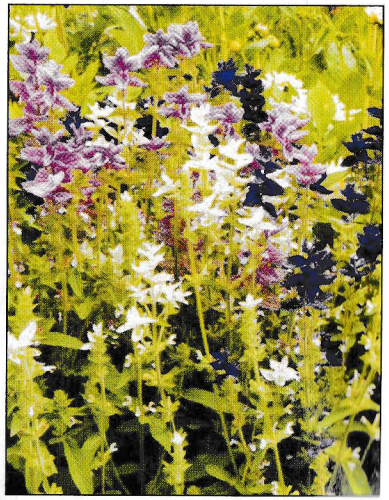

SAGE

COMMON (SALVIA OFFICINALIS) HP SHRUB ORGANIC

Familiar grey leaved shrub with attractive blue-mauve flowers. Use leaves for stuffings and to flavour potatoes and rich meats. Medicinal plant with antiseptic properties. Ht. 60cm.
S/C 30 [OH00318] £2.00

PAINTED (SALVIA HORMINUM) HA

A most decorative plant with purple, pink and white bracts. Adding leaves and seeds to liquors during fermentation increases their inebriating quality. An infusion is beneficial for sore gums. Ht. 45cm.
S/C 300 [H207] £2.05

Order line: 01376 570000/572456

SCABIOUS, FIELD (KNAUTIA ARVENSIS) HP

Flowers bluish lilac waving pincushion heads June-September. Culpeper recommends scabious wine for pleurisy. Used externally for sores and internally for lung complaints. Habitat: meadows and roadsides. Ht. 60cm.

S/C 25 [H213] £2.10

SCABIOUS, DEVIL'S BIT (SUCCISA PRATENSIS) HP

Waving stems of small mauve-blue pincushions. This is the butterfly and bee plant above all others. The profusion of butterflies this attracts has to be seen to be believed. Wet and dry grassland. Ht. 1 mtr.

S/C 75 [H214] £2.15

SEAHOLLY (ERYNGIUM MARITIMUM) HP

A beautiful plant with waxy-grey spiny leaves. Umbellifers more like teasel heads. Flowers bright clear blue. Covered with hooked bristles. Found on sandy and shingly beaches and dunes.

S/C 15 [H217] £2.15

SELF HEAL In the C16th they believed a plant always bore an outward sign as to its intended use. Here they saw the shape of the throat and so it was used to treat quinsy and diphtheria.

SELF HEAL (PRUNELLA VULGARIS) HP

Very attractive spreading plant with dark purple flower spikes from June to September. Useful wound herb especially for sore mouth and throat. Habitat: grassland. Ht. 22cm.

S/C 100 [H218] £2.15

SOAPWORT A gentle cleanser for delicate fabrics.

SOAPWORT (SAPONARIA OFFICINALIS) HP

Steep the whole plant, especially the roots, in water to produce soapy lather for skin rinses and a shampoo. A sprawling plant with lovely pink flowers. Ht. 60cm. Naturalised.

S/C 35 [H221] £2.15

ST JOHN'S WORT A valuable medicinal herb, used in homoeopathy.

ST JOHN'S WORT (HYPERICUM PERFORATUM) HP

An attractive looking slender plant with bright yellow flowers. For identification hold the tiny leaves up to the light to see the perforations. The oil is very effective rubbed into aching and tired muscles. Tincture is a valuable antiseptic. Habitat: pasture and wood margins. Ht. 30cm.

S/C 250 [80242] £2.15

STRAWBERRY, WILD (FRAGARIA VESCA) HP

Dark green glossy small fan shaped leaves, silver beneath. Flowers small white rose form from April onwards. Tiny fragrant red fruits are a great delicacy, and are also rich in iron and other minerals. Very long fruiting season. Habitat: woodland. Ht. low spreading.

S/C 40 [H227] £2.15

TAGETES DROPSHOT (TAGETES FILIFOLIA) HHA

Easy to grow annual herb with fine feathery foliage with a strong licorice, anise flavour. Ideal flavouring for drinks or salads. Can be used as a tarragon substitute or as a baby leaf. Ht. 15-25cm (6-10in).

S/C 30 [80272] £2.45

THISTLE, SCOTTISH OR COTTON (ONOPORDUM ACANTHIUM) HB

Naturalised. Grey leaved giant. Superb architectural plant with purple flower heads. Said to have been used for treating cricks in the neck. Hardly surprising! Ht. tall.

S/C 15 [H240] £2.15

THYME One of our commonest herbs. With the added attraction of bringing bees and butterflies into the garden.

THYME, BROAD LEAVED (THYMUS PULEGOIDES) HP

Different to Common Thyme with large fleshy leaves, much used in flavouring Jamaican cooking.

S/C 250 [H245] £2.15

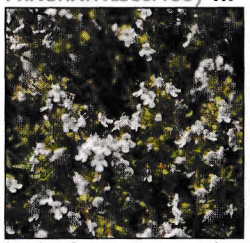

THYME, COMMON (THYMUS VULGARIS) HP ORGANIC

Very decorative low shrub with pink flowers very attractive to bees. Use leaves for flavouring meat. Full sun and well drained soil. Ht. 37cm.

S/C 200 [OH242] £2.15

THYME ORANGELO (THYMUS FRAGRANTISSIMUS) HP

A traditional thyme scent with overtones of citrusy orange. Orangelo creates a bushy fragrant groundcover or can be grown in containers as and edible ornamental where the plants become clothed in tiny white blushed flowers. Use to flavour a wide range of dishes. Ht. 15-30cm (8-12in).

S/C 30 [80273] £2.30

THYME, WILD see page 156

TOADFLAX, COMMON (LINARIA VULGARIS) HP

Bold spikes of primrose yellow flowers like a miniature snapdragon. Fleshy bluish green leaves. A spreading floppy plant. A liver and jaundice herb, purgative and diuretic. Used also to treat gallstones. Habitat: dry banks and sand. Ht. 22cm.

S/C 150 [H246] £1.95

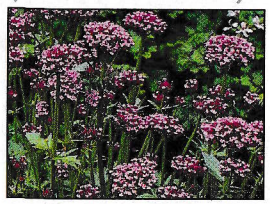

VALERIAN (VALERIANA OFFICINALIS) HP

Umbels of flesh coloured flowers from June to August. Our most useful native tranquilliser. Strongly sedative and used to relieve migraine and neuralgia. Habitat: marshes and riversides. Ht. tall.

S/C 75 [H81011] £1.95

VALERIAN, RED (CENTRANTHUS RUBER) HP

Quite different from native wild Valerian. Showy bushy garden plant with fragrant red flowers. Young leaves for salads and cooked as greens. Roots used for soups. Very attractive to butterflies. Ht. 60cm.

S/C 150 [H251] £2.00

VERVAIN Associated with magic and sorcery.

VERVAIN (VERBENA OFFICINALIS) HP

Slender flower spikes with many tiny mauve flowers up the stem. Habitat: waysides and waste ground. Ht. 1mtr.

S/C 500 [H253] £2.00

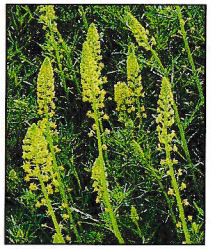

VIPER'S BUGLOSS HB (ECHIUM VULGARE)

A European wildflower, native in the UK on light and poor soils. Easy to grow and it self-seeds readily. Old medicinal herb used for headaches, fevers and nervous complaints and apparently to treat snake bites! Ht. 30cm.

S/C 35 [H255] £1.95

WELD, DYER'S ROCKET (RESEDA LUTEOLA) HB

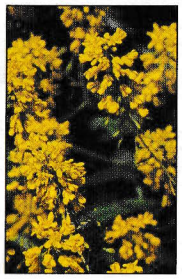

Long spines of yellow/green flowers. One of the best and most permanent of all vegetable dyes. With the right mordant will yield four distinct yellows. Architectural. Habitat: waste ground. Ht. over 1 mtr.

S/C 150 [H257] £1.90

WOAD Famous dye plant used by the ancient Britons for blue dye. Tewkesbury Strain.

WOAD (ISATIS TINCTORIA) HB

The arching branches with their blue/black hanging ripe seeds are an unusual addition to dried flower arrangements. Naturalised. Rare. Ht. over 1 mtr.

S/C 25 [H258] £2.05

WOODRUFF, SWEET (ASPERULA ODORATA) HP/V

Shiny leaves growing in radiating formation up the stem with small white star shaped flowers in May and June. When dried has the scent of newly mown hay. Used dried in linen cupboards. Fresh leaves and flowers steeped in drinks especially white wine cup. Make a tea to soothe the nerves and to ease headaches. Germination difficult and erratic. Ht. low.

S/C 15 [H259] £2.25

YARROW Much used herb, for wounds, to treat colds and fever, skin cleanser and for high blood pressure.

YARROW (ACHILLEA MILLEFOLIUM) HP

Fine feathered leaves and flat white or pinkish flowers. Habitat: grassland. Ht. 60cm.

S/C 400 [H81016] £2.20

Flowers

Here we include many well-loved cottage garden varieties. They will be a delight in your garden and attract all forms of wildlife, see the inside back cover for some of our suggestions.

ACHILLEA, CLOTH OF GOLD (A. FILIPENDULA) HP

Deeply cut foliage and large flat mustard yellow heads. Makes a lovely border plant. Ht. 1.5 mtrs.

S/C 400 [CG3] £2.20

GODETIA OR SUMMER'S DARLING, SINGLE MIXED (G. GRANDIFLORA) HA

Compact bushy plants with posies of funnel-shaped flowers 5cm across, in a wide colour range. Suited to pot culture and as a cut flower. Sow April. Ht. 30cm.

S/C 1000 [CG75] £1.95

GRASSES, ORNAMENTAL

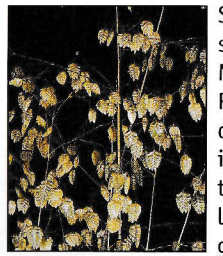

BRIZA MAXIMA (QUAKING GRASS) HA

Ornamental grass with delightful nodding spikelets of pale green drying to gold. Lovely in ever-lasting arrangements. Sow April to May. Ht. 45cm (18").

S/C 225 [54701] £2.10

BRIZA MEDIA (QUAKING GRASS) HP

Small heart-shaped flowers. May to July. Prefers well-drained soils and is drought tolerant. Good low maintenance ground-cover for naturalizing. Sow April. Ht. 25cm.

S/C 225 [63005] £2.10

CORTADERIA ARGENTEA (PAMPAS GRASS) HP

Silvery white plumes on tall strong stems above plants of slender sharp pointed leaves. Much used in dried arrangements. Sow March to April. Ht. 180cm (70") plus.

S/C 100 [69801] £2.45

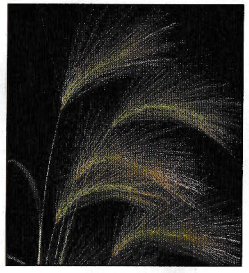

FESTUCA GLAUCA (BLUE GRASS) HP

Popular ornamental grass with bristle-like blue/grey leaves and purple spikelets. Great in winter flower arrangements. Sow April to June. Flowers throughout the following summer. Ht. 15cm (6").

S/C 250 [61202] £2.10

HORDEUM JUBATUM (SQUIRRELTAIL GRASS) HA

Beardless seeds, flowers July-September. Sow directly into open ground during April and May. Ht. 60cm (24").

S/C 100 [63012] £2.20

Order line: 01376 570000/572456

LAGURUS OVATUS (HARE'S TAIL GRASS) HA

Narrow hairy green leaves with white fluffy seed heads like a Hare's tail. Dries beautifully. Sow March to April. Ht. 40cm (16").

S/C 500 [65701] £2.05

MELICA TRANSSILVANICA (RED SPIRE) HP

Can be used as a cut flower or dried. Fast growing, high yielding with as many as 40 stems per season. Flowers the first year from mid-April sowings, producing russet-red flower spikes. Sow April. Ht. in the first year 80-100cm (32-40").

S/C 75 [63011] £2.05

ORNAMENTAL MIX HA/HP

Blended mix of the numerous individual species to be found on this page. All add elegance to dried arrangements. Sow March to May. Ht. 35-60cm (14-24").

S/C 500 [63001] £2.05

STIPA BARBATA "SILVERFEATHER" (FEATHER GRASS) HP

Long, narrow, silvery green leaves and long, feathery, silvery-white awns. Flowers June to July. Can be used as a dried flower, cut in good time or the awns will fall out. Sow November. Ht. 90cm (36") with 40cm (16") long awns.

S/C 5 [63006] £2.05

STIPA CAPILLATA (BRIDAL VEIL) HP

Feather-like with narrow, upright habit and narrow foliage. Non-feathered awns are clear green, later changing to yellow. Sow April. Flowers July to August. Ht. 120cm (48").

S/C 25 [63008] £2.05

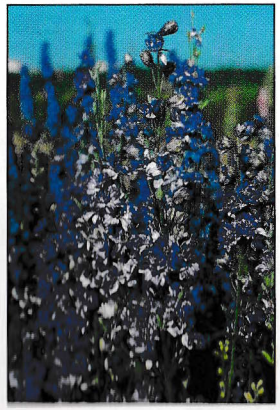

JACOB'S LADDER (POLEMONIUM CAERULEUM) HP

Totally undemanding, produces long racemes of blue or white flowers in April to July. Sow March. See also Herbs page 151. Ht. 45cm.

S/C 100 [CG84] £2.15

LARKSPUR, BLUE SPIRE HA

A lovely dusky blue so much associated with old-fashioned gardens.

S/C 250 [CG89] £2.10

LINUM, RED (L. GRANDIFLORUM RUBRUM) HA

Extraordinary blood red coloured flowers 2-5cm across with a glistening sheen. Sow March. Ht. 60cm.

S/C 300 [CG65] £2.05

NICOTIANA, AFFINIS (NICOTIANA AFFINIS) HHA

Loose clusters of white tubular flowers, June to September. The whole plant is sticky to touch. Sweetly scented. Sow February. Ht. 60cm.

S/C 400 [CG121] £2.10

POPPY SOMNIFERUM 'MAANZAAD' (BREAD SEED POPPY) HA

The best Bread seed ('Maanzaad' = 'Poppy Seed' in Dutch) Poppy, producing beautiful white single flowers with pink markings and a seed head which holds onto the seeds rather than allow the seeds to scatter making seed collection easier. Home grown seed is ideal for use as a topping to bread. Attractive in the border. Ht. 90cm.

S/C 500 [CG136] £1.45

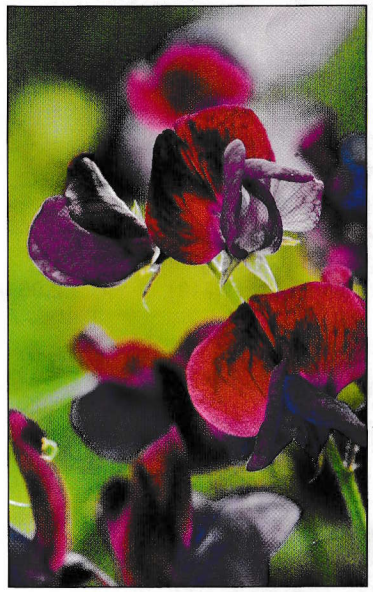

POPPY ORIENTAL, NEW HYBRIDS HP

Large, silky petals in a range of shades from deep blood red to salmon. Ht. 90cm.

S/C 1000 [CG137] £2.10

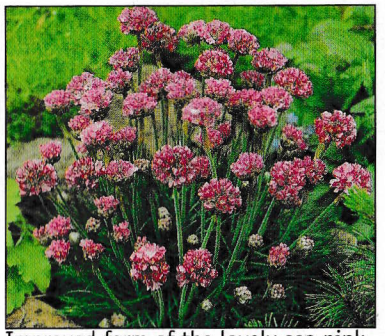

SWEET PEA, WILD (LATHYRUS) HA

Flowers are rich purple with a back petal of deep red. Outstanding fragrance. Ht. tall.

S/C 20 [CG165] £2.10

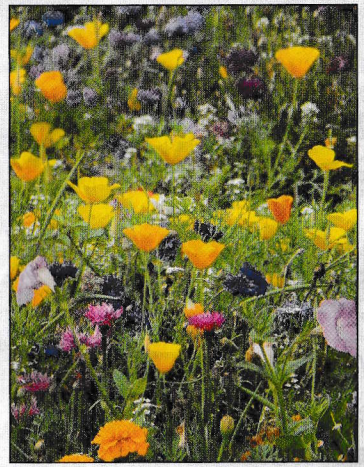

THRIFT OR SEA PINK (ARMERIA MARITIMA SPLENDENS) HP

Improved form of the lovely sea pink with bright rose flowers on hummocks of dense foliage. Soak seeds in warm water for 8 hours. Germination 16-18°C. Ht. 30cm.

S/C 175 [CG169] £2.10

COUNTRY GARDEN MIX

PRAIRIE MIX, RIGOLETTO

HA/HP

Perennials and annuals which freely re-seed. Includes Coreopsis, Perennial Flax, Marigold, Red Poppy and more.

5g [CG81019] £2.65

Wild Flowers

Many wild flowers have disappeared due to urban development. By introducing just a few to your garden you will attract butterflies, bees and seed-eating birds.

POISON PLANTS (Po)
Some plants and seeds are poisonous and these are clearly marked in our list (eg Bluebell HP//Po/S and Columbine HP/Po). Please take careful note, especially if you have young children. Teach them not to touch or taste plants, berries and seeds except with adult guidance. Many plants (including some vegetables which can cause reactions such as skin rashes) are irritant and can affect some people with sensitive skins. The herbs rue and comfrey can cause the skin to become hyper-sensitive to sunlight resulting in a painful, blistering rash.

ANEMONE, WOOD (ANEMONE NEMOROSA) HP

Flowers pale pink to white in early spring. Habitat: woodland. Ranunculaceae. Ht. low. Creeping.

S/C 50 [WF2] £2.10

BIRD'S FOOT TREFOIL (LOTUS CORNICULATUS) HP/S

Flowers bright yellow June-August. Habitat: light and chalk grassland. Leguminosae. Ht. low.

S/C 100 [WF8] £2.10

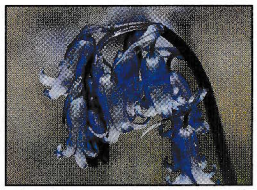

BELLFLOWER, NETTLE-LEAVED (C. TRACHELIUM) HP

Flowers mauve bells July-September. Habitat: woodland and hedgebanks. Campanulaceae. Ht. 1 mtr.

S/C 150 [WF7] £2.10

BLUEBELL (HYACINTHOIDES NON-SCRIPTA) HP/Po/S

Flowers blue violet April-June. Habitat: woodland on light soil. Liliaceae.

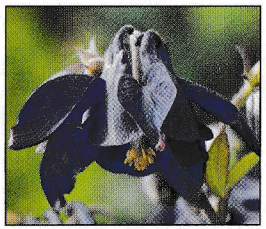

S/C 50 [WF81015] £2.20

CAMPION, WHITE (SILENE ALBA) HP

Flowers white May-September. Habitat: copses and open ground light-soil. Caryophyllaceae. Ht 60cm.

S/C 500 [WF12] £2.05

COLUMBINE (AQUILEGIA VULGARIS) HP/Po

Old fashioned garden flower with bluish green leaves and drooping flower heads of blue or pink. Blooms May-July. Habitat: woods and waysides. Ht. 45cm. Naturalised.

S/C 25 [H72] £2.10

CORNCOCKLE (AGROSTEMMA GITHAGO) HA/Po

Flowers purple pink June-August. Habitat: cornfields. Caryophyllaceae. Ht. 1 mtr.

S/C 75 [WF15] £2.15

CORNFLOWER Also known as Bachelor's Buttons, Bluebottle and Hurtsickle. They were also used in the funeral wreath of Tutankhamun.

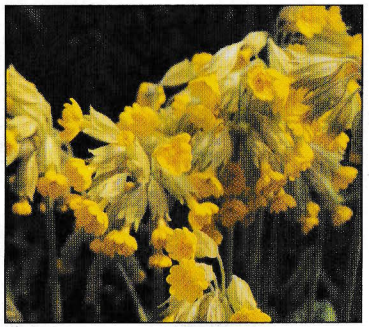

CORNFLOWER (CENTAUREA CYANUS) HA

Flowers bright blue June-August. Habitat: cornfields. Compositae. Native. Ht. 60cm.

S/C 200 [WF16] £2.00

COWSLIP (PRIMULA VERIS) HP/V

Flowers yellow April-May. Habitat: grassland on chalk and clay. Primulaceae. Ht. 22cm.

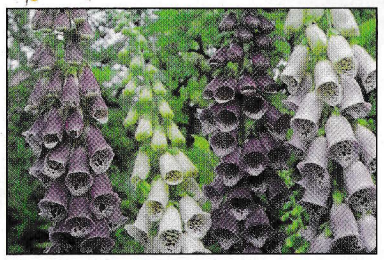

S/C 50 [WF81002] £2.20

DRAGONHEAD (DRACOCEPHALLUM MOLDAVICUM) HA

Scented leaves and showy blue flowers. Fine bee plant. Ht. 45cm.

S/C 100 [WF23] £2.10

FOXGLOVE, MIXED WILD (DIGITALIS PURPUREA & ALBA) HB/Po

S/C 500 [WF29] £2.05

FOXGLOVE, WHITE (DIGITALIS ALBA) HB/Po

Flowers July-September. Habitat: woodland clearings and heaths. Scrophulariaceae. Ht. 1 mtr.

S/C 250 [WF28] £2.20

FRITILLARY (FRITILLARIA MELEAGRIS) HP BULB

Solitary nodding bell shaped flower of deep purple sometimes white with a chequerboard pattern. Beautiful and rare flower. Habitat: moist meadows. Lillacae. Ht. 22cm.

S/C 30 [WF30] £2.10

HAREBELL (CAMPANULA ROTUNDIFOLIA) HP

Flowers blue bell shaped July-September. Habitat: dry grassland. Campanulaceae. Ht. 30cm.

S/C 1000 [WF33] £2.10

MALLOW, MUSK (MALVA MOSCHATA) HP

Delicate large rose pink flowers (sometimes white) and decorative finely cut foliage. Habitat: old pastures and waysides. Ht. 60cm.

S/C 50 [WF81006] £2.20

MARIGOLD, CORN (CHRYSANTHEMUM SEGETUM) HA

Flowers golden yellow June-October. Habitat: arable fields. Compositae. Ht. 30cm.

S/C 400 [WF37] £2.10

MULLEIN, GREAT (VERBASCUM THAPSUS) HP

Rosettes of felty grey leaves at ground level and very tall spires of densely crowded, single yellow flowers. The whole plant is covered with softish white wool. Flowers June-August. Ht. 30cm-200cm (12"-80").

S/C 800 [WF81005] £2.20

Order line: 01376 570000/572456

PIMPERNEL, SCARLET (ANAGALLIS ARVENSIS) **HA**

Flowers bright red June-August. Habitat: arable fields. Primulaceae. Ht. low.

S/C 400 [WF81010] £2.20

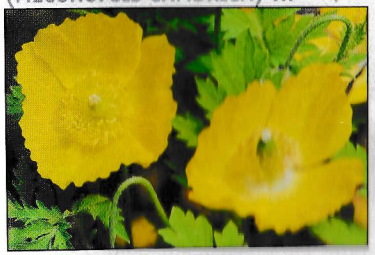

POPPY, FIELD (PAPAVER RHOEAS) **HA**

The beautiful cornfield poppy flowering June-September. Valuable herbal painkiller and ancient cough remedy. Habitat: cornfields and road banks. Ht. 40cm.

S/C 2000 [WF81008] £2.20

POPPY, WELSH (MECONOPSIS CAMBRICA) **HP**

Flowers bright yellow June-August. Habitat: damp and rocky places. Papaveraceae. Ht. 30cm.

S/C 175 [WF47] £2.10

PRIMROSE, WILD (PRIMULA VULGARIS) **HP/V**

Flowers yellow February-May. Habitat: woods and hedgerows. Primulaceae. Ht. 18cm.

S/C 30 [WF81009] £2.20

RAGGED ROBIN (LYCHNIS FLOS-CUCULI) **HP**

Flowers deep rose red May-August. Habitat: moist meadows.

Caryophyllaceae. Ht. 45cm.

S/C 1000 [WF51] £2.00

THYME, WILD (THYMUS PRAECOX, SSP ARTICUS) **HP**

Flowers rose purple June-August. Habitat: dry grasslands and heaths. Labiatae.

S/C 200 [WF58] £2.05

YELLOW-RATTLE(RHINANTHUS MINOR) **HA**

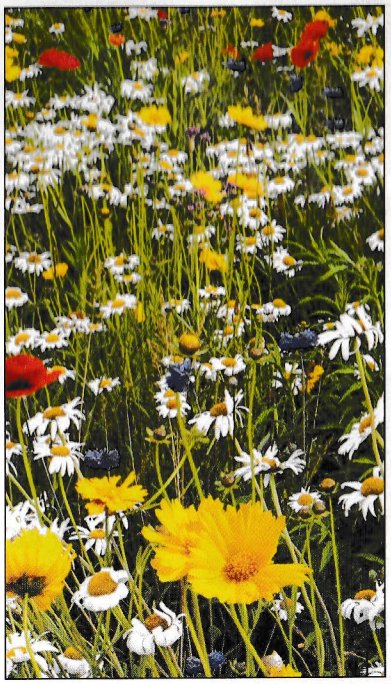

Seeds "rattle" in pods when ripe. Flowers yellow May-August. Habitat: grasslands.

Scrophulariaceae. Ht. to 50cm.

S/C 50 [WF67] £2.10

Wild Flower Mixtures

All mixtures come with full cultural instructions

WILD FLOWER CLASSIC MEADOW 80/20 MIX

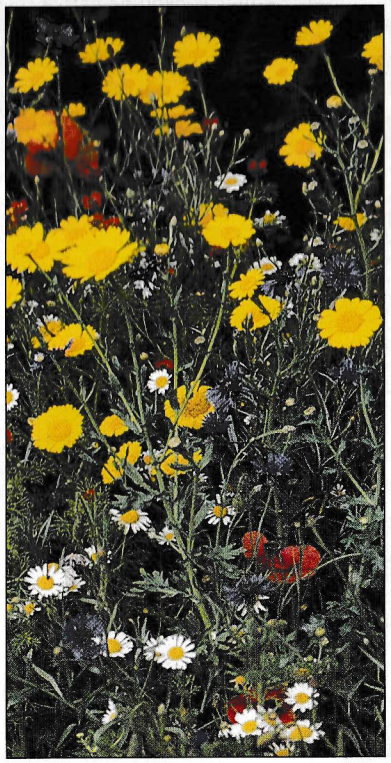

(Contains grass)

Create your own classic meadow, contains a delightful mixture of 20% wild flowers and 80% grasses for quick and easy establishment. Providing colour over a long period.

Wild Flower Native Species: Red Campion, Black Medick, Common Knapweed, Oxeye Daisy, Ribwort Plantain, Yarrow, Field Poppy, Ladys Bedstraw, Meadow Buttercup, Cowslip, Salad Burnet.

Grass Species: Browntop Bent, Strong Creeping Red Fescue, Crested Dogstail, Chewings Fescue and Sheeps Fescue. 25gm pack, enough for 5 square metres.

[81022] £4.50

WILD FLOWER CORNFIELD ANNUALS 80/20

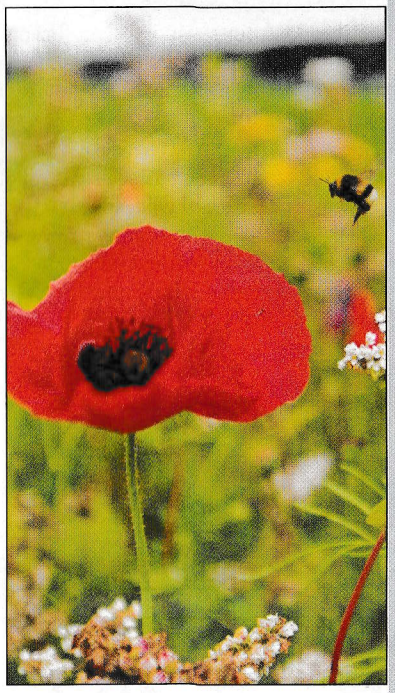

(Contains grass)

A carefully selected mixture of colourful annuals once commonly seen in our cornfields. Mixture contains 20% wild flowers and 80% grasses for quick and easy establishment.

Wild Flower Native Species: Corn Chamomile, Corncockle, Cornflower, Corn Marigold, Field Poppy.

Grass Species: Browntop Bent, Strong Creeping Red Fescue, Crested Dogstail, Chewings Fescue and Sheeps Fescue. 25gm pack, enough for 5 square metres.

[81024] £4.50

WILD FLOWER BUTTERFLIES & BEES 80/20 MIX

(Contains grass)

A wide range of species to attract many beneficial insects into the garden. Mixture contains 20% wild flowers and 80% grasses for quick and easy establishment. Providing colour and insect interest over a long period.

Wild Flower Native Species: Foxglove, Common Knapweed, Cornflower, Yarrow, Field Scabious, Field Poppy, Musk Mallow, Oxeye Daisy, Wild Clary, Corn Marigold.

Grass Species: Browntop Bent, Strong Creeping Red Fescue, Crested Dogstail, Chewings Fescue and Sheeps Fescue. 25gm pack, enough for 5 square metres.

[81023] £4.50

Wild Flower Mixtures continued

All the wild flower seed listed in our Wild Flower Mixtures is genuine native seed collected from either wild population or wild flowers grown on the nurseries (the seed originating from wild stock). The basic grasses in our mixtures are not from wild stock but are suitable grasses recommended by English Nature. We include some native wild grasses where appropriate species are available.

PLEASE DO NOT scatter wild flower seeds in the countryside. Firstly, this is very wasteful of expensive and precious seed. Secondly, whereas it is quite appropriate and beneficial to have a varied collection of wild flowers in the garden, it might not be appropriate to establish many of these species in the countryside far from their natural habitats.

All conservation seeding on a small or large scale outside the private garden should be done in close association with your county Naturalists' Trust or English Nature.

GENERAL ALL-PURPOSE MIXTURE (Contains grass)

A mixture for general use containing 21 native species which is made up of 80% grass mixture and 20% wild flower mixture.

Wild Flower Native Species: Black Medick, Buttercup Bulbous, Campion Red, Campion White, Clary Wild, Cowslip, Forget-me-not field, Foxglove, Knapweed Common, Knapweed Greater, Lady's Bedstraw, Musk Mallow, Oxeye Daisy, Plantain Ribwort, Salad Burnet, Selfheal, Sorrel Common, St John's Wort, Wild Carrot and Yarrow.

Grass Species: Browntop Bent, Strong Creeping Red Fescue, Crested Dogs Tail, Meadow Fescue, Smooth-stalked Meadow Grass.

5g packet [WF81022] £2.55

WILD FLOWER MIXTURE FOR HEAVY CLAY SOILS (Contains grass)

Contains 22 native species which are frequently found in grassland on heavier soils subject to occasional or seasonal water-logging. Made up of 80% grass mixture and 20% wild flower mixture. Suitable for low lying areas on clays and silts, or locations with poor drainage.

Wild Flower Native Species: Agrimony, Bird's Foot Trefoil, Black Medick, Buttercup Meadow, Campion White, Cowslip, Dandelion, Knapweed Common, Knapweed Greater, Lady's Bedstraw, Meadowsweet, Oxeye Daisy, Plantain Hoary, Plantain Ribwort, Salad Burnet, Scabious Field, Selfheal, Sorrel Common, Teasel, Wild Carrot, Yarrow, Yellow Rattle.

Grass Species: Browntop Bent, Chewings Fescue, Crested Dog's Tail, Meadow Foxtail, Rough Stalked Meadow Grass, Sheeps Fescue, Smooth-stalked Meadow Grass, Sweet Vernal Grass, Tufted-hair grass.

5g packet [WF81021] £2.20

100% CORNFIELD FLOWERS A (Does not contain grass)

A colourful mixture of annual flowers once common in cornfields. Many now rare and are no longer seen growing in the wild. Flowers early summer to autumn. Contains Corn Chamomile, Corncockle, Cornflower, Corn Marigold, Corn Poppy. Covers approx. 2 sq. m. **[WF81017] £4.50**

All mixtures come with full cultural instructions

Order line: 01376 570000/572456

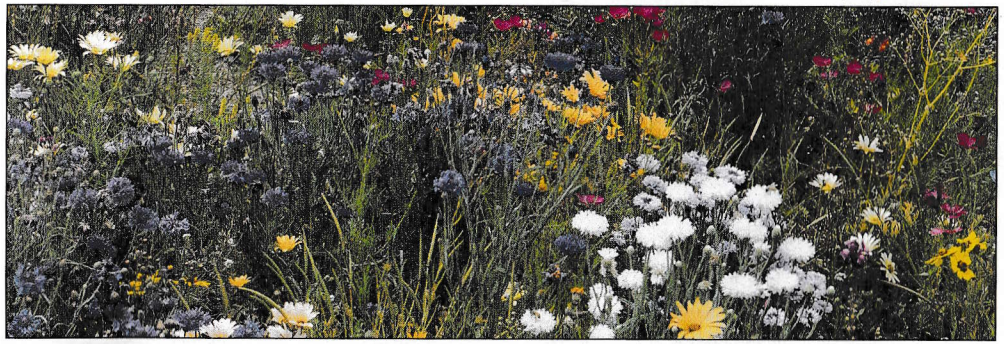

100% FIELD AND HEDGEROW FLOWERS A and HP (Does not contain grass)

Annuals to flower in the first season and perennial species which will flower in the second and subsequent years.

Contains Agrimony, Basil Wild, Bedstraw Hedge, Bellflower Nettle Leaved, Campion Red, Campion White, Foxglove, Garlic Mustard, Knapweed Common, Oxeye Daisy, Ragged Robin, Selfheal, St John's Wort Common, Tufted Vetch, Upright Hedge-parsley, Wild Angelica, Wood Avens, Woundwort Hedge, Yarrow. Covers approx. 2 sq. m. **[WF81018] £4.50**

WILD FLOWER MIXTURE FOR LOAM AND ALLUVIAL SOILS (Contains grass)

Contains 22 native species which are frequently found on moisture retentive loamy soils, typical of many lowland meadows with free drainage. Contains 80% grass and 20% wild flower mixture.

Wild Flower Native Species:
Bird's Foot Trefoil, Black Medick, Buttercup Meadow, Campion White, Cowslip, Dandelion, Goats Beard, Knapweed Greater, Knapweed Common, Lady's Bedstraw, Mouse-ear Common, Oxeye Daisy, Pignut, Plantain Hoary, Plantain Ribwort, Ragged Robin, Salad Burnet, Selfheal, Sorrel Common, Wild Carrot, Yarrow, Yellow Rattle.

Grass Species: Browntop Bent, Chewings Fescue, Slender Creeping Red Fescue, Strong Creeping Red Fescue, Crested Dog's Tail, Golden Oat Grass, Meadow Foxtail, Sheep's Fescue, Smooth-stalked Meadow Grass.

5g packet [WF81020] £2.55

WILD FLOWER MIXTURE FOR HEDGEROW AND LIGHT SHADE (Contains grass)

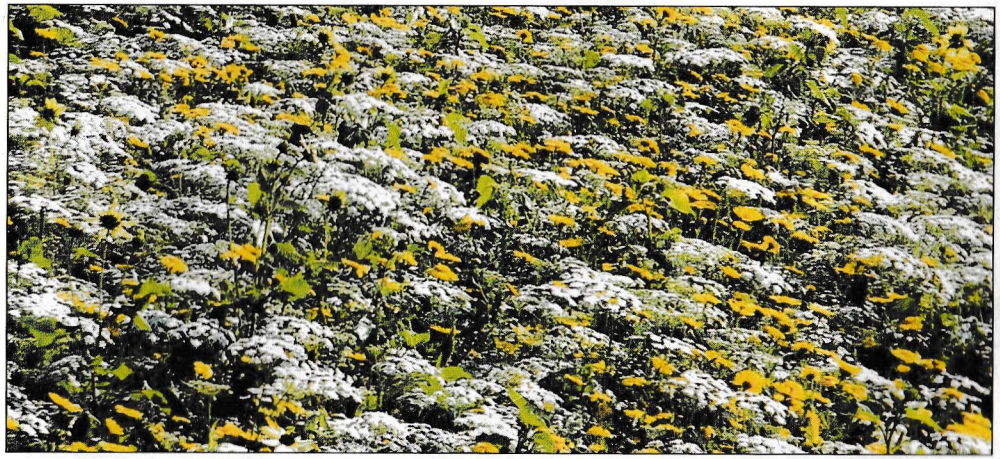

Contains 20 native species frequently found in hedgerows, woodland edges, clearings and open woods. It can also be sown in partial shade such as hedge bottoms, tree plantations and woodland rides. Contains 80% grass and 20% wild flower mixture.

Wild Flowers Native Species: Bedstraw Hedge, Buttercup Meadow, Campion Red, Campion White, Cowslip, Foxglove, Knapweed Common, Knapweed Greater, Mullein Great, Musk Mallow, Mustard Garlic, Oxeye Daisy, Selfheal, St John's Wort Common, Teasel, Upright Hedge-parsley, Vetch Common, Wild Angelica, Woundwort Hedge, Yarrow.

Grass Species: Browntop Bent, Chewings Fescue, Creeping Red Fescue Slender, Crested Dog's Tail, Golden Oat Grass, Sheep's Fescue, Small Cat's-tail, Smooth-stalked Meadow Grass.

5g packet [WF81019] £2.20

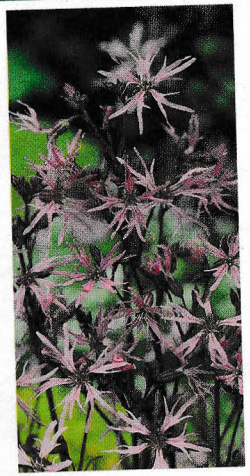

Suffolk Herbs have been involved with many projects in re-addressing the demise of wild flowers. We have supplied seed to projects such as reseeding road verges, factory site planting, country parks and conservation areas.

Try these Suffolk Herb plants to attract wildlife into your garden

Lavender

GENERAL TERMS AND CONDITIONS

PRICES All prices in this catalogue will remain in force until 31st August 2025 and include V.A.T. where appropriate. We reserve the right to revise these prices in the event of matters outside our control.

CARRIAGE Orders for delivery to mainland England, Wales and the Scottish Lowlands please add £3.75 towards postage and packing if the order contains fruit, potatoes and plants, **otherwise just add £1.95 BUT for items to post code areas: AB31-38 /40-56, HS, FK17-21, IM, IV, KA27-28, KW1-17, KW44, PA20-38/40-49/60-78, PH4-44/49-50, ZE, and the Isle of Wight and foreign countries please telephone for a quotation.**

PAYMENT Payment is taken immediately if ordering from the website. We accept payment by debit card and BACS. Please quote number, start date, expiry date, issue number (if applicable) and full name as shown on card with the last three digits of your security code located on the signature strip.

We also accept cheques which should be made payable to Kings Seeds and should accompany your order.

SUBSTITUTES We will endeavour wherever possible to supply all items as listed in this catalogue. Should circumstances prevent us from doing this, occasionally crop failures or shortages do occur and as a result we will send you the best possible alternative or a refund/credit if there is no available alternative.

DELIVERY Normally orders are dispatched within one week of receipt. During the spring rush, please be patient, orders are dispatched in strict rotation. Occasionally orders are held for completion when awaiting new stocks of seed.

PLEASE NOTE Orders containing questions and queries are held back to be dealt with in a slack moment. To avoid delay send queries by separate letter enclosing s.a.e. - thank you.

SPECIAL TERMS Special terms are available for gardening clubs and societies.

OVERSEAS ORDERS Payment will be accepted in sterling by cash, cheque, Visa, MasterCard or Maestro.

Please add postage for all overseas orders, please phone for a quotation.

CONDITIONS OF SALE Please read this before placing an order. The descriptions in this catalogue relating to species, varieties and their characteristics and information given regarding fitness for any particular purpose, including consumption, are given for general guidance only. We believe our seeds are true to name and disease free. However, in accordance with the custom of the seed trade, we give no warranty, expressed or implied as to the productiveness or description of any seeds. We cannot be held responsible for the resulting crop or any consequential loss involved. We will in no case be liable for more than the cost of goods supplied. All seeds supplied by us are for the specific use of gardeners and are not intended for commercial production unless otherwise stated.

LATENT DEFECT OR PATHOGEN Plant diseases can be transmitted by wind, insects, animals or human agencies and may be seed or soil borne. We believe goods sold to be free from latent defect but we do not guarantee this and we will not be responsible in any way for the resultant crop. Seed is supplied at horticultural standards, we do not warrant that seeds are free from human pathogens, and growers using it in high risk food production operations such as sprouted seeds or microgreens are advised to take suitable precautions.

OUR 2026 CATALOGUE If you order from us this year you will automatically be sent our new catalogue in October. Continue using your current catalogue until you receive your new one.
